**Branch Creek™**  
Grow. Greener.

**Paleo** is a blend of Humic, Fulvic and Ulmic acid that acts as an organic chelator and microbial stimulator. It has a unique carbon matrix which includes a high concentration of trace minerals and organic acids. Humic acid enhances the plant's ability to take in essential nutrients and improves soil structure.

#### Humic Acid Benefits

- Increases soil carbon
- Improves plant health
- Improves germination and viability of seeds
- Chelates macro and micro nutrients to increase availability to the plant for a longer period of time
- Increases cation exchange capacity (CEC)
- Improves soil structure for better aeration and water movement

#### Paleo Benefits

- Humates feed the soil microbes which in turn release the nutrients such as nitrogen, phosphates and other trace elements
- **Humic acids** - enable the plants to extract nutrients from the soil
- **Ulmic acids** - stimulate and increase root formation and growth
- **Fulvic acids** - give plants strength to withstand stresses caused by pest, drought and mowing
- Acts as an organic catalyst
- Natural chelating and complexing agent to help magnify nutrient absorption

#### Turf (Golf):

- Overall: 1 Gal per Acre per month
- Program: 64 oz per Acre every 2 weeks

#### Application Rates:

##### Turf (Residential, Commercial):

- Initial Application: 3 oz. per 1,000 sq. ft. (1 Gal per Acre)
- Maintenance: 3 oz. per 1,000 sq. ft. every 2 weeks
