### HMI INSTALLATION INSERT

Part # 201642-000  
November 2019

---

## Purpose

This insert provides information on how to safely install your Toshiba International Corporation power electronics product. The manual accompanying this insert includes a section of general safety instructions that describes the warning labels and symbols that are used throughout the manual. Read the manual completely before installing, operating, or performing maintenance on this equipment.

The manual, this insert, and the accompanying drawings should be considered a permanent part of the equipment and should be readily available for reference and review. Dimensions shown in the manual are in metric and/or the English customary equivalent.

Toshiba International Corporation reserves the right, without prior notice, to update information, make product changes, or discontinue any product or service identified in this publication. (See <https://www.toshiba.com/tic/industrial/uninterruptible-power-systems>.)

Toshiba and SCiB are registered trademarks of the Toshiba Corporation. All other product or trade references appearing in this manual are registered trademarks of their respective owners.

Toshiba International Corporation shall not be liable for direct, indirect, special, or consequential damages resulting from the use of the information contained within this manual.

This manual is copyrighted. No part of this manual may be photocopied or reproduced in any form without the prior written consent of Toshiba International Corporation.

## 1 Introduction

This insert provides information on how to safely install the Human–Machine Interface (HMI) Option for the G9000 Series SCiB Energy Storage System (ESS). The SCiB ESS Manual (PN 98485) includes a section of general safety instructions that describes the warning labels and symbols that are used throughout the manual. Read the SCiB ESS Manual completely before installing, operating, performing maintenance on the equipment, or taking any actions described in this insert.

Qualified personnel should read the SCiB ESS manual carefully before transporting, installing, and wiring the SCiB ESS. In addition they should have a thorough understanding of the information provided in the chapters titled:

- General Safety Instructions
- Important Safety Instructions
- Safety Precautions
- Installation Precautions

Read this SCiB ESS Installation and Operation Manual for important instructions on operating the G9000 UPS with the SCiB ESS. This insert and the accompanying drawings should be considered a permanent part of the equipment and should be readily available for reference and review.

Keep the Installation Manual and the Operation Manual near the SCiB ESS for necessary reference.

Dimensions shown in the manual are in metric and/or the English customary equivalent.

## SAVE THESE INSTRUCTIONS

## 2 Hardware Contents

The following table shows the bill of material for the HMI Option kit.

**TABLE 2.1: HMI KIT BILL OF MATERIAL**

TIC PN	Description	Quantity
201334	HMI DISPLAY 7IN WDSCRN TFT	1
200866	BRKT HMI EXOR07_RES-TOUCH	1
201639	WIRE KIT MULTI HMI SCiB	1
201624	SCiB ESS HMI INSTALLATION MANUAL	1

## 3 Installation Procedure

Refer to Figure 3.1 for Installation Overview when following the below procedure.

### 3.1 Install HMI into Mounting Bracket:

1. Locate the HMI Mounting Bracket (PN 200866) and remove from packaging. (Figure 3.2 & Figure 3.3)
2. Locate the HMI Display (PN 201334). (Figure 3.4 & Figure 3.5)
3. Remove HMI Display from packaging, keeping the (4) mounting clips with screws available.
4. Slide HMI Display (PN 201334) onto HMI Mounting Bracket (200866). Ensure you can clearly read the connection ports on the backside of the HMI screen, this will indicate you have placed the screen in its proper orientation. (Figure 3.6)
5. Secure the (4) clips onto the HMI by aligning them to the slots on the HMI screen, and tightening the provided bottom head screws. Follow torque recommendations given in figures. (Figure 3.8 – Figure 3.10)
6. Assembly should resemble Figure 3.11 when completed.

### 3.2 Install HMI assembly onto ESS Cabinet:

7. Remove SCiB Cover Plate, be sure to retain the washers, locks, and nuts for HMI installation. Bolts remain on the door. (Figure 3.12–Figure 3.14)
8. Remove protective film on HMI screen.
9. Mount the HMI assembly onto the door. Ensure HMI connections are located on the bottom for proper orientation.
10. Secure the assembly to the door by utilizing the washers, locks, and nuts previously removed. Be sure to follow the drawing attached to this instruction guide. (Figure 3.15 & Figure 3.16)

### 3.3 Wiring Connections:

11. Refer to wiring schematic (Figure 3.20) to determine wire terminations for following steps.
12. Use 78704 to connect the HMI to the communication port on (90700) board. Follow LED wiring as a guide for routing and anchoring. (Figure 3.17 & Figure 3.19)
13. Use 78703 to connect HMI for power and ground. Ground conductor will connect to the Door-GND terminal located at the bottom of the Door by utilizing the NRG M5 Termination. Follow LED Wiring as a guide for routing and anchoring the power cable to TB4. (Figure 3.18)

\* WIRES TO BE COILED, BAGGED AND PLACED IN BOX.

**Notes:**

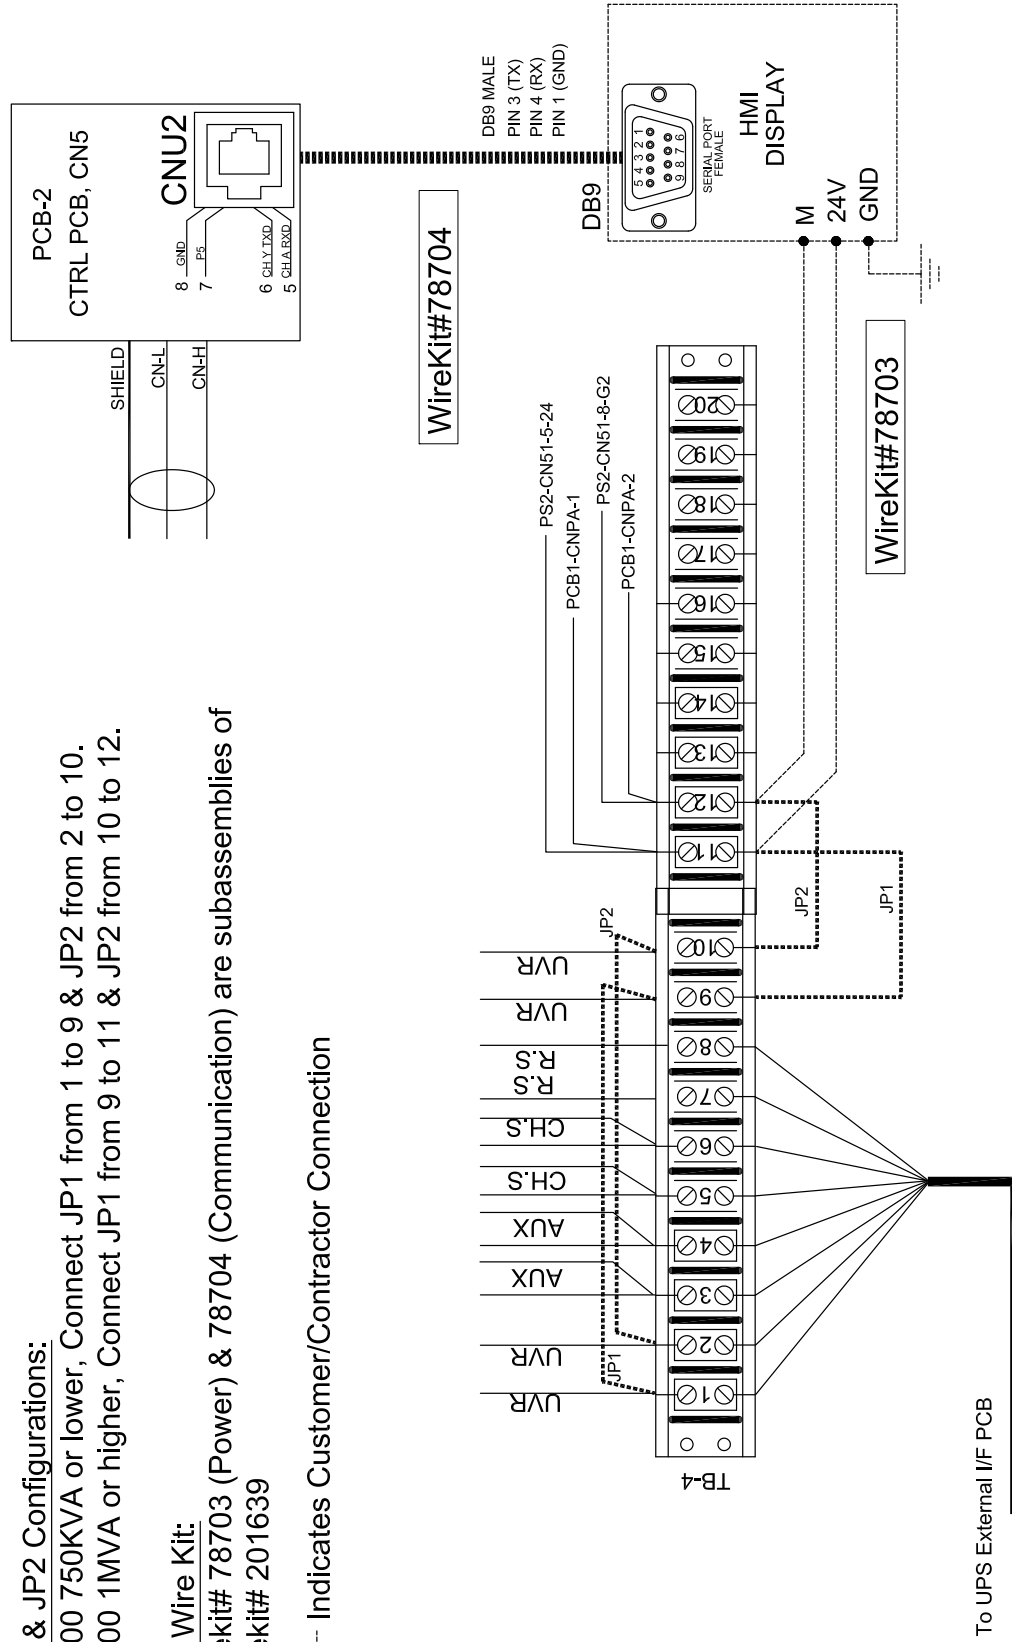

**JP1 & JP2 Configurations:**

G9000 750KVA or lower, Connect JP1 from 1 to 9 & JP2 from 2 to 10.  
 G9000 1MVA or higher, Connect JP1 from 9 to 11 & JP2 from 10 to 12.

**HMI Wire Kit:**

Wirekit# 78703 (Power) & 78704 (Communication) are subassemblies of Wirekit# 201639
