

Updating a TiVo Premiere or Premiere XL

The instructions below will guide you through the process of updating a TiVo Premiere or Premiere XL box and running the retail video demo loop. You will update the box using the supplied USB stick. **You do not need a broadband connection to complete the process.**

Total installation time is approximately 8 minutes.

- 1 Connect the TiVo Premiere box to an HDTV** using an HDMI connection.
- 2 Disconnect the power cord from the TiVo box** (if it is currently connected).
- 3 Plug the USB stick** into one of the USB ports on the back of the TiVo box.
- 4 Plug in the power cord.** The Premiere box will start to power up.
- 5 Watch the progress** of the update on the television screen:

Minute	Message displayed on screen
0:00	<i>Welcome, starting up.</i>
2:00	<i>Almost there...just a few minutes more.</i>
3:00	<i>Beginning update checks. Removing partially installed updates.</i>
5:00	<i>Installing update. Completed update. USB stick update completed.</i>
6:00	<i>You may remove the USB stick now.</i>

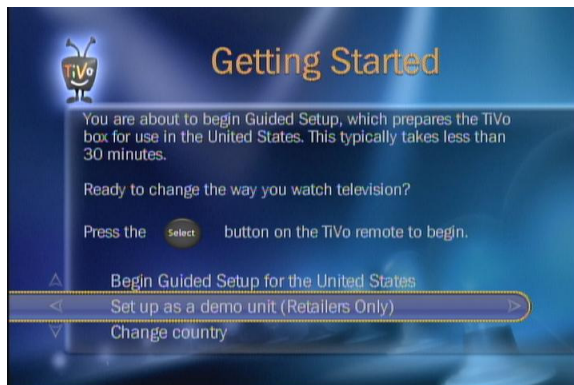

- 6 Remove the USB stick** from the TiVo box.
- 7** Approximately two minutes after you remove the USB stick from the TiVo box, a Welcome screen will be displayed. Using your TiVo remote, **follow the on-screen prompts** (as shown on the next page) to run the retail video demo loop.

(continued on reverse)

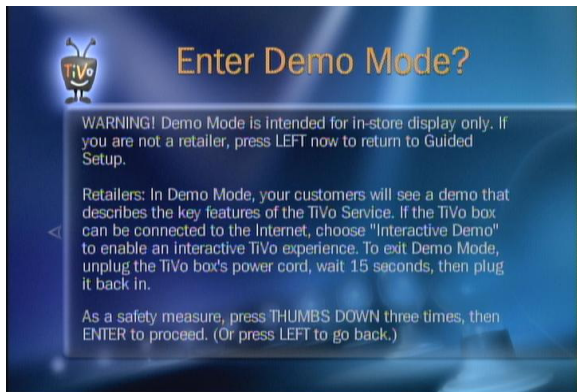

- 8 Press SELECT to choose “United States.”

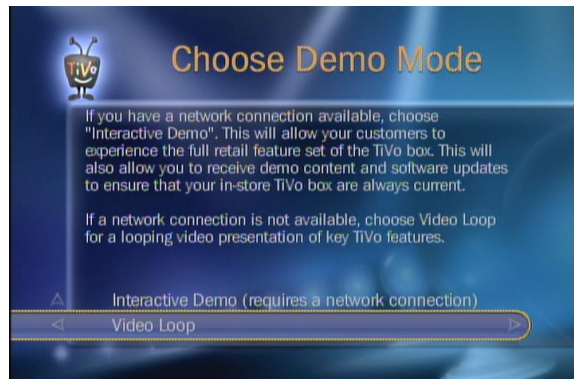

- 9 Press the DOWN arrow to highlight “Set up as a demo unit (Retailers Only)” and press SELECT.

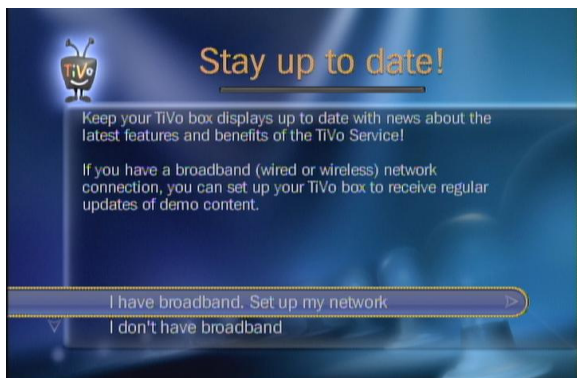

- 10 Press the THUMBS DOWN button three times, and then press ENTER.

- 11 Press the DOWN arrow to highlight “Video Loop” and press SELECT.

- 12 Press the DOWN arrow to select “I don't have broadband” and press SELECT.

- 13 Press SELECT to play the demo video loop.
