

# CIS-WAP

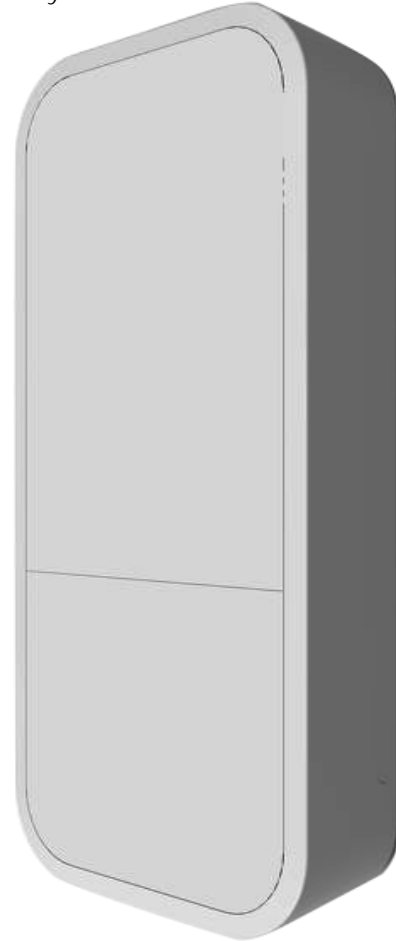

The CIS-WAP is a small **weatherproof** wireless access point for your mobile devices, perfect for installation inside or outside your house, in the garden, on your porch or anywhere else where you need wireless access from your phone or computer.

The device has 10/100 Ethernet port. **It looks unobtrusive and sleek.**

Have a CIS Router? Simply plug it into port 10 and eliminate the need for the POE injector.

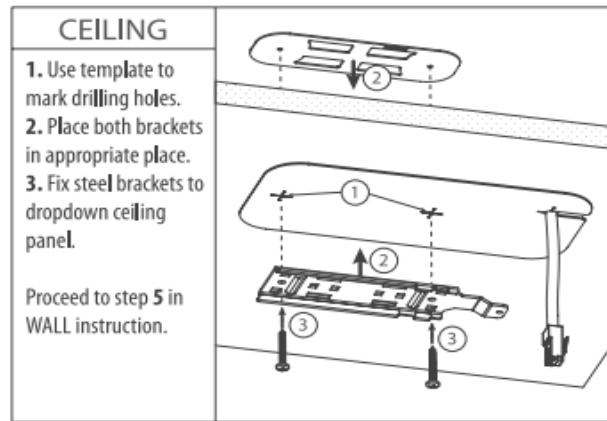

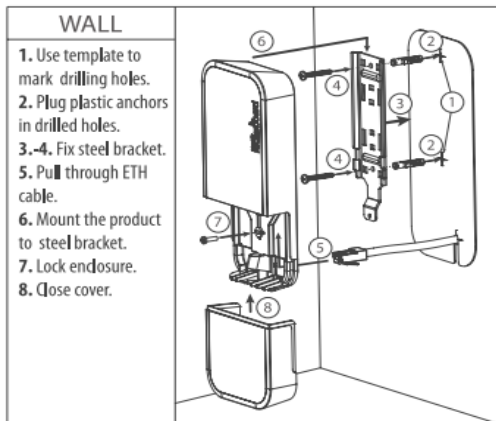

The CIS-WAP is weatherproof and can be fixed to any external wall from the inside of the case - so that it is securely attached to **it's mounting location. The bottom door can** also be secured with a special **crew**, which can only be opened by the integration professionals.

It is also possible to run the Ethernet cable directly behind the unit, to inside the wall, as there is a special opening on the back of the **case. This way, the unit doesn't attract** attention and blends into any environment

## Included Accessories

- 24Volt 0.8A power adaptor
- Gigabit PoE injector

# Specifications

Product code	CIS-WAP
CPU nominal frequency	650 MHz
Size of RAM	64 MB
Storage type	Flash
Flash size	16 MB
10/100 Ethernet ports	1
Wireless	2.4 GHz 802.11b/g/n
Chains	Dual-chain
Antenna gain	2 dBi
Antenna beam width	360°
PoE in	Yes
Supported input voltage	11 V - 57 V (802.3af/at with shielding not connected to GND pins, passive PoE)
Dimensions	185 x 85 x 30 mm
Max Power consumption	4 W

## Wireless specifications

2.4 GHz	Tx (dBm)	Rx (dBm)
1MBit/s	22	-96
11MBit/s	22	-89
6MBit/s	20	-93
54MBit/s	18	-74
MCS0	20	-93
MCS7	16	-71
