

Fowlers Gap Biodiversity Checklist Plants

Fowlers Gap is predominantly chenopod shrubland but has a diverse and well-studied flora. The following list was compiled by members of the then Soil Conservation Service of NSW, many of whom authored 'The Plants of Western New South Wales'. The organisation of Families followed the order in this book but some genera have changed since 1981 and this is reflected in this checklist. Additional plants have been added from the Fowlers Gap collection in the John T Waterhouse Herbarium at the University of NSW.

Thanks to Jan de Nardi, Frank Hemmings and Tony Robbie in updating plant list for Fowlers Gap and checking nomenclature. The guide is part of a UNSW research project in collaboration with the CRC for Sustainable Tourism and NSW National Parks and Wildlife Service. The aim of this project is to develop and implement products to support a vibrant wildlife tourism industry in the rangelands of the Outback.
