

All decisions regarding the health of a player (including his ability to play) shall be made by the Tournament Athletic Trainer in his sole discretion. The Tournament Director and/or University Head Coach shall instruct all coaches that the Tournament Athletic Trainer's decision is final. The following is the procedure to follow in connection with all injuries occurring during the Tournament:

Coaches should immediately inform Tournament staff of any injury occurring during the Tournament.

The Tournament Athletic Trainer shall assess the injury and, if necessary, instruct Security to call Hatzalah.

In the case of an injured athlete who is sent to a hospital:

- The Tournament Athletic Trainer shall send the athlete's medical form with an appropriate representative to the hospital. The representative shall return to the Tournament Athletic Trainer either the original or a copy of the medical form.
- Unless otherwise determined by the Tournament Athletic Trainer in his sole discretion, the athlete shall not be permitted to return to play in the Tournament without a note from the hospital or physician allowing him to return to play in the Tournament.
- Even if an athlete has clearance to play from a hospital or physician, the Tournament Athletic Trainer may still determine in his sole discretion that the athlete is ineligible to play.
- In no event will an athlete who has suffered a concussion – or who the Tournament Athletic Trainer believes has suffered a concussion - during the Tournament be permitted to continue to play in the Tournament, even if cleared to play by a hospital or doctor.
- The Tournament Athletic Trainer will notify the University Admissions Event Manager, Security, the University Athletic Director, the Tournament Director and the University Head Coach of all serious injuries occurring during the Tournament to any athlete or other participant, including spectators.
