Power at Your Fingertips

Information is power. And in the fast-paced world of pro audio—which seems to be ruled by the classic “Time = Money” equation—having access to a fingertip source of information can save you time and money.

Mix magazine was founded in 1977 from a need to provide information for studios, musicians, engineers, producers and other audio professionals. First appearing as a directory of recording studios and services in the San Francisco Bay Area, the concept expanded to include the studios of Los Angeles, and later Nashville, New York and the rest of the country. Eventually *Mix* widened its scope, adding interviews, articles on audio production, new products, and directories of essential audio services. Along the way, the *Mix Master Directory* was conceived as an annual, convenient, single-volume reference filled with resource data for audio pros.

Today, it's hard to imagine life without cell phones, the Internet and DAWs with unlimited undo commands. But just as when *Mix* began, the need for solid, reliable information remains essential. Certainly, online searches offer a vast array of data, but if you're looking for CD pressing services, a hot New York tracking room, a studio designer/acoustician or engineers/producers in your area, the *Mix Master Directory* provides the data you need at a glance—without getting snared in a Web engine that spits out 325,000 entries when you search for “studio.”

We think you'll find the 2006 *Mix Master Directory* an essential part of your business, whether you're contacting major or indie record labels, live sound companies, duplicators or recording studios. And e-mail mmd@primediabusiness.com or give us a call at 800/344-LIST if you'd like to be included in next year's *Mix Master Directory*.

We'll be listening.

Our Flagship Has Officially Set Sail

When we set out to develop our new **m802** 8 channel remote control microphone preamplifier, we knew we had our work cut out for us. After all, the finest audio engineers in music recording, film scoring, major artist tours and premier music and recording schools have relied on the model 801R system for its stunning sonic performance and rock-solid reliability for years.

So the newly designed **m802** system can now be controlled directly from **Digidesign® ProTools|HD®** systems, compatible control surfaces and many other MIDI devices. **DPA 130V** microphone users will be thrilled to know they can order a 130V option on a channel pair basis.

We have incorporated an updated signal path which is now fully balanced from start to finish, resulting in a noticeable dynamic range improvement and the output current has been increased so that very long audio cable runs can be achieved without signal loss. Plus, we have included a provision for a high definition 24-bit/192 kHz converter card in the future.

The new stainless steel chassis comes from our **m** series monitor controllers and we have completely redesigned the Remote Control Unit to provide greatly improved ergonomics and system control.

Whatever your application, we invite you to discover the remarkable sonic performance and functionality of our new **m802**.

We're confident that it will help you make the finest recordings of your career.

MIXERS

HOW MANY CHANNELS DO YOU NEED?

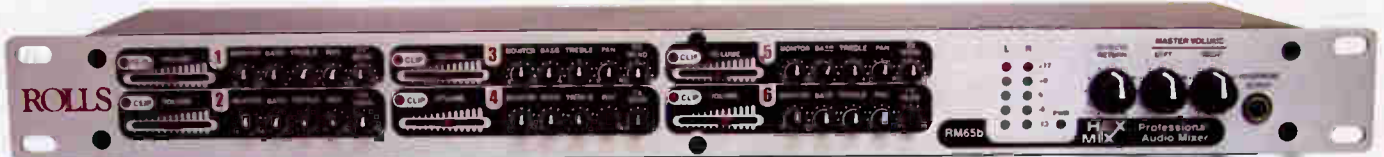

1 Channel. We know, it's not a mixer, but the MP13 is a shining example of the clean preamp circuitry we use in all our mixers, plus phantom power for your condenser microphones. The MP13 has XLR and 1/4" inputs and outputs.

2 Channel. The new MX34 LiveMix is a two channel microphone mixer with Level and Pan controls for each channel, plus 1/8" (3.5mm) Headphone and Main Outputs for compact connection to any pro-audio input.

3 and 4 Channel. The MX54s ProMix Plus three channel and MX124 ProMix IV four channel units each feature quality microphone mixing with stereo transformer-balanced XLR Outputs, and a 1/4" TRS stereo Headphone/Aux Output. Each channel has balanced XLR inputs, 100Hz low cut switches and 18 Volts of phantom power.

6 Channel. The RM65b HexMix is a single rack space unit featuring 6 channels of audio mixing, each with an XLR Microphone Input and 1/4" unbalanced Line Input. A unique feature of the 1/4" line inputs is they may be internally reconfigured to operate as Inserts for the Microphone Input. Each channel, in addition to its Level control, also features a Clip LED, Monitor Send control, Effects Send control, and Bass and Treble controls. Each Microphone input has switchable 36 volts of phantom power, and a rear panel Trim control.

7 Channel. The RM67 is a single rack space audio mixer with three XLR inputs and four stereo RCA source inputs. Talkover features have been included on Mic 1 and Source 4 for paging and music priority functions. A Remote Volume jack has also been included to connect to an external potentiometer for master volume control. A pre-master level stereo Record Out jack allows for program recording, and a contact closure main output mute jack allows the whole unit to be muted for external paging, etc..

8 Channel. The RM82 is a mono eight channel mixer. Each of the eight channels has an XLR microphone input, as well as a 1/4" unbalanced input. The 1/4" jacks may be internally reconfigured to become channel Inserts or Direct Outputs. Each channel has individually switchable +48 VDC phantom power. The Main output for the RM82 is a balanced male XLR jack. This output may be internally jumpered for a Line or Mic level.

Stabilant 22 is an Electronic Contact Enhancer. It ensures long-term connector reliability, conductivity, and performance by eliminating intermittent connections. Stabilant 22 is easy to apply and cost-effective. It is an active, resident treatment for assembling or servicing audio and video equipment. Stabilant 22 can substantially improve the quality of the sound or video by increasing the signal-to-noise ratio and reducing thin-film rectification effects. These can cause susceptibility to RF interference. Any reflections will cause ghosting that can degrade the signal quality. Remember that Stabilant 22 is effective from DC to several GHz.

Polyphonic Octave Generator. Add one octave up, two octaves up, and one octave down from your original guitar signal and blend them all together-plus it works on chords! Want your guitar to sound like a 12 string? The POG can do it-or even make it sound like an 18 string. The POG also lets you detune either or both of the up octaves, and it can process any musical source. Destined to be a legendary EH classic.

The newly founded company is determined to re-define the meaning of quality in pro-audio through a subjective as well as objective, "Golden-ear"-driven R&D process spearheaded by Andrew Lipinski. Mission I: The Loudspeakers, debuted at the 2003 AES, are super-linear surround monitoring solutions for varying room sizes. Mission II: The Microphone Pre-amp, debuted at the 2004 AES in San Francisco and Lynn Fuston's mic-pre shootout DVD, is a four-way gain adjustment microphone preamplifier with two different kinds of input transformers, each having a switchable turn ratio.

Mission I Quotes: "If more engineers were using monitors like these there might be a lot less abuse inflicted on poor defenseless audio." - Alan Silverman, ArII Digital - "The imaging and transient response are incredible - Roy Hendrickson, Avatar Studios

Mission II Quotes: "The L-408 is one of the finest clean-sounding mic preamps that I've ever encountered. The resolution and detail of the pres are amazing, especially in the bottom end. The L-409 is reminiscent of a vintage Class A mic preamp. Though it sounds like neither, its performance reminds me of falling somewhere between an API and a Neve 1081. In my mind, the optimum preamp palette would be a pair of each mounted in one of the 3RU rack units." - Russ Long, Pro Audio Review

The "VDX BOX" is a comb nation compressor, microphone preamplifier, 33 frequency Pultec style equalizer, de-esser and limiter based on several of Manley's legendary tube designs including the 40dB Microphone Preamplifier, the Electro-Optical Limiter, and the All Tube Mid Frequency Equalizer. It elegantly combines these with a shorter audio path and more processing power than the individual units. Features include, a variable attack/release opto-compressor located before the mic preamp (!). Instrument and line inputs, VU meter, highpass filters, phase and phantom switches. While designed for vocals, the "VOX BOX" is well-suited for drums, guitars, synths and bass. The "Variable MU Compressor Limiter" today is widely recognized as the best all purpose compressor available. It has that very rare quality of making a source immediately sound better. No audible squashing, pumping, distortion or frequency emphasis. It accomplishes this feat using an all-tube differential circuit in some ways similar to the old Fairchild compressors. It features individual attack, release, threshold, output controls, a useful dual input control and two hardware bypass, and compress/limit switches and link switch. The vast majority of recent hit records have been mixed and/or mastered through a Manley Variable MU Compressor Limiter.

Palmyra Studios (nestled in the countryside 25 miles south of Dallas) was built and designed from the property's original 1903 farmhouse. The control room is solid 1", 100-year-old cedar. The sound and feel of the old wood, coupled with our 1969 Abbey Road Class A Neve 8038, and Studer A800's, give Palmyra Studios an amazingly distinctive sound. Add 65 acres of privacy, and an occasional pooch resting on the surrounding decks, and you have what we feel is one of the most creative environments ever built for the recording process. For 8 years, we have been one of the best kept secrets in Texas.

Radial JD7 Injector - suggested list \$649 US
Guitar freaks rejoice! Drive up to 7 amplifiers at the same time without changing the original tone of the guitar and do it without buzz or hum caused by ground loops. Record a dry track with the built-in DI and send the signal back to the JD7 and re-amplify it to 7 amps and effect pedals. Addictive.

Magic.

Radial X-Amp Re-Amplifier - suggested list \$199 US

FRANK COMENTALE

92 Harbor Rd., Port Washington, NY, 11050; (516)944-6028; Email: soundvu@optonline.net or fcomentale@optonline.net, Contact: Frank Comentale

A 35 year veteran of the NY recording scene, the first 15 of which were spent as chief engineer and principle designer of the world famous Hit Factory complex, Frank Comentale brings hands-on experience as a producer, engineer, musician and technician to any project he undertakes, from site survey to equipment installation. Approaching every studio as a finely tuned instrument, whether a large commercial facility such as NYC's Chung King or Eastside Sound, a personal artist-oriented room for Sean P. Diddy Combs, Wyclef Jean, Donald Fagan or Alicia Keys, or a residential project for Jose Feliciano, the Eagles' Glenn Frey or numerous "aspiring" artists, Frank has consistently provided clients with a workspace that is ergonomically designed for maximum functionality, while pleasing to the eye and above all, second to none in its sonic properties. Frank is also often called upon to convert poorly constructed existing studios into remarkably useful spaces.

●●●●●●●● ARGOSY®

Talk about coming full-circle - in October, 1994 a recording industry publication debuted Argosy's first console enclosure for the Mackie analog 8.bus mixer. The phrase "[Argosy]... makes your Mackie look like an SSL" was their off-the-cuff comment that reflected the advent of this new industry. Who knew that barely ten years later, Argosy would be building consoles for Solid State Logic's AWS-900. "Our business is really service and the Argosy product is the result of taking our customers' needs to heart." - Tim Thompson, Vice President.

Argosy - customer centric furniture designs transform cutting edge technology into inspiring environments.

"I really like what the [Argosy] Mirage console does for the AWS-900. It gives AWS operators the ideal ergonomics by putting everything within arms reach. Plus, it really looks great." - Phil Wagner, President, Solid State Logic.

Argosy began designing and manufacturing technical furniture solutions for recording studios in 1994. Argosy earned its first pioneering patent for its revolutionary furniture design application for the audio mixing board console in 1998. Today, Argosy holds several design and utility patents for its inventions, offering a range of consoles and workstation furniture solutions - conducting operations from its three acre campus in Osage Beach, Missouri, - but the real story is summed up in one word - "transformation".

Technical furniture solutions for recording studios, broadcast facilities, editing suites and beyond.

With 35 years experience in all facets of professional recording and music production, we install carefully constructed studio and high-end performance equipment packages for all audio applications. Naturally, as a manufacturer of audiophile-grade studio monitors, power amplifiers and signal processors, we specialize in custom monitor systems ranging from our deadly accurate small nearfield PRM 165 and Model Four Hundred amplifier combination, through our highly acclaimed ARM 265 active midfields, to our new High Output Series HOS 115 modular main monitors and mega-SPL SD 312, SB 412 and HOS 218. Additionally, we offer six high-performance subwoofers and controllers, and provide unique mechanical isolators, acoustical products and exotic cabling. We are also the ultimate source for vintage and custom-built Red, Gold, DMT and AMS series Tannoy monitors, component drivers and hard to find parts.
