## Focused on the future

Working with us, you can look forward to good business. With our wide range of leading-edge products and comprehensive distribution network, we are perfectly set up to meet current and future demands. And we're always interested in hearing our partners' ideas and suggestions.

Our innovative capacity and quality as an original equipment manufacturer are available to you in each product in the replacement parts range – for vehicle diagnostics, fuel systems, engine actuators and sensors. It's your guarantee of lasting success in the automotive world of tomorrow.

## Das Unternehmen Zukunft

Die Chancen für gemeinsame erfolgreiche Geschäfte stehen gut. Denn mit unserem zukunftsorientierten Produktspektrum und unserem flächendeckenden Vertriebsnetz sind wir für aktuelle wie für kommende Aufgaben erstklassig aufgestellt. Dabei sind für uns die Wünsche und Anregungen unserer Partner jederzeit von großer Bedeutung.

Mit jedem unserer Produkte im Kfz-Ersatzteilebereich – von der Fahrzeugdiagnose über Kraftstoffsysteme und Motorstellelemente bis hin zu Sensoren – stehen Ihnen die Innovationskraft und Qualität des Erstausrüsters zur Verfügung. Serienmäßig, als langfristige Erfolgsgaranten in der automotiven Welt von morgen.

## L'entreprise du futur

Les chances de réaliser ensemble des affaires fructueuses sont bonnes. En effet, avec notre gamme de produits porteuse d'avenir et notre vaste réseau de distribution, nous sommes parfaitement à même d'accomplir les tâches du présent et de l'avenir, d'autant plus que les souhaits et les suggestions de nos partenaires revêtent toujours une grande importance pour nous.

Avec chacun de nos produits du secteur des pièces de rechange pour véhicules – du diagnostic automobile aux capteurs en passant par les circuits de carburant et les éléments de réglage du moteur – vous bénéficiez de la force d'innovation et de la qualité de l'équipementier de première monte. Ces produits de série sont des garants durables du succès dans le monde automobile de demain.

## La empresa futura

Se presentan buenas oportunidades para realizar negocios conjuntos colmados de éxito, ya que, con nuestra gama de productos orientada al futuro y nuestra red de distribución de cobertura global, somos los líderes a la hora de llevar a cabo las tareas actuales y venideras. Además, para nosotros, los deseos y las sugerencias de nuestros socios tienen siempre la máxima relevancia.

Con cada uno de nuestros productos del sector de piezas de recambio para el automóvil – desde el diagnóstico del vehículo hasta los sensores, pasando por los sistemas de combustible y los elementos de ajuste del motor –, usted dispone de la fuerza innovadora y la calidad del proveedor de equipo original. De serie, para garantizarle el éxito a largo plazo en el mundo de la automoción del mañana.

## Il futuro dell'azienda

Vi sono ottime opportunità di successo per la nostra e vostra attività commerciale. Con la nostra gamma di prodotti di avanzata tecnologia e la nostra ampia rete di distribuzione siamo perfettamente posizionati sia rispetto al presente che al futuro. I suggerimenti e le esigenze dei nostri partners sono per noi sempre di grande importanza.

Tutti i nostri prodotti del settore automotive, dagli apparecchi diagnostici ai sistemi di alimentazione, dagli attuatori motore ai sensori, sono realizzati in modo innovativo e con la elevata qualità propria di una azienda produttrice di sistemi destinati al primo equipaggiamento. Garanzia di successo immediato ed a lungo termine per il settore automobilistico di oggi e di domani.

## Предприятие - будущее

Хорошие шансы для успешного совместного бизнеса. Так как с нашим ориентированным на будущее спектром продукции и нашей широкомасштабной сбытовой сетью мы прекрасно подготовлены к решению текущих и будущих задач. При этом пожелания и предложения партнеров имеют для нас всегда большое значение.

В каждом из наших изделий в области автомобильных запасных деталей, начиная от диагностики автомобилей, топливных систем и исполнительных механизмов и заканчивая датчиками, Вы получаете в Ваше распоряжение инновационную силу и качество изготовителя оригинальных запчастей. Серийно, от гаранта долгосрочного успеха в автомобильном мире завтрашнего дня.

Обзор Продукта

## Central Locking Actuator

A large proportion of today's vehicles are already fitted with this convenient feature. Doors, windows and fuel tank caps lock and unlock with ease at the touch of a button. Our actuators make it possible for numerous models of vehicles to be comfortably locked and unlocked.

These actuators are controlled by the central locking system and / or remote control. Each actuator's motor operates a lifter that activates and deactivates the lock. Additionally, the lifter may be retained by a latch mechanism and used specifically for anti-theft protection. The product range includes actuators for:

- Doors
- Tailgates, Rear Windows and Boot Lids
- Fuel Filler Flaps

## Stellelement Zentralverriegelung

Ein Großteil der heutigen Fahrzeuge ist mit dieser Komfortfunktion ausgestattet. Türen, Fenster, Tankklappen ver- bzw. entriegeln – ganz bequem per Knopfdruck. Unsere Stellelemente ermöglichen ein komfortables Öffnen und Schließen bei zahlreichen Fahrzeugmodellen.

Stellelemente werden über die Zentralverriegelung beziehungsweise über eine Fernbedienung angesteuert. Im Stellelement befindet sich ein Gleichstrommotor, der auf einen Stößel mit definiertem Antriebshub wirkt, welcher das Schloss öffnet und schließt. Bei manchen Modellen ist der Stößel in definierten Betriebszuständen zusätzlich mit einem Riegel zur Diebstahlsicherung blockiert. Das Lieferprogramm umfasst Stellelemente für:

- Türen
- Hecktüren, Heckscheiben und Heckklappen
- Tankklappen

## Élément d'ajustage, verrouillage central

La plupart des véhicules actuels sont dotés de cette fonction de confort: verrouillage et déverrouillage aisés des portes, des fenêtres, des trappes à carburant sur simple pression d'un bouton. Nos actionneurs permettent une ouverture et une fermeture confortables sur de nombreux modèles de véhicules.

Les actionneurs sont activés par le système de verrouillage centralisé ou par une télécommande. Dans l'actionneur se trouve un moteur à courant continu agissant sur un coulisseau avec une course définie, qui ouvre et ferme la serrure. Sur certains modèles et dans des états de service définis, le coulisseau est en outre bloqué par un verrou antivol. La gamme de produits comprend des actionneurs pour:

- Portes
- Portes arrière, lunettes arrière et hayons
- Trappes à carburant

## Elemento de regulación, cierre centralizado

Una gran parte de los vehículos actuales está equipada con esta función que favorece la comodidad. De este modo, es posible bloquear y desbloquear las puertas, las ventanas y las tapas de los depósitos cómodamente: solo pulsando un botón. Nuestros elementos de control permiten abrir y cerrar cómodamente en numerosos modelos de vehículos.

Dichos elementos de control se activan a través del cierre centralizado o de un mando a distancia. En el elemento de control se encuentra un motor de corriente continua que pone en funcionamiento un taqué con una carrera de accionamiento determinada que abre y cierra la cerradura. Además, en algunos modelos, en ciertos estados de funcionamiento, dicho taqué también está bloqueado con un cerrojo a modo de dispositivo antirrobo. El programa de suministro contiene elementos de control para:

- Puertas
- Puertas traseras, lunetas posteriores y capós traseros
- Tapas de los depósitos

## Attuatore, Chiusura centralizzata

La maggior parte dei veicoli è oggi dotata di questa funzione comfort. Bloccare e sbloccare le portiere, i finestrini, gli sportelli del serbatoio carburante in tutta comodità premendo un tasto. I nostri attuatori permettono di aprire e chiudere comodamente numerosi modelli di veicolo.

Gli attuatori sono comandati tramite la chiusura centralizzata o tramite un telecomando. Nell'attuatore c'è un motorino a corrente continua che agisce su un pistoncino con una corsa prerogolata, che apre e chiude la serratura. Su alcuni modelli il pistoncino, in determinate modalità operative, è inoltre bloccato con una barra antifurto. La gamma disponibile comprende attuatori per:

- portiere
- portiere posteriori, lunotti posteriori e portelloni del bagagliaio
- sportelli del serbatoio carburante

## Регулировочный элемент, центральный замок

Большинство современных автомобилей оснащено этой комфортной функцией. Закрыть или же открыть двери, стекла, лючки топливного бака – очень удобно простым нажатием кнопки. Наши исполнительные механизмы позволяют осуществлять комфортное открывание и закрывание у многочисленных моделей автомобилей.

Исполнительные механизмы приводятся в действие с помощью системы центральной блокировки замков или же дистанционного управления. В исполнительном механизме находится электродвигатель постоянного тока, который приводит в действие толкатель с определенным ходом привода, который открывает и закрывает замок. У некоторых моделей толкатель в определенных рабочих состояниях дополнительно блокируется замыкателем в качестве противоугонного приспособления. Программа поставок включает исполнительные механизмы для:

- дверей
- задних дверей, задних стекол и крышек багажника
- лючков топливного бака

## Idle-Speed Controller / Digital Linear Actuator

### Idle-Speed Controllers

Idle speed governors dynamically control the adjustment of intake air in the throttle valve bypass and therefore the engine speed when idling. Working with the sensors and an electronic control unit, they quickly correct variances in speed.

### Digital Linear Actuators

Digital linear actuators gradually control the adjustment of intake air in the throttle valve bypass and therefore the engine speed when idling. Working with the sensors and an electronic control unit, they quickly correct variances in speed.

## Leerlaufregelventil / Digitaler Linearsteller

### Leerlaufregelventile

Leerlaufregler steuern die Regelung der Ansaugluft im Drosselklappen-Bypass und damit die Motordrehzahl im Leerlauf dynamisch. In Verbindung mit den Sensoren und einem elektronischen Steuergerät werden Drehzahlabweichungen schnell ausgeregelt.

### Digitale Linearsteller

Digitale Linearsteller steuern die Regelung der Ansaugluft im Drosselklappen-Bypass und damit die Motordrehzahl im Leerlauf schrittweise. In Verbindung mit den Sensoren und einem elektronischen Steuergerät werden Drehzahl-abweichungen schnell ausgeregelt.

## Contrôle de ralenti / Actionneur linéaires numériques

### Contrôle de ralenti

Les régulateurs de ralenti commandent la régulation de l'air d'entrée dans le by-pass des clapets d'étranglement et ainsi le régime du moteur au ralenti de manière dynamique. Les écarts de régime sont réglés rapidement en combinaison avec les capteurs et un appareil de commande électronique.

### Actionneurs linéaires numériques

Les régulateurs de ralenti commandent la régulation de l'air d'entrée dans le by-pass des clapets d'étranglement et ainsi le régime du moteur au ralenti par étapes. Les écarts de régime sont réglés rapidement en combinaison avec les capteurs et un appareil de commande électronique.

## Válvula de mando de ralenti / Actuadores lineales digitales

### Válvula de mando de ralenti

Los reguladores de ralenti gobiernan la regulación del aire de admisión en el bypass de la válvula de mariposa y, por tanto, controlan de manera dinámica las revoluciones del motor en ralenti. Conjuntamente con los sensores y una unidad de mando electrónica se compensan rápidamente las desviaciones del número de revoluciones del motor.

### Actuadores lineales digitales

Los actuadores lineales digitales gobiernan paso a paso la regulación del aire de admisión en el bypass de la válvula de mariposa y, de este modo, las revoluciones del motor en ralenti. Conjuntamente con los sensores y una unidad de mando electrónica se compensan rápidamente las desviaciones del número de revoluciones del motor.

## Valvola regolazione reg. minimo / Regolator linear digital

### Valvola regolazione reg. minimo

I dispositivi di regolazione del minimo regolano in modo dinamico l'aria aspirata nel bypass delle valvole a farfalle e quindi il numero di giri al minimo del motore. In combinazione con i sensori e con un dispositivo di controllo elettronico vengono compensati rapidamente eventuali scostamenti del numero di giri.

### Regolatori lineari digitali

I regolatori lineari digitali regolano in modo graduale l'aria aspirata nel bypass delle valvole a farfalle e quindi il numero di giri al minimo del motore. In combinazione con i sensori e con un dispositivo di controllo elettronico vengono compensati rapidamente eventuali scostamenti del numero di giri.

## Клапан регулировки холостого хода / цифровые линейные исполнительные механизмы

### Клапаны регулировки холостого хода

Регуляторы холостого хода управляют динамически регулировкой впускаемого воздуха в байпасе дроссельной заслонки и тем самым числа оборота двигателя на холостом ходу. В сочетании с датчиками и электронным блоком управления отклонения числа оборотов быстро автоматически компенсируются.

### Цифровые линейные исполнительные механизмы

Цифровые линейные исполнительные механизмы управляют ступенчато регулировкой впускаемого воздуха в байпасе дроссельной заслонки и тем самым числа оборота двигателя на холостом ходу. В сочетании с датчиками и электронным блоком управления отклонения числа оборотов быстро автоматически компенсируются.

## Air Control Valve

In the intake system of diesel engines, our ACVs (with or without integrated control electronics) use an electric motor to restrict the intake air so that a precisely controlled exhaust gas recirculation system is possible (stricter exhaust standards) and to remedy the annoying shake that occurs when shutting down diesel engines.

## Luftregelventil

Mit unseren ACV (mit oder ohne integrierte Regelelektronik) wird im Ansaugtrakt von Dieselmotoren elektromotorisch eine Ansaugluftdrosselung vorgenommen, um eine exakt geregelte Abgasrückführung (strengere Abgasnormen) zu realisieren sowie die bei Dieselmotoren störend wirkende Abschalterschüttelfunktion zu beheben.

## Clapet d'arrivée d'air

Avec nos ACV (avec ou sans électronique de réglage intégrée) on procède de façon électromotrice à une restriction d'air aspiré dans le circuit d'admission des moteurs diesel pour réaliser un recyclage des gaz d'échappement exactement réglé (normes de rejet plus sévères) ainsi on élimine aussi les secousses moteur au moment de l'arrêt des moteurs diesel, ressenties comme dérangeantes.

## Válvula reguladora de aire

Con nuestras válvulas reguladoras de aire ACV (con o sin electrónica de regulación integrada) se estrangula el aire de admisión mediante un motor eléctrico en el conducto de admisión de motores diésel para implementar una recirculación de gases de escape regulada con exactitud (para poder cumplir normas más estrictas sobre emisiones de gases de escape) así como para eliminar la función supresora de sacudidas durante la parada del motor, tan molesta en los motores diésel.

## Valvola di regolazione dell'aria

Con il nostro ACV (con o senza sistema elettronico di regolazione integrato) nel tratto di aspirazione dei motori diesel viene effettuata con un motore elettrico una chiusura dell'aria di aspirazione per realizzare un ricircolo del gas di scarico regolato con esattezza (norme sulle emissioni dei gas di scarico più severe) e per eliminare una scorretta funzione di vibrazione nei motori diesel.

## Воздушный регулировочный клапан

С помощью наших воздушных регулировочных клапанов (со встроенной электроникой регулирования или без нее) с приводом от электродвигателя осуществляется во всасывающем тракте дизельных двигателей дросселирование всасываемого воздуха, чтобы реализовать точно регулируемую рециркуляцию ОГ (более строгие стандарты по выбросу ОГ), а также чтобы устранить в дизельных двигателях нежелательную детонацию при их выключении.

## Throttle Valve

### Electromotive Throttle Valves

In this type of throttle, the butterfly valve is mechanically linked to the accelerator pedal. The angle of the valve is monitored by the throttle electronics, which remain in constant communication with the engine management system. The resulting data is compared in real time with a range of information from other onboard sensors. The engine management system calculates the optimum throttle position in terms of both fuel economy and emissions. This information is then fed back to the throttle electronics, which adjust the throttle angle as required.

### Electronic Throttle Valves

The electronic accelerator's pulse and all other available data from the engine management system's sensors are permanently calibrated. The optimum throttle valve position is calculated from this information. The electronic throttle valve is only activated by the control signal from the engine management system.

## Drosselklappe

### Elektromotorische Drosselklappen

Die Drosselklappenstellung wird mechanisch über den Gaszug reguliert und von der Drosselklappen-Elektronik als Steuersignal an das Motorsteuergerät weitergeleitet. Die eingehenden Informationen werden mit weiteren aktuellen Informationen aus verschiedenen Sensoren des Motormanagements abgeglichen. Die für Verbrauch und Abgasemission optimale Drosselklappenstellung wird permanent errechnet und angeglichen und in Form eines Steuersignals an die Drosselklappe zurück gesendet. Dort wird eine Feinregulierung der Drosselklappenstellung eingeleitet.

### Elektronische Drosselklappen

Der Impuls des elektronischen Gaspedals (E-Gas) und alle weiteren zur Verfügung stehenden Daten der Motormanagement-Sensorik werden permanent abgeglichen. Hieraus wird die jeweils optimale Drosselklappenstellung errechnet. Die elektronische Drosselklappe wird dabei ausschließlich durch das Steuersignal aus dem Motormanagement angesteuert.

## Corp papillon

### Corps papillon compact

Ici, le papillon est relié à la pédale d'accélérateur au moyen d'une liaison mécanique. L'angle de soupape est contrôlé par l'élec-tronique du papillon, qui reste en communication permanente avec le système de commande du moteur. Les données qui en résultent sont comparées en temps réel avec un ensemble d'informations provenant d'autres capteurs embarqués. Le système de commande du moteur calcule alors la position optimale du système au niveau des économies de carburant et des émissions. Ces informations sont ensuite renvoyées à l'électronique du papillon, qui ajuste l'inclinaison en conséquence.

### Clapets d'étranglement électroniques

L'impulsion de la pédale d'accélérateur électronique et toutes les autres données disponibles de la sensorique de la gestion du moteur sont alignées en permanence. On calcule en permanence la position optimale des clapets d'étranglement. Ce faisant le clapet d'étranglement électronique est excité exclusivement par le signal de commande de la gestion du moteur.

## Válvula del acelerador

### Válvulas del acelerador con control electromotriz

En este tipo de acelerador, la válvula de mariposa está conectada de forma mecánica al pedal. La electrónica del acelerador observa el ángulo de la válvula y lo comunica al sistema de gestión del motor. Estos datos se comparan en tiempo real con la información procedente de otros sensores de a bordo y se calcula la mejor posición del acelerador para optimizar las emisiones y el consumo de combustible. Esta información se devuelve a la electrónica del acelerador que corrige el ángulo del acelerador según sea necesario.

### Válvulas de mariposa electrónicas

El impulso del pedal electrónico del acelerador (acelerador electrónico) y todos los restantes datos disponibles de los sensores del sistema de gestión del motor se equilibran de manera permanente. A partir de estos datos se calcula la posición óptima de la válvula de mariposa en cada momento. La válvula de mariposa electrónica se controla exclusivamente mediante la señal de control procedente del sistema de gestión del motor.

### Valvole a farfalla

#### Valvole a farfalla elettromeccaniche

In questo caso, la valvola a farfalla è collegata meccanicamente al pedale dell'acceleratore. L'angolo di apertura della valvola è controllato dai componenti elettronici della stessa, che rimangono in comunicazione costante con il sistema di gestione del motore. I dati ottenuti vengono confrontati in tempo reale con una serie di informazioni provenienti da altri sensori di bordo. Il sistema di gestione del motore calcola la posizione ottimale della valvola in termini sia di risparmio di carburante sia di emissioni. Queste informazioni vengono poi rinviate ai componenti elettronici della valvola che ne regolano l'apertura di conseguenza.

#### Valvole a farfalla elettroniche

L'impulso del pedale dell'acceleratore elettronico (E-Gas) e tutti gli altri dati disponibili della sensorica di gestione del motore vengono compensati in modo permanente. In base a questi dati viene calcolata la posizione di volta in volta ottimale delle valvole a farfalla. La valvola a farfalla elettronica viene controllata esclusivamente dal segnale di comando proveniente dalla gestione del motore.

### Дроссельная заслонка

Дроссельные заслонки с приводом от электродвигателя  
Положение дроссельной заслонки регулируется механически с помощью троса управления дроссельной заслонкой и электроникой дроссельной заслонки передается дальше в качестве управляющего сигнала на блок управления двигателем. Поступающие данные сравниваются с другими текущими данными от различных датчиков системы управления двигателем. Постоянно рассчитывается и приводится в соответствие положение дроссельной заслонки, оптимальное в отношении расхода топлива и выброса ОГ и подается назад на дроссельную заслонку в виде управляющего сигнала. Там осуществляется точная регулировка положения дроссельной заслонки.

#### Электронные дроссельные заслонки

Импульс электронной педали газа (электронная система управления подачей топлива) и все прочие имеющиеся данные датчиков системы управления двигателем непрерывно сравниваются. Из них рассчитывается соответствующее оптимальное положение дроссельной заслонки. Электронная дроссельная заслонка при этом управляется исключительно с помощью сигнала системы управления двигателем.

### Exhaust Gas Recirculation Valve

Compared with traditional valves, the electrically actuated exhaust recirculation valves enable even more accurate control of the exhaust recirculation rates in Diesel engines and direct-injection gasoline engines. This way they make an important contribution towards meeting ever stricter exhaust emission standards.

### Abgasrückführungsventil

Im Vergleich zu herkömmlichen Ventilen ermöglichen elektrisch betätigte Abgasrückführungsventile eine noch genauere Steuerung der Abgasrückführaten in Dieselmotoren und direkt einspritzenden Ottomotoren. So leisten sie einen wichtigen Beitrag zur Erfüllung der immer strenger werdenden Abgasnormen.

### Valve de recyclage des gaz d'échappement

Par rapport aux valves conventionnelles, les valves de recyclage des gaz d'échappement à commande électrique permettent un contrôle plus précis des taux de recyclage des gaz d'échappement dans des moteurs diesel et des moteurs à essence à injection directe. Ainsi, elles contribuent fortement au respect des normes antipollution de plus en plus sévères.

### Válvula para la recirculación de gases de escape

Las válvulas de actuación eléctrica para la recirculación de los gases de escape permiten un control todavía más preciso de las tasas de recirculación de gases en los motores de gasóleo y los motores de explosión con inyección directa si se comparan con las válvulas convencionales. En consecuencia contribuyen en gran medida al cumplimiento de las normas cada vez más estrictas para los gases de combustión.

### Valvole di ricircolo dei gas esausti

In confronto alle valvole convenzionali, le valvole di ricircolo dei gas esausti a comando elettrico permettono una gestione più precisa dei tassi di ricircolo dei gas combusti dei motori diesel e a benzina ad iniezione diretta, dando un forte contributo al rispetto delle norme sulle emissioni gassose sempre più severe.

## Клапаны системы рециркуляции отработавших газов

По сравнению с традиционными клапанами клапаны системы рециркуляции ОГ с электроприводом позволяют еще точнее управлять степенью рециркуляции ОГ в дизельных двигателях и бензиновых двигателях с прямым впрыском. Таким образом они вносят важный вклад в соблюдение все более строгих стандартов по выбросу ОГ.

### Air Flap Actuator

The electric actuator with integrated position sensor and optional integrated electronics allows intake manifold throttles or turbo charge guide vanes for example to be continuously adjusted. Its more precise control means that it is taking the place of standard pneumatic drives which can no longer satisfy the more stringent requirements.

### Luftklappen-Stellmotor

Der elektrische Aktuator mit integriertem Positionssensor und wahlweise integrierter Elektronik ermöglicht die kontinuierliche Verstellung beispielsweise von Saugrohrklappen oder Turboladerleitschaufeln und ersetzt aufgrund der präziseren Steuerung herkömmliche pneumatische Antriebe, die den gestiegenen Anforderungen nicht mehr genügen.

### Moteur de commande des clapets d'arrivée d'air

L'actionneur électrique avec un capteur de position intégré et au choix une électronique intégrée permet le réglage continu par exemple de clapets de tuyau d'aspiration ou d'aubes directrices de turbocompresseur et remplace, en raison de la commande plus précise, les entraînements pneumatiques traditionnels qui ne suffisent plus aux exigences plus élevées.

### Servomotore de válvula de aire

El actuador eléctrico con sensor de posición integrado y electrónica opcionalmente integrada permite la regulación continua de, por ejemplo, las válvulas de múltiples de admisión o de los álabes guía de turboalimentadores y, debido al control más preciso que permite dicho actuador, sustituye a los accionamientos neumáticos convencionales que ya no pueden hacer frente a las actuales exigencias cada vez mayores.

## Servomotore delle valvole di chiusura dell'aria

L'attuatore elettrico con sensore di posizione integrato e sistema elettronico integrato a scelta permette la regolazione continua delle valvole del tubo di aspirazione o delle palette di guida del turbocompressore e, grazie al controllo preciso, sostituisce gli attuatori pneumatici che non soddisfano più gli attuali requisiti.

## Исполнительный привод воздушных заслонок

Электрический исполнительный орган со встроенным датчиком положения и на выбор со встроенной электроникой позволяет регулировать непрерывно, например, заслонки впускного коллектора или направляющих лопаток турбонагнетателя и заменяет благодаря более точному управлению традиционные пневматические приводы, которые уже не удовлетворяют возросшим требованиям.

### Electric Water Pump

The coolant flow of the electrically-powered water pump with integrated control unit can be variably adjusted to the cooling requirements. Thus, precise engine temperature control is ensured. Its use of energy meets the demands with the water pump running independently from the main cooling circuit and combustion engine operation. Thanks to its high efficiency the electric water pump contributes to reduce fuel consumption.

### Elektrische Wasserpumpe

Der Kühlmitteldurchfluss der elektrisch angetriebenen Wasserpumpe mit integriertem Steuergerät kann variabel an den Kühlbedarf angepasst werden. So ist eine präzise Motortemperaturkontrolle sichergestellt. Die Wasserpumpe läuft mit bedarfsgerichtetem Energieverbrauch, unabhängig von Hauptkühlkreislauf und Verbrennungsmotorbetrieb. Dank ihres hohen Wirkungsgrads trägt die elektrische Wasserpumpe dazu bei, den Kraftstoffverbrauch zu senken.

### Pompe à eau électrique

Le débit de réfrigérant de la pompe à eau électrique avec commande intégrée peut être varié pour répondre aux besoins de refroidissement. Ainsi, un contrôle précis de la température du moteur est assuré. La consommation d'énergie de la pompe à eau est adaptée aux besoins, indépendamment du circuit principal de refroidissement et de la marche du moteur à combustion interne. Grâce à son rendement élevé, la pompe à eau électrique contribue à la réduction de la consommation de carburant.

### Bomba de agua eléctrica

El flujo de líquido refrigerante de la bomba de agua de accionamiento eléctrico con unidad de mando integrada puede adaptarse de forma variable a las exigencias de refrigeración. De esta manera, se asegura un control preciso de la temperatura del motor. La bomba de agua funciona con un consumo energético acorde a las necesidades, independientemente del circuito principal de refrigeración y del funcionamiento del motor de combustión. Gracias a su alta eficiencia la bomba de agua eléctrica contribuye a reducir el consumo de carburante.

### Pompa elettrica dell'acqua

La portata del liquido refrigerante della pompa elettrica dell'acqua con sistema di controllo integrato può essere adeguata in maniera variabile al fabbisogno di raffreddamento. Ciò garantisce un preciso controllo della temperatura del motore. La pompa dell'acqua funziona con un adeguato consumo energetico e in modo indipendente dal circuito di raffreddamento principale e dal processo di combustione del motore. Grazie al suo rendimento elevato la pompa elettrica dell'acqua contribuisce alla riduzione del consumo di carburante.

### Электрический водяной насос

Поток охлаждающей жидкости водяного насоса с электрическим приводом и встроенным блоком управления можно вариативно адаптировать к потребностям охлаждения. Таким образом обеспечивается точный контроль температуры двигателя. Водяной насос работает, расходуя энергию в зависимости от потребности, независимо от главного контура охлаждения и работы двигателя внутреннего сгорания. Благодаря своему высокому коэффициенту полезного действия электрический водяной насос содействует снижению расхода топлива.

### Motor Variable Valve Train

With help of the Valvetronic System the vehicle power is more direct and increased. On the other hand the consumption is reduced by up to 10% within the gasoline engine. Within this system the airflow is controlled by the Variable Valve Lift and replaces the Throttle Valve. Nevertheless, a Throttle Valve is still mounted and responsible for other functionalities like emergency operation. The high-precision VDO Motors adjust continuously the eccentric shaft of the system. Via the eccentric shaft and the cam shaft driven rocker arm the intake valves are variably adjusted. The VDO Sensors exactly control the adjusted angle of the eccentric shaft and report this value to the engine-management.

### Motor Variable Ventilsteuerung

Das Valvetronic System verhilft dem Fahrzeug zu einer direkteren, erhöhten Leistung und zu einem um bis zu 10 % reduzierten Verbrauch bei Ottomotoren. Die Luftmengenführung wird bei diesem System über den variablen Ventilhub geregelt und ersetzt hier die Drosselklappenfunktionalität; die Drosselklappe entfällt deswegen aber nicht, übernimmt jedoch andere Funktionen, wie z.B. den Notlauf. Die hochpräzisen VDO Motoren verstellen dabei stufenlos die Exzenterwelle in dem System. Über die Exzenterwelle und den von der Nockenwelle getriebenen Kipphebel werden die Einlassventile variabel verstellt. Die VDO Sensoren überwachen exakt den Verstellwinkel der Exzenterwelle und melden diesen an das Motormanagement.

### Actuateur, arbre excentrique

Le système Valvetronic System permet au véhicule de développer plus directement sa puissance tout en l'augmentant, et de réduire jusqu'à 10 % la consommation des moteurs à essence. Avec ce système, le débit d'admission d'air est régulé par la commande variable de la levée des soupapes, qui remplit ainsi le rôle du papillon. Cependant, le papillon n'est pas supprimé car il assure d'autres fonctions, par exemple le régime de secours. Les moteurs de haute précision VDO ajustent en continu l'arbre à excentrique dans le système. Les soupapes d'admission sont réglées de manière variable par l'arbre à excentrique et le culbuteur entraîné par l'arbre à cames. Les capteurs VDO surveillent avec précision l'angle de calage de l'arbre à excentrique et transmettent sa valeur à la gestion du moteur.

## Accionador, excéntrica

El sistema Valvetronic contribuye a que la potencia del automóvil sea más directa y superior, además de reducir el consumo de combustible en hasta un 10 % en motores de explosión. En este sistema, el volumen de aire de admisión se regula mediante la carrera variable de la válvula, sustituyendo aquí la funcionalidad de la válvula de estrangulación; no por ello la válvula de estrangulación desaparece, sino que se encarga de otras funciones como, por ejemplo, el funcionamiento de emergencia. Al mismo tiempo, los motores VDO de alta precisión se encargan de ajustar en continuo el árbol de excéntrica del sistema. A través del árbol de excéntrica y de los balancines accionados por el árbol de levas se ajustan de forma variable las válvulas de admisión. Los sensores VDO controlan exactamente el ángulo de ajuste del árbol de excéntrica, transmitiendo este valor a la gestión del motor.

## Regolatore, Albero a eccentric

Il sistema Valvetronic permette alle autovetture di erogare una potenza più diretta e maggiorata, e di ridurre nel contempo fino al 10 % il consumo di carburante dei motori a ciclo Otto. Con questo sistema l'alimentazione d'aria è regolata tramite l'alzata variabile delle valvole che in tal modo sostituisce la funzionalità della valvola a farfalla che però non viene a mancare, ma assume altre funzioni, come ad es. il regime d'emergenza. I motori VDO ad alta precisione provvedono quindi alla regolazione continua dell'albero ad eccentrici del sistema. Le valvole d'aspirazione vengono gestite in modo variabile tramite l'albero ad eccentrici e i bilancieri azionati dall'albero a camme. I sensori VDO altamente precisi controllano esattamente l'angolo d'anticipo dell'albero ad eccentrici e trasmettono questo valore al sistema di gestione del motore.

## Регулировочн. элемент, эксцентр. вал

Система газораспределения Valvetronic помогает автомобилю повысить мощность и снизить почти на 10 % расход топлива в бензиновых двигателях. Подача объема воздуха в этой системе регулируется с помощью переменного хода клапанов и заменяет здесь функции дроссельной заслонки; но дроссельная заслонка по этой причине не отпадает, а берет на себя другие функции, как, например, аварийный режим. Высокоточные двигатели VDO регулируют при этом бесступенчато эксцентриковый вал в системе. С помощью эксцентрикового вала и перемещаемых распределительным валом коромысел осуществляется переменная регулировка впускных клапанов. Датчики VDO точно контролируют угол опережения зажигания и передают его в систему управления двигателем.

## Eccentric Shaft Sensor

The VDO Sensors exactly control the adjusted angle of the eccentric shaft and report this value to the enginemanagement.

## Exzenterwellensensor

Die VDO Sensoren misst exakt den eingestellten Winkel der Exzenterwelle und senden den Wert an das Motormanagement weiter.

## Capteur de l'arbre à excentrique

Les capteurs VDO mesurent avec précision l'angle réglé pour l'arbre à excentrique et transmettent la valeur à la gestion du moteur.

## Sensor del eje excéntrico

Los sensores VDO miden exactamente el ángulo ajustado del eje excéntrico, enviando el valor obtenido a la gestión del motor.

## Sensore per alberi eccentrici

I sensori VDO misurano con precisione l'angolo dell'albero eccentrico e trasmettono il relativo valore al sistema di gestione motore.

## Датчики эксцентрикового вала

Датчики VDO точно измеряют установленный угол эксцентрикового вала и передают значение на блок управления двигателем.

**Air Control Valve**

∅ [mm] 26

Electronic (V56)

Supplementary Article/Supplementary Info (C82): with seal (V146)

Observe the vehicle manufacturer specifications (C27)

T019: Have to be taught/updated.

T024: Mandatory - check new part against old part (in particular OE No.)

T025: Components at risk due to electrostatic discharge (DO NOT TOUCH PLUG CONTACTS)

**RENAULT**

FLUENCE (L30\_) / GRAND SCÉNIC III (JZ0/1\_) / MEGANE III Coupe (DZ0/1\_) / MEGANE III Grandtour (KZ0/1) / MEGANE III Hatchback (BZ0\_) / MEGANE CC (EZ0/1\_) / SCÉNIC III (JZ0/1\_)

The information provided in this brochure contains only general descriptions or performance characteristics, which do not always apply as described in case of actual use or which may change as a result of further development of the products. This information is merely a technical description of the product. This information is not meant or intended to be a special guarantee for a particular quality or a particular durability. An obligation to provide the respective characteristics shall only exist if expressly agreed in the terms of contract. We reserve the right to make changes in availability as well as technical changes without prior notice.

Please note: Application – The products described in this catalogue are designed for use in land vehicles, engines and equipment. Disclaimer – The data in this replacement parts catalogue has been compiled and processed for the purpose of presenting our replacement parts range and is correct to the best of our knowledge. Subject to technical alterations, errors and omissions. Availability is not guaranteed. We cannot be held liable with regard to any information contained in the Continental Trading replacement parts catalogue except in case of intent, gross negligence or where mandatory liability is borne in accordance with German product liability law.
