About Wagner Greenhouses

Wagner Greenhouses operates out of Minneapolis, Minnesota. Our fifth generation family company supplies young plants to growers nationwide through the broker system. Known for quality and service, Wagner's excels in producing spring bedding plugs, summer/fall pansy plugs, cyclamen liners, cool crop liners, specialty florist liners and prefinished cyclamen.

Wagner's also operates three garden centers which gives some unique perspectives to our young plant production. First, we finish our own products, so we truly understand the important qualities in a plug. Second, we can actually interact with the gardening public and closely observe their buying decisions. We integrate what we learn into our young plant programs, strengthening our products for you, the grower.

Spring Plug Program Information

All product ships November 4, 2019 through June 26, 2020 (except Dracaena in weeks 45 - 11; Patio & Garvinea Gerbera in weeks 2 - 10).

Every young plant that leaves Wagner Greenhouses carries with it the evidence of our dedication to producing top quality products to help your season get a great start. We start by working closely with your sales person to ensure accurate order entry. We test every seed lot that comes through our doors to avoid surprises during production. We sow to order and grow the plants under carefully controlled conditions, with a staff skilled at managing fertilizer, moisture and temperature to achieve ideal plant growth. Our picture of an ideal plant includes short hypocotyls, well-developed roots and compact top growth, all with minimal chemical use. We then ship the young plants to arrive in good condition on the date you expect. Your success is important to us, and we are dedicated to helping you achieve it.

The Gerbera Garvinea Sweet series boasts true garden performance from a gerbera. The smaller flowers are more numerous than in pot plant types (flowers are larger sized than Garvinea Classics). Garvinea gerbera serve well for early spring production, tolerating a light frost once established and are hardy in mild climates (Zone 7+). Produced from tissue culture. Allow 12-14 weeks to finish earlier crops, 10-12 weeks to finish later crops. Garvineas finish nicely in 6" or gallon pots, one plant per pot.

The Gerbera Patio series produces very large, dramatic flowers on vigorous plants. Patio gerbera are ideal as premium items, making an impressive show in large patio containers. Produced from tissue culture. Allow 14-16 weeks to finish earlier crops, 12-14 weeks to finish later crops. Best in 8-10" pots (one plant per pot) or as multiples in larger containers.

Both series will be offered in a 72 tray for shipping in Weeks 2-10. We will also offer a 50 tray assortment of each series for shipping in Weeks 2-10. The assortment will have 1 row each of 5 varieties, and each row will be labeled by variety on the back of the tray. See below for planned colors (subject to change based on availability of tissue culture). Tags are included and will ship with your plants.
