WELCOME TO THE 25th WORLD CONGRESS OF DERMATOLOGY

Dear friends and colleagues,

After 4 years of preparations, we are now ready to present the 25th World Congress of Dermatology in Singapore.

To get to this stage, we have called on the coordinated effort of numerous individuals in several organisations, viz. the National Organising Committee (NOC) of the Dermatological Society of Singapore, the Scientific Programme Committee (SPC), the Executive Committee, Board, and staff of the International League of Dermatological Societies (ILDS), and Triumph our professional several conference organisers. Together, we have put in thousands of hours to make the 25th WCD outstanding scientifically and memorable socially.

The Theme of the WCD, Dermatology Beyond Borders, could not be more poignant in these times of geopolitical tension and turmoil. It reminds us of the need for us as healthcare providers and scientists to continue to strive for the betterment of all mankind. We can do this by keeping the platforms of discussion and channels of information exchange open, and we aim to leave a legacy to the next edition of WCD in 4 years time. To make the WCD a truly global meeting, the NOC and the SPC have tried to be as diverse and inclusive as possible when selecting chairs, co-chairs, speakers, session topics and moderators. We are happy to report that the number and proportion of chairs and cochairs of symposia who come from the Asia-Pacific, South Asia, the Middle East, and Africa have doubled compared to WCD2019.

The congress's Subtheme is Science, Care and Communities. We will present a scientific programme that is both wide as well as deep, leaving no areas uncovered. There will be 15 keynote plenaries, 60 Symposia in 208 sessions, 8 Controversies in Dermatology debates, 24 Courses, 19 Expert Forums, 30 DSS/LADS sessions, 51 Free Communications sessions, 12 Residents sessions, 5 late-breaking sessions and 3 sessions for Hot topics. It will cover all areas of dermatology – from medical to surgical conditions, from infections to aesthetic procedures, from skin cancers to pigmentary diseases, from paediatric dermatology to diseases in the elderly, from basic science to quality of care, from dermatopathology to STI/HIV, from eczema to neglected tropical diseases, from skin aging to hair and nail diseases, and everything else in between. We will present the latest advances in diagnostics and therapeutics and take a glimpse into the future of where dermatology is headed. We would like to thank Prof Martin Röcken and Prof Henry Lim and other members of the Scientific Programme Committee; they have worked hard to design a truly outstanding programme. We are incredibly grateful for the chairs, cochairs and speakers who have agreed come to Singapore and to share their expertise. Without you there would be no WCD.

We have received a large number of abstracts and they will provide rich and informative free communications, residents, and late breaker sessions, as well as poster sessions and displays. The 25th WCD will truly be a festival of dermatology.

To encourage the participation of patient organisations, we have planned for more sessions and presentations for these groups and will have a community village. We have also lowered the registration fees for patient support organizations, as well as for nurses and allied health personnel.

To complement the scientific content, we will present a variety of entertainment performances at our social events. We hope to give you a taste of the colorful multicultural heritage that we have in South-East Asia and in Singapore.

We are very grateful for the wonderful help from many colleagues and friends in the dermatology fraternity, especially WCD Ambassadors and ILDS Board who have actively promoted the WCD2023 to all corners of the world.

Last but certainly not least, we acknowledge and thank our industry partners. It is with their generous sponsorship that we are able to stage the 25th WCD, and to increase the assistance for needy delegates. We speak for all in the NOC and other presenting and supporting organisations when we say that we are incredibly excited and very much looking forward to welcoming you to Singapore in July.

Lights, Camera, and Action!

With best wishes

MESSAGE FROM THE ILDS PRESIDENT

Dear WCD2023 Delegates, Members of the International League of Dermatological Societies (ILDS), Friends and Colleagues,

Welcome to Singapore and our flagship event, the World Congress of Dermatology.

Here in beautiful Singapore, surrounded by modern design, water and wonderful tropical vegetation we will be hosted with great devotion by the Dermatological Society of *Singapore* for a global highlight in dermatology.

Faithful to our mission of improving "Skin Health for the World", the ILDS has worked hard towards making this WCD a globally inclusive event fostering high-level dermatological education, exchange of professional knowledge and skills, with the aim of improving our specialty and patient care.

The 25th WCD takes place every 4 years under the auspices of the ILDS and builds upon the success of WCD 2019 Milan. I am extremely grateful to WCD2023 President Roy Chan, Secretary-General Yen Loo Lim, and the Dermatological Society of Singapore for their tremendous devotion as hosts in challenging post-Covid times. My thanks also to the Scientific Programme Committee, headed by Martin Röcken (Chair) and Henry Lim (Vice-Chair) for the newly structured program with half-day/day grouped theme tracks of great depth, quality, global representation, practical relevance, and appeal. I am confident everyone will benefit from the exciting scientific and social program offered here in Singapore.

In tradition, WCD2023 will also be a time of suspense during which new members will be elected to the ILDS Board of Directors and the location of the next World Congress will be decided.

It has been a true honour to serve as your ILDS President over the last four years. Representing over 190-member dermatological societies and 220,000 dermatologists worldwide, and dermatology within the WHO as a non-state actor, is an honor! Together with dedicated dermatologists, a wonderful ILDS office team in London, patient representatives, nurses, allied health professionals, and industry we are delivering on our agenda (www.ilds.org) to successfully promote skin health globally. Thank you!

I truly appreciate you being with us in Singapore to share your precious time and experience with colleagues from different parts of the world. Please stay tuned to the latest news by following our social media accounts @ILDSDerm on LinkedIn, Twitter, Facebook and Instagram.

I look forward to meeting you all in Singapore.

With my best personal regards,

Lars French, MD
ILDS President

MESSAGE FROM THE DSS PRESIDENT

A WARM WELCOME TO SINGAPORE!

It is the privilege and delight of the Dermatological Society of Singapore to be the host of the 25th World Congress of Dermatology. This congress is the culmination of the enormous efforts and achievements put together by the ILDS and the national organizing committee led by Prof Roy Chan and A/Prof Lim Yen Loo.

Against the backdrop of post-pandemic changes, the burden of skin disease worldwide and global events, the theme "Dermatology Beyond Borders" resonates so much more! In the next few days of the congress, I hope that even we are kept abreast on the latest in skin science and patient care, we will continue to build new friendships, strengthen the existing ties, together building the global dermatology community.

Finally, in the midst of all the sessions and events, I hope that you will have the opportunities to enjoy the food, culture and experiences that Singapore and the region has to offer.

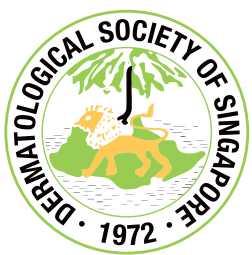

Wishing you a fruitful time at the WCD 2023!

A/Prof. Haur Yueh Lee

President, Dermatological Society of Singapore

DERMATOLOGICAL SOCIETY OF SINGAPORE

HOST ORGANISATION

The genesis of DSS dates back to 1960 when a group of doctors founded the Singapore Dermatological Society under the umbrella of the Singapore Medical Association. The name of the Society was later changed to the Dermatological Society of Singapore when it became an independent Society in 1972. DSS is an active member of the League of ASEAN Dermatological Societies (LADS) as well as the International League of Dermatological Societies (ILDS).

PREVIOUS WORLD CONGRESSES

The World Congress of Dermatology (WCD) is one of the largest international dermatological conferences. It is organised under the auspices of the International League of Dermatological Societies (ILDS). The first WCD was held in 1889 in Paris. It is now held every 4 years, the most recent one was the 24th WCD, that was staged in June 2019 in Milan, Italy.

The WCD aims to promote the science and practice of dermatology, by providing a platform for specialists from around the world to showcase new knowledge, exchange clinical experiences and scientific research, and to build professional and personal networks and collaborations.

Over the past 130 years, the WCD has traversed the globe. It has brought together dermatologists and professional societies and has raised the stature and importance of skin health and diseases that affect humankind.

Any violations of these rules will result in expulsion from the session, and from the 25th World Congress of Dermatology.

Sessions will be closely monitored for such occurrences.

WCD2023 MEDIA CENTRE USE

Only those who have registered as Media are permitted to use the Media Centre as a working space and to use all facilities (equipped with table, chairs, and electrical outlets). Doctors and other participants who are not registered as Media are not permitted access to the Media Centre, unless they are participating in an interview with a registered Media; in that case, interviewees must always be accompanied by a registered Media and may not remain in the room for more than one hour.

Please note that the Media Centre may not be used for equipment storage.

The **Interview Room** is located in Room 305 Suntec Congress Venue.

Opening hours:

From 4th to 7th July 2023: 9:00 to 17:00

This space must be booked ahead of time at the Media desk and is available on a first come, first served basis. It can be reserved for free for a maximum of one hour.

The equipment must be assembled and disassembled within the time frame specified.

Unless otherwise announced, all interviews will take place in the Interview Room.

After reviewing the programme, journalists must send their interview requests to wcd2023media@thetriumph.com.

The **Photocall Area** is located at Level 3, in the foyer in front of Room 303.

Opening hours:

- 3rd July 2023: 10:00 to 17:30
- 4–5–6–7 July 2023: 8:00 to 18:00
- 8th July 2023: 8:00 to 14:00

The **Opening Press Conference** will take place in Room 303, Level 3, on 3rd July at 12:30.

SUSTAINABILITY AT WCD2023

As the leading global dermatology congress, taking place in the city-state of Singapore, the go-to destination for global business event, we felt the need to keep our environmental, social and economic impact in check and lead the way for more sustainable actions.

We drafted a document that became the Congress Manifesto: the **WCD2023 Green Policy**, taking into account the United Nations Sustainable Development Goals (UN SDGs) and the Singapore Green Plan 2030.

The policy is complemented by the **WCD2023 Green Nudges**, a list of 25 actions aimed at instilling a sense of responsibility to all stakeholders involved.

This will hopefully mitigate negative impact inherent in the realisation of this major event.

Furthermore, sponsors and exhibitors are more involved in this process, with the Congress launching a **Green Challenge** to demonstrate how waste and pollution caused by product packaging can be reduced, as well as sharing their sustainable production and disposal practices.

WCD2023 has also joined the OneMillionTrees movement, a project that aims to protect nature in Singapore by planting one million trees over the next 10 years.

The initiative is part of Singapore's transformation into a City in Nature, a key component of the Singapore Green Plan 2030, to which WCD2023 has made a concrete contribution through a **fundraising campaign** to support the local charity Garden City Fund, in order to offset the Congress' effects.

GREEN CHALLENGE

Categories involved:

- Pharmaceutical and dermocosmetic companies submitted a maximum of 4 videos each, featuring innovative projects related to product packaging that have been on the market since June 2019 (date of the latest WCD edition);
- Medical equipment companies shared a maximum of 4 videos each, featuring good sustainable practices in manufacturing processes and equipment disposal that have been on the market since June 2019.

How the Challenge works:

- Voting is available exclusively through the WCD2023 App: Homepage 2 > Green Challenge
- Each registrant (attendee, exhibitor, sponsor, etc.) with a unique registration number can only vote once
- Each registrant can vote for 1 project and 1 best practice

INSURANCE

The Congress fee does not include individual insurance coverage. All participants are advised to arrange their own travel and health insurance, which must be purchased in your country of origin. The organizers will also not be responsible for loss of or damage to a person or personal belongings.

MOBILE PHONES & PERSONAL DEVICES

Please be considerate by silencing all notifications on your mobile phone, laptop and personal mobile devices prior to entering any session room.

PHOTOGRAPHY

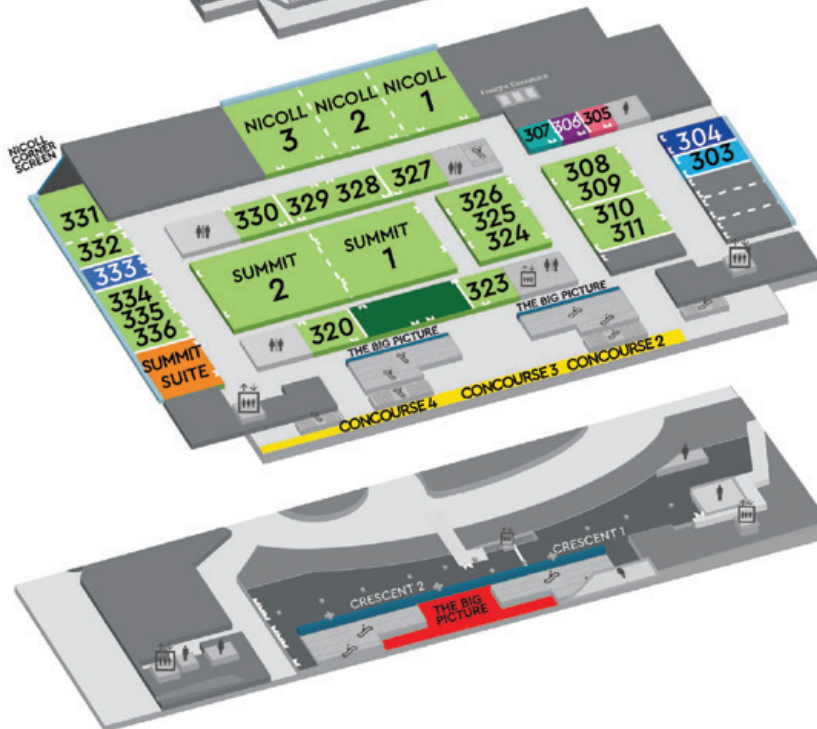

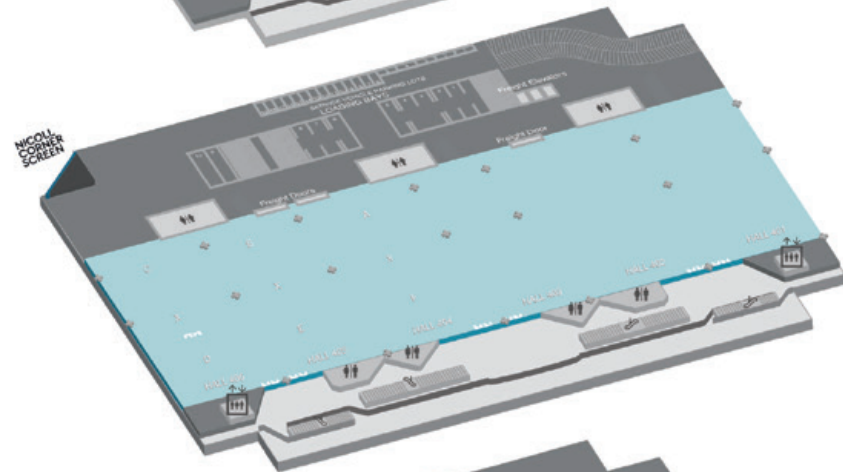

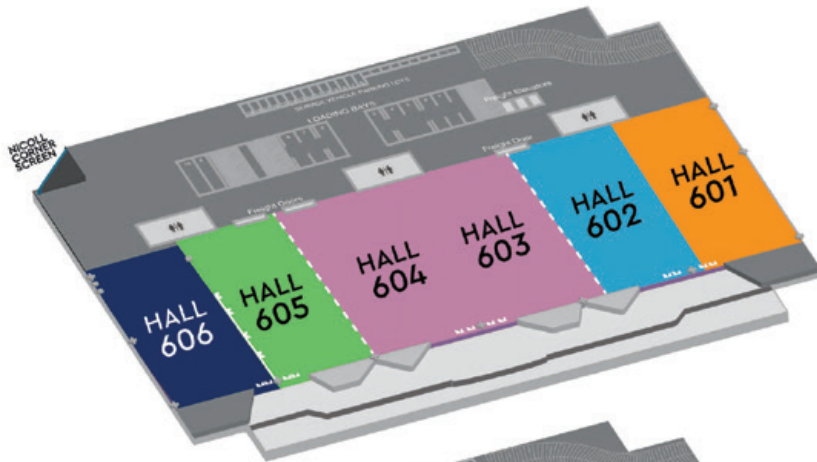

Recording or taking photos of any Scientific Sessions is NOT permitted, and this policy will be strictly enforced.

SMOKING POLICY

It is strictly forbidden to smoke inside the Congress Venue at any time. The restriction applies to all types of electronic cigarettes.

ABOUT SINGAPORE

Singapore is an island nation with a population of 5.7 million people, comprising of mostly Chinese, Malay and Indian ethnicities. It offers visitors a fascinating fusion of many cultures from East and West, and has an outstanding record of racial and religious harmony. English is the main language of communication, everyone is multi-lingual, and it is likely to be the only country in the world where the majority of the population speaks both English and their mother tongue language of Mandarin, Malay or Tamil. Singapore is an open, modern and secular democracy.

EFFECTIVE COVID-19 PANDEMIC CONTROL

Singapore has been relatively successful in managing Covid-19, there is a very high vaccination coverage and very low mortality rate. Safety measures are continuously updated to control the epidemic and to make your visit smoother and safer.

Covid-19 related travel health and border regulations will be updated on the congress website, so check it periodically.

CLEAN, GREEN AND SUSTAINABLE

Singapore is also known as the Garden City, with over 50% of its area covered in greenery. With hundreds of parks, nature reserves, mangroves, tidal flats and coral reefs, it is no concrete jungle. The Botanic Gardens, a UNESCO Heritage site, and the award-winning Gardens by the Bay are especially popular. Singapore is an eminently liveable and sustainable city, with clean air, healthy living environment, and a robust and diversified supply of water. It has strived to maintain a balance between development and conserving the environment.

EFFICIENT & AFFORDABLE TRANSPORTATION

Travel within the city-state is convenient and hassle-free, and traffic jams are rare. Visitors have options to several inexpensive, safe and reliable transportation choices, including the MRT metro system, buses and taxis. This means that hotels, restaurants, cultural venues and other places of interest are all easily accessible.

SAFETY & SECURITY

You can visit Singapore with the confidence that your personal safety is in good hands. Singapore is widely regarded as one of the safest countries in the world, with consistently low crime rates, a transparent legal system, and a reliable police force.

LOCAL CULTURE & CUISINE

The melding of our rich tapestry of cultures into a harmonious collective is arguably the country's biggest attraction. There is also an impressive range of more than 40 different museums, there will be something to discover for every interest.

Singapore is home to more dishes than you can eat in a lifetime – from Michelin-starred restaurants to affordable yet scrumptious meals, this is where you can taste it all. Nothing reflects the patchwork of cultures more than the food here.

WEATHER & CLOTHING

The weather is tropical, which means it is hot and humid through most of the year. It is advisable to wear light, cotton clothing. Jackets are not needed unless indicated. Fortunately, all hotels, offices, shopping malls and the public transport are air-conditioned, so you would hardly feel uncomfortable.

CURRENCY

The Singapore dollar is the official currency. It is made up of 100 cents and is abbreviated with the dollar sign S\$, or SGD to distinguish it from other dollar-denominated currencies.

TIME ZONE

Singapore Time is consistent with UTC +8. The Singapore Time does not have an associated daylight-saving time. The Singapore Time applies only to Singapore.

LANGUAGE

There are 4 official languages: Malay, English, Mandarin, and Tamil. English is the primary spoken language of the country.

ELECTRICITY

In Singapore the electrical current is 230V supply voltage and 50Hz.

GETTING AROUND SINGAPORE

Singapore's public transport system is fast and efficient, and will whizz you to memorable attractions without fuss:

- **Metro** – Singapore's MRT (Mass Rapid Transit) and bus systems have an extensive network of routes that will help you zip around the city.
- **Bus** – bus routes are also some of the most scenic, allowing you to indulge in the lush greenery and beautiful architecture of our 'City in a Garden'. All public buses are wheelchair accessible and open strollers are allowed.
- **Taxi** – Taxis are comfortable and especially handy if you want to go to places not accessible by the bus or MRT. Cabs here are metered, but there may be surcharges depending on when, where and which company's taxi you board.
- **Ride-hailing APPS** – you may use one of the ride-hailing applications available in Singapore to book a ride from your preferred pick-up point to your desired destination. Some options available include Grab, Gojek, Ryde and TADA.

ILDS MEMBER SOCIETY MEETINGS & ANCILLARY GROUP MEETINGS

MONDAY 3rd JULY, 2023

The following satellite sessions have been organised by national and international societies (i.e. ILDS member societies and affiliate groups) for the benefit of WCD2023 delegates. They represent and adjunct to the main World Congress scientific programme and are meant to showcase activities and expertise in dermatology from around the world. Attendance at these sessions is generally open to all WCD2023 registrants but for some sessions, advance preregistration through the individual societies may have been required.

MESSAGE FROM THE SCIENTIFIC PROGRAMME COMMITTEE CHAIR AND VICE-CHAIR

Dear colleagues,

Warm welcome to the World Congress of Dermatology 2023 in Singapore! To make a difference, the scientific programming committee (SPC) developed an entirely new format for this event. Despite the global threats, the world is moving closer together and the interdependencies are increasing. In this challenging context, the World Congress of Dermatology 2023 provides the highest quality of global dermatology continuing education as specialists from all over the world, including areas previously underrepresented, will enrich us from different angles.

Major inclusive effort has been taken to identify and invite leading dermatologists from Africa, Asia, Middle-East and South-America to enrich the scientific program. To make the Congress a true World Congress, the SPC and local organizer have:

- invited distinguished speakers on topics of global responsibility
- provided an unprecedented number of scholarships to support attendees especially from low and lower-middle-income countries
- completely restructured the congress format, moving towards a structured format promoting exchange on topics most relevant to dermatology in 2023 and beyond.

How does the new format look like?

Distinguished Lectures which go beyond clinical medicine. Prominent scientists will address topics of world-wide impact such as the distribution of resources or the human impact on climate change. In subsequent **Plenary Lectures**, internationally-recognized experts summarize newest insights into 15 disease entities.

Instead of the classical formats, 60 **full- or half-day Symposia** focus on individual disease entities, from epidemiology and pathophysiology through clinical and histological diagnosis to treatment – addressing both classical and most recent approaches. This allows to get profound insights into many important skin diseases and their treatments from different parts of the world.

Furthermore, two **Hot Topics** sessions will address entities of immediate relevance to our specialty.

The third new format, the **Expert Forum**, will be truly interactive. Short statements by widely known experts introduce debated topics to be subsequently discussed between experts and delegates. To ensure lively discussions, **Expert Forums** have a maximum of 100 participants. The discussions will be summarized by the chair.

Because of their success during previous congresses, we will keep the **Controversy Sessions**, the **Courses** and **Free Communications**.

Organizing such a program with a world-wide scope is the work of many. First of all, I want to thank the chairs and speakers. They are the ones who prepared their presentations and will enrich us with their knowledge. We are especially grateful to all those from low- and middle-income countries, for whom joining this congress is also a major financial effort.

We all are grateful to the hundreds of experts and the ILDS member societies who helped to form the program, to formulate the most appropriate and most pressing questions, and to find the best speakers from

all over the world. You might miss the participation of some prominent experts – we hope that these experts and also you forgive us for that, as we took a major effort to involve young stars, early in their career.

We would like to thank the strong support provided by members of the Scientific Program Committee, Professor Roy Chan, the local organizing committee, and the ILDS member societies from all over the world for helping to shape a world-wide and balanced program.

I'm especially grateful to Professor Henry Lim, co-chair of the SPC and ILDS president-elect. He provided tremendous help and guided the SPC for some months during difficult periods. Without his support realizing this program would have been impossible.

This said, we sincerely hope that you will enjoy the program and that this World Congress will deeply enrich us and make all of us better dermatologists for our patients.

Yours

CME ACCREDITATION

Participants must ensure that their badges are scanned both at the entrance and at the exit of each session to be acknowledged for UEMS-EACCME and Singapore CME accreditation.

The 25th World Congress has been granted 32 European CME credits (ECMEC®s) by the European Accreditation Council for Continuing Medical Education (EACCME®).

Each participant can only receive the number of credits he/she is entitled to according to his/her actual participation at the event once he/she has completed the feedback form.

Please find below the breakdown of ECMEC®s per day:

03.07.2023 – 0.00
04.07.2023 – 7.00
05.07.2023 – 7.00
06.07.2023 – 7.00
07.07.2023 – 7.00
08.07.2023 – 4.00

The EACCME® awards ECMEC®s on the basis of 1 ECMEC® for one hour of CME with a maximum of 8 ECMEC®s per day.

SINGAPORE CME ACCREDITATION

Continuing Medical Education (CME) points for the local medical practitioners are being applied with the Singapore Medical Council. Once approved, information on the number of points for the main meeting of the World Congress in Dermatology (WCD) will be made known. CME points for attendance at sessions at the WCD will be uploaded to the SMC website within 2–4 weeks after the event.

FACULTY CONFLICT OF INTEREST DISCLOSURES

According to the UEMS-EACCME® WCD2023 requires that all individuals who make any presentation at the Congress declare their conflicts of interest in relation to their presentation(s). If there are no relevant conflicts this must also be specifically declared. The list of conflict of interest declarations is available for review on the Congress website www.wcd2023singapore.org/cme. All presenters must provide a declaration of COI at the time of presentation. More detailed information on individual disclosures by any specific author, listed by specific type of conflict and commercial relation(s), are available for review by direct request to the Organising Secretariat.

These sessions aim to showcase the top posters selected from over 4,300 submissions for their outstanding scientific and educational value. A total of 25 "featured" ePosters for the 4 sessions (8 feature platinum, 17 feature posters per session) will be on display in the ePosters Area during the slated hour from 4th July to 7th July.

Each Platinum posters presenter will have eight-minute window during this hour to present the first two minutes the findings/results of his work and leave the remaining six minutes for questions from the invited moderators and attending delegates.

ALL posters will be available for viewing within the ePosters Area during operating hours throughout the entire conference. When the posters are not on special display as a "Feature Platinum posters and Feature Posters", they will still be available for viewing at the kiosk workstations.

NAOS is the company behind BIODERMA, Institut Esthederm and Etat Pur. When he created the first BIODERMA and Institut Esthederm products in 1977, Jean-Noël Thorel, a pharmacist-biologist, paved the way for active cosmetics by integrating biology into cosmetics. Our brands are designed with a unique scientific approach: ecobiology. Combining skin ecology and skin biology, this approach is inspired by the skin itself; it considers the skin as an ecosystem that must be preserved and acts with its natural mechanisms to strengthen them. Ecobiology is a positive and respectful approach that promotes lasting effectiveness and balance for the whole person. NAOS is owned by an endowment fund whose purpose is to contribute to the realization of human potential. This very innovative business model offers a better sharing of the value we create, which guarantees the sustainability of the company and makes it possible to use the dividends for generous purposes.
