- HD 720p/30 fps video calling and stereo wideband audio with H.264 embedded technology
- True 16:9 widescreen with a 78-degree field of view
- Carl Zeiss® optics with autofocus
- High image quality in low light
- Broad compatibility

Logitech® B990 HD Webcam. HD video calling for business—even on thin clients working on virtual desktop interfaces (VDI) or cloud-based networks—thanks to H.264 technology. Thin-client users can now enjoy video calls that look and sound true to life with HD 720p/30 fps video calling and stereo wideband audio. True 16:9 widescreen with a 78-degree field of view makes this webcam perfect for small-group video conferencing. Carl Zeiss® optics with autofocus keep images incredibly sharp and clear, automatically, from as close as 10 cm (3.94 inches). Even in dim or poorly backlit settings, the webcam will intelligently adjust to produce the best possible image. Plus, it works with virtually any business video-calling client—including Avistar C3 Integrator™—and VDI platforms, such as Citrix XenDesktop®.
