<i>Provide contact information to be used for RFP solicitation related matters.</i>			
Contact Person:	Nader Tirandazi	Title:	Managing Partner
Phone:	978.261.6100	Alternate Phone:	858.342.6665
Email:	ntirandazi@lsiconsulting.com		

CONFIRMATION OF REDACTED COPY
<input checked="" type="checkbox"/> YES, a redacted copy of submission documents is enclosed.
<input type="checkbox"/> NO, a redacted copy of submission documents is <u>not</u> enclosed. I understand a full copy of non-redacted submission documents will be released if requested.
<i>Note: If a redacted copy of the submission documents is not provided with Prospective Contractor's response packet, and neither box is checked, a copy of the non-redacted documents, with the exception of financial data (other than pricing), will be released in response to any request made under the Arkansas Freedom of Information Act (FOIA). See RFP Solicitation for additional information.</i>

ILLEGAL IMMIGRANT CONFIRMATION
By signing and submitting a response to this <i>RFP Solicitation</i> , Prospective Contractor agrees and certifies that they do not employ or contract with illegal immigrants and shall not employ or contract with illegal immigrants during the term of a contract awarded as a result of this RFP.

ISRAEL BOYCOTT RESTRICTION CONFIRMATION
By checking the box below, Prospective Contractor agrees and certifies that they do not boycott Israel and shall not boycott Israel during the term of a contract awarded as a result of this RFP.
<input checked="" type="checkbox"/> Prospective Contractor does not and shall not boycott Israel.

An official authorized to bind the Prospective Contractor to a resultant contract shall sign below.

The signature below signifies agreement that any exception that conflicts with a Requirement of this RFP *Solicitation* may cause the Prospective Contractor's proposal to be rejected.

Authorized Signature: _____ Title: Managing Partner _____
Use Ink Only.

Printed/Typed Name: Nader Tirandazi _____ Date: November 23, 2020 _____

SUBMISSION REQUIREMENTS CHECKLIST

Per the solicitation, the following items **must** be submitted with the Prospective Contractor's proposal:

- Proposal Signature Page*
- Proposed Subcontractors Form*
- Information for Evaluation*
- Exceptions Form, if applicable*
- Official Solicitation Price Sheet, sealed separately*

It is strongly recommended that the following items are also included with the Prospective Contractor's proposal:

- EO 98-04: *Contract and Grant Disclosure Form*
 - Copy of Prospective Contractor's *Equal Opportunity Policy*
 - Signed addenda, if applicable
-

PROPOSED SUBCONTRACTORS FORM

- **Do not** include additional information relating to subcontractors on this form or as an attachment to this form.
 - Prospective Contractor **shall** complete and submit the *Proposed Subcontractors Form* included in the *Technical Proposal Packet*.
 - Additional subcontractor information may be required or requested in following sections of this *RFP Solicitation* or in the *Information for Evaluation* section provided in the *Technical Proposal Packet*. **Do not** attach any additional information to the *Proposed Subcontractors Form*.
 - The utilization of any proposed subcontractor is subject to approval by the State agency.

PROSPECTIVE CONTRACTOR PROPOSES TO USE THE FOLLOWING SUBCONTRACTOR(S) TO PROVIDE SERVICES.

Type or Print the following information

Subcontractor's Company Name	Street Address	City, State, ZIP

PROSPECTIVE CONTRACTOR DOES NOT PROPOSE TO USE SUBCONTRACTORS TO PERFORM SERVICES.

E.1 MINIMUM QUALIFICATIONS

1. Describe your company’s experience providing services such as those described in this RFP and how that experience meets or exceeds the Contractor Minimum Qualifications set forth in Section 2.4. Include details on your company’s status as an SAP Partner Center of Expertise.

5

Founded in 1998, from the first two SAP Public Sector implementations in the U.S.: The City of Phoenix and Massachusetts Institute of Technology, Our Firm, an S-Corporation, incorporated in MA, is an SAP Systems Integrator and Certified Services and Development Partner, that was created with the intent of offering high impact SAP services for the Public-Sector market, with specific focus on Public Sector Finance, Procurement, Analytics, HANA Technologies, Ariba, Concur HCM and SuccessFactors and Public-Sector Budgeting. Our Firm has grown over the last 22 years into a national practice while expanding our capabilities of SAP Public-Sector services to State, County, Municipal, K-12, Higher Education & Research, Healthcare, Federal & DoD, Sport and Entertainment organizations.

Our Firm, as an implementation partner, presents the DFA-OIS with the right choice to get the job done on time, in scope and on budget through a careful, thoughtful, well-articulated approach to an SAP implementation. We bring important and unique strengths and capabilities to this project including:

- Our business and IT thought leadership and knowledge of the public sector
- Our re-useable intellectual capital from years focused as industry professionals and as consultants, crystallized in our peerless on time and on budget track record of SAP implementations, as well as our **best practice templates**
- Our proven ability to provide deep support for the scope of services in the RFP
- Our long standing executive relationship with SAP Public Services, Inc. SAP Labs (product development) and SAP Global Support Services
- Our Official SAP PartnerEdge Gold status for Services and Development and an Official Value-Added Reseller of SAP Software

Through our dedicated and seasoned SAP Public-Sector consultants, and technical solution architects, as well as access to hundreds of SAP-certified contractors, Our Firm is well positioned to deliver services on time, and on budget. Our Firm has approximately 300 employees with access to over 100 expert seasoned consultants and our employee count remaining steady throughout the last three years.

Our Firm’s customers (past and current) include the following (representative list):

Our Firm has had our preferred vendor status with SAP Public Services since our inception in 1998, and remains a certified SAP Services and Development Official Gold Partner and Value Added Reseller today as a niche vendor specializing exclusively in the implementation and support of SAP Public Sector functionality. Below is our SAP Partner Profile:

Figure 1: SAP Partner Profile for Our Firm

Our Firm was a principal participant in the design and development of the Funds Management (FM) module, which forms the heart of SAP’s Public-Sector Management solution. Our Firm’s founders and managing partners worked with much of the senior management at SAP well before the Public Services business unit of SAP was formed, and enabled the establishment of SAP Public Services solutions in the US local government and higher education markets.

Our Firm, on the recommendation of SAP executive management, was brought in to support SAP America at the City of Phoenix, the first local government implementation of SAP in the U.S.

Our Firm is widely considered to be the SAP Public Sector REFX, Finance, Fund and Grant Management, Budget, Procurement, HR and Business Analytics subject matter experts. We have implemented funds

management and fund accounting using the Budget Control System in dozens of separate implementations and have helped many public-sector organizations optimize their SAP Public Sector solution. We have also implemented SAP's Grants Management, Public Sector Collections and Disbursements (Contract Accounting), Biller Direct (on-line bill payment), Treasury & Risk Management, Cash Desk, Bank Accounting, Project Systems, Plant Maintenance (now Enterprise Asset Management), and Supplier Relationship Management functionality as well as Human Capital Management and Business Intelligence (SAP Business Warehouse as well as SAP Business Objects) for dozens of US public sector clients. In addition, Our Firm brings together a team of experienced consultants and real-world professionals for best in practice Ariba implementations and ROI realizations.

Our Firm provided both technical as well as business domain expertise in the development of SAP's Best Business Practices configuration for U.S. Public Sector. Our solution for automated, fully-formatted GASB 34 financial statements has been selected for presentation at national conferences as well as at the SAP Americas User Group ("ASUG") Annual Conference and North American Public-Sector Symposium, as well as at the Annual Government Financial Officer's Association (GFOA) conference.

Our Firm brings a cadre of public sector experts to our implementation team, featuring implementation experience from such clients as Houston Independent School District, City of San Diego, Duke University, University of Kentucky, Los Angeles Unified School District, State of South Carolina, Amtrak, Santa Clara County, San Bernardino County, CA, and the Australian Federal Government, among others.

Our Firm is the only SAP partner that has implemented SAP Budgeting and Planning for public sector based on SAP's revolutionary HANA platform. Our Firm has implemented many operational and strategic solutions over the years, recycling business process and technical expertise into future iterations of SAP solutions and implementations, as well as our proprietary accelerators.

Built specifically to serve public sector organizations, Our Firm is organized by Centers of Excellence (CoE's) or functional and technical practices that are designed to bring high impact and value-added services to our clients in a cohesive, well managed approach.

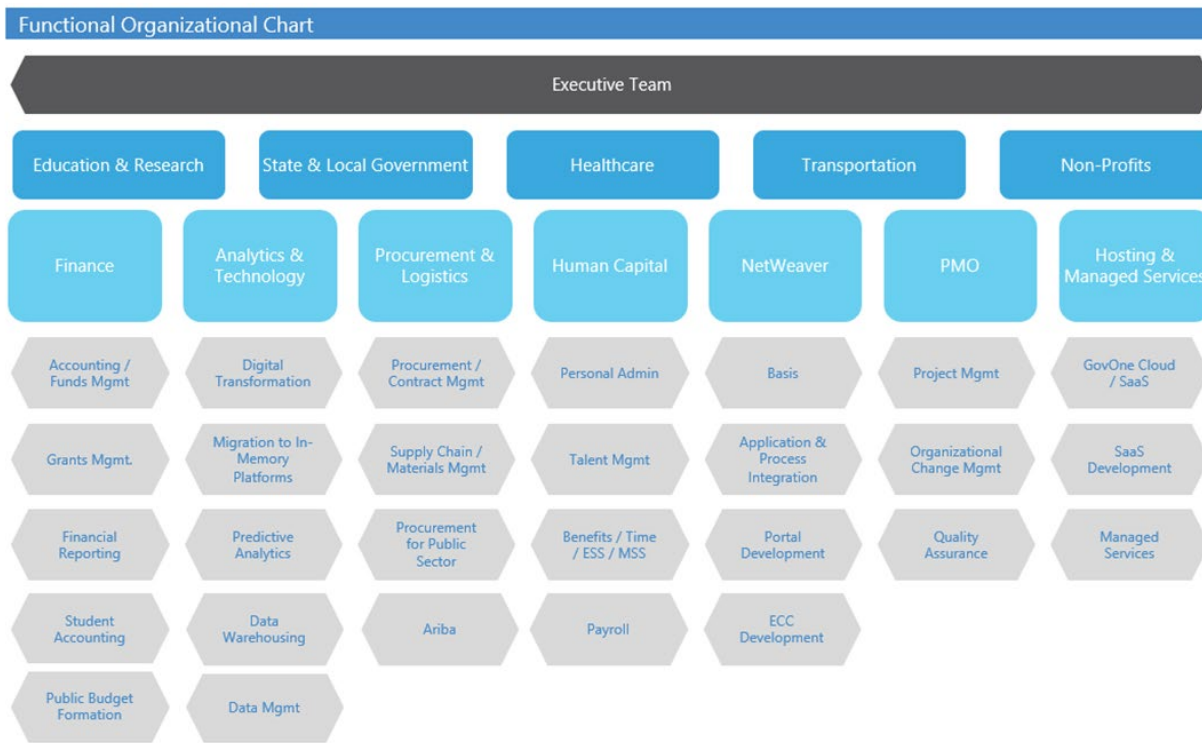

Figure 2: Organization Structure

Our Firm has provided product design, training design and delivery, and implementation consulting services for SAP customers since the establishment of SAP Public Services Inc. We are frequently referred to within SAP circles as “the consultants’ consultants.”

When it comes to HANA migration and development, our team has been successful in implementing with such clients as Air University (U.S. Air Force), City of Palo Alto, Clark County, Colorado Department of Transportation, Duke University, Eskenazi, Massachusetts Institute of Technology Lincoln Labs, the New York Knicks basketball team, the State of Nevada, the State of Arkansas, the University of Cincinnati, the University of Kentucky, Penn State University, Weill Cornell Medicine, and more. Our client list keeps growing as all of our clients are referenceable. 95% of Our Firm’s consultants held Public Sector jobs before becoming Public Sector solution consultants. Our consultants have walked in your shoes and understand your unique business processes. We are confident that you will find that we have assembled the most competent and experienced team of SAP professionals available today.

2. Provide names, contact information, and contract details for at a least three (3) government entities in the United States for whom you have successfully provided services of a similar size, complexity, and scope to this engagement, that have either been completed within the last five (5) years or are active projects. At minimum, one (1) of the references provided **must** be for an SAP CLM implementation. Each reference chosen should clearly demonstrate the Prospective Contractor’s ability to perform the Scope of Work described in the RFP.

E.2 DESIGN

1. Provide examples of Project Design work products. The examples should demonstrate the Prospective Contractor has a thorough understanding of all activities required to seamlessly design the proposed solution. 5

Our appendices have several sample Project Design work products that show an understanding of the activities required to seamlessly design our proposed solution.

Please see Appendix A_Lease Accounting Interface Process_Sample Document.

Please see Appendix B_CLM-Blueprint Design Document_Sample Document.

Please see Appendix C_CLM-Configuration_Sample Document.

E.3 IMPLEMENTATION

1. Provide an Implementation Plan. The Implementation Plan should demonstrate that the Prospective Contractor has a thorough understanding of all activities required to seamlessly implement the proposed system. The proposed Implementation Plan must address and meet or exceed all requirements set forth in Section 2.8 of the RFP. If proposing an alternative approach, please include at a minimum, a detailed description of the approach, pros/cons and expected outcomes of utilizing the alternative approach.

E.10 PROJECT STATUS REPORT

1. Provide examples of Project Status Reports. The examples should communicate current activities, issues, risks, resolutions and overall timeline of the project at a minimum. The examples should demonstrate the Prospective Contractor has a thorough understanding of all activities required to manage the project. Reports **must** address and meet or exceed all requirements set forth in Section 2.15 of the RFP.

5

We have provided examples of Project Status Reports that are in our appendices:

Please see Appendix F_Sample Weekly Status Report_Exec Status Report.

Please also see Appendix G_Sample Weekly Status Report_Project Management.

E.11 CONTRACTOR PROJECT TEAM

1. Provide a proposed Staffing Plan. Include key staff members required by Section 2.18 of the RFP and any additional key staff being proposed by the Contractor. Provide resumes for all key staff members. Proposed plan **must** at minimum meet all requirements set forth in Section 2.18 of the RFP.

5

E.12 PAYMENT MILESTONES

1. The State described the preferred payment milestone schedule in Section 2.21 of the RFP. Please describe your organization's suggested milestone schedule and why you feel it is a better approach.

5

EQUAL OPPORTUNITY POLICY

Our Firm EEO POLICY

EQUAL EMPLOYMENT OPPORTUNITY

Our Firm is an Equal Opportunity Employer and do not discriminate on the basis of actual or perceived race, creed, color, religion, alienage or national origin, ancestry, citizenship status, age, disability or handicap, sex, marital status, veteran status, sexual orientation, arrest record, or any other characteristic protected by applicable federal, state or local laws. Our management team is dedicated to this policy with respect to recruitment, hiring, placement, promotion, transfer, training, compensation, benefits, employee activities and general treatment during employment.

Our Firm will endeavor to make a reasonable accommodation to the known physical or mental limitations of qualified employees with disabilities unless the accommodation would impose an undue hardship on the operation of our business. If you need assistance to perform your job duties because of a physical or mental condition, please let your supervisor know.

Our Firm will endeavor to accommodate the sincere religious beliefs of its employees to the extent such accommodation does not pose an undue hardship on your Our Firm's operations. If you wish to request such an accommodation, please speak to your supervisor.

Any employees with questions or concerns about equal employment opportunities in the workplace are encouraged to bring these issues to the attention of the supervisor. Employees may also contact the Our Firm at 978-295-2038. Our Firm will not allow any form of retaliation against individuals who raise issues of equal employment opportunity. To ensure our workplace is free of artificial barriers, violation of this policy will lead to discipline, up to and including discharge.

SIGNED ADDENDA

Our Firm acknowledges receipt of Addendum 1

Nader Tirandazi

Question ID	RFP Reference (page number, section number, paragraph)	Specific RFP Language	Question	Answers
1	Introduction 1.1	The Office of State Procurement (OSP) issues this Request for Proposal (RFP) on behalf of the Arkansas Department of Finance and Administration (DFA) - Office of Information Services (DFA-OIS) to obtain proposals and a contract for implementation services for the SAP Contract and Lease Management (CLM) functionality in the on-premise Arkansas Administrative Statewide Information System (AASIS) to comply with Government Accounting Standards Board (GASB) Statement 87.	Is the state willing to consider implementing GASB 87 compliant solutions that are not SAP?	No. The State already owns the SAP solution. This RFP is for Implementation Services only.
2	page 2, Section 1.4, Paragraph A	<i>Answers to Questions Posted to OSP website*</i>	Will addenda be available at the following web address: https://www.arkansas.gov/tss/procurement/bids/bid_info.php?bid_number=SP-21-0025 or another location? If so, what exactly is the location? Also, as of 11/5/2020, the webpage at the above link mentions that this RFP has been amended. Is there an associated document for Vendors to review, and if so, where is it located?	Yes, the Q&A and Addendum will be available at the referenced link. A previous update was made to correct a file name, which triggered the amended status.
3	page 3, Section 1.7, Paragraph A.1 - in conjunction with Official Solicitation Price Sheet	<i>Responses within the Information for Evaluation and Exceptions sections must not contain the Prospective Contractor's name or any other identifiers, including without limitation names of staff members, projects, products, and addresses.</i>	Is it the expectation of the DFA that our consultant resumes also have no names, (including corporation name) listed (ie instead they will be Consultant A, B and so on?) Should, thus, the Official Solicitation Price Sheet (where the example shown has a consultant name listed as "John Doe") also only include identifiers such as Consultant A, B and so on without actual names? Does the limitation on use of Contractor name include all sample training plans, work plans, SLA's, essentially anything that is meant to answer to the Information of Evaluation , even if these items are attached as an Appendix? Does this also mean there is a recommended nomenclature for our submitted file names, and if so, what is the recommendation?	Yes, the State's expectation is that company and resource names will not be revealed in the Contractor's technical response. This includes but is not limited to sample plans, work plans, and any items included as an appendix. OSP will rename electronic files appropriately before disseminating to evaluators. Contractors may list resources by name on the Official Solicitation Price Sheet, as pricing will not be opened until technical evaluation is complete.
4	Page 4 of 25 , Article 1.7 3 (iii)	Proposed Subcontractors Form.	Can a subcontractor/independent consultant be listed by multiple Prime vendors as their subcontractor or does a subcontractor/consultant has to work with only one Prime Vendor?	Subcontractor(s) can be associated to multiple Contractor responses. Only one Prime Contractor will be awarded.
5	Section 2.2	Project Scope	Has the Posting Schema for GASB 87 Accounting entries been finalised. If yes, can it be shared?	No. While we have a general idea on what the entries will be, we have not established the necessary general ledger accounts at this time. We anticipate creating those general ledger accounts during the design stage.
6	Section 2.2	Project Scope	Does State of Arkansas have Lease Out Scenarios applicable as well?	The State serves as both lessor and lessee.

7	page 6, Section 2.2, Paragraph A	<i>Implementation will be limited to only the functionality required to support GASB-87 compliance from the initial recording of the Lease Contract to the eventual posting of accounting entries to record the assets and liabilities associated with the lease and the periodic payments, interest, and depreciation required to fully account for the lease in accordance with GASB 87.</i>	How and where are the current leases that are in scope (RE/Auto/Equipment) tracked (Excel/Legacy systems)?	The CAFR section has maintained the inventory of Leases in Excel.
8	page 6, Section 2.2, Paragraph B	<i>Outlined below is a list of CLM use cases that must be included and defined in the Business Development Blueprint Design.</i>	Does the scope include triggering SAP workflow for lease approvals and amendments?	No
9	page 6, Section 2.2, Paragraph B.1	<i>Building Lease – State Owns and Manages the Building and rents to either another State Agency or to an External Entity</i>	Leases with External Entity: Will billing and AR process be done from CLM? What is the approximate number of leases? Leases with State Agency: Is this internal charge to cost center/fund center? What is the approximate number of leases?	For both Internal and External Leases, during the Explore Phase, we will evaluate standard functionality and determine its fit for use. See Question #11 for information regarding number of leases.
10	page 6, Section 2.2, Paragraph B.2	<i>Building Lease – non state-owned building and the State agencies lease the space</i>	Will payment processing and vendor payments initiated from CLM? What is the approximate number of leases?	For both Internal and External Leases, during the Explore Phase, we will evaluate standard functionality and determine its fit for use. See Question #11 for information regarding number of leases.
11	page 6, Section 2.2, Paragraph B.6	<i>Multi-year Lease where equipment is returned and replaced with new machinery every year of the lease</i>	What is the approximate number of leases?	Approximately 575 based on operating and capital leases currently listed on 2019 schedules. The actual number will likely be less once analysis is done to determine which would meet GASB criteria for recognition as lease asset and liability.
12	page 6, Section 2.2, Paragraph B.7	<i>Land Lease</i>	Are easements part of CLM scope?	Yes. Most though are not expected to meet GASB criteria for recognition.
13	page 6, Section 2.2, Paragraph B.8	<i>Building and equipment acquisitions funded by Capital Leases provided by Component Units, this project is responsible for the Lessee side of these Leases and providing a basis for reconciliation to the Component Unit's reporting of the Lessor's side of the lease.</i>	What is the approximate number of SAP company Codes involved with all the leases?	One Company Code which is the State of Arkansas
14	Section 2.6	Technology Overview	Can the State provide estimates on the following numbers ? i. Real Estate Leases ii. Equipment Leases iii. Any other type of Leases	See Question #11.
15	Section 2.6	Technology Overview	Does the State of Arkansas use PSCD or any other Industry Solution?	No.
16	Section 2.6	Technology Overview	Are there any major Customization or Enhancements done in existing FICO landscape which can impact CLM postings?	Yes, AASIS is a highly customized solution. During the explore phase, we will resolve any conflicts with existing customizations

17	page 13, Section 2.8, Paragraph C.1	<i>DFA expects to complete implementation by September 30th, 2021. The Prospective Contractors must develop a project timeline in their development of a work plan.</i>	Is the latest date of Go-Live by Sep 30th?	The State anticipates that support for CAFR reporting will be required around the September timeframe. Implementation of the Contract Lease Management functionality can be deployed in advance of that. The Contractor work with the State to develop a workplan that makes sense from a Project perspective.
18	page 8, Section 2.6, Paragraph C.3 <u>System Software</u>	<i>All components of the current ECC and BW are migrated to HANA.</i>	Is there a upgrade to S4/HANA planned for the near future?	This information is not relevant to responding to this RFP.
19	page 12, Section 2.6, Paragraph C.3.b	<i>Third party applications used by AASIS are listed below: a. BSI TaxFactory b. Vertex</i>	Does the scope include tax calculation with integration to Vertex?	Yes
20	Section 2.8	Implementation	Does State of Arkansas need Modified Accrual or Full Accrual method of Postings/Implementation?	The State of Arkansas requires both Modified and Full Accrual accounting for CAFR reporting.
21	Page No. 17 of 25, Article 2.14 A	The Contractor shall propose a suitable project manager/team with diversified expertise to meet the requirements of the State. The manager/team shall provide overall project management throughout the life cycle of the project to ensure successful completion on time. Project management must include, at minimum, the following	Do we need to provide resumes If yes, do we need to provide resumes of all the team members or only the resume of the Project Manager.	Yes, please provide resumes for all team members.
22	EO 98-04: Contract and Grant Disclosure Form	The file on the portal is corrupt.	The link provided on the website for the Contract and Grant Disclosure Form : https://www.arkansas.gov/tss/procurement/bids/get_document.php/popup?doc_id=16193&doc_type=PDF yields a corrupt pdf file. Would the DFA please reupload this strongly recommended document.	Yes, please try the file again.

VOLUNTARY PRODUCT ACCESSIBILITY TEMPLATE

Introduction to VPATs: SAP ERP Flexible Real Estate Management SAP enhancement package 6 for SAP ERP 6.0

Document Classification: Customer

To accurately describe the accessibility capability of the application SAP ERP Flexible Real Estate Management SAP enhancement package 6 for SAP ERP 6.0, more than a single VPAT is needed. Below is a list of VPATs associated with Flexible Real Estate Management.

List of VPATs for SAP ERP Flexible Real Estate Management SAP enhancement package 6 for SAP ERP 6.0:

[Flexible Real Estate Management - SAP GUI for Windows](#)

[Flexible Real Estate Management - Web Dynpro for ABAP](#)

**SAP ERP Flexible Real Estate Management SAP enhancement package 6 for SAP ERP 6.0 (SAP GUI for Windows 7.20)
Voluntary Product Accessibility Template® (VPAT®)**

Document Classification: Customer

Date: 05.12.2012

Name of Product: SAP ERP Flexible Real Estate Management SAP enhancement package 6 for SAP ERP 6.0

[See also the details in the attached sheet 'Details for SAPGUI W720 NW703', which are part of this Voluntary Product Accessibility Template.](#)

Application Content:

This VPAT covers the following SAP-ERP components:
Flexible Real Estate Management

References:

If the content is displayed via BI Business Explorer, please refer to the status document of BI concerning its accessibility status.

If the BI content is displayed via Xcelsius dashboard, please refer to the status document of Xcelsius concerning the accessibility status of its dashboard.

If the SAPGUI for Windows content is displayed via web, please refer to the status document of SAPGUI for HTML concerning its accessibility status.

The status of Dynamic Documents used in the application, is not covered by this status document. For the technical status of Dynamic Documents please refer to the status document of Dynamic Documents.

Contact for more information: accessibility@sap.com

Testing Environment: SAP enhancement package 3 for SAP NetWeaver® 7.0 (Support Package Stack 01), SAP GUI for Windows version 7.20 Patch 5, SAP GUI Screenreader Extension version Patch 30, JAWS® for Windows® version 11.0.1447 with English speech output, Microsoft® Windows® XP

Support for accessibility feature of this product requires SAP NetWeaver. To receive the document "Front-End Requirements and Infrastructure for Accessibility" as well as the accessibility status document for SAP NetWeaver, please contact SAP using the e-mail address above.

The result shown on this VPAT is based on activation of all relevant Business Functions. De-activation of business functions may yield different accessibility results.

Voluntary Product Accessibility Template - Summary Table		
Criteria	Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems	supported with exceptions	See below for details.
Section 1194.22 Web-based intranet and internet information and applications	not applicable	
Section 1194.23 Telecommunications Products	not applicable	
Section 1194.24 Video and Multi-media Products	not applicable	
Section 1194.25 Self-Contained, Closed Products	not applicable	
Section 1194.26 Desktop and Portable Computers	not applicable	
Section 1194.31 Functional Performance Criteria	supported with exceptions	See below for details.
Section 1194.41 (a) Information, Documentation and Support	supported with exceptions	See below for details.

Voluntary Product Accessibility Template - Section 1194.21 Software Applications and Operating Systems - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	supported with exceptions	Graphic: Graphics without meaning are included in the tabchain. Statusbar: Not reachable via keyboard on Vista and newer operating systems. Screen reader support provided via keyboard hotkey. Options Dialog: Some options are not included in tab chain (Classic Theme configuration).
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	not applicable	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	supported	

(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	supported with exceptions	Date picker: Screen reader announcement about value help functionality is missing and navigation via keyboard is not as expected. SAP Logon: The filter field is incorrectly announced, the cells in the list of connection entries are not associated with their header cells, the "Close Window" entry in the menu is not announced and the dropdown listboxes in the dialogs for creating new entries do not announce the index of the focused item. Options Dialog: Some buttons labelled "*" are not announced and the number of items contained in a tree node are not announced. Identical Icons or Images are not used in a consistent manner throughout the whole Application.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	supported with exceptions	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	not applicable	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	supported	
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	not applicable	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	supported	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	supported	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	supported	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	supported with exceptions	Date picker: Screen reader announcement about value help functionality is missing and navigation via keyboard is not as expected. SAP Logon: The filter field is incorrectly announced, the cells in the list of connection entries are not associated with their header cells, the "Close Window" entry in the menu is not announced and the dropdown listboxes in the dialogs for creating new entries do not announce the index of the focused item. Options Dialog: Some buttons labelled "*" are not announced and the number of items contained in a tree node are not announced. Table control: Table columns which are defined as invisible are still visible and might not have a column header. Graphic: Graphics without meaning are included in the tabchain. Statusbar: Not reachable via keyboard on Vista and newer operating systems. Screen reader support provided via keyboard hotkey. Options Dialog: Some options are not included in tab chain (Classic Theme configuration). Short description located on the right of an input field is not assigned as "label right" on some screens. Label Heuristic: In some special cases it may happen that for a dynpro element (e.g. button) a left label is announced that does not belong to the element. SAP Shortcut property dialog: A button is labelled "... " and no announcement is made. Symbol: Within Accessibility mode, screen readers might not be able to interpret some list symbols (SAPDings symbol font). The user is able to display the list symbols as letters via setting in the SAP GUI options dialog. With this setting the screen reader announcement is proper. Customize Layout Icon: Screen reader announcement is wrong ("Button unavailable") in SAP Signature Theme. A change of setting of any control element may cause a change of focus Change of context: In some cases when a UI Element receives focus the focus position automatically changes to another UI Element.

Voluntary Product Accessibility Template - Section 1194.22 Web-based Intranet and Internet information and applications - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	not applicable	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	not applicable	
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	not applicable	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	not applicable	
(e) Redundant text links shall be provided for each active region of a server-side image map.	not applicable	
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	not applicable	
(g) Row and column headers shall be identified for data tables.	not applicable	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	not applicable	

(i) Frames shall be titled with text that facilitates frame identification and navigation.	not applicable	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	not applicable	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	not applicable	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	not applicable	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	not applicable	
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	not applicable	
(o) A method shall be provided that permits users to skip repetitive navigation links.	not applicable	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	not applicable	

Voluntary Product Accessibility Template - Section 1194.23 Telecommunications Products - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.	not applicable	
(b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.	not applicable	
(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.	not applicable	
(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.	not applicable	
(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.	not applicable	
(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.	not applicable	
(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.	not applicable	
(h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.	not applicable	
(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.	not applicable	

(j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.	not applicable	
(k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.	not applicable	
(k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.	not applicable	
(k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.	not applicable	
(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.	not applicable	

Voluntary Product Accessibility Template - Section 1194.24 Video and Multi-media Products - Detail		
Criteria	Supporting Features	Remarks and explanations
a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	not applicable	
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.	not applicable	
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	not applicable	
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	not applicable	
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	not applicable	

Voluntary Product Accessibility Template - Section 1194.25 Self-Contained, Closed Products - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) Self contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.	not applicable	
(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	not applicable	
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	not applicable	

(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	not applicable	
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime.	not applicable	
(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.	not applicable	
(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	not applicable	
(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.	not applicable	
(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	not applicable	
(j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length.	not applicable	
(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum above the floor.	not applicable	
(j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.	not applicable	
(j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.	not applicable	

Voluntary Product Accessibility Template - Section 1194.26 Desktop and Portable Computers - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) All mechanically operated controls and keys shall comply with §1194.23 (k) (1) through (4).	not applicable	
(b) If a product utilizes touchscreens or touch-operated controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	not applicable	
(c) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	not applicable	
(d) Where provided, at least one of each type of expansion slots, ports and connectors shall comply with publicly available industry standards	not applicable	

Voluntary Product Accessibility Template - Section 1194.31 Functional Performance Criteria - Detail		
Criteria	Supporting Features	Remarks and explanations

(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	supported with exceptions	Partial support provided by JAWS® for Windows®. Please refer to the previous applicable VPAT sections.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	supported with exceptions	Partial support provided by JAWS® for Windows®. Please refer to the previous applicable VPAT sections.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.	not applicable	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	not applicable	
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	not applicable	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	supported with exceptions	Partial support provided by keyboard access. Please refer to the previous applicable VPAT sections.

Voluntary Product Accessibility Template - Section 1194.41 Information, Documentation, and Support - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supported with exceptions and additional charges may apply.	Accessibility format of documentation is available upon request by contacting accessibility@sap.com.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported with exceptions and additional charges may apply.	Users may contact accessibility@sap.com or utilize the customer message system to request support for accessibility related questions.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	supported	Users may contact accessibility@sap.com or utilize the customer message system to request support for accessibility related questions.

SAP ERP Flexible Real Estate Management SAP enhancement package 6 for SAP ERP 6.0 (Web Dynpro for ABAP 7.03) Voluntary Product Accessibility Template

Document Classification: Customer

Date: 05.12.2012

Name of Product: SAP ERP Flexible Real Estate Management SAP enhancement package 6 for SAP ERP 6.0

[See also the details in the attached sheet 'Details for WD ABAP 703', which are part of this Voluntary Product Accessibility Template.](#)

Application Content:

This VPAT covers the following SAP-ERP components:
Flexible Real Estate Management

References:

If the content is displayed via BI Business Explorer, please refer to the status document of BI concerning its accessibility status.

If the BI content is displayed via Xcelsius dashboard, please refer to the status document of Xcelsius concerning the accessibility status of its dashboard.

If the SAPGUI for Windows content is displayed via web, please refer to the status document of SAPGUI for HTML concerning its accessibility status.

The status of Dynamic Documents used in the application, is not covered by this status document. For the technical status of Dynamic Documents please refer to the status document of Dynamic Documents.

Contact for more information: accessibility@sap.com

Testing Environment: SAP Netweaver® version SAP enhancement package 3 for SAP NetWeaver 7.0, JAWS® for Windows® version 11.0.1446 with English speech output, Microsoft® Internet Explorer 8, Microsoft® Windows® 7

Support for accessibility feature of this product requires SAP NetWeaver. To receive the document "Front-End Requirements and Infrastructure for Accessibility" as well as the accessibility status document for SAP NetWeaver, please contact SAP using the e-mail address above.

The result shown on this VPAT is based on activation of all relevant Business Functions. De-activation of business functions may yield different accessibility results.

Voluntary Product Accessibility Template - Summary Table		
Criteria	Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems	not applicable	
Section 1194.22 Web-based intranet and internet information and applications	supported with exceptions	See below for details.
Section 1194.23 Telecommunications Products	not applicable	
Section 1194.24 Video and Multi-media Products	not applicable	
Section 1194.25 Self-Contained, Closed Products	not applicable	
Section 1194.26 Desktop and Portable Computers	not applicable	

Section 1194.31 Functional Performance Criteria	supported with exceptions	See below for details.
Section 1194.41 (a) Information, Documentation and Support	supported with exceptions	See below for details.

Voluntary Product Accessibility Template - Section 1194.21 Software Applications and Operating Systems - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	not applicable	
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	not applicable	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	not applicable	
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	not applicable	
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	not applicable	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	not applicable	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	not applicable	
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	not applicable	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	not applicable	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	not applicable	

(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	not applicable	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	not applicable	

Voluntary Product Accessibility Template - Section 1194.22 Web-based Intranet and Internet information and applications - Detail

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	supported	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	not applicable	
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	supported	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	not supported	
(e) Redundant text links shall be provided for each active region of a server-side image map.	not applicable	
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	not applicable	
(g) Row and column headers shall be identified for data tables.	supported	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	supported	
(i) Frames shall be titled with text that facilitates frame identification and navigation.	supported	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	supported	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	supported	
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	not applicable	

(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	supported	
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	supported with exceptions	<p>Incorrect number of columns is announced by screen reader for UI Element RowRepeater that uses complex layout such as nested TransparentContainers.</p> <p>UI Element ToggleButton announced only as "Button" by screen reader.</p> <p>For HorizontalContextualPanel UI Element, no level information is announced for the 2nd level row.</p> <p>For some semantic colors of TextView UI Element there is no speech output defined.</p> <p>The disabled state is not announced for a UI Toolbar element.</p> <p>InputField UI Element with F4 Help is announced as "combo box" instead of "Edit".</p> <p>For a number of UI Elements, the screen reader either repeats element information twice or makes a second announcement that differs from the first (correct) announcement when the UI Element gets the keyboard focus:</p> <p>a) Groups: Sometimes "Table" is announced additionally at the begin of a Group and "cell" at the end.</p> <p>b) Images: Screen reader announces "Graphic" additionally.</p> <p>c) Radiobutton-Groups: "0 Items" is announced additionally even if the group has items.</p> <p>The "Browse" Button of a FileUpload UI Element is not announced at all.</p> <p>In some rare cases, instead of announcing the attributes of UI Element actually focused, the attributes of the UI Element container or the preceding UI Element are announced.</p> <p>Labels, table headers and other UI elements containing ellipses may not have a tooltip with the full text.</p> <p>When navigating to the items of the UI Element ItemListBox with MultiSelection via down arrow key the items sometimes are also automatically selected.</p> <p>Navigation to the first empty/blank entry in the dropdown of an Dropdown UI Element is not possible with the keyboard.</p> <p>While navigating to a different Tab within UI Element Tab Strip, visible focus gets lost</p> <p>No visual indication for selected top level menu item</p> <p>If Windows runs in High Contrast theme sometimes the focus is not visible when using the Web Dynpro High Contrast theme</p> <p>Focus is not restored on Row Selectors in certain cases for UI Element Table when a selection is made. Instead, other elements are focused (e.g a UI Element Button below the Table).</p> <p>Labels containing ellipses may not have a tooltip with the full text.</p> <p>Link: On activating the List item links, focus is lost.</p>
(o) A method shall be provided that permits users to skip repetitive navigation links.	supported	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	supported	

Voluntary Product Accessibility Template - Section 1194.23 Telecommunications Products - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.	not applicable	
(b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.	not applicable	

(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.	not applicable	
(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.	not applicable	
(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.	not applicable	
(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.	not applicable	
(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.	not applicable	
(h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.	not applicable	
(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.	not applicable	
(j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.	not applicable	
(k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.	not applicable	
(k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.	not applicable	

(k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.	not applicable	
(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.	not applicable	

Voluntary Product Accessibility Template - Section 1194.24 Video and Multi-media Products - Detail

Criteria	Supporting Features	Remarks and explanations
a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	not applicable	
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.	not applicable	
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	not applicable	
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	not applicable	
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	not applicable	

Voluntary Product Accessibility Template - Section 1194.25 Self-Contained, Closed Products - Detail

Criteria	Supporting Features	Remarks and explanations
(a) Self contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.	not applicable	

(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	not applicable	
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	not applicable	
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	not applicable	
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime.	not applicable	
(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.	not applicable	
(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	not applicable	
(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.	not applicable	
(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	not applicable	
(j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length.	not applicable	
(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum above the floor.	not applicable	

(j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.	not applicable	
(j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.	not applicable	

Voluntary Product Accessibility Template - Section 1194.26 Desktop and Portable Computers - Detail

Criteria	Supporting Features	Remarks and explanations
(a) All mechanically operated controls and keys shall comply with §1194.23 (k) (1) through (4).	not applicable	
(b) If a product utilizes touchscreens or touch-operated controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	not applicable	
(c) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	not applicable	
(d) Where provided, at least one of each type of expansion slots, ports and connectors shall comply with publicly available industry standards	not applicable	

Voluntary Product Accessibility Template - Section 1194.31 Functional Performance Criteria - Detail

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	supported with exceptions	Partial support provided by JAWS® for Windows®. Please refer to the previous applicable VPAT sections.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	supported with exceptions	Partial support provided by JAWS® for Windows®. Please refer to the previous applicable VPAT sections.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.	not applicable	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	not applicable	

(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	not applicable	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	supported with exceptions	Partial support provided by keyboard access. Please refer to the previous applicable VPAT sections.

Voluntary Product Accessibility Template - Section 1194.41 Information, Documentation, and Support - Detail		
Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Supported with exceptions and additional charges may apply.	Accessibility format of documentation is available upon request by contacting accessibility@sap.com .
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported with exceptions and additional charges may apply.	Users may contact accessibility@sap.com or utilize the customer message system to request support for accessibility related questions.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	supported	Users may contact accessibility@sap.com or utilize the customer message system to request support for accessibility related questions.
