Stand-Alone Control Solutions: Easy Install & Commissioning

PRESENTED BY SEAN LAFFERTY & SHAWN STEFANYAK

STEINEL: The inventors' company

We think outside the box and

Scrutinize things that are taken for granted

Providing value-added features and functions without the additional cost.

With technology invention in our veins, we think without restrictions and turn discoveries into intelligent products that meet the most exacting of demands.

Digital Done Better:

Smarter Solution

My No Front End Needed

Easy to Install

STEINEL Digital Control Solution™

Easy to Install. Easy to Program.

DCS™ answers the demand for a COST-EFFECTIVE digital controller that MAXIMIZES energy savings.

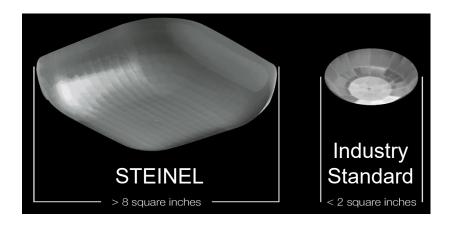

Everything you need, code-compliant out of the box.

- Digital bus for sensors, switches, photo cells
- Wireless programming
- Predefined (out of the box) & custom use case generation
- Preset or custom scenes
- 3 independent 20A relays
- Current monitoring per relay
- 3 independent 0-10v dimming zones
- Receptacle control
- Multi-zone daylighting
- Min. & max. dimming levels
- Hold off / Force off photo sensor functions
- Partial on & off
- Demand response
- Astronomic and time clock functions
- Wireless BLE mesh interconnectivity
- BMS integration via BACnet * DCS Connect

Control Pro Series

IR Quattro HD

- 4800 Detection Zones
- 4,200 sq. ft. of coverage
- Square Coverage pattern (vs. common round)
- Mechanically adjustable range
- Built-in Photocell

US Hallway

DT Quattro

- Features extra long 65' x 6.5' detection range, prevents motion detection from adjacent rooms
- Built-in Photocell
- 40kHz frequency, furthest above human hearing
- Square Coverage pattern (vs. common round)
- Built-in Photocell
- 530 switching zones
- · PIR and US options available

Wall Sensors

Wall Switches

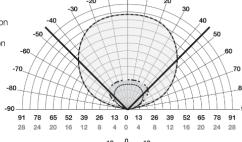

- IR / DT / PIR options available
- Available in 1 button, 2 Button or 0-10V dimming
- Built-in Photocell for Hold off / force off function
- Available in Gray, Black, White and Light Almond
- Custom designed rubber PIR lens
- Communication wire allows for 3-way dimming, as opposed to standard "master / auxiliary" setup

Coverage

Shown coverage diagram at 9 ft mounting height. Ultrasonic signal can be increased by hard surfaces and decreased by soft surfaces.

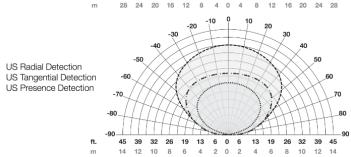

CM Sensors

- IR / DT / PIR options available.
- IR detection up to 82 feet tangential coverage
- Built in Photocell

Where's the benefit?

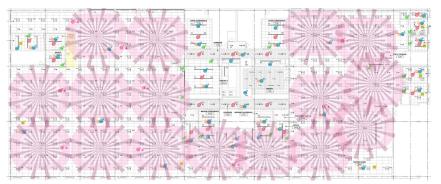

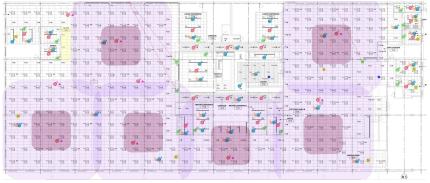

Larger Sensor, Square Coverage Pattern

Larger Coverage Pattern:

- STEINEL saves you money
- Larger Coverage Pattern = Less sensors required = Less wiring required = Less Labor = SAVING MONEY

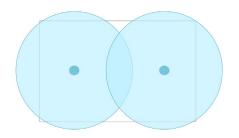

Issue: Overlap needed due to large space, 16 sensors total

6 Sensors used, less than half the sensors

Square Coverage Pattern:

- STEINEL's square coverage pattern allows the capability to fill a complete room, which are normally square/rectangular shaped, not round
- With 2 round sensors, there is both significant overlap (causing the need for extra sensors) and an abnormal shaped pattern in comparison to the shape of a room

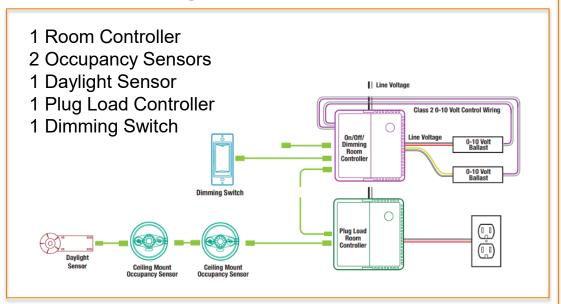

When to Use Stand-Alone

Stand-Alone Solution:

- Has benefits of standard room controller, at significantly reduced cost, use when you want many of the digital capabilities, but a smaller budget
- Less Components (20-30%) required on most projects when using stand-alone solutions
- CODE COMPLIANT FOR HALF THE PRICE

Competitor's Digital Solution

STEINEL STAND-ALONE SOLUTION

- 1 Dimming Switch
- 3 Power Packs
- 2 Control Pro Dim24 sensors with built-in Photocell

DIM-24 (2)

TR 200 (3)

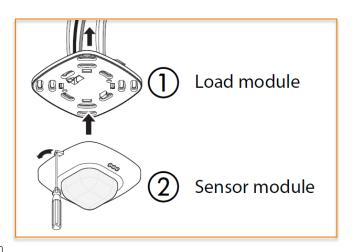

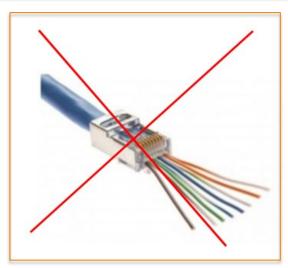

Easy to Install & Commission

steinel

Easy Install:

- 18/3 wire can be used in most installs.
- No terminating Category Cables (16 chances to mess up).
- No need to hire / wait for someone to come out and commissioning (which also means NO COMMISSIONING FEE).
- 2 ways to set up sensors (Dip switches and Smart Phone IR device).
- No losing Installation instructions. All wiring diagrams are on our sensors and power packs.
- Same wired sensors (IE Com1 to Com1) can be replaced without re-wiring!

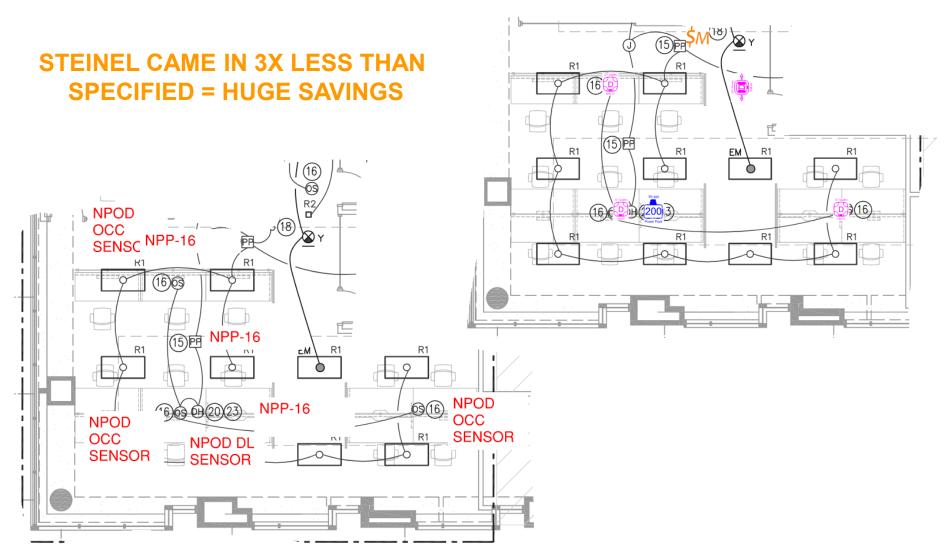

Easy Commission:

Project: Office Application

steinel

Project: Corridor Application

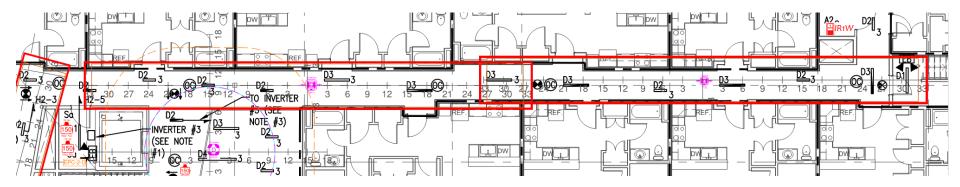

STEINEL SOLUTION:

- Occupancy sensors provide partial OFF to 25%
- All sensors to be set to automatic ON
- Power pack with mechanical latch provides fail-safe operation

Product	Description	
US Hallway DIM-24	Ultrasonic occupancy sensor w/ 0-10v dimming	
TR 250	Power Pack	

Total number of specified Sensors: 13

STEINEL SENSORS: 5

STEINEL Solutions Advantages

- 1. Place Order by 1 pm CST for **Same Day Shipping**
- 2. Quick Quote and **FREE Layouts**, 24-48 Hours
- 3. Significant **Cost Savings** on Digital Replacement
- 4. Wire Diagrams on the Sensors
- 5. Sensors Can Be Changed in field with No Re-wiring Required
- 6. No Waiting, **Easy and Fast Commissioning**
- 7. Out-of-the-Box Functionality
- 8. Photocells included in Control Pro Series (True Daylight Harvesting with Dim24)
- 9. Larger Coverage Pattern = Less Sensors Required = Less Wiring = Less Labor = **SAVINGS**
