Getting Started

Packing List

The package contains the following parts, please check if all the items are not missed:
1. The phone station
2. The phone stand
3. Handset
4. Headset cord
5. Power adapter
6. Ethernet cable
7. Quick installation reference

Phone Installation

1. Attach the phone stand
2. Connect the Handset and optional Headset
3. Connect the Network and Power
Initialization Process

After your phone has been powered up, the system boots up and performs the following steps:

Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"
And then show "Initializing "during the initialization.

The IP Phone will upgrade the firmware if there is a new firmware on your server. And the IP Phone will show "Check firmware, please wait…" after initialization.

Then IP Phone will show Reboot information:

By default, the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

Status

You can view the system status of your phone via phone user interface or web user interface. The information of phone status includes: Information (e.g., Model, IPV4,IPV6, MAC, Firmware, Hardware), Network (e.g., WAN Type, IP, Mask, LAN Type, Gateway, DNS …), Accounts (e.g., register status of accounts)

To view the phone status via Phone interface:

1. Press Menu→ Status→ Information

2. Press Menu→ Status→ Network

3. Press Menu→ Status→ Network→ IPV4

4. Press Menu→ Status→ Network→ IPV6

```
                    IPV6
1.WAN Type:        DHCP mode
2.WAN IP:        ⓘ 2015:1fc1:1111:...
3.Gateway:          /64
4.Pri.DNS:
5.Sec.DNS:
Back      |        |        |
```

5. Press Menu→ Status→ Accounts (UC503(G) support four accounts)

```
                  Accounts
1.0012:            Registered
2.243:             Registered
3.Empty:           Not Registered
4.Empty:           Not Registered

Back      |        |        |
```

To view the phone status via Web interface:
Login webpage (For How to login, please refer to Web Login)
View the information of Version, Account Status and Network.

Registration

To register via Phone interface

1. Press Menu→ Settings→ Advanced Setting (default password: admin)→ Accounts

2. Select the desired account

3. Select Enable for Active

4. Select the desired Profile of the account.

5. Fill the SIP User ID, Authenticate ID

6. Fill the Password and Name (shown on LCD).

7. Press Save to save the configuration.

Note:

If there is a port of sip server, you need to press "1" on the keypad, then you will find the ":".

Additional Information

When the current input method is ABC/abc/2ab,

Pressing "1", you will find ",.?:;"

Pressing "0", you will find " <>(){}[]_-"

Pressing "*", you will find "*/"!@$"

Pressing "#", you will find "#'%&*|"

To register via Web interface

1. Login webpage and Click Profile→ Basic

2. Select the desired profile from the pull-down list of Profile in the Profile field.

3. Fill the Primary SIP Server and other profile information.

4. Select the SIP Transport.

5. Click $\boxed{\text{SaveSet}}$ to save the configuration.

6. Click Account→ Basic.

7. Select the desired account from the pull-down list of Account in the Account field.

8. Select Yes for Account Active.

9. Select the desired Profile.

10. Fill the SIP User ID, Authenticate ID, Authenticate Password and other account information.

11. Click [SaveSet] to save the configuration.

To register via DHCP SIP Server

1. Login web page and Click Profile→ Basic

2. Select the desired profile from the pull-down list of Profile in the Profile field.

3. Fill the Primary SIP Server and other profile information.

4. Select Yes for the DHCP SIP Server and select the SIP Transport.

5. Click SaveSet to save the configuration.

6. Click Account→ Basic.

7. Select the desired account from the pull-down list of Account in the Account field.

8. Select Yes for Account Active.

9. Select the desired Profile.

10. Fill the SIP User ID, Authenticate ID, Authenticate Password and other account information.

11. Click [SaveSet] to save the configuration.

Note:

1. All fields with * must be filled. If changed, it requires a phone restart.

2. Account Status says the account registered successfully or not.

Idle Screen
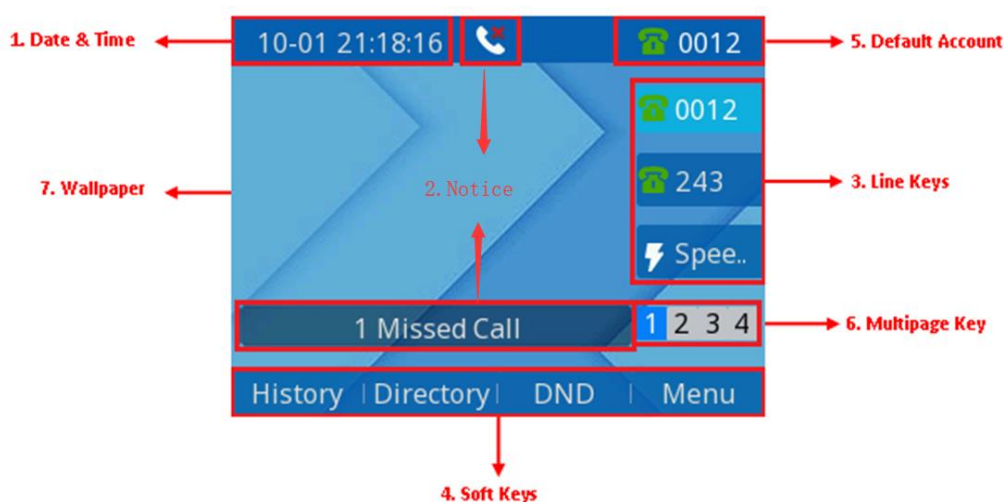

Name	Description
1. Date & Time	It is the area that displays the current set date and time of the phone.
2. Notice	It is the area to display the phone's notifications such as missed calls, SMS, do not disturb mode and many more. For more info, see Icon Preview.
3. Line Keys	This area shows the line key labels. The Line keys can also be used for other function keys. For more info, you can refer to Line Keys
4. Soft Keys	This area shows the soft key labels. The default soft key labels are "History", "Directory", "DND" and "Menu". For more info, see Programmable Key
5. Default Account	This shows the current use account. User can use to change the default use account.
6. Multipage Key	UC503(G) support 12 keys, you can configure different types.You can view and use these keys by pressing the multipage key.
7. Wallpaper	This shows the current wallpaper picture. You can also change it. For more info, you can refer to Wallpaper.

LED Instruction

This part mainly instructs the LED status. The Power LED Status describe on the premise that the LED setting all set as Yes. For LED status setting, please refer to: LED Status Setting

Power Indicator LED

LED Status	Description
Blinked green	Ringing or have missed call
Steady Green	Idle status (Power on)
Off	Powered off.

Line LED (Line Key set as Line)

LED Status	Description
Steady Green	Hold
Steady Green	Off hook or during a conversation.
Blinked red	Ringing.
Off	Idle status

BLF or BLF List Key LED (Line/Line Key set as BLF)

LED Status	Description
Steady Green	Idle status for the monitored line
Steady Red	The monitored line is calling or during a call
Blinked red	The monitored line is ringing.
Off	All other unknown status

Shared Line LED

LED Status	Description
off	Idle status
Stay green	a member of the SCA group in off-hook status
Stay red	Other member of the SCA group's led status when a member of the SCA group in off-hook status
Blinked green every 500ms	a member of the SCA group in Private hold status.
Stay red	Other member of the SCA group's led status when a member of the SCA group in Private hold status
Blinked green every 500ms	a member of the SCA group in public hold status
Blinked red every 500ms	Other member of the SCA group's led status when a member of the SCA group in public hold status
Blinked green every 500ms	a member of the SCA group in progressing status
Stay red	Other member of the SCA group's led status when a member of the SCA group is in progressing status.
Blinked red every 100ms	Alerting
Stay green	a member of the SCA group in active status when there is an incoming call designated for the SCA group
Stay red	Other member of the SCA group's led status when a member of the SCA group in active

	status

Other Key Led

Key	Description
Headset Key	When using in headset mode, the led is steady green or the LED is off.
Message Key	Blinked green when there is a new message or the LED is off.
Mute Key	Red when muting the call, or the LED is off.

User Interface

There are two ways to customize specific configurations on your IP phone:
● The user interface on the IP phone
● The user interface in a web browser on your PC
The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many instances, it is possible to use both the phone user interface and the web user interface to operate the phone and change settings. However, in some instances, it is only possible to use the phone or the web user interface.

Display Mode

This phone support two Display mode: Text and Icon.

Icon Mode: all Items are shown same as the main with Icon.

Text Mode: Only the 8 main items will be shown as icon, and others all text description.

To Configure Display mode via Phone interface:

1. Press Menu→ Display→ Display Mode

2. Select Text or Icon

3. Press Save soft key to save the configuration.

To Configure Display mode via Web interface:

1. Login web interface, and click Setting→ Preference

Display Mode	○ Icon Mode
	⦿ Text Mode
2. Select Icon Mode or Text Mode for the Display Mode

3. Click ⟨ SaveSet ⟩ to save the configuration.

Language

The default Phone interface language is English.

To change the language via Phone interface

1. Press Menu→ Settings→ Basic Setting→ Language.
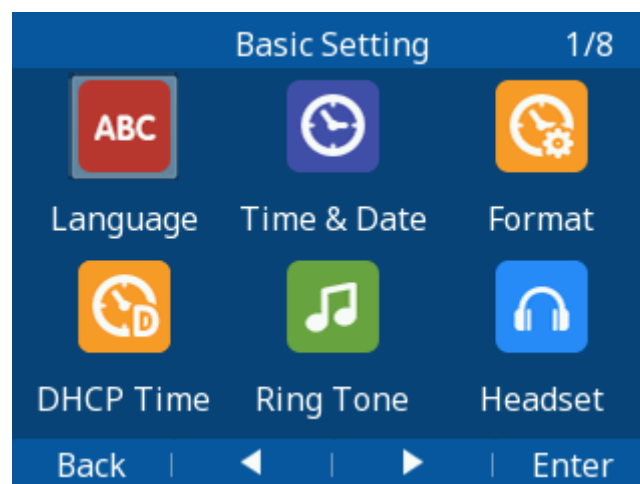

2. Select the necessary one.

3. Press ⟨ ⟩ or Save soft key to save the configuration.
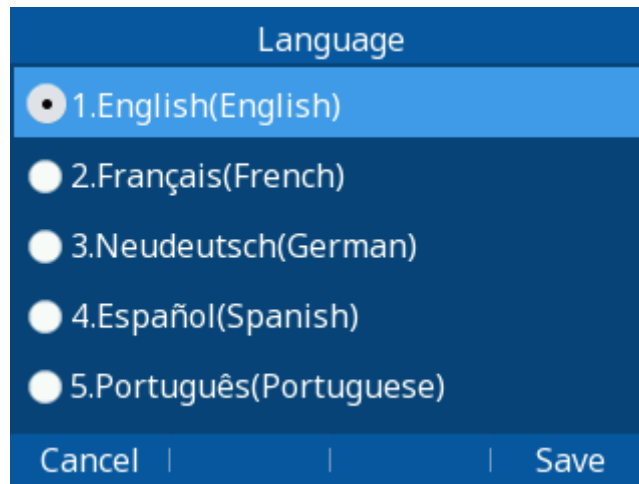

To change the language via Web interface

1. Setting→ Preference→ Web Language & LCD Language
2. Select the necessary one.

3. Press [SaveSet] to save the configuration.

Web Language	English ▼	?
LCD Language	English ▼	?
Note:

All languages may not be available for selection. The available languages depend on the language packs currently loaded to the IP phone.

Wallpaper

To change wallpaper, go by the following steps:

To change the wallpaper via Phone interface:

1. To press Menu→ Display→ Wallpaper

2. Press ⟨ and ⟩ or press Switch soft key to display the different pictures.

3. Press ⌨ or Save soft key to save the selected picture as the wallpaper.
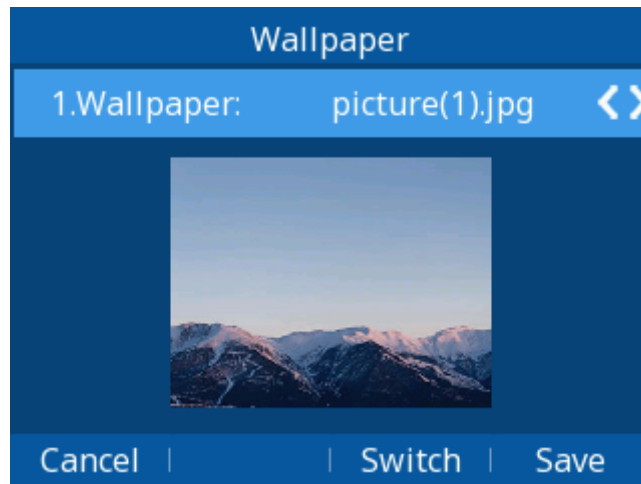

To change the wallpaper via Web interface:

1. Click Setting→ Preference

2. Select the desired wallpaper picture to upload.

3. Click [Upload Photo] to save the setting.
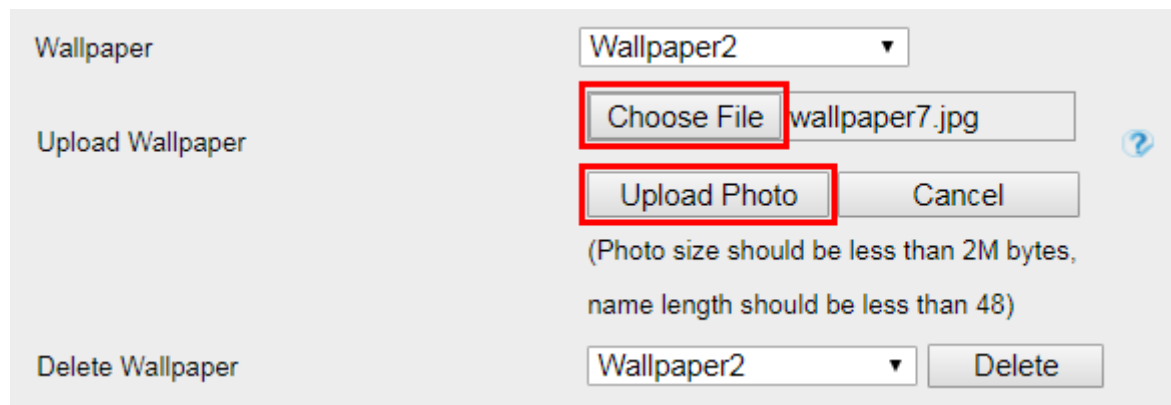

To delete the wallpaper via Web interface:

1. Click Setting→ Preference

2. Select the desired wallpaper to delete.

3. Click [Delete] to save the setting.

Screen Saver

There are four types of screen saver: Time & Logo, Time Only, Photo Switch and Static Photo.

Time & Logo: when the screensaver works, it will show Time and logo in turns.

Time Only: when the screensaver works, it will only show Time

Photo Switch: all screensaver pictures display one by one.

Static Photo: Only the selected picture will display as screensaver.

Text Logo: It works with the **Time & Logo,** when enter the value, it will display the time and the entered value in turns.

To enable screen saver via Phone interface:

1. To press Menu→ Display→ Screensaver...

2. Press ⬇ and ⬇ or press Switch soft key to choose the Time-out as 1 min or 2/5/10/30 minute.

3. Press ⬜ or Save soft key to save the selected configuration.

4. Enter the Screensaver Type to choose one of the type: Time & Logo, Time Only, Photo Switch and Photo.

5. Press ⬜ or Save soft key to save the selected configuration.
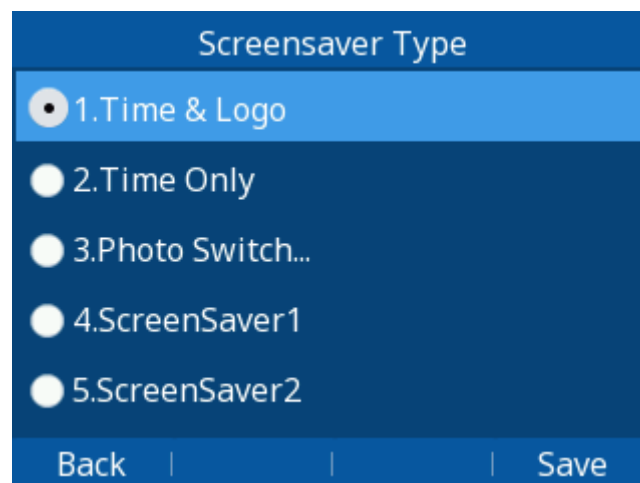

To disable screen saver via Phone interface

1. To press Menu→ Display→ Screensaver...

2. Press ⬇ and ⬇ or press Switch soft key to choose the Time-out as off.

3. Press ⬜ or Save soft key to save the selected configuration.
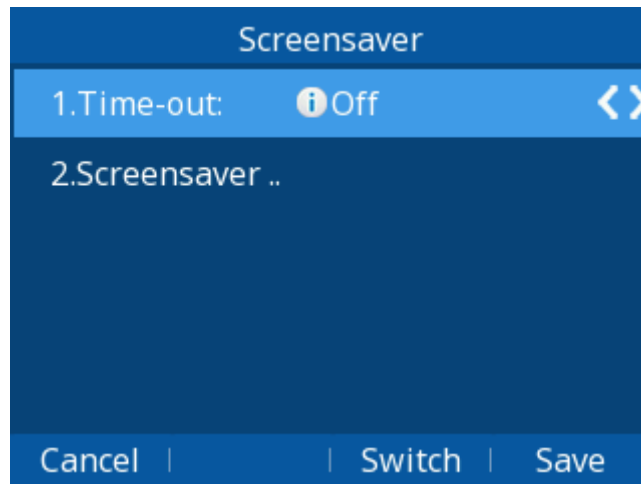

To upload screen saver via Web interface:

1. Setting→ Preference

2. Choose the picture wanted to use as screen saver

3. Click [Upload Photo] to save the upload picture
To delete upload screen saver phone via Web interface:

1. Setting→ Preference

2. Select the photo that to delete.

3. Click [Delete] to delete the photo.
Note:

System Screen Photo (ScreenSaver1-ScreenSaver3) cannot be deleted and only color IP Phone support upload wallpaper.

To custom text logo via Web interface:

1. Click Setting→ Preference.

2. Choose the Screen Time Out as 1 min or 2/5/10/30 minute and choose the

ScreenSaver Type as time & logo.

3. Enter the desired value in the Text Logo field.

4. Click [SaveSet] to save the configuration.

Screen Time Out	1 min
Expansion screensaver time	10 min
Text Logo	Welcome
ScreenSaver Type	time & logo

it will work when screensaver type is time & logo or logo only, and ';' represents the newline

To wake up screen saver via Web interface:

1. Setting→ Preference

2. Choose Dial First Digit: Screensaver Wakes up or Screensaver Wakes up and Dial

3. Click [SaveSet] to save the configuration.

| Dial First Digit | ○ Screensaver Wakes up |
| | ● Screensaver Wakes up and Dial |

Note:

1. The upload Photo size should be less than 2MB, name length should be less than 48 characters, and the File name should be letters, numbers or underline '_' and photo number should be less than 9.

2. The default screensaver photos cannot be deleted.

3. You can only upload screen photos in format of '.bmp' and '.jpg'.

Backlight

To set Backlight via Web interface:

1. Click Setting→ Preference

2. Enter the time for Backlight time (In seconds).

The default is 0, which means Backlight is always on.

3. Click [SaveSet] to save the configuration.

| Backlight Time | 0 |

Note:

Backlight Time refers to the time into the backlight

Time and Date

Time and date is displayed on the idle page, and it can be set automatically by SNTP server or manually by manual setting.

To configure the time and Date by SNTP setting via Phone interface

1. Press Menu→ Settings→ Basic Setting→ Time & Date→ SNTP Settings

2. Press ⬗ or ⬖ to change the Time zone.

3. Fill the NTP Server1, NTP Server2, and select the mode of Daylight Saving.

4. Press ⌨ or Save soft key to save the configuration.

```

| Daylight Saving Time | ⊙ Disable ○ Enable ○ Auto | ? |

Note:

If the IP Phone cannot obtain the time and date from the Simple Network Time Protocol (SNTP) server, please contact your system administrator for more information.

Daylight Saving Time

Daylight Saving Time (DST) is the practice of temporary advancing clocks during the summertime so that evenings have more daylight and mornings have less. Typically, clocks are adjusted forward one hour at the start of spring and backward in autumn. Many countries have used the DST at various times, details vary by location. The DST can be adjusted automatically from the time zone configuration. Typically, there is no need to change this setting

LED Status Setting

The LED Status setting mainly defines the power indicator LED.

To configure LED Status via Web interface:

1. Click Setting→ Preference

2. Select Yes or No for Power Status, Ringing Status, Miss Calls Status and Voice Message Status.

3. Click [SaveSet] for the setting.

For the LED status description, see: LED Instruction [Power Indicator LED](#)

Key as Send

To configure # Key as Send via Phone interface:

1. Press Menu→ Features→ Key as Send

2. Press 🔽 and 🔽 key to select the Enable choice.

3. Press 🔲 or Save soft key to save the configuration
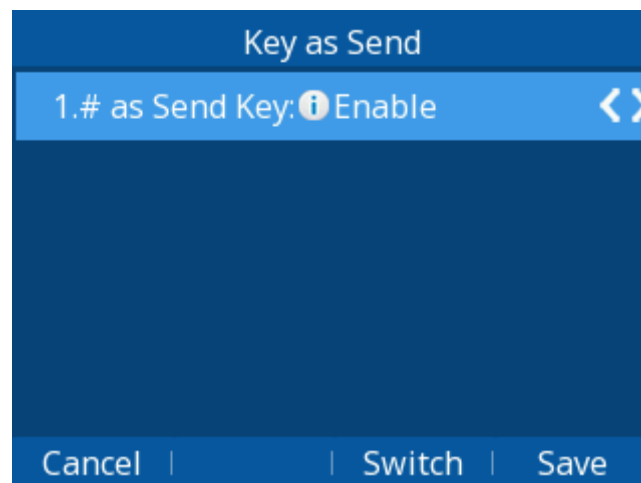

To cancel # Key as Send via Phone interface:

1. Press Menu→ Features→ Key as Send

2. Press 🔽 and 🔽 key to select the Disable choice.

3. Press 🔲 or Save soft key to save the configuration

To configure # Key as Send via Web interface:

1. Click Setting→ Preference
2. Select Yes or No for Use # As Dial Key.

3. Click [SaveSet] for the setting.

Network Setting

Htek IP Phone supports IPv4, IPv6, IPv4&IPv6.They have three mode of Network: DHCP, Static, and PPPoE. The default mode is DHCP, it will obtain IP address and other information automatically.
If your phone cannot contact a DHCP server for any reason, you need to configure a static IP address manually.
When switch DHCP, Static IP Address and PPPoE to each other, or change the Static IP on webpage, it will show the warning of restart as following.

Network settings have been changed, Are you sure reboot the phone to save changes?

OK   Cancel

IPv4

If you set IP Mode to IPv4,IP phone will use IPv4 address. IPv4 has three network modes: DHCP, Static, and PPPoE
To configure IPv4 via Phone interface:
1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN Port→ IP Port Mode.

2. Press or to change the IP Port Mode..

3. Press or Save soft key to save the configuration.
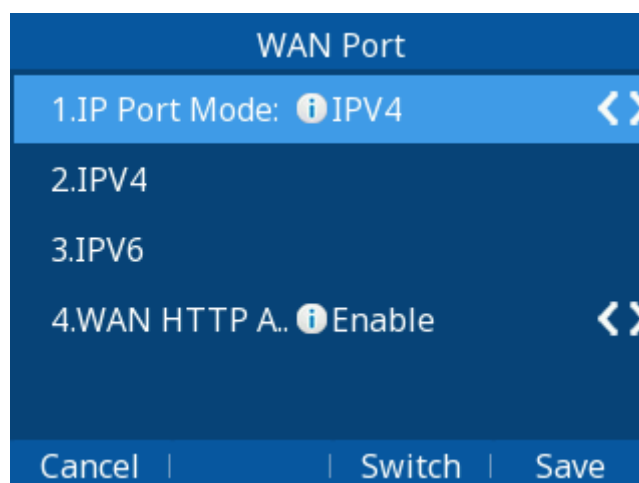

To configure IPv4 via Web interface:
1. Click Network→ Basic→ Internet Port
2. Select IPv4 for Internet Port
3. Click [SaveSet] for the setting.

To configure DHCP via Phone interface:
1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN Port→ IPv4→ DHCP mode.
2. Click Save and restart the phone.
To configure a static IP address via Phone interface:
1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN Port→ IPv4→ Static mode.
2. Enter the parameters: IP, Netmask, Gateway, Pri.DNS(primary DNS), Sec.DNS (second DNS) in the corresponding fields.
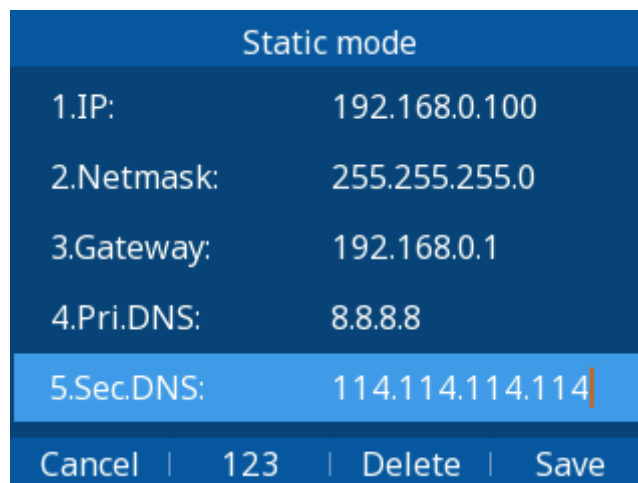

3. Click Save and restart the phone.
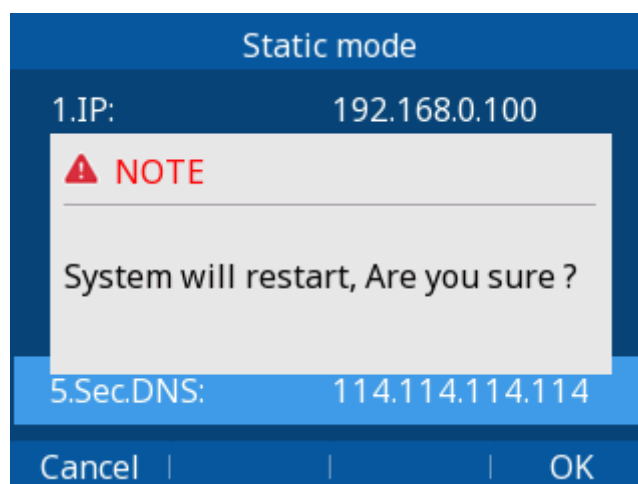

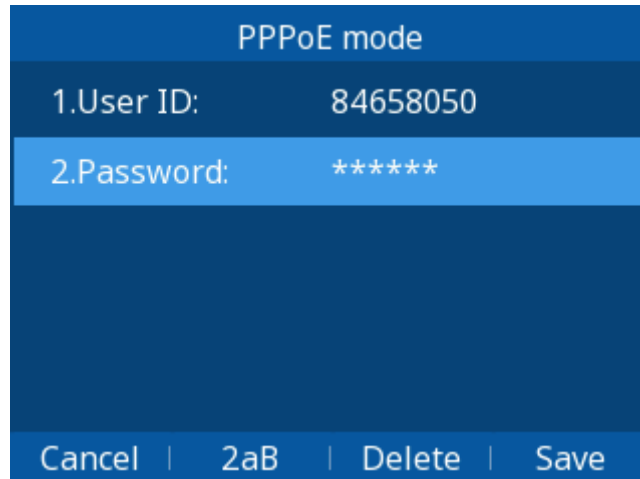

4. Press the OK soft key to accept the change or the Cancel soft key to cancel. If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. You can set a WAN port to be a PPPoE port. The PPPoE port will perform a PPP negotiation to obtain the IP address. Contact your system administrator for the PPPoE user name and

password.

To configure PPPoE via Phone interface:

1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN
Port→ PPPoE mode.

2. Enter the User ID and Password

3. Click Save and restart the phone.

To configure Network via Web interface:

1. Click Network→ Basic→ IPv4 Setting

2. Select the desired Type: DHCP, Static IP Address or PPPoE

3. Fill the necessary information.

4. Click [SaveSet] and restart the phone.

IPv6

If you set IP Mode to IPv6, IP phone will use IPv6 address. IPv6 has two network modes: DHCP, Static IP Address.

To configure IPv6 via Phone interface:

1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN Port→ IP Port Mode.

2. Press ◁ or ▷ to change the IP Port Mode..

3. Press ⤶ or Save soft key to save the configuration.
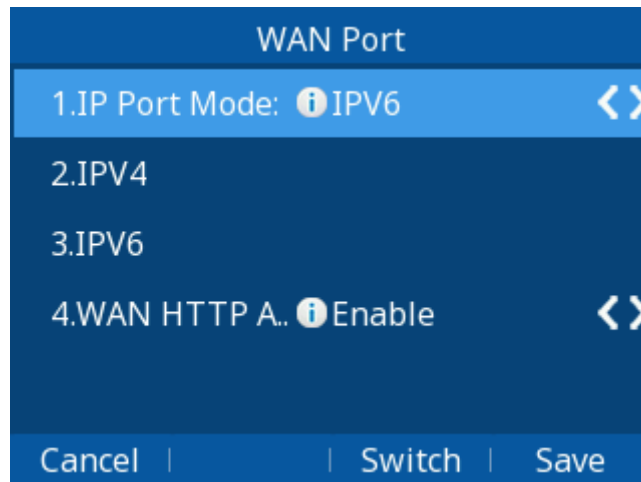

To configure IPv6 via Web interface:

1. Click Network→ Basic→ Internet Port

2. Select IPv6 for Internet Port
3. Click [SaveSet] for the setting.

To configure DHCP via Phone interface:

1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN Port

→ IPv6→ DHCP mode.

2. Click Save and restart the phone.

To configure a static IP address via Phone interface:

1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN Port→ IPv6→ Static mode.

2. Enter the parameters: IP, IPV6 Prefix, Gateway, Pri.DNS(primary DNS), sec.DNS (second DNS) in the corresponding fields.
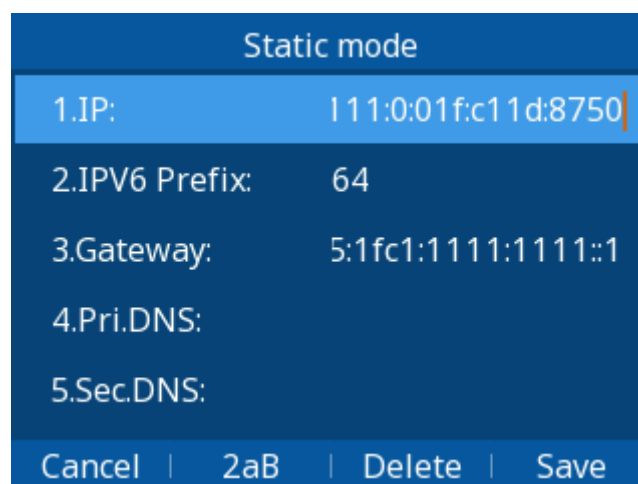

3. Click Save and restart the phone.
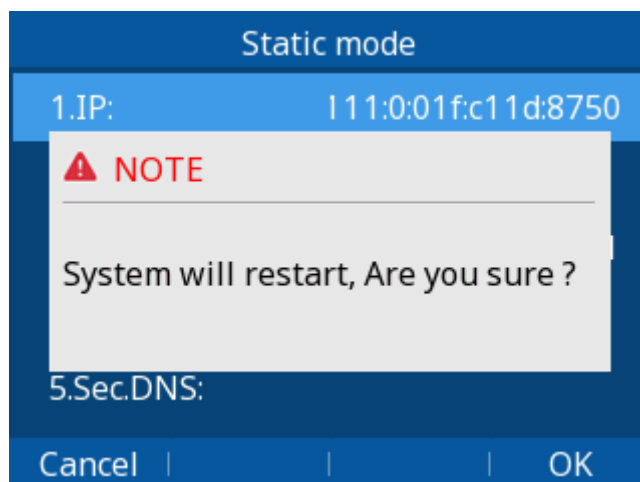

To configure Network via Web interface:

1. Click Network→ Basic→ IPv6 Setting

2. Select the desired Type: DHCP, Static IP Address.

3. Fill required fields.

4. Click ⎡ SaveSet ⎤ and restart the phone.
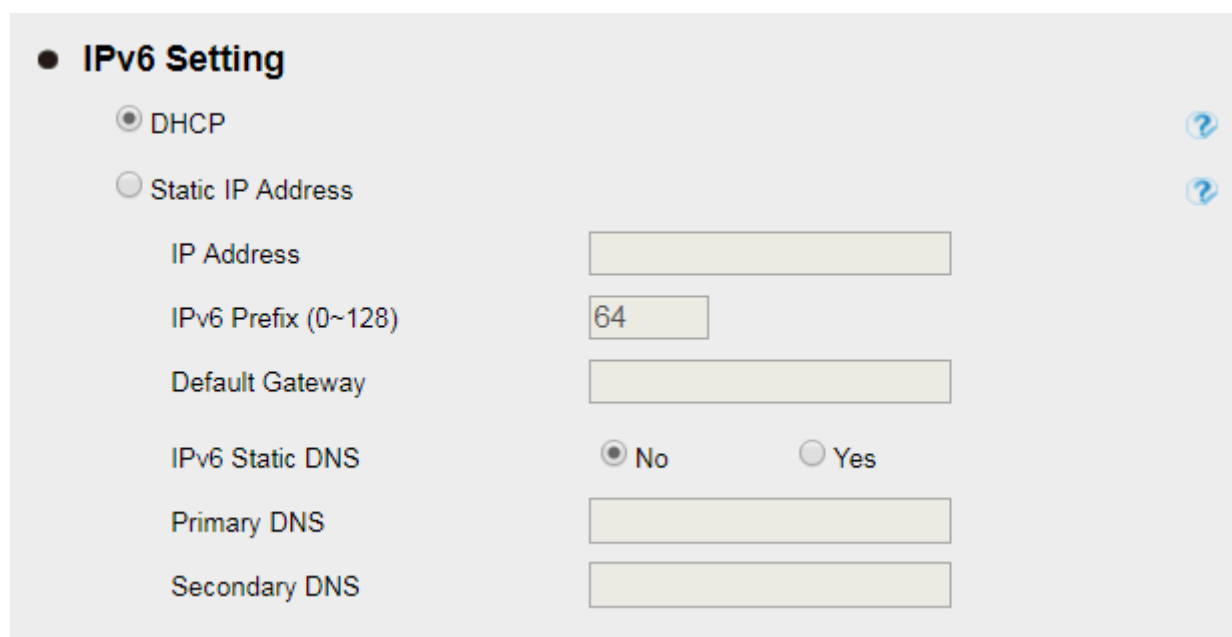

IPv4&IPv6

If you set IP Mode to IPv4&IPv6, IP phone will support both IPv4 and IPv6 address. The settings of DHCP, Static, and PPPoE are same as above.

To configure IPv4&IPv6 via Phone interface:
1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ WAN Port→ IP Port Mode.

2. Press ⬅ or ➡ to change the IP Port Mode..

3. Press ⏎ or Save soft key to save the configuration.
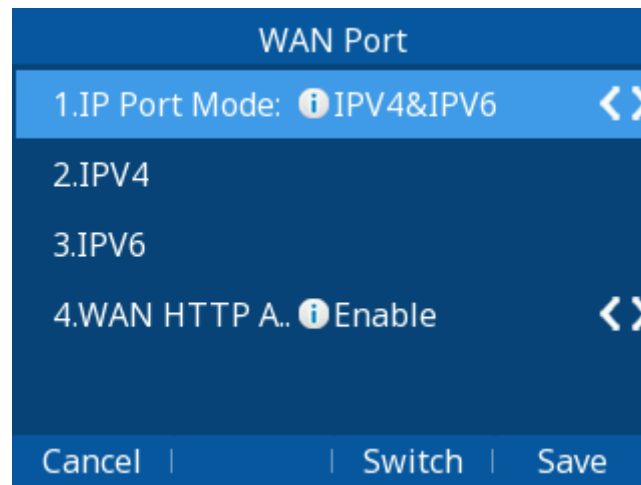

To configure IPv4&IPv6 via Web interface:

1. Click Network→ Basic→ Internet Port

2. Select IPv4&IPv6 for Internet Port

3. Click [SaveSet] for the setting.
Note:

Wrong network parameters may result in inaccessibility of your phone and may also have an impact on your network performance. For more information about these parameters, contact your system administrator.

PC Port

Two modes for PC Port: bridge and router.

To configure Bridge via Phone interface:

1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ PC Port→ Bridge mode.

2. Click Save

3. Click the OK button, then the phone will reboot.

To configure Router via Phone interface:

1. Press Menu→ Settings→ Advanced Setting (password: admin)→ Network→ PC Port→ Router mode.

2. Enter the IP, Netmask and DHCP server

3. Click Save

4. Click the OK button, then the phone will reboot

To configure Bridge via Web interface:

1. Click Network→ PC Port

2. Select As Bridge

3. Click [SaveSet] and then click [OK], the phone will reboot automatically.

● **PC Port**

　　◉ As Bridge　　　　　　　　　　　　　　　　　　　　　　　　⑦
To configure Router via Web interface:

1. Click Network→ PC Port

2. Select As Router

3. Fill the IP Address and other necessary information.

4. Click [SaveSet] and then click [OK], the phone will reboot automatically

Contact Setting

This section provides the operating instructions for managing contacts. The topics include:

● Local Directory

● Remote Phonebook
● LDAP
● Search Contact
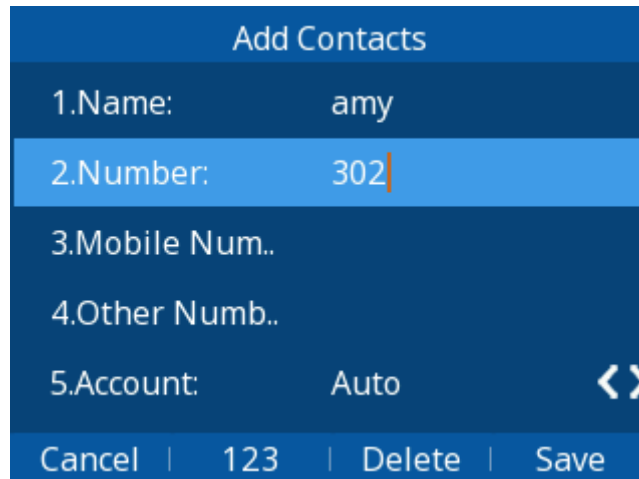

Local Directory

In the directory, you can add or delete your friends, business partner or anyone others' phone No., so you will not forget their number. Or put some anonymous phone No. in the blacklist to prevent from being disturbed. The local Directory can add up to 1000 contacts.

A. To add contacts list into local directory

To add contacts manually via Phone interface

1. Press Menu→ Directory→ Local Contacts

2. Press Add soft key.

3. Enter the necessary information as Name, Phone number…

4. Press Save soft key or [✓] to add the contacts successfully.

To add contacts from history via Phone interface:

1. Press History soft key or press Menu→ History→ Local History→ All/ Missed/ Received/ Dialed/ Forwarded Calls

2. Press [▽] and [△] to select the targeted one. (Press and switched among the All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls).

3. Press Option soft key→ Add to Contacts

4. Edit the necessary information as Name, Phone number…

5. Press Save soft key or [✓]to add the contacts successfully.
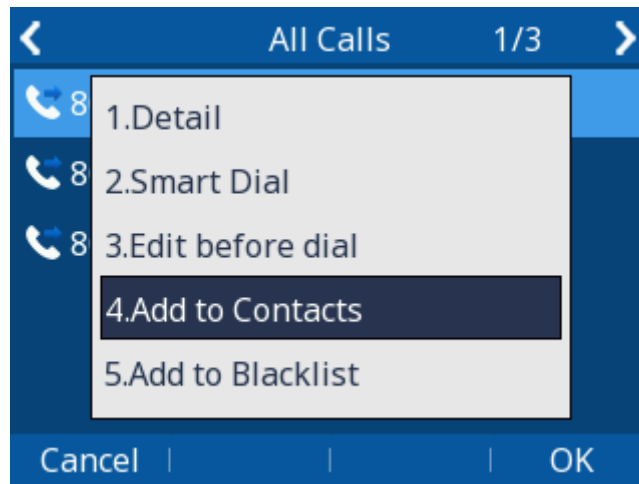

To add contacts via Web interface:

1. Click Directory→ Directory

2. Enter the name, number and some other information.

3. Press `Add` and then press `Save` button.

B: To add contacts into blacklist

To add blacklist manually via Phone interface:
1. Press Menu→ Directory→ BlackList

2. Press Group soft key.

3. Press Add soft key.

4. Enter the Name and select the Ring Tone.

5. Press Save soft key or ⌷ to add the Group successfully.

6. Enter the added Group, then press Add soft key.

7. Enter the necessary information as Name, Phone number…

8. Press Save soft key or ⌷ to add the contacts successfully.

To add blacklist from history via Phone interface:

1. Press History soft key or press Menu→ History→ Local History→ All/ Missed/ Received/ Dialed/ Forwarded Calls

2. Press ⌄ and ⌃ to select the targeted one. (Press ▷ and ◁ switched among the All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls).

3. Press Option soft key→ Add to Blacklist

4. Edit the necessary information as Name, Phone number…

5. Press Save soft key or ⌷ to add successfully.
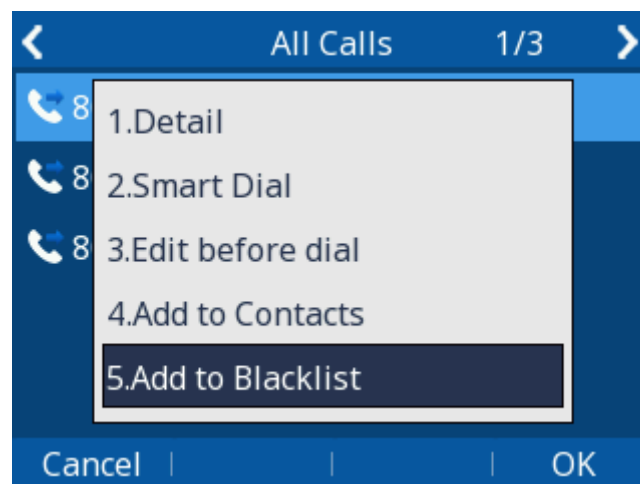

Upload Contacts photo via Web interface:

1. Click Directory→ Directory and select the desired contact.

2. Click [Choose File] to select the photo for the contact

3. Click [Upload Photo] to upload the photo.

When you place a call from the contact, the phone idle screen will show the contact photo.
Contacts photo server

The contact photo server allows you to configure the contact's photo by modifying the xml file instead of uploading it on a web page.

First, click Setting→ Preference, and fill in the server path (e.g.

http://192.168.1.18/photo/) .

Then, fill in the file name in the quotes for the field photoDefault = "". (e.g. photoDefault = "htek.jpg").

Finally, import the xml file to the phone.

```xml
<?xml version="1.0" encoding="UTF-8"?>
<contactData>
  <group>
    <contact sDisplayName="075" sOfficeNumber="075" sMobilNumber="" sOtherNumber="" sAccountIndex="255" sRing=
    "Auto" group="" photoDefault="Config:gee.jpg" photoSelect="0" />
    <contact sDisplayName="076" sOfficeNumber="076" sMobilNumber="" sOtherNumber="" sAccountIndex="255" sRing=
    "Auto" group="" photoDefault="Config:htek.jpg" photoSelect="0" />
  </group>
  <blacklist>
  </blacklist>
  <groupinfo>
  </groupinfo>
</contactData>
```

You can get the xml file through the export function.

Note:

1. The format of the photo supported is jpg or bmp

2. Photo size should be less than 2MB, name length should be less than 48 characters.

To import or export the contact list

You can manage your phone's local directory via phone or web user interface. But you can only import or export the contact list via Web interface.

To import an XML file of contact list via Web interface:

1. Click on Directory→ Directory

2. Click Choose File to select a contact list file (file format must be .xml) from your local system.

3. Click Import XML to import the contact list.

To export an XML file of contact list via Web interface:

1. Click on Directory→ Directory

2. Click Export XML to export the contact list.

To import a CSV file of contact list via Web interface:

1. Click on Directory→ Directory

2. Click Choose File to select a contact list file (file format must be .csv) from your local system.

3. Click Import Csv to import the contact list.

To export a CSV file of contact list via Web interface:

1. Click on Directory→ Directory

2. Click Export Csv to export the contact list.

Note:
If the XML file or CSV file has more than 1000 contacts, the phone will only upload 1000 contacts.

Remote Phonebook

To set Remote Phonebook via Web interface:
1. Login the webpage and click Directory→ Remote Phone Book
2. Fill the URL of the remote file in the Phone Book URL field. For example, http://10.2.0.140/Phonebook/remotephonebook.xml

3. Fill the Name and then click SaveSet to save the configuration.

To check the contacts via Phone interface:

1. Press Directory→ Remote Contacts or Menu→ Directory→ Remote Contacts, and then you can see the item you set.

2. Select the item and press Update.

3. After updating completely, press Enter and you will find the detail.

For More detail, please refer to: <u>Remote Phonebook</u>.

Note:
Every remote phonebook, only supports 1000 contacts.

LDAP Phonebook

When use the LDAP feature, you can get the LDAP Phonebook directly.

To configure LDAP via Web interface:

1. Login webpage and click Directory→ LDAP

2. Fill the LDAP Name Filter:

   a) This parameter specifies the name attributes for LDAP searching. The "%" symbol in the filter stands for the entering string used as the prefix of the filter condition.

   b) For example, (cn=%), when the name prefix of the cn of the contact record matches the search criteria, the record will be displayed on the IP PHONE LCD.

3. Fill LDAP Number Filter: This parameter specifies the number attributes for LDAP searching.

4. Fill Server Address: Fill the domain name or IP address of the LDAP Server. For example: 192.168.0.253

5. Port (the port of the LDAP Server), Base, User Name, Password

6. Max.Hits(1-32000): the maximum number of the search results to be returned by the LDAP server.

7. LDAP Display Name: the display name of the contact record displayed on the LCD screen.

8. Filled the relative value and then click SaveSet to save the settings.

Following is the example screenshot for the configuration.

LDAP Name Filter	(cn=%)	?
LDAP Number Filter	(|(telephoneNumber=%	?
Server Address	192.168.0.253	?
Port	389	?

SaveSet   Cancel

To Configure LDAP Key

To configure LDAP Key via Web interface:

1. Click Function Keys→ Line Key→ choose Line Key2(for example)
2. Select LDAP in the Type field.

3. Click SaveSet to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▾	Default ▾		243	Account 1 ▾	
Key2	LDAP ▾	Default ▾			Account 1 ▾	

To Configure LDAP Key via Phone interface:

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line Key2

2. Select LDAP in the Type field

3. Press Save or [⏎] key to save the configuration.

When press the LDAP Key the LCD will display as following:

```
◀         LDAP Contacts    1/1    ▶
  Miumiu Wu          123

 Filter Prefix:
  Cancel  |   2aB   |  Delete  |  Option
```
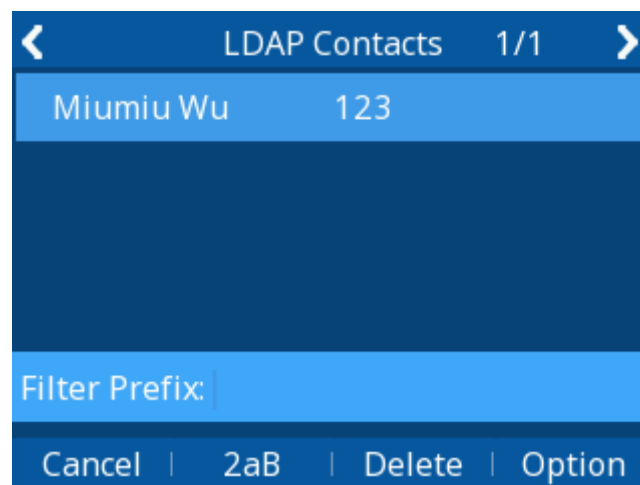

For More detail, please refer to LDAP

Search Contact

You can search contact in all contacts, local contacts, remote contacts and LDAP contact.

To search contact in All Contacts:

1. Click the Directory soft key on Idle interface.

2. Select the All Contacts list and click Enter.

3. Click the More soft key, then you can see the Search soft key

4. Click the Search soft key, you can enter the desired part of name or part of number.

5. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.
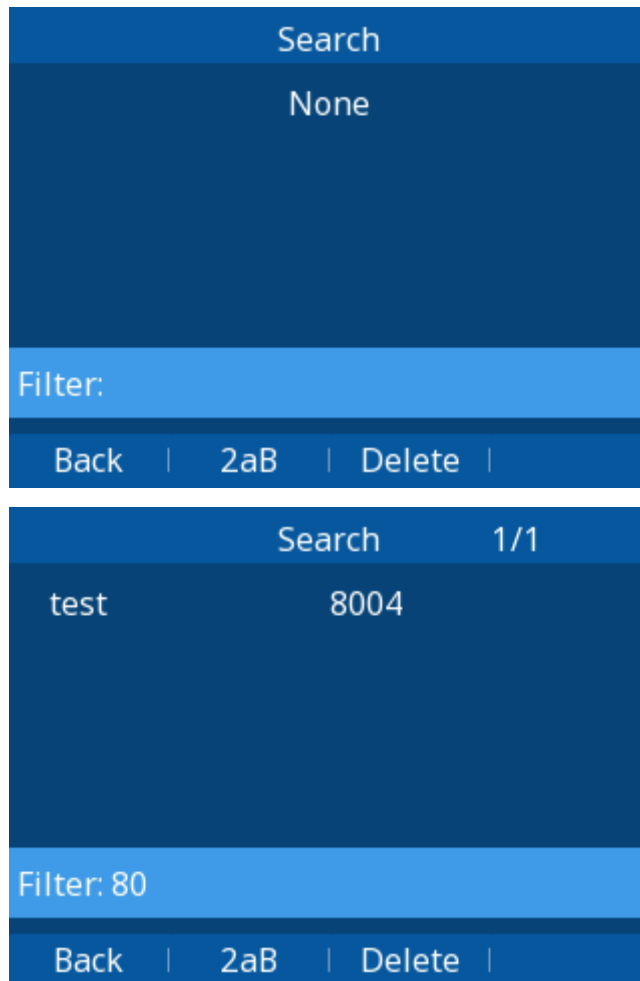

To search contact in Local Contacts:

1. Click the Directory soft key on Idle interface.

2. Select the Local Contacts list and click Enter.

3. Click the More soft key, then you can see the Search soft key

4. Click the Search soft key, you can enter the desired part of name or part of number.

5. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

To search contact in Remote Contacts:

1. Click the Directory soft key on Idle interface.

2. Select the Remote Contacts list and click Enter.

3. Select the desired remote phonebook and click Enter soft key.

4. Click the Search soft key, you can enter the desired part of name or part of number.

5. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

To search contact in LDAP contacts:

1. Click the Directory soft key on Idle interface.

2. Select the LDAP list and click Enter.

3. Enter the first character or more of contact's name or number.

4. With the search content to match the contact will be automatically displayed on the LCD within 5 seconds.

Call History Setting

Call History

This phone maintains call history lists of Dialed Calls, Received Calls, Missed Calls and Forwarded Calls. The call history list supports up to100 entries in all on phone interface and more than 1500 items. You can check the call history, dial a call, add a contact or delete an entry from the call history list. You should enable the history record feature in advance.

To enable the history record feature via Phone interface:
1. Press Menu→ Features→ History Setting

2. Press ◁ and ▷ or Switch soft key to enable History record.
3. Press Save soft key to save the configuration.
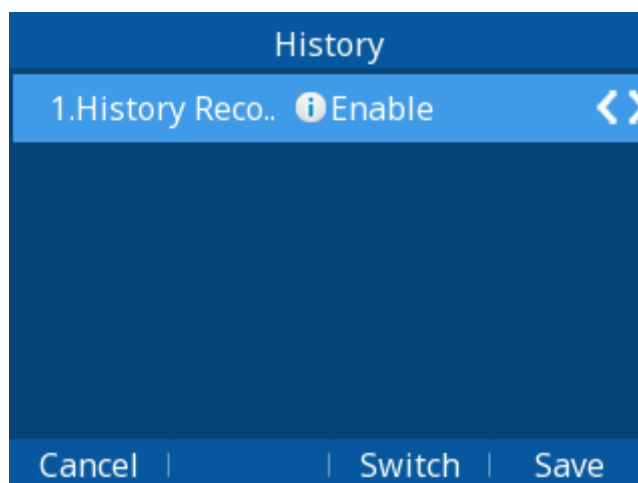

To check the call history via Phone interface:
1. Press the History soft key. The LCD screen displays All Calls list.
2. Press ◁ or ▷ to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
3. Press ⌄ or ⌃ to select the desired entry.
4. Press the Option soft key, then select Detail from the prompt list and press the OK soft key.
5. The detailed information of the entry appears on the LCD screen.
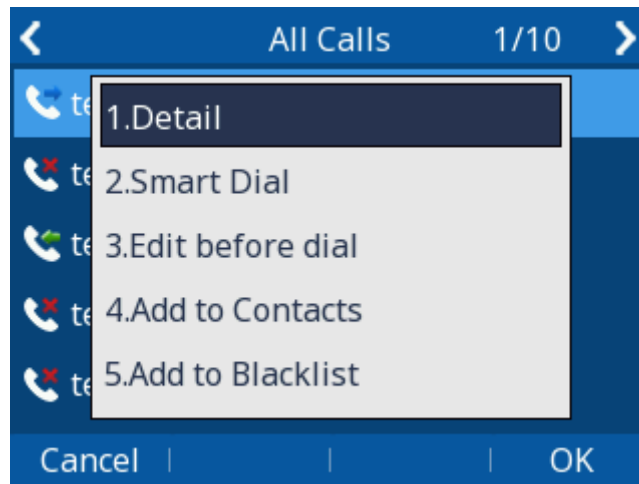

To Dial a call from Call History via Phone interface:

1. Press the History soft key.

2. Press ⬖ or ⬗ to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.

3. Press ⬇ or ⬆ to select the desired entry.

4. Press the Dial soft key or ⌨ .

To delete an entry from the call history list via Phone interface:

1. Press the History soft key.

2. Press ⬖ or ⬗ to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.

3. Press ⬇ or ⬆ to select the desired entry.

4. Press the Delete soft key.

To delete all entries from the call history list via Phone interface:

1. Press the History soft key.

2. Press ⬖ or ⬗ to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.

3. Press the Option soft key, and then select Delete All from the prompt list.

4. Press the OK soft key to confirm the deleting or the Cancel soft key to cancel.

To check the call history via Web interface:

1. Click Directory→ Call History

2. Click Dialed List, Missed List, Received List, or Forwarded List, then you can see the history list.

Dial Plan

Dial plan is a string of characters that governs the way this phone processes the inputs received from your phone keypad. This phone supports dial plan with following accept digits:

1,2,3,4,5,6,7,8,9,0, *, #

Grammar	Description
x	any digit from 0-9;
xx+	at least 2-digit number;
^	exclude;
,	hear dial tone;
[3-5]	any digit of 3, 4, or 5;
[147]	any digit 1, 4, or 7;
<2=011>	replace digit 2 with 011 when dialing.

To configure dial plan via Web interface:
1. Click Account→ Basic.
2. Select the desired account from the pull-down list of Account in the Account field.
3. Fill the value in Dial Plan field.

4. Click [SaveSet] to save the configuration.

Dial-Now Timeout

Dial-Now Timeout means that when you enter the number which is matching with dial plan, it will dial out automatically after some time when you stop entering the number.
To configure Dial-Now Timeout via Web interface:

1. Click Setting→ Preference
2. Fill the blank of Dial-Now Timeout: for example, 5(seconds). (0 means dial out immediately).

3. Click the [SaveSet] button to save the configuration

Dial-now Time-out (seconds)	5	⑦

No Key Entry Timeout

No Key Entry Timeout means that when you enter the number, it will dial out automatically after some time when you stop enter the number.
To configure No Key Entry Timeout via Web interface:
1. Click Setting→ Preference
2. Fill the blank of No Key Entry Timeout: for example, 5(seconds). (0 means never timeout, you should press the Dial key to dial out the number.)

3. Click the [SaveSet] button to save the configuration.

NO Key Entry Timeout(seconds)	5	⑦

Emergency Call

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when required. The emergency telephone number may differ from country to country. It is typically a three-digit number that can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different emergency services.
You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation.
To configure emergency call via Web interface:
1. Click Setting→ Features→ Phone Lock
2. Enter the emergency services number in the Emergency field,

3. Click [SaveSet] to save the configuration.

Lable Scroll

When setting function keys, you need to set the label of the function keys. If the words are too long to show on the label, you can use this function to make labels scroll. Another approach is to set the labels to Long Label mode.

To configure Label Scroll via Web interface:

1. Click Setting→ Preference

2. Select Enable or Disable for Lable Scroll.

3. Click [SaveSet] for the setting.

Show Missed Calls

Whether to show missed call notification on LCD

To configure Show Missed Calls via Web interface:

1. Click Setting→ Preference

2. Select Yes or No for Show Missed Calls.

3. Click [SaveSet] for the setting.

Auto Logout Time

Set the Web login timeout

1. Login webpage, and click Setting→ Preference

2. Set number 1~5000 min for Auto Logout Time.

3. Click [SaveSet] for the setting.

Reboot in Talking

This function is to allow reboot during the calls or not
1. Login webpage, and click Setting→ Preference
2. Set Enable or Disable for Reboot in Talking.

3. Click [SaveSet] for the setting.

Reboot in Talking	Disable ▾
Detect IP Conflict

Softkey Layout

This feature mainly defines which shown on the soft key in some status. For example, what the soft key displays when dialing, or talking.

To configure Soft key via Web interface:

1. Click Setting→ Softkey Layout

2. Select Enable for Custom Softkey

3. Select Call States.

4. Select the feature from the Disable Keys to Enable Keys field by [→]. [→] moves the Disable key to Enable field. [←] moves the Enable key, and it will back to Disable field.

5. Click [↑] or [↓] to change to position for each feature.

6. Click [SaveSet] to save the configuration.

Programmable Key

For the default keys as Soft Keys, Navigation Keys and so on, you can define them as some specific feature, and it works only on the idle page.

To configure Programmable Key via Web interface:

1. Click Function Keys→ Programmable Key.

2. Select the desired Key to set.

3. Click SaveSet to save the setting.

4. By clicking Reset To Default , all setting of the keys will be back to default.

Basic Call Features

Place a Call

There are three ways to dialing a call: Handset, Headset and Hands-free loud speaker.

To place a call by Handset:

1. Pick up the handset and enter the necessary number.

2. Press ⌗ or ✓ or press the Send soft key, then the call is sending.

To place a call by Headset:

1. Press the 🎧 (light is Green),

2. Enter the desired number.

3. Press ⌗ or ✓, or press the Send soft key, then the call is sending.

Using headset to place and answer calls for all time:
1. Login webpage, and click Setting→ Preference

2. HeadSet Priority→ Enable

3. Ring Device For HeadSet→ User HeadSet

4. Click | SaveSet | to save the setting.

5. Press 🎧.

| HeadSet Priority | Enable ▼ |
| Ringer Device For HeadSet | Use HeadSet ▼ |

To place a call by hands-free speakerphone:

1. Press the 🔊, or press the Line key, then you can hear the dial tone.

2. Press the number.

3. Press ⌗ or ✓ or press the Send soft key, then the call is sending.

To place a call by call history or Directory via Phone interface:

1. Press the History / Directory→ All Contacts/ Local Contacts/ LDAP (On the idle page) or Menu→ History / Directory→ All Contacts/ Local Contacts/ LDAP

2. Press ⌄ and ⌃ to select the targeted one.

3. Press the Send soft key, or ✓, or 🔊, or the corresponding line key, then the call is sending.

Note:

1. The ⌗ key is set to be a Send key. For more information, refer to the <u>Key as</u>

2. During the call, you can also change among Headset, Handset or Free-speaker mode.

Making two calls with one line and one account

1. Press a line key and dial the phone number, then make a call.

2. Press Hold soft key and then press New Call soft key.

3. Dial another phone number,

4. Press the Send soft key, or ⌨, then make the second call.

End a Call

Here shows to end a call during three modes:

To end a call by Handset

Press the End Call soft key or hang up the handset.

To end a call under Headset Mode

Press the End Call soft key or press 🎧.

To end a call under Hands-free speakerphone Mode

Press the End Call soft key or press 🔊.

Note:

During the conference, to end the call is same as mentioned above.

Redial a Call

To redial the last placed call from the IP Phone:

Press 🔁 directly when LCD is on the idle interface.

Receive a Call

There are three ways to receive a call when the phone is ringing:

To receive a call by handset

Pick up the handset and now the conversation is built.

To receive a call by headset

Press 🎧 and now the conversation is built.

To receive a call by hands-free speakerphone

1. Option 1: Press 🔊 directly.

2. Option 2: Press Answer soft key.

3. Option 3: Press the Line key (flashes red).

Moreover, some other action can be done by soft key when the call is coming.

1. Press the Reject soft key to reject the call.
2. Press Forward soft key to forward to another phone.
3. Press Silence soft key, and then the call will keep silent, no ring tone display.
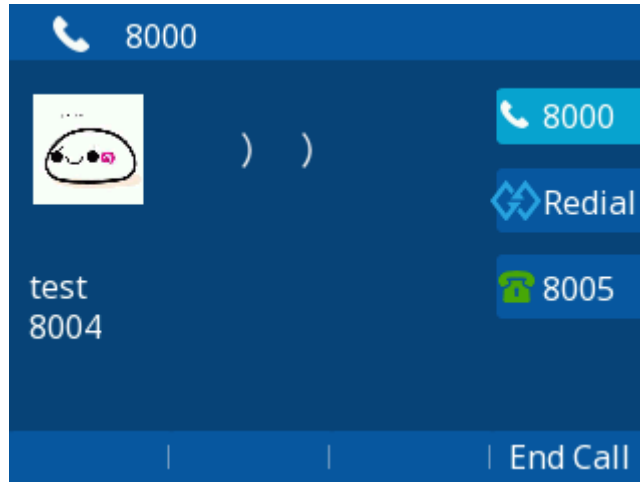

Incoming Call Show Mode

There are two incoming call show modes for this phone:
1. name of the contacts
2. name and number of the contacts
3. name and number of the incoming call and the account which is connecting

To set Incoming Call Show Mode via Web interface:
1. Click Setting→ Preference
2. Select the desire mode for the Incoming Call Show Mode

3. Click [SaveSet] to save the setting.

Auto Answer

Enable Auto Answer feature, you will answer all incoming call automatically.
To enable Auto Answer via Web interface:
1. Click Profile→ Advanced
2. Select the desired profile from the pull-down list of Profile in the Profile field.
3. Choose Yes for the Auto Answer.

4. Click [SaveSet] to save the configuration.
To disable Auto Answer via Web interface:

1. Click Profile→ Advanced

2. Select the desired profile from the pull-down list of Profile in the Profile field.

3. Choose No for the Auto Answer.

4. Click [SaveSet] to save the configuration.

Call Hold

When using the Hold feature, the Hold icon will show on the display.
To make a call on hold during three modes:

To hold a call under handset mode:

1. Press Hold soft key to hold the current call.

2. Press Resume soft key to resume the call on hold.

To hold a call under headset mode:

1. Press Hold soft key to hold the current call.

2. Press Resume soft key to resume the call on hold.

To hold a call during the speaker mode:

1. Press Hold soft key to hold the current call.

2. Press Resume soft key to resume the call on hold.
Call Transfer

This phone supports Blind, Attended and Semi-Attended Transfer.

Blind Transfer
When you use this feature, you can

1. Press [🔄] or Transfer soft key during the conversation, the call is on hold now.

2. Enter the number that transfers to.

3. Press ⏻ or Transfer soft key, and now the blind transfer is completed.

Attended Transfer

When you use this feature, you can

1. Press ⏻ or Transfer soft key during the conversation, the call is on hold now.
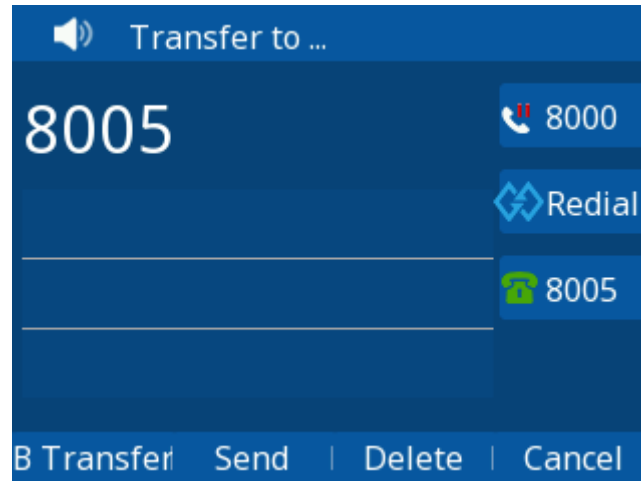

2. Enter the number that transfers to, and press the Send soft key or ⌗ or ✔ .

3. Start the second conversation, then press ⏻ or Transfer soft key, and now transfer is completed.

NOTE:

To transfer calls across SIP domains, SIP service providers must support transfer across SIP domains. Blind transfer will usually use the primary account SIP profile.

Semi-Attended Transfer

1. Press ⏻ or Transfer soft key during the conversation, the call is on hold now.

2. Enter the number transfer to, and then press the Send soft key or ⌗ or ✔ , then you can hear the ring tone.

3. Press ⏻ or the Transfer soft key, and now the Semi-attended transfer is completed.

BLF Transfer

1. Set a Programmable Key or Line Key as BLF. For how to set BLF, please refer to BLF

2. Configure the Transfer Mode via DSSkey.

3. Press BLF key during the conversation then realize Blind, Attended and Semi-Attended Transfer.

Hold Transfer On Hook:

1. Login webpage, and click Setting→ Features→ Transfer Settings: Hold Transfer On Hook: On.

2. A enables the Hold Transfer On Hook feature. During the conversation with B, A presses the Hold soft key and places a new call to C. A cancels the call after C answers, then C and B are in the same call and the transfer is successful.

Hold transfer on Three Way conference:

1. Login webpage, and click Setting→ Preference→ Three Way Call Release Type: Transfer.

2. When acting as the initiator of the three-way conference, the IP Phone presses the End Call soft key or on-hook to exit the conference in the process of talking.

4. Then the other two IP Phones will continue to talk.

Transfer to New Call via Web interface

1. Click Setting→ Features

2. Select Transfer Mode via DSSkey: New Call

3. Click Function Keys→ Line Key

4. Select the desired Line Key and select BLF in the Type.

5. Enter the phone number in the Value field.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▼	Default ▼		243	Account 1 ▼	
Key2	BLF ▼	Default ▼	245		Account 1 ▼	

NOTE:

If the person that wanted to be spoken to do not want to answer the call, then the person that answered the coming call could use this function.

Transfer Release Trigger

This option defines when the phone sends BYE to the server to release the transferred call. Login webpage, and click Profile→ Basic→ Transfer Release Trigger:

1. NOTIFY with 200OK

After receiving REFER request sended by the phone, server will send NOTIFY to the phone, and the phone response 200OK, this is the trigger for the phone to release the call.

2. 2xx response of REFER

The phone will not release the call until it receives a 2xx response from the server to the phone's REFER request.

3. BYE for the call

The phone will not release the call until receiving BYE from the server.

Call Conference

This IP Phone supports up to 5-way conference.

5-way conference

1. Assuming that call party **A** and **B** are in conversation. **A** wants to bring **C**, **D** and **E** in a conference

2. **A** press the Conf soft key, the call is placed on hold.

3. **A** enter the number of **C** and then press Send soft key or [⌗].

4. **C** answer the call.

5. **A** press the Conf soft key, then **A**, **B** and **C** are now in a conference. (and now this is

3-way conference)

6. **A** press the Conf soft key, the current 3-way conference is placed on hold.

7. **A** enter the number of **D** and then press Send soft key or [⌗].

8. **D** answer the call.

9. **A** press the Conf soft key, then **A**, **B**, **C** and **D** are now in a conference. (and now this is **4-way conference**)

10. **A** press the Conf soft key, the current 4-way conference is placed on hold.

11. **A** enter the number of **E** and then press Send soft key or [⌗].

12. **E** answer the call.

13. **A** press the Conf soft key, then **A**, **B**, **C**, **D** and **E** are now in a conference. (and now this is **5-way conference**)

14. **A** end the call, the conference is finished.
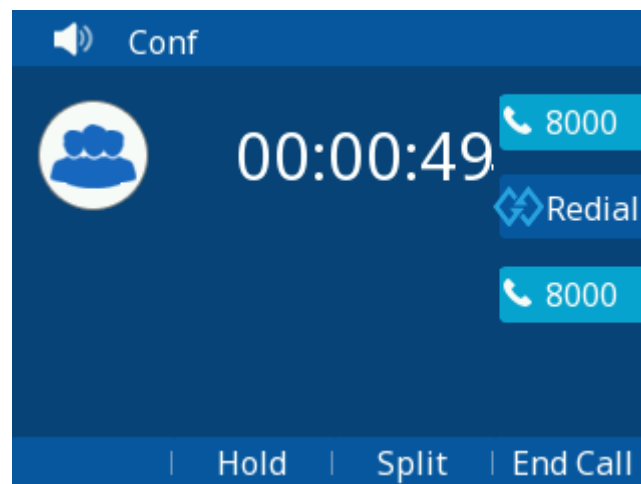

Note:

1. If C does not answer the call, A can back to continue the conversation with B;

2. Once A hangs up the call, the conference is ended, while if B or C drops the call, A&C or A&B continues the conversation.

3. The conference feature is not available on all servers. For more information, contact your system administrator.

4. To realize the 5-way conference, the line should be all available.

Call Forward

This phone supports static forward (always forward, busy forward and no answer forward) and dynamic forward
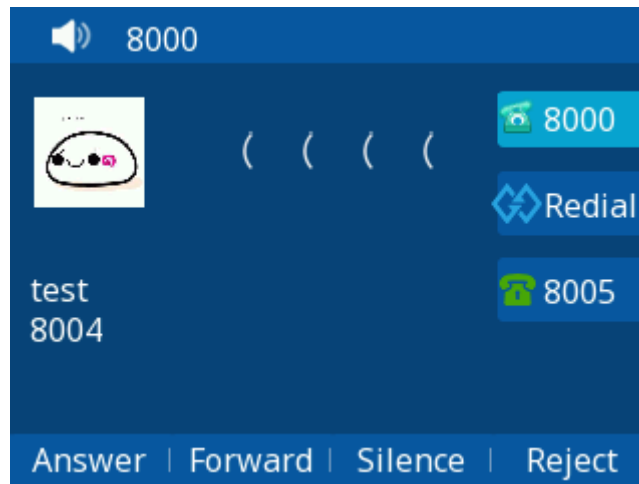

To configure static forward

To configure always forward via Phone interface:

With this feature, all incoming calls will forward immediately to configured number.

1. Press Menu→ Features→ Call Forward→ Always Forward.

2. Press ◁ and ▷ to select the Enable choice

3. Enter the Forward To number.

4. Enter the On Code and Off Code (optional).

5. Press ☑ or Save soft key to save the configuration.
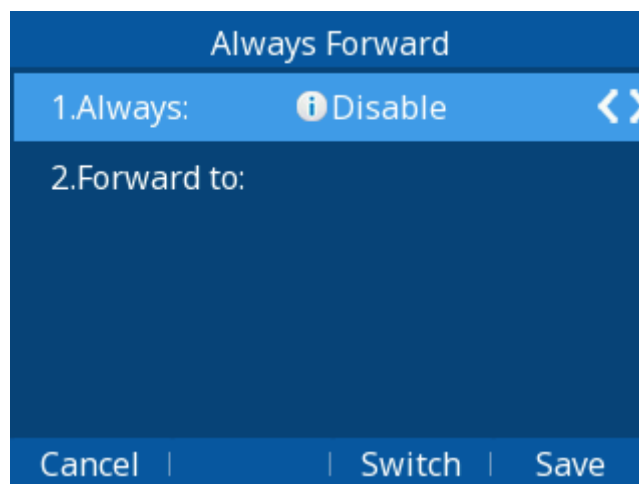

To configure busy forward via Phone interface:

With this feature, the incoming calls are immediately forwarded if the phone is busy.

1. Press Menu→ Features→ Call Forward→ Busy Forward.

2. Press ◁ and ▷ to select the Enable choice.

3. Enter the Forward To number.

4. Enter the On Code and Off Code (optional).

5. Press ☑ or Save soft key to save the configuration.
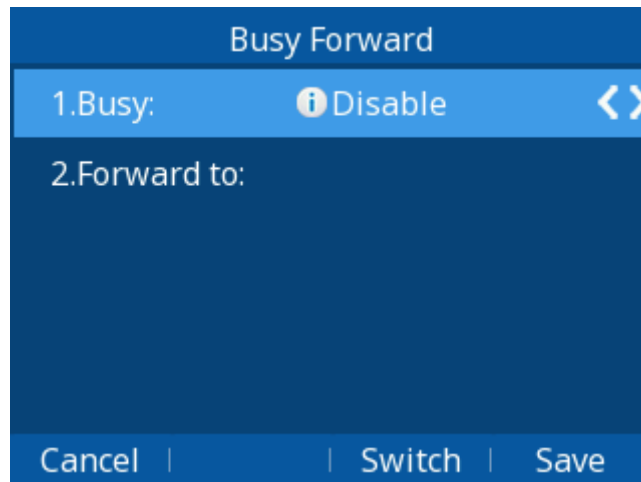

To configure no answer forward via Phone interface:

No Answer Forward: Incoming calls are forwarded if not answered after some time.

1. Press Menu→ Features→ Call Forward→ No Answer Forward.

2. Press ⬇ and ⬆ to select the Enable choice

3. Enter the Forward To number and After Ring Times.

4. Enter the On Code and Off Code (optional).

5. Press [⏎] or Save soft key to save the configuration.
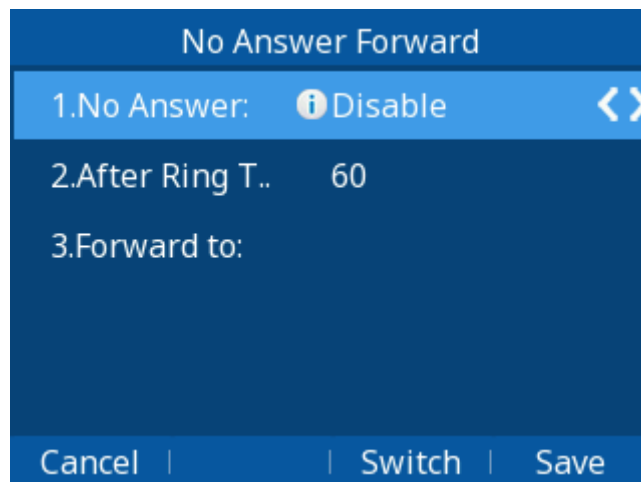

When the Forward feature is enabled, the Icon ⤴ will display on Top of the LCD.
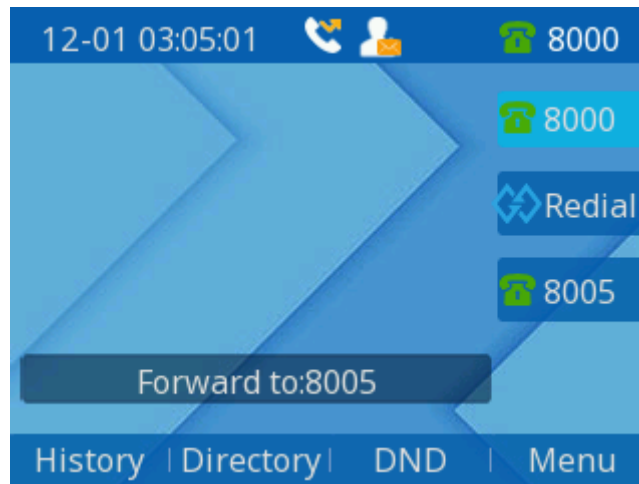

To configure Forward via Web interface

1. Setting→ Features

2. Click On for the Always/Busy/No Answer

3. Fill the Target number

4. Fill the After Ring Time

5. Fill the On Code and Off Code (optional).

6.Click [SaveSet] to save the configuration

To cancel the forward feature via Phone interface

1. Option 1: To press the ⌣ key to disable the forward feature.

2. Option 2: Press Menu→ Features→ Call Forward→ Always/Busy/No Answer Forward

   a. Press ◁ and ▷ to select the Disable choice

   b. Press ✓ or Save soft key to save the configuration.

To cancel the forward feature via Web interface

1. Setting→ Features

2. Click Off for the Always/Busy/No Answer

3. Click SaveSet to save the configuration

To configure dynamic forward

Forward an incoming call during the ringing.

1. When the phone is ringing, press Forward soft key.

2. Enter the forward number or select the desired number from Directory soft key (Precondition: local directory has one or more contacts).

3. Press ⌨ or press the Send soft key, then the call is forwarded.
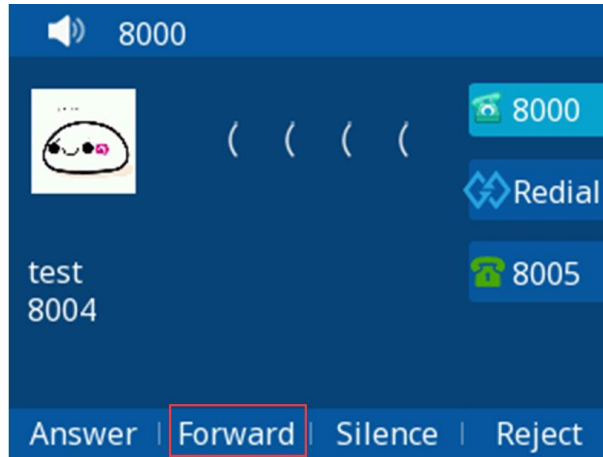

Call Return

This feature allows you to dial the last phone call you received.

To configure the Call Return via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line Key2(for example)

2. Press ▽ and ▷ key to select the Call Return in the Type field.

3. Press ✓ or Save soft key to save the configuration

To configure the Call Return via Web interface

1. Click Function Keys→ Line Key.

2. Select the desired Line Key and select Call Return in the Type field.

3. Click SaveSet to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▼	Default ▼		243	Account 1 ▼	
Key2	Call Return ▼	Default ▼			Account 1 ▼	

Call Back

When this option is set, if the phone you call is busy and does not set call waiting or voice mail, your LCD screen will prompt for call-back, as shown in figure
If you press the Callback, the phone will dial the Callback phone number.

To configure the Call Back via Web interface

1. Click Setting→ Features→ Callback .

2. Fill the Callback phone number in the Callback Code field.

3. Click [SaveSet] to save the configuration.
Call Waiting Tone

To enable the Call Waiting and Call Waiting Tone via Web interface

1. Click Setting→ Features

2. Select Call Waiting: On and Call Waiting Tone: On

To Change the Call Waiting Tone time via Web interface

1. Click Setting→ Tones

2. Change the Tone Time as you want (for example 3s)

Hide Caller ID

Just enable the unknown/hidden caller feature, by enabling Anonymous call feature thereby the receiver won't be able to know who is calling them.

To configure anonymous call via Phone interface

1. Press Menu→ Features→ Anonymous Call→ Account ID 1/ 2

2. Press ◁ and ▷ to select the Enable choice in Anonymous Call filed.

3. Enter the Call On Code (optional), Call Off Code (optional).

4. Press ✓ or Save soft key to save the configuration.
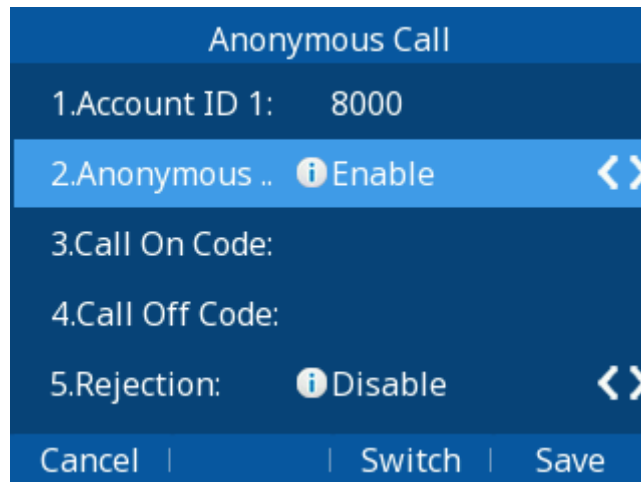

To cancel anonymous call feature via Phone interface

1. Press Menu→ Features→ Anonymous Call→ Account ID 1/ 2

2. Press ⧠ and ⧠ key to select the Disable choice in Anonymous Call filed.

3. Press ⬚ or Save soft key to save the configuration.

Reject Anonymous

If you do not want to be disturb by anonymous calls, you can set the reject anonymous call feature, so you will not hear the unknown calls

To configure rejecting anonymous call

1. Press Menu→ Features→ Anonymous Call→ Account ID 1/ 2

2. Press ⧠ and ⧠ key to select the Enable choice in Rejection filed.

3. Enter the Reject On Code (optional), Reject Off Code (optional).

4. Press ⬚ or Save soft key to save the configuration
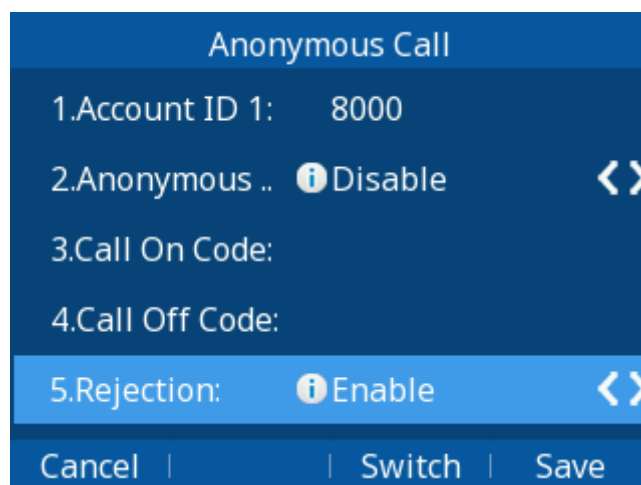

To cancel rejecting anonymous call

1. Press Menu→ Features→ Anonymous Call→ Account ID 1/ 2

2. Press ⬐ and ⬑ key to select the Disable choice in Rejection filed.

3. Press ⌨ or Save soft key to save the configuration.

Call Mute

When you use the Mute feature, the other parties will not hear your voice while you can hear their voice. Call mute applies to all modes (handset, headset, and speakerphone).
To mute the call during a call (including a conference call)

1. Press the mute key 🔇, then the mute key glows green, and the LCD display 🔇

2. To disable the mute function, press 🔇 again.

DND

When you use the DND feature, the phone is to reject all incoming calls automatically and

you can see the DND icon 🚫 shown on the Top of the LCD on idle page.

To enable DND feature via Phone interface:

Press the DND soft key when the phone is idle, and then is shown on the LCD.

To disable DND feature via Phone interface:

Press the DND soft key again, and then there is no on the LCD.

Hot Line

To configure Hot Line via Phone interface

1. Press Menu→ Features→ Hot Line

2. Enter the Number and HotLine Delay time (as present, we support off hook auto dial).

3. Press or Save soft key to save the configuration

To configure Hotline auto dial via Web interface

1. Setting→ Features.

2. Fill the number in the Hotline Number and Hotline Time-out field.

3. Click SaveSet to save the configuration.

4. Delete the Hotline Number and save the configuration, then now the Hotline auto dial is cancelled.

Auto Redial

When this option is set, if the phone you call is busy and does not set call waiting or voice mail, your LCD screen will prompt for Auto Redial, as shown in figure.
If you press OK, your LCD will prompt Auto Redial Interval and Auto Redial Times

To configure Auto Redial via Web interface

1. Click Setting→ Features→ Auto Redial

2. Select On or Off for the Auto Redial.

3. Fill the number 1~300 seconds for the Auto Redial Interval.

4. Fill the number 1~300 times for the Auto Redial Times.

5. Click SaveSet to save the configuration.

Function Key Features and Settings

The function key supports the **Line Label Length**, **Line Page Indicator**, **BLF list MODE**, **line key as cancel**, **BLF blink.**

Line Label Length: If this option is set Long label, then the label's length will be longer, it is used if the string is too long.

Line Page Indicator: Enable this option when the phone has been configured for multiple pages. For example, when current page is the first page, the second page has a BLF and BLF's status is changed, the second page's button will flash the red indicator.

UC503(G) has 12 Function Keys.

BLF blink: Turn this option on to make the BLF key blink when the monitored extension is ringing or talking.

Line

It works same as Line keys.

Line support three Mode (Default, Lock and Float)

Default mode: If there is an incoming call, the phone won't navigate to the set line key's page if the line key is set as Line type and current page is not the set line key's page.

Lock mode: The line key will reflect on the same position on every page when the line key is set as the Line type.

Float mode: If there is an incoming call, the phone will navigate to the set line key's page if the line key is set as Line type and current page is not the set line key's page.

To configure Line feature via Phone interface

1. Press Menu→ Features→ Function Keys→ Line keys as Function Keys→ Line Key1(for example)

2. Press ⬦ and ⬦ key to select the Line in the Type field.

3. Select the Account ID

4. Press ⬛ or Save soft key to save the configuration

Then the selected Line Key will work as Line.

To configure Line Feature via Web interface

1. Click Function Keys→ Line Key.

2. Select the wanted Line Key and set as Line.

3. Select the Account.

4. Click the SaveSet button to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▼	Default ▼		243	Account 1 ▼	
Key2	N/A ▼	Default ▼			Account 1 ▼	

Shared Line

Htek IP Phone supports "Shared Call Appearance" by Broadsoft and XCast standard. This feature allows members of the SCA group to shared SIP lines and provides status monitoring (idle, active, progressing, hold) of the shared line. When there is an incoming call designated for the SCA group, all of the members of the group will be notified of an incoming call and will be able to answer the call from the phone with the SCA extension registered in the group.

All the users that belong to the same SCA group will be notified by visual indicator when a user seizes the line and places an outgoing call, and all the users of this group will not be able to seize the line until the line goes back to an idle state or when the call is placed on hold (with the exception of when multiple call appearances are enabled on the server side).

In the middle of the conversation, there are two types of hold: Public Hold and Private Hold.   When a member of the group places the call on public hold, the other users of the SCA group will be notified of this by the red-flashing button and they will be able to resume the call from their phone by pressing the line button. However, if this call is placed on private-hold, no other member of the SCA group will be able to resume that call.

To enable shared call appearance, the user would need to register the shared line account on the phone. In addition, they would need to navigate to "Account"→ "Basic" and "Profile"→ "Advanced" on the webpage and set the line to "Shared Line" and "SIP Server Type", and configure the line key or Line Key as "Line" type with the desired account on webpage or LCD. If the user requires more shared call appearances, the user can configure multiple line keys (Function Keys→ Line Key) to be "Line" type associated with the account.

This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss' extension number on her phone. When there is an incoming call to the extension number of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on shared line can be placed on hold or barged in.

To enable share line via Web interface

1. Click Account→ Basic

2. Select the desired account from the pull-down list of Account in the Account field.

3. Select SCA for the Shared Line

Shared Line	Disable ▼

4. Click Profile→ Advanced

5. Select the desired profile from the pull-down list of Profile in the Profile field.

6. Select the SIP Server Type

| SIP Server Type	BroadSoft ▼

7. Click [SaveSet] to save the configuration.

To configure Line key via Phone interface

With this feature, when you have an active call, you can listen using Handset and Free-speaker, but only can use the handset to speak.
To configure the Group Listening via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line Key2(for example)

2. Press ◁ and ▷ key to select the Group Listening in the Type field.

3. Press ⏎ or Save soft key to save the configuration

To configure the Group Listening via Web interface
1. Click Function Keys→ Line Key.
2. Select the desired Line Key and select Group Listening in the Type field.

3. Click | SaveSet | to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▼	Default ▼		243	Account 1 ▼	
Key2	Group Listenin ▼	Default ▼			Account 1 ▼	

Public Hold

The key can be configured as a public hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold or resume a call.
To configure the Public Hold via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line Key2(for example)

2. Press ⎗ and ⎘ key to select the Public Hold in the Type field.

3. Press ⏎ or Save soft key to save the configuration

To configure the Public Hold via Web interface
1. Click Function Keys→ Line Key.
2. Select the desired Line Key and select Public Hold in the Type field.

3. Click the SaveSet button to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line	Default		243	Account 1	
Key2	Public Hold	Default			Account 1	

Private Hold

The key can be configured as a private hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold the call, but only the initiator can resume the call.
To configure the Private Hold via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line Key2(for example)

2. Press ⎗ and ⎘ key to select the Private Hold in the Type field.

3. Press ⏎ or Save soft key to save the configuration

To configure the Private Hold via Web interface
1. Click Function Keys→ Line Key.
2. Select the desired Line Key and select Private Hold in the Type field.

3. Click the SaveSet button to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▾	Default ▾		243	Account 1 ▾	
Key2	Private Hold ▾	Default ▾			Account 1 ▾	

Hot Desking

Hot Desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for Hot Desking is cost reduction. This feature is regularly used in places where all employees are not in the office at the same time, or not in the office for a very long time, which means their personal offices are often vacant, consuming valuable space and resources.

You can use Hot Desking on the IP phone to logout the existing accounts and then log in a new account, which allows many users to share the phone resource in different times. To use this feature, first you need to configure a Hot Desking key in the advance settings. This feature is supported on the version 1.0.3.82 or later

To configure the Hot Desking via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line

Key2(for example)

2. Press ◁ and ▷ key to select the Hot Desking in the Type field.

3. Press ⮐ or Save soft key to save the configuration

To configure the Hot Desking via Web interface:
1. Click Function Keys→ Line Key.
2. Select the desired Line Key and select Hot Desking in the Type field.

3. Click the [SaveSet] button to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▾	Default ▾		243	Account 1 ▾	
Key2	Hot Desking ▾	Default ▾			Account 1 ▾	

To use the Hot Desking feature on the user interface:
1. Press the Hot Desking key when the IP Phone is idle.
2. "Clear all other account config?" is shown on the screen, and press OK.
2. Enter the Extension number and password
3. Click Save soft key

You can see the account information which has changed.

ACD

ACD feature is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of the different personnel at the earliest point. The ACD feature on the Htek IP Phone allows the ACD system to distribute calls from large volumes of incoming calls to the registered IP phone users. To use this feature, first you should configure an ACD key in the advance settings.

To configure the ACD via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line

Key2(for example)

2.Press ⬒ and ⬓ key to select the ACD in the Type field.

3. Select the desired account in the Account ID field.

4. Press ⬒ or Save soft key to save the configuration

To configure the ACD via Web interface:

1. Click Function Keys→ Line Key.
2. Select the desired Line Key and select ACD in the Type field.
3. Select the desired account from the pull-down list of Account field.

4. Click the SaveSet button to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line	Default		243	Account 1	
Key2	ACD	Default			Account 1	

Zero Touch

You can use this key feature to configure auto provision and network parameters quickly. This feature is supported on the version 1.0.3.82 or later

To configure the Zero Touch via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line

Key2(for example)

2. Press [image] and [image] key to select the Zero Touch in the Type field.

3. Press [image] or Save soft key to save the configuration

To configure the Zero Touch via Web interface:

1. Click Function Keys→ Line Key.

2. Select the desired Line Key and select Zero Touch in the Type field.

3. Click the [SaveSet] button to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▼	Default ▼		243	Account 1 ▼	
Key2	Zero Touch ▼	Default ▼			Account 1 ▼	

To use the zero touch feature on the user interface:

1. Press the Zero Touch key when the IP Phone is idle.

2. Press the OK soft key and the IP Phone will enter the WAN Port interface; you can change the WAN Type by pressing the Navigation keys.

3. Press the Next soft key to enter Network interface, then you can configure some information.

4. Press the Next soft key again, you can configure Auto Provision information.

5. When you finish the setting, you can press the OK to accept the changes.

Note:

This feature is not available on all servers. For more information, contact your system administrator.

Multicast Paging
You can use multicast paging to quickly and easily forward out time sensitive announcements to people within the multicast group. You can configure a multicast paging key or a paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address/addresses without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address/addresses without involving SIP signaling. You can specify up to 10 multicast listening addresses.

133

Sending RTP Stream

To configure a Multicast Paging key via Phone interface

1. Press Menu→ Features→ Function Keys→ Line Keys as Function Keys→ Line

Key2(for example).

2. Press ⬦ and ⬦ or Switch soft key to select the Multicast Paging in the Type field.
3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value
field. The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

4. Press ⬚ or Save soft key to save the configuration

To configure a Multicast Paging key via Web interface

1. Click Function Keys→ Line key：

2. Select the desired Line Key and select Multicast Paging in the Type field.
3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value
field. The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

4. Click the [SaveSet] button to save the configuration.

Line	Type	Mode	Value	Label	Account	Extension
Key1	Line ▼	Default ▼		243	Account 1 ▼	
Key2	MultiCast Pagi ▼	Default ▼	224.5.6.20:2		Account 1 ▼	

Sending RTP Stream:
Press the Multicast Paging key when the phone is idle.
The phone sends RTP to a preconfigured multicast address (IP: Port). Any phone in the
local network then listens to the RTP on the preconfigured multicast address (IP:Port). For
both sending and receiving of the multicast RTP, there is no SIP signaling involved.
The Multicast Paging key LED illuminates solid green.

Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from
the pre-configured multicast address/addresses without involving SIP signaling. You can
specify up to 10 multicast addresses that the phone listens to on the network.
How the phone handles incoming multicast paging calls depends on Paging Barge and
Paging Priority Active parameters configured via web user interface.

Paging Barge

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls.
Valid values in the Paging Barge field:

● 1 to 10: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.

● Disabled: The voice call in progress will take precedence over all incoming paging calls.

Paging Priority Active

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

Multicast Codec

You can only configure the codec via Web interface.
To configure Multicast Codec via Web interface
1. Click Directory→ Multicast Paging
2. Select the desired codec from the pull-down list of Multicast Codec

3. Click the SaveSet button to save the configuration.

Listening Address

To configure multicast listening addresses via Web interface:
1. Click Directory→ Multicast Paging.
2. Select the desired value from the pull-down list of Paging Barge.
3. Select the desired value from the pull-down list of Paging Priority Active.
4. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) which the phone listens to for incoming RTP multicast in the Listening Address field.
5. Enter the label in the Label field.

6. Click SaveSet button to save the configuration.

Paging Barge	10 ▼
Paging Priority Active	Enable ▼
Multicast Codec	PCMU ▼

Index	Listening Address	Label	Multi Priority
IP Address 1	224.5.6.20:2000		1
IP Address 2			2
IP Address 3			3
IP Address 4			4
IP Address 5			5
IP Address 6			6
IP Address 7			7
IP Address 8			8
IP Address 9			9
IP Address 10			10

SaveSet   Cancel

Note:
The priorities of listening to multicasting addresses can be predefined: 1 being the highest priority, 10 with the lowest in priority order. Both the multicast paging sender and receiver's phones play a warning tone when establishing a multicast paging call. Listening to Multicasting addresses can be configurable via Web interface only.

Upgrade

Factory Reset

To set Factory Reset via Phone interface

1. Press Menu→ Settings→ Advanced Setting (default password: **admin**)→ Phone

Setting→ Factory Reset

2. Press OK soft key in the warning page.

To set Factory Reset via Web interface

1. Click Management→ Upgrade

2. Click [Reset To Factory] and then confirm the setting.
Pcap Feature

To use Pcap feature via Web interface:

1. Click Management→ Tools

2. Click [Start] and then operation the phone

3. When finishing the operation, click [Stop] and then click [Export].

4. Then you'll get the Pcap captures.
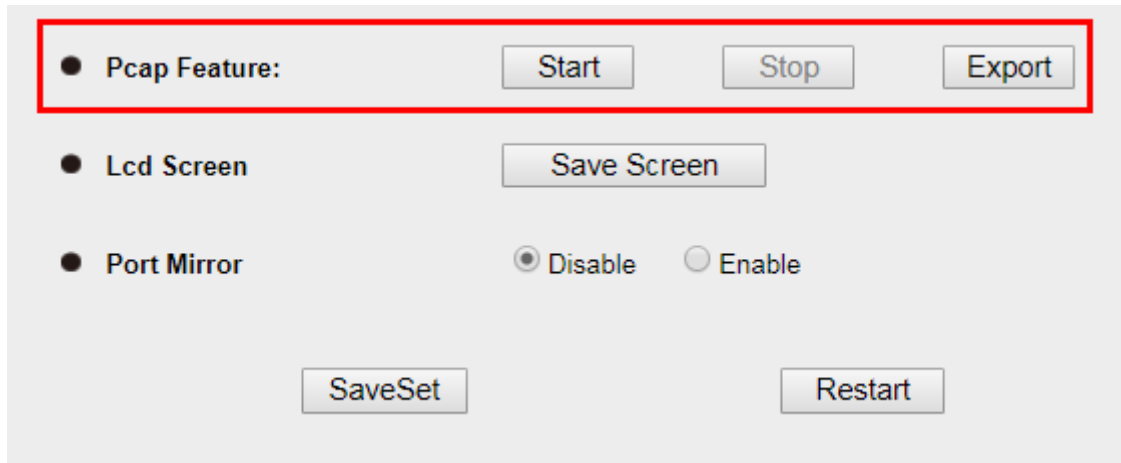

System Log

To download system log via Web interface:

1. Click Management→ Configuration

2. Select the Syslog Level
3. Click [Download] of the System Log

4. Then you'll get a txt file: syslog.txt.

📄 syslog.txt

.
Upgrade

To upgrade via HTTP, the "Management"→ "Auto Provision"→ "Firmware Upgrade"→ "Upgrade Mode" field needs to be set to HTTP, respectively. "Firmware Server Path" needs to be set to a valid URL of a HTTP server, server name can be in either FQDN or IP address format. Here are examples of some valid URL.

   e.g. firmware.mycompany.com:5688/Htek

e.g. www.mycompany.com:5688/fm/Htek

e.g. 218.2.83.110

Instructions for firmware upgrade via HTTP:

(1) End users can choose to download the free HTTP server from http://httpd.apache.org/ or use Microsoft IIS web server. Then setup HTTP server.

(2) Unzip the firmware file and put all of them under the *root/fm* directory of the HTTP server.

(3) Visit "http://192.168.0.254/fm/fw500M.rom" on localhost by browser to verify the HTTP Server. If visiting "http://192.168.0.254/fm/fw500M.rom" on another computer and it is not prompted to download fw500M.rom file on this computer, please check if the firewall is on or off (Suggest you turn off the firewall).

To configure the server path via Web interface:

1. Click Management→ Auto Provision

2. Select the upgrade mode in the Upgrade Mode field

3. Enter the Firmware Server Path and Config Server Path (192.168.0.254 is HTTP server).

4. Enter the HTTP server's username and password (optional).

5. Click the SaveSet button to save the configuration.

6. Restart the UC503(G), IP Phone will restart and auto-get firmware files from HTTP server.

NOTES:

- For large companies, we recommend to maintain their own TFTP/HTTP/FTP/HTTPS server for upgrade and provisioning procedures.
- Once a "Firmware Server Path" is set, user needs to update the settings and restart the IP Phone. If the configured firmware server is found and a new code image is available, the UC503(G) will attempt to retrieve the new image files by downloading them into the UC503(G)'s SDRAM. During this stage, the UC503(G)'s LEDs will blink fast until the checking/downloading process is completed. Upon verification of checksum, the new code image will then be saved into the Flash. If TFTP/HTTP/FTP/HTTPS fails for any reason (e.g. TFTP/HTTP/FTP/HTTPS server is not responding, there are no code image files available for upgrade, or checksum test fails, etc), the UC503(G) will stop the TFTP/HTTP/FTP/HTTPS process and simply boot using the existing code image in the flash.
- Firmware upgrade may take as long as 3 to 8 minutes over Internet, or just 1 minutes if it is performed on a LAN. It is recommended to conduct firmware upgrade in a controlled LAN environment if possible. For users who do not have a local firmware upgrade server.
- Oversea users are strongly recommended to download the binary files and upgrade firmware locally in a controlled LAN environment.

To upgrade manually via the Web configuration interface

1. Click Management→ Upgrade

2. Click [Choose File] or the blank.

3. Select the firmware (fw500M.rom) and then click [Upgrade] .

Configuration File

To download configuration file

1. Click Management→ Configuration→ Configure File

2. Click the [Download Xml File] or [Download Bin File], then
you can get a file: cfg.xml or cfg.bin.

To restore a configuration file

1. Click Management→ Configuration→ Configure File

2. Select the xxx.xml or xxx.bin file, and then Click the [Restore Xml Configuration]
or [Restore Bin Configuration], then IP Phone will reboot.

● Configure File

Download Device Xml Configuration	Download Xml File
Restore Xml Configuration	Choose File No file chosen
	Restore Xml Configuration
Download Device Bin Configuration	Download Bin File

Delete User Configuration	Delete User File

Troubleshooting

Why is the phone LCD screen blank?

- Ensure your phone is properly plugged into a functional AC outlet.
- Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
- If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
- If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
- Check if the power LED is on to ensure that the phone is powered on.

Why does the phone display "Network Unavailable"?

To resolve:
- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is functioning well.
- If the problem still persists, Contact your system administrator for more information.

Why can't I get a dial tone?

To resolve:
- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to the Phone Installation section.
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if you have) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

Where to set the tone?

You can set the tone on web interface:
- Click Setting→ Tones
- Define the Dial Tone, Ringback Tone, Busy Tone…
- For the tones, you can check with your system administrator.

Select Country	Custom ▼
Dial Tone	f1=350@-13,f2=440@-13,c=0/0;
Ringback Tone	f1=440@-19,f2=480@-19,c=2000/4000;
Busy Tone	f1=480@-24,f2=620@-24,c=500/500;
Reorder Tone	f1=480@-24,f2=620@-24,c=250/250;
Confirmation Tone	f1=350@-11,f2=440@-11,c=100/100-100/100-100/100;
Call Waiting Tone	f1=440@-13,c=300/10000-300/10000-0/0;

Syntax: f1=freq@vol, f2=freq@vol, c=on1/off1-on2/off2-on3/off3; [...]
Note: freq: 0 - 4000Hz; vol: -30 - 0dBm
