Title: Summary of Ad Hoc Meeting on Two Historical Scripts from Mongolia (Tokyo, Japan)

From: Deborah Anderson, SEI, UC Berkeley

Date: 17 October 2015

The meeting on two historical scripts of Mongolia took place on 16-17 October 2015 at the Hiroshima University office in Tokyo.

Attendees included: Peter Constable (chair), Deborah Anderson (meeting organizer), Byambaa Ragchaa, Agata Bareja-Starzyńska, Takashi Matsukawa, Demberel Sukhbaatar, Otgonbaatar Rinchinsambuu, S. Bolorchimeg, B. Biligsaikhan, Michel Suignard, Peter Constable, Anshuman Pandey, Toshiya Suzuki (local organizer), and Taichi Kawabata.

Attendees of the meeting agreed to the points listed below.

(Note: The reference to “slide” below refers to slides by Dr. R. Otgonbaatar posted at: <http://www.unicode.org/L2/L2015/15248-soyombo-cmt.pdf>)

Zanabazar Square

- The ad hoc did not have consensus to recommend a change of name for the Zanabazar Square script.
- The ad hoc did not have consensus to recommend any changes related to characters   and ; there were differences of opinion on the preferred names for these characters and on whether an additional character should be added in this set.
- Make the following changes to the proposal document for Zanabazar Square (L2/14-024):
 - Add a paragraph in section §4.4.3. that says when VOWEL SIGN AI occurs with the letters CA, TSA, and JA it can have a loop shape
 - Add a footnote to §4.7.3. stating that NYA and NNA may occur in Mongolian text
 - Add a comment in §4.12 (Punctuation) that 0F1C TIBETAN SIGN RDEL DKAR GSUM and 0F1A TIBETAN SIGN RDEL DKAR GCIG are used in Zanabazar Square
 - Add 0F1A TIBETAN SIGN RDEL DKAR GCIG and 0F1C TIBETAN SIGN RDEL DKAR GSUM to a new ScriptExtensions section, identifying these two characters as being used in Soyombo and Zanabazar Square, as well as Tibetan
 - Change the representative glyph for 11A33 ZANABAZAR SQUARE FINAL CONSONANT MARK from a circle to diamond shape
 - In §4.4.3, add a variant for VOWEL LENGTH MARK, showing a diagonal slanting down from middle of the dotted circle
 - Add a note in the code chart that 11A29 ZANABAZAR SQUARE LETTER SMALL A is also used for aang
 - Investigate whether a mark of repetition (“X”) is used in Zanabazar Square (see slide 30, where it appears in Soyombo)

Soyombo

- The repertoire as shown in L2/15-004 with revisions noted below can progress on to the next ballot in ISO.
- Make the following name changes to the Soyombo proposal (L2/15-04):
 - 11A9B SOYOMBO HEAD MARK WITH TRIPLE FLAME **CHANGE TO:** SOYOMBO HEAD MARK WITH MOON AND SUN AND TRIPLE FLAME, with annotation “National symbol of Mongolia”
 - 11A9C SOYOMBO HEAD MARK WITH SINGLE FLAME **CHANGE TO:** SOYOMBO HEAD MARK WITH MOON AND SUN AND FLAME, with annotation mentioning there are variants attested in the sources
 - 11A9D SOYOMBO HEAD MARK WITH CANDRABINDU **CHANGE TO:** SOYOMBO HEAD MARK WITH MOON AND SUN
 - Correct the names in the code chart for 11A84..11A87 to:
 - 11A84 SOYOMBO CLUSTER-INITIAL LETTER RA
 - 11A85 SOYOMBO CLUSTER-INITIAL LETTER LA
 - 11A86 SOYOMBO CLUSTER-INITIAL LETTER SHA
 - 11A87 SOYOMBO CLUSTER-INITIAL LETTER SA
 - Add a footnote to §4.4.2 (Phonetic values of consonant letters) stating that NYA, NNA, CA, CHA, JA and ZA may occur in Mongolian text.
 - Remove TERMINAL MARK-3, change the representative glyph of TERMINAL MARK-2 to resemble a flower, and add an annotation “cintamani=candamani”
 - Add a note in the code chart that 11A93 SOYOMBO FINAL CONSONANT SIGN -A is also used for aang.
 - Add a comment in §4.8 (Punctuation) that 0F1C TIBETAN SIGN RDEL DKAR GSUM and 0F1A TIBETAN SIGN RDEL DKAR GCIG are used in Soyombo
 - Reserve two spaces in the code chart after SOYOMBO LETTER KSSA and one space after SOYOMBO DOUBLE SHAD for future additions, moving code points down as necessary.
- Additional characters for Soyombo will be proposed in a later document by Anshuman Pandey, with information and attestation to be provided by Dr. R. Otgonbaatar. These include:
 - jihvamuliya and upadhmaniya (which could be located in the code chart after SOYOMBO LETTER KSSA) (see slide 23)
 - an elongation mark (pluta, which could be located in the code chart after DOUBLE SHAD) (see slide 23)
- Dr. R. Otgonbaatar will provide several examples of the following to Anshuman Pandey for further study and to verify their eligibility for encoding:
 - snake section mark (cf. 0F08 TIBETAN MARK SBRUL SHAD) (see slide 28)

 - e vam (see slide 29)

 - a mark of repetition (“X”), which may also appear in Zanabazar Square (see slide 30)

- insertion mark (small circle) and dots (see slide 31)

- shad with tooth (see slide 32)

- shad-like symbol with macron (how often does it occur after OM?) (see slide 34)

- Dr. R. Otgonbaatar will send images of glyphic variants of CLUSTER-INITIAL SA, RA and LA as shown on slide 35 to be documented in the proposal.

We also wish to convey our thanks to the Toshiko Kimura, Toshiya Suzuki, Hiroshima University Tokyo Office, the Luce Foundation, and the Unicode Consortium.

October 20, 2015

1 Introduction

The code chart and names list for Zanabazar Square (N4541 L2/14-024) have been revised as a result of a meeting with experts of Mongolian scripts in Tokyo, October 15–16, 2015. Changes are as follows:

1. Changed glyph for FINAL CONSONANT MARK from circle to diamond shape.
2. Included "Mongolian aang" as an annotation for LETTER -A.

The following points were discussed informally between various participants, but they were not formally documented:

1. Add annotation for VOWEL LENGTH MARK regarding its additional usage for representing Tibetan 'a-chung.
2. Change the glyph for CLUSTER INITIAL RA from ᠷ to ᠷ in order to indicate its special rendering properties. This aligns with the use of a dashed box around glyphs for cluster-initial letters in the Soyombo block.
3. Allocate spaces for the future encoding of ᠠ *ALTERNATE VOWEL SIGN AI and ᠠ *ALTERNATE VOWEL SIGN AU. These two characters are required because contextual alternates for the diphthongs *ai* and *au* are based upon their glyph shapes.
4. Open new spaces at U+11A43 and U+11A45 for the future encoding of ᠰ *INITIAL DOUBLE HEAD MARK and ᠰ *CLOSING DOUBLE HEAD MARK. The proposal specifies that these are glyphic variants of INITIAL HEAD MARK and CLOSING HEAD MARK, respectively. They should be encoded as distinctive characters.
5. Consider renaming the *candrabindu* ornament signs to align with the revised names of these elements in the Soyombo head marks. However, it is more sensible to retain *candrabindu* in the Zanabazar Square names (as is also the case for Soyombo).

Current name	Revised name
SIGN CANDRABINDU WITH ORNAMENT	SIGN CANDRABINDU WITH FLAME
SIGN CANDRA WITH ORNAMENT	SIGN CANDRA WITH FLAME

6. Move SIGN ANUSVARA and SIGN VISARGA to after VOWEL LENGTH MARK, under a new subheading ‘Vowel modifiers’. This has the benefit of keeping all vowel-related signs together.
7. Move the LONG TSHEG to after TSHEG.
8. Change the control character used for producing conjunct stacks. Reintroduce the  *SUBJOINER proposed in earlier versions (see N4471 L2/13-198). Rename SIGN VIRAMA to SIGN HALANTA and remove its conjunct-forming function. The SIGN HALANTA will only represent silencing of the inherent vowel.

Zanabazar Square does not have a native *halanta*. Apart from the FINAL CONSONANT MARK there is no means for indicating a bare consonant. The *halanta*, however, appears in a few sources and it was necessary to encode it. Earlier versions of the encoding model relied upon a  SUBJOINER for controlling conjunct formation. When the *halanta* was identified, it seemed practical to follow the Indic model and to unite its function with that of the SUBJOINER into the single character VIRAMA. As a result, the SUBJOINER was removed from the final proposal. It now seems more prudent to revert to the previous model so that it aligns with Soyombo.

Revised code chart and names list for Soyombo

Anshuman Pandey

anshuman.pandey@berkeley.edu

October 20, 2015

1 Introduction

The code chart and names list for Soyombo (N4655 L2/15-004) have been revised as a result of a meeting with experts of Mongolian scripts in Tokyo, October 15–16, 2015. Changes are as follows:

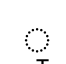

1. Renamed the following characters (prefixed with ‘SOYOMBO’):

Current name	Revised name
CLUSTER-INITIAL LETTER LA	CLUSTER-INITIAL LETTER RA
CLUSTER-INITIAL LETTER SHA	CLUSTER-INITIAL LETTER LA
CLUSTER-INITIAL LETTER SA	CLUSTER-INITIAL LETTER SHA
CLUSTER-INITIAL LETTER RA	CLUSTER-INITIAL LETTER SA
HEAD MARK WITH TRIPLE FLAME	HEAD MARK WITH MOON AND SUN AND TRIPLE FLAME
HEAD MARK WITH SINGLE FLAME	HEAD MARK WITH MOON AND SUN AND FLAME
HEAD MARK WITH CANDRABINDU	HEAD MARK WITH MOON AND SUN

2. Removed TERMINAL MARK-3 and reanalyzed its glyph as a variant of SOYOMBO TERMINAL MARK-2. A new representative glyph will be designed for TERMINAL MARK-2, which will have the features of a flower.
3. Opened the spaces at U+11A84 and U+11A85 for the future encoding of ☒ *JIHVAMULIYA and ☑ *UPADHMANIYA for Soyombo. Characters currently at U+11A84 and after have been shifted.
4. Opened the space at U+11A9D for the future encoding of ☛ *PALUTA for Soyombo. Characters currently at this position and after have been shifted.

Although the following points were not raised during the formal meeting, they were discussed with attendees informally and should be considered:

- Move VOWEL SIGN VOCALIC R and VOWEL SIGN VOCALIC L to in between VOWEL SIGN U and VOWEL SIGN E. This ordering of vowel signs follows the Brahmi pattern more closely and is attested in sources showing consonant-vowel combinations.
- Move SIGN ANUSVARA and SIGN VISARGA to after VOWEL LENGTH MARK. This has the benefit of keeping all vowel-related signs together. Currently the SIGN ANUSVARA and SIGN VISARGA are allocated in the midst of characters related to consonants.
- Retain ‘candrabindu’ in the names for the head marks: ‘head mark with candrabindu and triple flame’, ‘head mark with candrabindu and flame’, ‘head mark with candrabindu’. The use of ‘candrabindu’ aligns with names for characters in related scripts, such as Zanabazar Square, that contain similar elements in their representative glyphs. The descriptors “moon and sun ...” in the proposed name revisions can be preserved as annotations.
- Possibly reanalyze the head marks as base + combining sign instead of as atomic characters. The result would be 1 head-mark base and 3 combining ‘ornament’ signs. This aligns with the model for head marks in Zanabazar Square.
