Provisions for purchase with federal funds for contracts exceeding \$100,000

These forms are for non-construction contracts

Many TIPS members (grantees and sub-grantees) purchase goods and services with federal funds. When a member engages a contract exceeding \$100,000 and paid with federal funds, provisions are triggered by various Code of Federal Regulations requirements. Primarily 34 CFR 80.36 from the Department of Education and 7 CFR 3015 & 3016 from the Department of Agriculture for School Lunch Program. There may be other Federal programs from time to time that are not enumerated above that may fund certain projects using outside vendors. These are not optional for the contracting entity and in order to spend the federal funds certain provision and certifications must be in place to ensure legal compliance.

If your company wishes to be eligible to participate in a TIPS contract in which a member utilizes federal funds on contracts exceeding \$100,000, you must complete the following forms can provide the certifications as required on the subsequent pages.

Mobilize printing. Maximize security.

The MFP. Redefined by HP. New mobile-enabled HP LaserJet MFPs now let everyone in the office print from their tablet or smartphone with the security of a peer-to-peer connection. HP wireless direct and touch-to-print technology¹ make them easy to use, easy to manage, and keep mobile devices off your corporate network. Giving everyone freedom to print, it matters.

Make it matter.

HP MFP Mobile Printing Features

- Use optional wireless direct printing to simply discover and connect your mobile device to your MFP
- Walk up and touch-to-print—your NFC-enabled smartphone or tablet automatically discovers the printer for you

HP Color LaserJet Enterprise flow M880z+ NFC/Wireless direct MFP

- Comes standard with wireless direct and touch-to-print technology
- 3,500-sheet high-capacity input tray supports media up to size A3/11 x 17 inches

HP LaserJet Enterprise 700 color MFP M775f

- Save and print files directly at the printer with an easy-access USB port

Based on the renowned HP LaserJet technology, TROY MICR and security printing deliver the ultimate level of security for all applications. TROY offers breakthrough innovations in fraud-deterrent security, unsurpassed quality and operational controls, and flexible integration.

ARE YOU AT RISK?

Many important documents used every day are targets for fraud. Identity documents, legal contracts, education transcripts, inspection certificates, insurance documents, vehicle registrations, and titles are just a few of the documents which can be at risk for forgery.

TROY offers multiple toner options for enhancing the security of valuable printed documents. From patented Security Toner to guard against alteration to SecureUV and UV Toner to provide an easy method for authentication, TROY Solutions help guard your organization against the costs of document fraud.

TROY Security Toner

Patented anti-fraud technology forces a red stain to appear on a document if fraudulent alteration of personal information is attempted using solvents.

TROY SecureUV

Prints invisible security features which are only visible under UV light. Any combination of barcodes, text, or graphics can be printed in invisible UV at the same time as the normal black print portions of any document.

TROY UV Toner

Special UV toner available for document authentication and MICR applications. Appears as normal black print but fluoresces blue under UV verification light.

Welcome the similarity. Enjoy the difference.

The tapes are the same size but there's a world of difference between the first HP LTO-1 data cartridges and their new HP LTO-6 descendants. Capacities have soared to a massive 6.25 TB. Transfer rates are up by 1900%. Add WORM, encryption and LTF5 and today's LTO-6 cartridges are nothing short of revolutionary compared to their predecessors. But whilst these features are impressive, what matters most is the safety of your data. In that regard, HP LTO-6 cartridges share the same heritage of outstanding reliability that makes HP the most popular brand of storage media in the world. Like every generation before it, we test HP LTO-6 media to extremes to make sure you have the ultra reliable data protection your business demands. So if you're ready to evolve to LTO-6, become part of the HP family. For more information, visit hp.com/go/storagemedia.
