Collaborate with Swiss Biotech

Switzerland enjoys a great biotech ecosystem populated with leading academic institutions and hospitals, and a diverse talent pool of experienced pharma and biotech scientists and executives. This nurtures and supports many successful start-ups and established biotech companies. As of the beginning of 2021, the Swiss biotech hub comprises more than 1,000 biotech companies, creating more than 50,000 high-quality jobs.

The Swiss Biotech Association supports this industry and its members by:

- ▶ developing favorable and competitive framework conditions
- ▶ attracting talent and financial resources
- ▶ fostering networking through strategic national and international partnerships
- ▶ promoting the industry's accomplishments and contributions

The 2021 edition of the Swiss Biotech Directory supports all of these objectives. By providing an overview of the Swiss biotech stakeholders, we offer insight, facilitate access to Swiss biotech companies, and aim at fostering international collaborations. At the same time, this directory will serve as a valuable summary for international talent, biotech investors and pharma partners interested in learning more about the Swiss biotech ecosystem.

The Swiss Biotech Directory is constantly updated and enlarged. It is available online at swissbiotech.org/companies. We encourage you to provide us with feedback as to what you find useful and what we might add, improve or update. Promoting the directory by linking to it from your digital channels or referring to it in your publications is highly appreciated.

Sincerely yours,

Dominik Escher
President

Michael Altorfer
CEO

The Swiss Biotech Directory

The Swiss Biotech Association has been publishing the most comprehensive compendium of the Swiss biotech industry for ten years.

Based on the digital version, it provides a yearly, handy overview of Swiss companies active in biotechnology and related fields.

It supports the promotion and networking of the industry, is distributed by direct mail, at national and international biotech conferences, exhibitions & events, to interested parties, and to our members and partners.

Biotech companies are invited to update their data for free and value an inclusion in the directory as part of their marketing efforts.

Members of the Swiss Biotech Association are entitled to present more information than non-members, and benefit from attractive additional promotion opportunities. Have a look at [swissbiotech.org/welcome](https://www.swissbiotech.org/welcome).

The digital Swiss Biotech Directory

The screenshot displays the digital Swiss Biotech Directory website. On the left, there is a search bar with the text "SWISS BIOTECH" and a search icon. Below the search bar, there are filters for "Filter" and "Categories". A sidebar on the left lists various categories with checkboxes, including "Products", "Services", and "Platform technologies". The main content area shows a grid of company profiles, each with a header image, a company logo, and a brief description. The profiles include:

- Biologon**: Biologon is a Swiss biotech company specializing in the development of novel biological medicines.
- Biolytic AG**: Biolytic is a leading provider in different biotechnology and aims to be a leading partner for the industry.
- Bioply AG**: Bioply is a Swiss biotech company specializing in the development of novel biological medicines.
- Biotechniques AG**: Biotechniques AG is a private, 100% Swiss pharmaceutical company, leading an R&D of small molecule.
- Biotech (Swiss) SA**: Biotech has been engaged for more than 20 years in the study and development of biologics.
- Biother (Swiss) AG**: Biother (Swiss) AG is a private, 100% Swiss biotech company, manufacturing some of the most advanced biologics in the world.
- Blact AG**: Blact is a leading manufacturer of health systems, plus parts and related services in the field of laboratory equipment & devices.
- Biolabium Laboratories AG**: Biolabium designs, develops, manufactures and sells advanced scientific medical diagnostic.
- CGR**: CGR offers in-vitro technologies, unique single-use devices for cell line handling of CDMO sites.
- Colgate Biotech SA**: Colgate Biotech, a precision stage unit of our Biotech SA, combines therapeutic antibodies.
- Cancer Research and Biotechnology AG**: Many years target the cancer therapy by increasing the immune system. The cell based of cells.

World-leading biotech hub

- ▶ Attractive and reliable framework conditions
- ▶ Stable political environment
- ▶ Strong intellectual property protection
- ▶ Renowned universities
- ▶ Highly-qualified workforce
- ▶ Excellent R&D infrastructure
- ▶ Beneficial funding environment
- ▶ Superb quality of life

A vibrant, densely populated and comprehensive biotech hub

The Swiss Biotech Directory lists more than 1,000 companies, reflecting both the rapid growth, as well as the diversity of this economic sector. The Swiss biotech industry has built one of the most densely populated and comprehensive biotech ecosystems worldwide.

Highly specialized clinical research organizations, manufacturers, suppliers and technical consultants complement, support, and advice biotech companies which focus on the development of their proprietary product pipelines.

Many of the globally leading CROs and suppliers have selected Switzerland as their international headquarter, and Swiss biotech companies

benefit from the proximity of Roche and Novartis and numerous international pharma companies. Increasingly, international companies select Switzerland as their hub for the production of highly complex biologics, peptides and cell products. International investors and industry specialists alike, value the numerous advantages Switzerland offers.

Qualified workforce and high quality of life

The World Economic Forum's Global Innovation Index, the IMD's World Competitiveness Ranking 2020, and the Heritage Foundation's Index of Economic Freedom are widely regarded as impartial and useful publications that compare the competitiveness of countries around the globe.

Consistently, Switzerland is listed as one of the leading countries with regard to its education system, innovation power, political stability, quality of workforce, public services, and infrastructure, as well as its global trade networks and strong financial markets.

However, two factors typically stand out where Switzerland is right at the top of the league:

- ▶ highest attractiveness to highly skilled workforce
- ▶ best quality of life

If you are interested in learning more about the development and competitiveness of the Swiss biotech industry, we like to refer you to the annual Swiss Biotech Report at swissbiotech.org/report.

Swiss biotech industry: Development, trends, innovations

The Swiss Biotech Report 2021 sheds light on the most important trends, factors and sources of innovation, and summarizes the development of the Swiss biotech industry. Check it out at swissbiotech.org/report

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Swiss Biotech Success Stories demonstrate the power and potential of the industry

The Swiss Biotech Success Stories Awards recognize valuable accomplishments and honor those who have made important and sustainable contributions to the biotech industry in Switzerland. The awards are presented each year at the Swiss Biotech Day and reflect the diversity and achievements of this innovative sector.

Switzerland is one of the world's leading biotech hubs and attracts many foreign companies, specialists and investors. It provides over 50,000 jobs and, together with the pharmaceutical and chemical industries, accounts for almost half of Swiss exports.

To make the industry's impact more visible, the Swiss Biotech Success Stories initiative was launched in 2018. Selected success stories are showcased to illustrate how Swiss biotech companies help patients, improve health care worldwide, and make a valuable and significant contribution to the Swiss and global economy.

Laureates are individuals or groups who have earned extraordinary merits. Success is broadly defined as scientific, translational,

medical or commercial, together with other aspects that have a positive impact on the biotech and life science industry and society in Switzerland.

"It is essential to share with the public the importance and success factors of biotech companies and ensure that decision-makers understand what it takes for the industry to develop and remain competitive," says Michael Altorfer, CEO of the Swiss Biotech Association. "Young talent should be inspired and motivated to take a closer look at the great variety of career profiles in biotech."

12 success categories

- ▶ Completed achievement with lasting impact
- ▶ Scientific breakthrough
- ▶ New technology
- ▶ Strong impact on society
- ▶ Product approval and sustainable revenues
- ▶ Important IP, innovative deal-making, acquisition
- ▶ Involvement of one or more Swiss citizens
- ▶ Swiss-based company / institution
- ▶ Creation of jobs in Switzerland
- ▶ Other aspect with a direct link to Switzerland
- ▶ Enabler for the biotech industry
- ▶ Swissness: Think global, made in Switzerland

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Open up your network

To ensure that the Swiss Biotech Success Stories will be visible around the globe in many locations, media and events, help us with your network and distribution power.

Let us know if you have contacts in your network who could benefit from the insight into Swiss Biotech Success Stories, and are curious to learn more about the stunning accomplishments of entrepreneurs in this competitive industry.

Interested parties could be: Your customers, suppliers, partners, a journalist, an investor, your company's communication unit, your follower base on social media, your favorite politician, an event platform dedicated to life science, your rotary club colleagues or any other possibility, that could help to promote these success stories.

Share with us your suggestions for spreading the word by e-mail to success@swissbiotech.org or use the QR code to get to our online form.

New date!

SWISS BIOTECH DAY

7 Sep 2021
Congress Center Basel

The Swiss Biotech Day has become one of the leading biotechnology conferences in Europe and is a fixed date in the community's calendar. While the event could not take place in 2020 due to the worldwide COVID-19 pandemic, we plan to bring the Swiss Biotech Day back on stage on 7 September 2021. We would love to meet you all in person again.

What you can expect:

- › Meet senior experts from the life science industry from across Europe
- › Exhibition throughout the day
- › Delegations from various regions
- › Swiss Biotech Success Stories Awards
- › Innovative biotech start-ups and medium-sized biotech companies
- › Thematically focused panel discussions
- › Pre-scheduled one-to-one partnering meetings

Sign in on our website at
www.swissbiotechday.ch
and we will inform you about any news.

BIOCOM.™

SWISS BIOTECH SUCCESS STORIES

Award winners 2019

- ▶ Headquartered in Zug, Biogen has been a key stimulus and model for the biotech industry. Its best-selling drug for multiple sclerosis or its Alzheimer's candidate, as well as the new production facilities in Luterbach, creating 600 new jobs, are proof of Biogen's success.

- ▶ The Schlieren-based company is an integral part of Roche Pharmaceutical Research and Early Development since 2005, and a pioneer in antibody engineering in cancer immunotherapy. Its antibody glycosylation technology increases immune-mediated cancer cell killing and builds the basis for improved cancer medicines.

- ▶ Fully integrated into GlaxoSmithKline since 2013, Okairos from Basel developed innovative T-cell based vaccines for major infectious diseases such as malaria, hepatitis C, HIV, and Ebola. Its novel replication-incompetent adenovirus vectors could enable the development of important new vaccines and offer immunizations against illnesses that lack vaccines.

- ▶ The advanced technologies in protein expression by Selexis provide biotech and pharmaceutical companies a rapid, stable, and cost-effective solution for the production of recombinant proteins. Nearly a hundred drug candidates in clinical development and three commercial products utilize the technologies of the Plan-les-Quates-based company.

- ▶ This transformational joint venture provides Vifor Pharma direct access to dialysis patients, facilitating the product distribution and recruitment for clinical development. It transformed the company from Glattbrugg rapidly into a global nephrology corporation. Such vertical integration is a role model for the convergence of different life science sectors.

Award winners 2020

- ▶ Headquartered in Allschwil, Actelion is part of the Johnson & Johnson Family of Companies. Its ground-breaking research and medicines have been a key contributor to improve the lives of people affected by pulmonary hypertension, and made Actelion an industry leader in this area.

- ▶ Family-owned Debiopharm from Lausanne, identifies high-potential compounds in oncology and for the treatment of bacterial infections. They are tested in clinical development and licensed to business partners globally. Over a million patients benefit from their therapies every year.

- ▶ Helsinn, an important employer in Ticino, has a broad portfolio of marketed cancer care products and a deep development pipeline. It has built significant R&D and manufacturing capacities, also advances patient care and supports healthcare innovation with its investment fund.

- ▶ The trio of foundations has been supporting biotech startups with great success for more than 10 years, thereby making a significant contribution to the growth of the Swiss biotech industry. They share the nomination for the Swiss Biotech Success Stories Award.

Werner Arber

- ▶ Werner Arber, Swiss microbiologist and geneticist, won the 1978 Nobel Prize in Physiology or Medicine for his discovery of restriction endonucleases. His groundbreaking research in the field of molecular genetics was instrumental in the development of biotechnology.

SWISS BIOTECH SUCCESS STORIES

Award winner 2021

BACHEM

Bachem is a leading, innovation-driven company specializing in the development and manufacture of peptides and oligonucleotides.

With 50 years of experience and expertise Bachem provides products for research, clinical development and commercial application to pharmaceutical and biotechnology companies worldwide and offers a comprehensive range of services.

Bachem operates internationally with headquarters in Switzerland and locations in Europe, the US and Asia. At the end of 2020, more than 1,000 people were working in Switzerland at Bachem AG sites in Bubendorf and Vionnaz, which is an increase of more than 50% during the last five years.

The company is listed on the SIX Swiss Exchange.
For further information, see www.bachem.com.

Knowledge

- ▶ Founded in 1971, as Bachem Feinchemikalien AG in Liestal near Basel with the focus on amino acid and peptide synthesis.
- ▶ Public company since 1998 (Swiss stock exchange).
- ▶ 4 cGMP facilities in Switzerland and the U.S.
- ▶ Capacity to produce peptide or oligonucleotide APIs from gram scale up to annual quantities of hundreds of kilograms and small molecules APIs up to hundreds of tons.

Success Categories

- ★ Completed achievement with lasting impact
- ★ Product approval and sustainable revenues
- ★ Involvement of one or more Swiss citizens
- ★ Swiss based company / institution

The Founder

Dr. h.c. Peter Grogg
Founder and Honorary Chairman

Business Development

- ▶ Supporting pharma and biotech companies in ~ 150 NCE development projects in different clinical phases.
- ▶ Offering more than 5,500 different biologically active peptides, amino acid derivatives and biochemicals in its catalog from stock.
- ▶ Expanded the portfolio by establishing itself as a full-service provider for the development and production of oligonucleotides.
- ▶ The Green Chemistry Award bestowed on Bachem by the US Environmental Protection Agency (EPA) for a jointly developed project underscores Bachem's dedication to improving environmental aspects of production processes.
- ▶ In 2018, Bachem established a sales office in Tokyo, Japan. This new local presence in Asia will strengthen customer support and drive further business growth in the Asian market.
- ▶ The research and development building in Bubendorf, Switzerland, marks a recent milestone in the development of the Bachem Group's largest production site. Further expansion plans will be realized in the next years.
- ▶ With investment plans of 300 million CHF globally in the next five years, the Bachem Group continues to pursue its growth strategy.

- ★ Creation of jobs in Switzerland
- ★ Enabler for the biotech industry
- ★ Swissness: Think global, made in Switzerland

SWISS BIOTECH SUCCESS STORIES

Award winner 2021

Basilea Pharmaceutica is one of few biopharmaceutical companies in the world focused on the research, development and commercialization of targeted oncology small molecules and new antibiotics and antifungals.

The Basel-based company, listed since 2004 (SIX:BSLN) has successfully brought to market 2 anti-infective brands: Cresemba® (isavuconazole), for the treatment of invasive fungal infections and Zevtera®, an antibiotic for the treatment of severe hospital bacterial infections.

Knowledge

- ▶ Experienced team with proven expertise to advance compounds from research to market.
- ▶ Recognized ability to establish and manage successful partnerships in research, development and commercial phases, with the commercial partnerships providing access to key international markets.

Success Categories

- ★ Completed achievement with lasting impact
- ★ Scientific breakthrough
- ★ Strong impact on society
- ★ Product approval and sustainable revenues

- ★ Swiss based company / institution
- ★ Creation of jobs in Switzerland

SWISS BIOTECH SUCCESS STORIES

Award winner 2021

ESBATech (now ESBATech – a Novartis company) is recognized for its pioneering role of developing single-chain antibody fragments, in particular for ophthalmic indications.

ESBATech was founded in 1998 and developed a novel technology for therapeutic applications of antibody fragments. The company raised in total USD 90M venture capital in a Seed, Series A and Series B round. The Series B round of 2006 was with USD 50M one of the largest financing round at that time for a preclinical stage biotech company.

In 2009, ESBATech sold its ophthalmic business for USD 589M to Alcon, shortly thereafter Alcon was acquired by Novartis.

Knowledge

- ▶ Single-chain antibodies (scFv) were first described 1988, 32 years ago.
- ▶ At that time, due to its small size compared to an antibody, the format was regarded as highly attractive for therapeutic applications.
- ▶ Many scFvs were in preclinical development and some in clinical development.
- ▶ All failed, mainly due to stability, aggregation and manufacturing issues.
- ▶ ESBATech developed a novel technology to identify highly stable and soluble scFvs.

Success Categories

- ★ Completed achievement with lasting impact
- ★ Scientific breakthrough
- ★ New technology
- ★ Product approval and sustainable revenues

CEO

Dominik Escher
Co-founder and CEO
from 1998 to 2016

Indications

Beovu® (brolucizumab) received market approval by the FDA in October 2019 and is now also approved in Australia, Europe (EMA approval granted February 2020) and several Asian countries for the treatment of wet age-related macular degeneration.

Beovu is the first scFv to come to market.

It is also in phase 3 for diabetic eye diseases such as diabetic retinopathy.

STRUCTURE OF BEOVU® (brolucizumab)

SWISS BIOTECH SUCCESS STORIES

Award winner 2021

Lonza

Founded in 1897 in Gampel, Switzerland, Lonza is a preferred global partner to the pharma, biotech and nutrition industries.

The company works to promote a healthier world by enabling its customers to develop and manufacture medicines across modalities; from small molecules to biologics, including cell and gene therapies and mRNA. Lonza manages projects from pre-clinical stages through to commercialization, from established therapeutics to advanced personalized medicines, and its expertise covers both drug substance and drug product.

Lonza enables delivery of innovative new therapies and vaccines to the market that will combat illnesses and diseases affecting today's global population.

Knowledge

Lonza's contract development and manufacturing services portfolio is recognized for its regulatory track record, strong R&D capabilities, world class facilities in more than 30 countries, innovative technology platforms and extensive experience.

In 2019, Lonza supported more than 730 preclinical and clinical small and large molecules, more than 310 commercial small and large molecules and produced more than 200 billion capsules.

SWISS BIOTECH SUCCESS STORIES

Award winner 2021

novimmune 

Founded in 1998 by the renowned immunologist Bernard Mach, University of Geneva. Privately held company with focus on discovering and developing primarily fully human antibody-based drugs to fight autoimmune & inflammatory diseases and cancer. Headquarter in Plan-les-Ouates, Geneva and in December 2016 opening of Branch Office in Basel. Since its inception, the company successfully created 16 mono- and bi-specific human antibodies. The company has grown from 0 to 160 employees (22 nationalities), highly skilled in discovery, preclinical research & manufacturing and clinical research between 1999 and 2019. In 2019 NovImmune has successfully divested EmaCo AG, a newly established company owning emapalumab (the anti-IFN γ monoclonal antibody, Gamifant[®]) and related assets to SOBI. NovImmune SA continues to operate and focus on its bi-specific technology and associated programs and has rebranded as “Light Chain Bioscience – A brand of Novimmune SA”.

LIGHT CHAIN
BIOSCIENCE

Technology

Novimmune has developed a proprietary next-generation drug platform for the creation of monoclonal and bi-specific antibodies.

Three different monoclonal antibody technologies in-house: Diversity Trap, UltiMab and Humanization.

With $\kappa\lambda$ -body, Novimmune generated unmodified, fully human antibodies with two separate and unique antigen binding regions (bi-specific program).

Knowledge

These antibodies allow for the inhibition of multiple disease targets.

A mouse model (Cincinnati Children's Hospital, Ohio) for primary Hemophagocytic LymphoHistiocytosis (HLH) demonstrated that only by blocking IFN γ the test mice showed significant survival benefit in contrast to blocking other cytokines.

Success Categories

Indication

- ▶ Having a fully human anti-IFN γ monoclonal antibody in house, emapalumab, Novimmune decided to focus on developing it as a treatment for both primary and secondary Haemophagocytic LymphoHistiocytosis (HLH).
- ▶ Prior to the development of emapalumab, no drug was ever studied specifically for the treatment of HLH, and no drug was approved by regulatory authorities.
- ▶ HLH occurs as a familial autosomal recessive disorder (ie, primary HLH) or as an acquired, reactive condition (ie, secondary HLH).
- ▶ Primary HLH is an ultrarare disease which occurs mostly in infants and early childhood, with the disease manifesting in most patients between 1 and 6 months of age.
- ▶ It is invariably fatal with a median survival without treatment of less than 2 months. Conventional therapy foresees the use of immuno-chemotherapy, despite this mortality remains high (approx. 40%).
- ▶ HLH signs and symptoms and their different severities combine to form a broad spectrum of disease presentation that varies from patient to patient.
- ▶ Development efforts led to the approval of emapalumab by the FDA (November 2018) for the treatment of adult and pediatric (newborn and older) patients with primary HLH with refractory, recurrent or progressive disease or intolerance with conventional HLH therapy. The regulatory process for the approval of HLH in Europe and Switzerland is ongoing.
- ▶ Disease with IFN γ signature: the development of emapalumab in other diseases characterized by the presence of an IFN γ signature are being explored.

Awards

- ▶ Winner of the European Biotechnica Award 2009.
- ▶ EU Commission awards a EUR 6 Mio FP7 grant to support clinical development of emapalumab in primary and secondary HLH (FIGHT HLH program).
- ▶ Orphan Drug Designation US and EU.
- ▶ Breakthrough designation and PRIME designation granted by FDA and EMA, respectively.
- ▶ Priority Review Voucher.
- ▶ SOBI and Novimmune selected as Honourees for 2019 National Organization for Rare Disorders (NORD) Rare Impact Award in Industry Innovation for Gamifant[®] (emapalumab).

The Swiss Biotech Association

Founded in 1998, the Swiss Biotech Association represents the interests of the Swiss biotech industry. To support its members in a competitive market, the Swiss Biotech Association works to secure favorable framework conditions and facilitate access

to talents, novel technologies and financial resources. To strengthen and promote the Swiss biotech industry, the Swiss Biotech Association collaborates with numerous partners and life science clusters globally under the brand Swiss Biotech™.

Our mission

The Swiss Biotech Association is a non-profit, member-driven organization representing the interests of the Swiss biotech industry. Swiss biotech companies are leading the way in developing and commercializing innovative medicines, diagnostics, health-care treatments, services and enabling technologies.

Our core objective is to ensure that the value generated by the Swiss biotech industry continues to grow and that the industry contributes to the well-being of the socio-economic ecosystem thereby enabling Switzerland to be a key player at the forefront of bioscience innovation. To this end, the Swiss Biotech Association is dedicated to supporting Swiss biotech companies through the following:

Developing favorable and competitive framework conditions

- ▶ Creating awareness of the biotech industry's needs and interests with policy makers
- ▶ Advocating a competitive tax system alongside lean and pragmatic regulations
- ▶ Fostering life science education, technology transfer and intellectual property

Attracting talent, know-how and financial resources to drive innovation and growth

- ▶ Promoting and facilitating access to funding opportunities
- ▶ Connecting investors and attractive biotech investment opportunities
- ▶ Facilitating access to national and international talent

Fostering networking through strategic, national and international partnerships

- ▶ Connecting industry stakeholders and life science clusters
- ▶ Organizing and co-promoting national and international life science events
- ▶ Providing access to privileged information through industry platforms and working groups

Promoting the accomplishments of the Swiss biotech industry

- ▶ Disseminating the value-creation of Swiss biotech companies
- ▶ Visualizing the diversity and competitiveness of Swiss biotech companies
- ▶ Presenting innovative products and technologies and their contribution to quality of life

SWISS BIOTECH™

- Broaden your network, meet peers and investors
- Increase your impact and visibility
- Secure significant cost savings
- Capture new business and attract talent
- Unite with fellow members to strengthen the Swiss biotech hub

Araris Biotech AG

Private company, founded 2019

Member Swiss Biotech Association

Araris Biotech AG is a spin-off company from the Paul Scherrer Institute (PSI) and ETH Zurich focusing on the commercialization of a novel antibody-drug conjugate (ADC)-linker technology. Araris' innovative platform allows for the attachment of any payload to 'off the shelf' antibodies without the need of prior antibody engineering in one-step. The resulting ADCs have a well-defined drug-to-antibody ratio, are stable and monomeric. All these favorable properties contribute to the high efficacy, stability and low level of toxicity observed so far. In summary, the straightforward drug conjugation, versatility of the technology and high in vivo efficacy enable the generation of ADC compounds for the treatment of patients with a high unmet medical need. For more information, please visit www.ararisbiotech.com.

Cyxone Switzerland AG

Private company, founded 2019

Member Swiss Biotech Association

Cyxone develops novel drugs to improve quality of life for patients suffering from autoimmune diseases.

Cyxone AB is a clinical biotech company with a portfolio of immunomodulating drugs for the treatment of autoimmune diseases such as multiple sclerosis (MS) and rheumatoid arthritis (RA). The company's drug portfolio is based on two technological pillars in the form of oral molecules and cyclotide-based drugs that inhibit key processes in the body's cells that are typically associated with various immune-related disorders. **Products, services, technology.**

Cyxone's technologies have the potential to address an unmet need to develop new effective and safe medicines that can improve the quality of life for patients affected by autoimmune diseases. The company's development portfolio comprises Rabeximod in a clinical phase II program for RA and T20K that has successfully completed phase I infusion study for MS.

iOnectura, headquartered in Geneva, Switzerland, was founded in June 2017 as a spin out from Merck KGaA, funded by Merck Ventures. It is a clinical stage biotechnology company developing

a pipeline of next generation, best-in-class molecules for the treatment of cancer and fibrosis.

Key business: Production (of own products), R&D

Core competencies: Therapeutics/vaccines (human)

Products, services, technology

IOA-244: a next generation PI3K δ inhibitor.

IOA-289: a novel autotaxin (ATX) inhibitor.

iOncutra also has an early pipeline of antibody candidates.

Neurimmune AG

Private company, founded 2006

Member Swiss Biotech Association

Neurimmune is a biopharmaceutical company translating human immune memory into transformative antibody therapeutics. Neurimmune discovered aducanumab together with a team of researchers at the University of Zurich and licensed it to Biogen. Aducanumab is a human monoclonal antibody against beta amyloid in development for the treatment of early Alzheimer's disease. Based on large Phase 3 study results, Biogen decided to proceed with regulatory filings for approval. Besides aducanumab, Neurimmune discovered with its Reverse Translational Medicine technology cinpanemab for

Parkinson's disease, the anti-tau antibody B1B076 for Alzheimer's disease, the anti-miSOD1 antibody AP-101 for ALS and the anti-ATTR antibody N1006 for cardiomyopathy, these programs are currently evaluated in clinical trials.

New Branch Office Berlin

YOUR CRO: FLEXIBLE EXPERTS AND RELIABLE SOLUTIONS.

- ▶ Customized conduct of clinical trials for biotech and medical device companies
- ▶ Highest quality standards, accompanied by frequent and clear communication
- ▶ Combined know-how in all major indications through our 175+ in-house experts in Europe

fgk-cro.com

▶ **FGK Clinical Research GmbH** is a Europe-based full service CRO providing small to mid-sized biotechnology, pharmaceutical and medical device companies with a full range of clinical development services. Since our foundation in 2002, we have performed a large number of international studies in all clinical phases. With efficient processes and flat hierarchies, we can guarantee the sponsor a personal service throughout a project and beyond.

Owned and managed by:

Dipl.-Stat. Martin Krauss
+49 89 893 119-25
martin.krauss@fgk-cro.com

Dr. med. Edgar J. Fenzl

Advanced Cell Culture Solutions

for research and
industrial applications.

We are your partner for:

- Fully defined mammalian Cell Culture Media
- Custom-made liquid and powder solutions for pharmaceutical use
- Classical Cell Culture Media
