

## **Panasonic KX-NS700** **3<sup>rd</sup> Party SIP Phone / Panasonic KX-HDV series** **Telquest Tech Support**

This Help Sheet explains how to set up the KX-NS700 KSU to allow a 3<sup>rd</sup> Party SIP Phone to work.

**Note:**

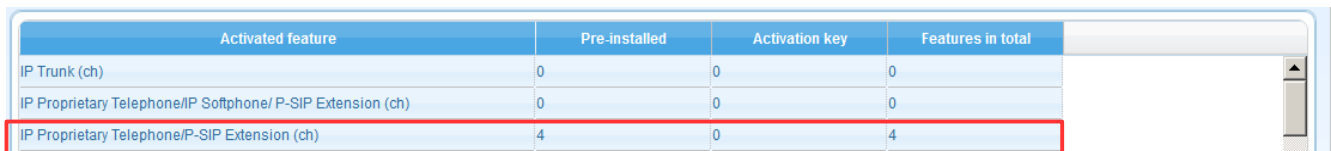

The Panasonic KX-HDV series of telephones are considered as a P-SIP Extension by the KSU.

As such, they use Panasonic P-SIP Extension Application Keys.

There is a 4 Station Application Key Pre-Installed.

If you have more than 4 P-SIP Devices in total, you will need to purchase more Activation Keys.

Speak with your Telquest salesperson for more info.

Activated feature	Pre-installed	Activation key	Features in total
IP Trunk (ch)	0	0	0
IP Proprietary Telephone/IP Softphone/ P-SIP Extension (ch)	0	0	0
IP Proprietary Telephone/P-SIP Extension (ch)	4	0	4

It is up to you to program your 3<sup>rd</sup> Party SIP Phone to work properly.

We also assume that you are a qualified Telecom Tech with Panasonic programming experience.

If you are unable to understand this Help Sheet then you will need to bring in a local person that is an experienced, qualified Panasonic technician and has an understands IT Networking.

You will need to know the following information before you can proceed.

The LAN IP Address of the NS-700 KSU

Setting up and changing the Default KSU IP Addresses is not covered in this Help Sheet.

Start the Panasonic Web Maintenance Console program and connect to the KSU.

At the bottom of the screen, Mouse Over the Virtual Slot and then click on Select Shelf.

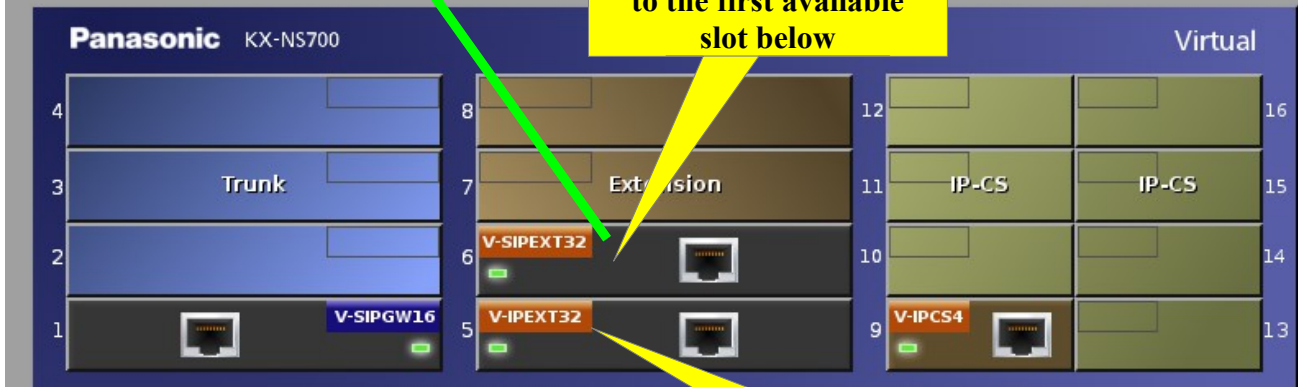

Next Screen:

2. This will appear...

1. Click here...

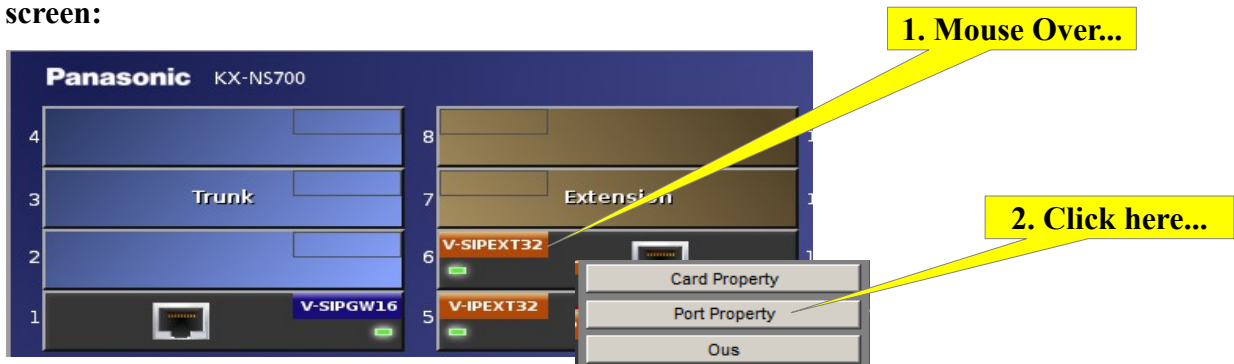

3. Click and Drag to the first available slot below

Note: This is installed by default. It allows 2 NT Type Phones to work.

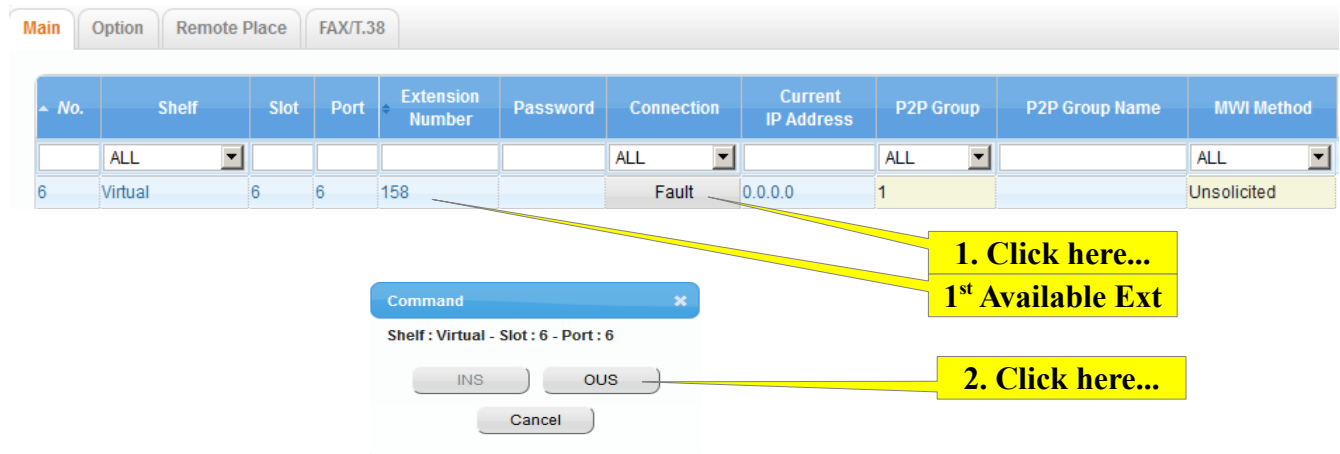

Same screen:

Next screen:

I have cut the screens down to minimize the view.

Same screen:

Be security aware.  
Do not use 1234 or anything simple.  
Use something like  
27jw947x or 53rm67jfx

1. Add a password.  
This will be the SIP Password  
used for SIP Registration  
AKA: SIP Authentication  
SIP Password

Now Out of Service

Same screen:

3. Click here...

4. Click here...

No.	Shelf	Slot	Port	Extension Number (SIP Username)	Password	Connection	SIP Phone Type	Current IP Address	MWI Method
6	Virtual	6	6	158	53rm67jfx	Fault		0.0.0.0	Unsolicited

5. It will say Fault until the phone is Registered  
It will say INS when the phone is Registered

6. Click here...

Now, go to your 3<sup>rd</sup> Party SIP Phone and program it to communicate with the KSU.

Here are the 3 basic elements for SIP Registration:

- KSU LAN IP Address
- SIP Extension Number
- SIP Password

Keep in mind that not every manufacturer uses the same words for each element.

Be prepared to be flexible.

## **Programming for Panasonic KX-HDV Series Telephones**

**You can use a web browser to program the phone.**

**Before you can access the phone, you need to do 2 things.**

**First, you must enable the phones Embedded Web Server.  
Then you need to determine the phones IP Address:**

**Note: All button functions appear in the LCD area of the phone.**

**Activate the Embedded Web Server:**

**Press the Menu button**

**Scroll down to Basic Settings**

**Press OK**

**Scroll down to Other Option**

**Press OK**

**Scroll down to Embedded Web**

**Press OK**

**Scroll and select On**

**Press OK**

**Determine the IP Address of the phone:**

**Press Back until you see the idle screen**

**Press Menu**

**Scroll down**

**Select System Settings**

**Press OK**

**Select Status**

**Press OK**

**Scroll down to IPv4 Settings**

**Press OK**

**Select IP Address**

**Press OK**

**Write down the IP Address that appears in the display**

**Press Back until you see the idle screen**

**There is an automatic Time Out for the Embedded Web Server.**

**It is about 15 minutes.**

**If it times out, you will not be able to make any changes until you activate it again.**

Open a web browser and enter the IP Address of the phone in the web browsers Address Bar and connect to the phone.

The log on info is:

ID= admin

Password= adminpass

These are the basic settings to make the phone operational.

Navigate to the area below:

The screenshot shows the Panasonic KX-HDV230 web interface. At the top, there are navigation tabs: Status, Network, System, VoIP (highlighted with a red box and callout '1. Click here...'), Telephone, and Maintenance. Below the tabs is the title 'SIP Settings [Line 1]'. On the left, there is a sidebar with 'VoIP' settings. Under 'SIP Settings', a list of lines (- Line 1 to - Line 6) is shown, with '- Line 1' highlighted by a red box and callout '2. Select Line 1...'. Below this is 'VoIP Settings' with another list of lines (- Line 1 to - Line 6). The main area is titled 'Basic' and contains a table of settings:

Phone Number	Enter the Extension Number
Registrar Server Address	Enter the KSU's IP Address
Registrar Server Port	5060 [1-65535]
Proxy Server Address	Enter the KSU's IP Address
Proxy Server Port	5060 [1-65535]
Presence Server Address	Enter the KSU's IP Address
Presence Server Port	5060 [1-65535]
Outbound Proxy Server Address	Enter the KSU's IP Address
Outbound Proxy Server Port	5060 [1-65535]
Service Domain	
Authentication ID	Enter the Extension Number
Authentication Password	.....

At the bottom of the page, there are 'Save' and 'Cancel' buttons. A red box and callout '3. Enter the password you created on Page 3...' points to the password field. Another red box and callout '4. Click here...' points to the 'Save' button.

4. Click here...
