

the art and science of smart patch testing™

PA468: Quinidine sulphate

Patient Information

Your patch test result indicates that you have a contact allergy to quinidine sulphate. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is quinidine sulphate found?

Quinidine sulphate is an antiarrhythmic. It depresses excitability, conduction velocity, and contractility of most cardiac tissues.

How can you avoid contact with quinidine sulphate?

Avoid products that list any of the following names in the ingredients:

- | | |
|--|-----------------------------------|
| ■ (9S)-6'-Methoxycinchonan-9-ol sulfate (2:1) (salt) | ■ Quinidate |
| ■ Auriquin | ■ Quinidex |
| ■ Chinidine sulfate | ■ Quinidine monosulfate |
| ■ Cin-Quin | ■ Quinidine sulfate |
| ■ Cinchonan-9-ol, 6'-methoxy-, (9S)-, sulfate (2:1) (salt) | ■ Quinidine sulfate (salt) |
| ■ EINECS 200-046-3 | ■ Quinidine sulfate, (2:1) (salt) |
| ■ HSDB 5515 | ■ Quinidine sulphate |
| ■ Kinichron | ■ Quinitex |
| ■ NSC 10004 | ■ Quinora |
| ■ Quinicardine | ■ Systodin |
| | ■ sk-Quinidine sulfate |

What are some products that may contain quinidine sulphate?

Heart Medications

*For additional information about products that might contain **quinidine sulphate**, go to the Household Product Database online (<http://householdproducts.nlm.nih.gov>) at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
