Fakih Portless V-Dissector™

The Fakih Portless V-Dissector is a specialized tool that is used to prepare dense and fibrous tissue for infiltration and tissue extraction. The cutting notch is very useful for undermining in facial procedures and in areas where the tissue must be broken down due to acne scarring, stretch marks, and other fibrous deposits.

Item Code: VDINP1609

Bensimon Micro Sculptor

Designed by Dr. Richard Bensimon, this modification of the Tonnard harvester is ideal for facial liposuction and inducing skin contraction. The small holes ensure a smooth contour, and the small diameter enables entry with a needle puncture leaving no mark. This allows for multiple entries for precise contouring of the neck and gynecomastia. The Bensimon Micro Sculptor is a 12-Hole SuperLuerLok CellFriendly cannula that is barbed and extra toothy.

Item Code:	Hub Style:	Size:
BENSL1415CF	SuperLuerLok Hub	2.1mm (14G) x 15cm
BENSL1315CF	SuperLuerLok Hub	2.4mm (13G) x 15cm

Tissue Processing Microfat and Nanofat

Tulip's Nanofat System is designed around Tulip's clinically validated protocol for producing nanofat. Tulip designed this protocol and the instrumentation in collaboration with the pioneers of nanofat, Drs. Patrick Tonnard and Alexis Verpaele of Gent, Belgium.

Characteristics of Nanofat:

1. Nanofat must be consistently injectable with a 30G needle
2. Nanofat must remain viable within its native vascular structure and concentrates

Tulip Nanofat Set™ - Reusable

Included in the set:

- 1 each Tulip NanoTransfer™ Generation I
- 2 boxes of 5 Sterile NanoTransfer Cartridges
- 1 each Reusable Anaerobic Transfer 2.4mm
- 1 each Reusable Sizing Transfer 1.4mm
- 1 each Reusable Sizing Transfer 1.2mm

Item Code: TGSNANO-DNTC

Tulip Nanofat Kit™ - Single-Use

This single-use patent-pending closed system helps size adipose tissue so that it is injectable with 27G and 30G needles.

Kit for 1 Patient Includes:

- (Kit for 5 Patients Available with amounts of 5 each per item)
- 1 each Single-Use NanoTransfer™ Generation 2
- 1 each GEMS™ Anaerobic Transfer 2.4mm
- 1 each GEMS™ Sizing Transfer 1.2mm
- 1 each GEMS™ Sizing Transfer 1.4mm

Item Code:

DNTS-1P for 1 Patient
DNTS-5P for 5 Patient

NanoTransfer™ Generation I Cartridges

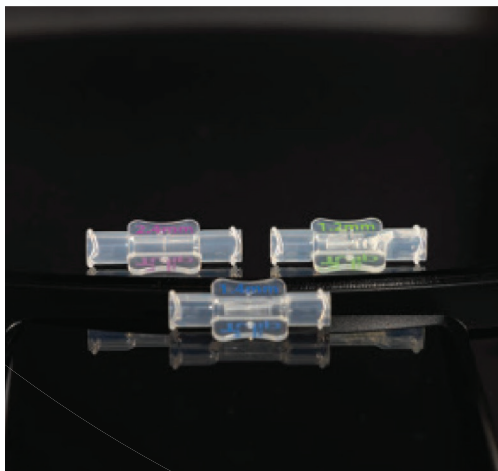

Pre-sterilized single-use cartridges for use with the Generation I NanoTransfer

Sold in boxes of 5

Item Code: DNTC-05

Tissue Processing Microfat and Nanofat

The Micro Kit™ - Single-Use

GEMS™ Single-use Anaerobic Sizing Transfers are used to size down adipose tissue into desired aliquot sizes of Microfat. They also play an important role in Tulip's proprietary Nanofat System™. Transfers can be used as a standalone system for sizing down adipose or can be used in conjunction with the Tulip NanoTransfer (Gen 1 or Gen 2) to create NanoFat. Each of the GEMS™ Transfers is also available for purchase individually in boxes of 10 (Codes in parentheses next to each item).

Kit Includes:

- 5 each GEMS™ Anaerobic Sizing Transfer 2.4mm (DATLLLL2.4-10)
- 5 each GEMS™ Sizing transfer 1.4mm (DATLLLL1.4-10)
- 5 each GEMS™ Sizing transfer 1.2mm (DATLLLL1.2-10)

Item Code: DMICRO-05

The Micro Set™ - Reusable

Reusable Anaerobic Sizing Transfers are used to size down adipose tissue into desired aliquot sizes of Microfat. They also play an important role in Tulip's proprietary Nanofat System™. Transfers can be used as a standalone system for sizing down adipose or can be used in conjunction with the Tulip NanoTransfer (Gen 1 or Gen 2) to create NanoFat. Each Reusable Transfer is also available for purchase individually (code is in parentheses next to each item).

Set Includes:

- 1 each Reusable Anaerobic Transfer 2.4mm (ATLLLL2.4)
- 1 each Reusable Sizing Transfer 1.4mm (ATLLLL1.4)
- 1 each Reusable Sizing Transfer 1.2mm (ATLLLL1.2)

Item Code: MicroSet

Available in Single-Use (as seen above)

TULIP GOLD PROCEDURE KIT

EVERYTHING YOU NEED TO OBTAIN NANOFAT: THE TULIP GOLD KIT

Tulip's GOLD (Gentle Office-Based Lipoaspirate Delivery) kit provides everything you need to harvest and prepare microfat and nanofat for use in an office-based setting.

Using a closed syringe lipoaspiration system, our GOLD kits provide a less traumatic and more efficient approach to acquiring Adipose Tissue Complex (ATC) as a structural or regenerative graft without surgery.

- The protocol and the kit have been clinically validated for safety, ease of use, viability, and consistent output, leading to more predictable outcomes.
- The GOLD Kit provides a safe and efficacious low-pressure acquisition of ATC.
- The harvested fat can be used as microfat or nanofat.

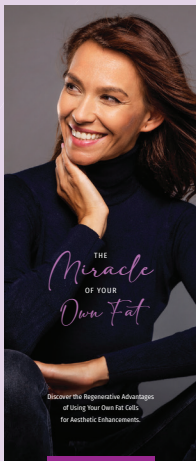

Each Kit Contains:

- 1 Single-Use Infiltrator
- 1 Single-Use Harvester
- 1 Single-Use Johnnie Snap
- 1 Single-Use One Patient NanoTransfer Kit
- 2 BD 20mL Syringes
- 2 BD 10mL Syringes
- 1 Hypodermic Needle

Purchase Options:

- Item Code:**
- 1 Kit **DPK-GOLD-01**
 - 5 Kits **DPK-GOLD-05**

Save when you purchase in cases of 5.

Get the Tulip Advantage using CellFriendly™ Instruments!

All of Tulip's cannulas and injectors are finished with Tulip's exclusive CellFriendly™ coating. This finish gives the instruments a smooth, lubricious action. Reduced friction creates less stress and damage to the tissue for a better outcome and less fatigue to the surgeon during the procedure.

SUPERCHARGE your microfat grafts

Surgeons worldwide are now supplementing their microfat with nanofat to supercharge their injections. These new micro injectors are sized right for injecting nanofat - supercharged microfat. Whether you are using sized-down microfat alone or nanofat - supercharged microfat, these micro injectors are ideal for periorbital, perioral, nose, and forehead applications. They are also excellent for restoring soft tissue in the foot fat pad as well as for female wellness restoration.
