Manzanillo
Hippomane mancinella

Danger

This is a Manzanillo area. This is an endemic species of Galápagos. They have a poisonous fruit and it has irritant latex. Do not eat the fruit and keep distance from the trees.

Manzanillo (*Hippomane mancinella*)

Darwin's cotton
Gossypium darwinii

Cordia lutea

Maytenus octagona

Darwiniothamnus tenuifolius

Alternanthera

Tournefortia psilostachya

*Heliotropium
angiospermum*

Clerodendrum molle

Chamaesyce amplexicaulis

Cleome viscosa

It turns out that *Cleome* is a pretty but nasty invasive plant from Asia.

Scaevola plumieri

Scalesia helleri

Tiquilia nesiotica
