List of contents

Roinn na Gaeilge, Col. na Tríonóide (TCD)

The arrangement of the information in the entries below is as follows: number of poem in this book/number of poem in Bardic Database on DIAS website (unless the number is followed immediately by a letter, in which case it is not in the Database), *first line of poem*, classification of subject-matter of poem, often including the name of the addressee and an indication of his or her obit or floruit, name of poet {in curly brackets if the ascription is from a manuscript source other than the one used in this book}, century if date not already given (this is not always included), [manuscript source], page in this book. The arrangement is alphabetic except in the case of the poems in *Droighneach* metre which, owing to the length of the line, have been placed at the end of the book. These would have been numbered 42, 154, 201, 228, 272 and 288 alphabetically.

For a complete list of all poems sourced for the Database see the file DATABASE-INDEX
