Ashy Sunflower, *Helianthus mollis*

A photograph of an Indian Heliotrope plant (Heliotropium indicum) growing in a field of green grass. The plant has a central upright stem with several large, ovate, serrated green leaves. At the top of the stem, there is a dense, rounded cluster of small, light blue or white flowers. The background is filled with a dense carpet of green grass and some dry, brownish stems.

Indian Heliotrope

A close-up photograph of an Indian Heliotrope plant. The plant features several large, green, ovate leaves with serrated margins and prominent venation. A central spike of small, white flowers is visible, extending upwards from the foliage. The background is filled with other green plants, creating a dense, natural setting.
