Avanti

INSTRUMENTS FOR ALIGNERS

The Art of Aligner Detailing

With these Avanti pliers it's easy to fine tune your aligners during treatment

TEAR DROP PLIER

SA-100-01

Creates a hook cut-out to hold elastics securely.

VERTICAL PLIER

SA-100-02

Creates a vertical indentation to help correct rotations.

HORIZONTAL PLIER

SA-100-03

Designed to create individual root torque by making a horizontal indentation.

HOLE PUNCH PLIER

SA-100-04

Creates a cut-out for bondable buttons and hooks to be placed directly on the tooth.

RETENTION PLIER

SA-100-05

Creates a circular indentation for increased retention in aligners and retainers.

Precision Aligner Buttons®

Try the first bondable buttons created for clear aligners

Orthodontists routinely use rubber bands with clear aligners to correct malocclusions. However, these elastics are being attached with components created for braces - not aligners. These auxiliaries too often debond or cause irritation because they have a small surface area and are intended for the centre of the clinical crown.

Here we have a new type of button that fits within the aligner cut out windows, like a puzzle piece.

Whichever aligner system you use—this patented design gives you a reliable bond due to its large surface area and contour.

Now you can reduce your unnecessary emergency patient visits with Precision Aligner Buttons.

- Base shaped to fit precisely within aligner cut outs for canines and premolars
- Maximum retention through optimal surface area and unique bonding base
- Anatomically correct to match the curvature of molar's cervical third
- Positioning dimple on button face for an explorer or scaler

NOW AVAILABLE IN CLEAR!

Reduce Emergency Visits & Save Chair Time!

TOC Intra-Oral Elastics

TOC's Flower Elastics are manufactured from the finest surgical grade natural latex and latex free rubber to ensure reliable force delivery.

- Fresh and uncontaminated due to air-tight seal
- Patient bag includes 100 lightly powdered elastics for easy use with no residue

Ortho FlexTech Retainer Wire

Ortho-FlexTech provides secure and stable long term passive retention. The patented interlocking chain design forms naturally to the lingual curvature making it easy to fit in the chair. The chain lays flat against the teeth offering improved patient comfort and lasting aesthetics due to its 14K karat gold composition.

An etched version is available for improved adhesion whilst the Stainless steel option offers increased tensile and torsional strength.
