

Capacity building work of FAO in relation to deep sea fisheries

Click to add text

FAO Fisheries and Aquaculture Division

FAO INTERNATIONAL GUIDELINES FOR THE MANAGEMENT OF DEEP-SEA FISHERIES IN THE HIGH SEAS

Objectives:

- sustainable use of marine living resources,
- prevention of significant adverse impacts on deep-sea VMEs,

➤ SPECIAL REQUIREMENTS OF DEVELOPING COUNTRIES

- financial and technical assistance, technology transfer, training and scientific cooperation

FAO's Deep-sea Fisheries Programme

Supporting the implementation of the International Guidelines for the Management of Deep-sea Fisheries in the High seas and other International processes

ABNJ "Common Oceans" Programme

GEF-funded ABNJ Deep Seas project

FAO Deep-sea Fisheries Programme

**SponGES
(EU H2020)**

**VME
Database
Project (FRA)**

**Sustainable
fisheries -
Deep-sea
Project (NOR)**

**VME and RFMO
Deep-sea
Project (JPN)**

**EAF-Nansen
Programme
Fishfinder
Others**

FAO Deep-Sea Fisheries Programme

- Capacity building workshops on the identification of deep-sea vulnerable fauna (sharks, corals and sponges).
- Tools to facilitate their identification and biological processing in the field

2-3 August 2022

Workshop on Bottom Fishing

UN Headquarters, N.Y.

SponGES

Transfer of knowledge from SponGES scientists to stakeholders from policy, fisheries management & the industry across the Atlantic

Bringing together over 300 people

Round-tables, Tools, awareness-raising materials, policy briefs

2-3 August 2022

Workshop on Bottom Fishing

UN Headquarters, N.Y.

The EAF Nansen Programme 2017 - 2023

Science

Plan

Fisheries Impacts

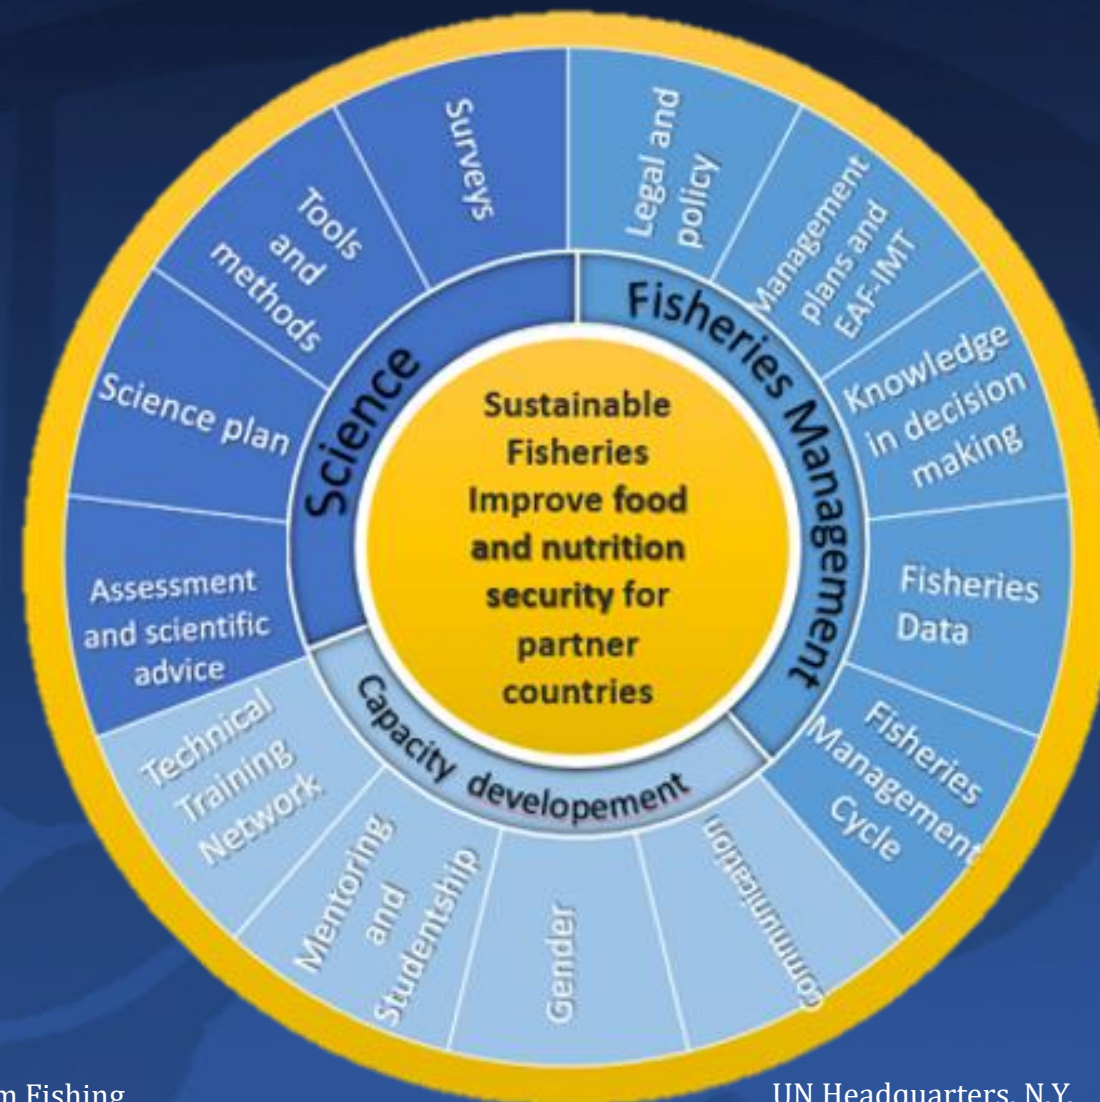

Oil/gas/pollution Impacts

Climate change Impacts

Management and
policy (EAF)

Science

Capacity development

>40000 NM sailed since the beginning of the new phase

7 specialized laboratories

Capacity to host up to 19 national scientists from partner countries

Approx.

920 days of research at-sea

850 scientists from

39 countries involved

Technical training network

More than 1000 scientists from 46 countries trained from 2017 through the Technical training network and the science plan.

2-3 August 2022

Workshop on Bottom Fishing

UN Headquarters, N.Y.

Surveys conducted in ABNJ areas since 2017

ABNJ CECAF - bottom habitat mapping Sierra Leone rise

Two surveys in SEAFO
- Seamounts VME
- Resource assessment

Discovery seamounts habitat survey in the SEAFO area

Mascarene Plateau in collaboration with The Designated Authority of the Extended Continental Shelf, Mascarene Plateau Region

69 scientists from 17 countries involved and trained onboard the vessel and in the several workshops to analyze data and samples collected

INFORMATION FOR THE MANAGEMENT PROCESS GENERATED

Examples of achievements from the surveys executed in the ABNJ

Onboard trainings

Provision of scientific advice

Workshops

Workshop To Characterize The Benthic Megafauna On Seamounts In The Sector Of The Seafo Convention Area, Se Atlantic Abnj” July 2020

Expert workshop on the processing and analysis of data from the 2019 Discovery Seamount complex survey (SEAFO)

Workshop on Bottom Fishing

Special Issue of the WIOMSA Journal of Marine Science released

Western Indian Ocean JOURNAL OF Marine Science

Special Issue 2/2021 | e-ISSN 2050-6416

Studies on the Mascarene Plateau

Guest Editor | Ranjeet Bhagooli

UN

Future outlook

- Continued support under the EAF Nansen Programme (2017 – 2023)
- FAO Deep sea Fisheries project Phase II (2022-2027)
 - Addressing identified gaps in management measures (regional, national)
 - Port inspection training
 - Observer training for data recording
 - Deepwater shark catch monitoring and bycatch reduction
 - VMS and mapping of DSF by gear type
 - Other topics identified...

Thank you
