

RGB Color Reference

The red, green, blue (RGB) colors can be used to specify colors in your HTML source and can be used in the colors settings in the Web tailoring|Advanced settings dialog. The string literals in this table are recognized by some browsers, but others may not support string names for colors. It is safer (although less convenient) to use the RGB color values instead. The following red, green, and blue values are in hexadecimal.

Color name	Red	Green	Blue	Color
aliceblue	F0	F8	FF	
antiquewhite	FA	EB	D7	
aqua	00	FF	FF
