Before you perform the installation, the first step is to check the software and the hardware requirements for the installation. Software requirement includes media for the installation and hardware requirement includes - PC with RAM 16 GB, hard disk space minimum 6080 GB for installation and running the system. If you are planning to create a virtual image, you can allocate an equivalent memory to VM image.

Software Requirement

You can get the software from SAP Marketplace. Go to https://websmp201.sapag.de/#wrapper

https://websmg	o200.isap-agide/#wrapped		V C Q Search

When you click next again, the wizard will take you to Parameter Summary tab. You can see the details of all the passwords (General Parameters, Master Password, Windows Domain) as shown in the following screenshot.

arameter List	
End User License Agreement (EULA)	
I accept D	
SAP System > General Parameters SAP System ID (SAPSID) NSP Installation Drive C: 5	
SAP System > Master Password Password for all users of this SAP system	
SAP System > Windows Domain Domain Model Local installation Windows Domain	

At the bottom, click the Next button. You will be moved to "Execute" tab of the installation Wizard. Here you can see phase-wise installation as shown in the following screenshot.

There are different errors you can face during this task progress. Some of them are -

- Database Error (Drivers issue)
- Import ABAP
- Post Installation Activities (Configuration issue)

Once the installation process is complete, you will see a confirmation message as shown in the following screenshot.
