International Petrochemical Luncheon

11:30 am – 2:00 pm

*Featuring John Bolton,
former U.S. Ambassador to
the United Nations*

Ballroom A / Ticket Required

Greetings from NPRA's President

San Antonio, Texas

March 25, 2007

Welcome to NPRA's 32nd International Petrochemical Conference! The IPC is the petrochemical industry's premier meeting, its largest, most productive annual gathering.

For the petrochemical industry, 2006 was primarily a good year. Profits increased, even with higher feedstock costs. We continued to operate in a challenging, globally competitive marketplace. And the industry faced increased scrutiny as the U.S. and international governments required that the industry produce safer products through testing and reporting, and continued to strengthen safety measures at its facilities.

The one bright spot: passage of the Gulf of Mexico Energy Security Act. This historic legislation opens 8.3 million acres of the Outer Continental Shelf to oil and gas drilling and may yield upwards of 5.8 trillion cubic feet of natural gas. It was an important first step toward the development of vital domestic resources of oil and natural gas.

So far in 2007, the Democrats – who gained control of both chambers late last year for the first time in 12 years – have been threatening to revisit the flawed energy policies of the 1970s and roll back critical tax incentives for the oil and gas industry. We believe that the political, regulatory and economic challenges have never been greater.

This year's IPC program features a group of distinguished international speakers who will offer their perspectives on current operating conditions and help you make sense of your changing business world. The keynote luncheon speaker is John Bolton, former U.S. Ambassador to the United Nations, who will speak on "America, International Security and the Future." Our Keynote Breakfast speakers are José Carlos Grubisich, Chief Executive Officer of Braskem, Brazil, and

Bob Slaughter
President

Bjorn Lomborg, adjunct professor at the Copenhagen Business School and author of "The Skeptical Environmentalist." For the Supply Chain Forum, the Honorable Alfonso Martinez-Fonts, Assistant Secretary, U.S. Department of Homeland Security, will give his viewpoint on the new U.S. security regulations. Fred Hayes, Vice President, Global Procurement, Dell, Inc., will share his expertise on effective supply chain management. Dell, Inc. is well-known for its expertise on managing the supply chain.

The Petrochemical Forum will feature The Honorable Alexander Graf Lambsdorff, Member of the European Parliament, who was active in the development of the REACH regulations. And, Dr. Gary Ross, CEO of the PIRA Energy Group, will present the worldwide oil and natural gas outlook, including LNG. Plus, there will be the opportunity to meet and network with industry representatives from all over the world.

From growing demand fueled by a strong global economy to worries related to geopolitical tensions, terrorism or even for that matter the weather, these turbulent times have made shaping a secure energy future the number one challenge facing the U.S. oil and gas industry.

In the face of this challenge, the IPC has gathered senior industry and policy officials to help you focus on the major challenges and issues facing the industry. We encourage you to make the most of this opportunity.

In that spirit, we welcome old and new friends alike to the International Petrochemical Conference. And as always, we thank you for your support for and trust in the NPRA! Now let's make it an IPC to remember!

Sponsors

NPRA thanks the following companies for sponsoring items at this year's meeting.

NPRA also thanks our media supporters.

NPRA Distinguished Safety Award (DSA)

NPRA's most prestigious safety award is presented annually to member company facilities which have attained a superior level of safety performance in the refining and petrochemical manufacturing industries. Recipients are chosen by a selection committee comprised of members of the NPRA Safety & Health Committee. Winners will be recognized at the NPRA Annual Safety Awards Banquet to be held May 3 in The Woodlands, Texas, as part of the NPRA National Safety Conference.

Receiving the DSA this year:

**Baton Rouge Polyolefins
ExxonMobil Chemical Company**

Receiving the DSA Honorable Mention this year:

**Citgo Corpus Christi Refinery
CITGO Refining and Chemicals, L.P.**

**ExxonMobil Baton Rouge Refinery
Exxon Mobil Corporation**

The National Petrochemical & Refiners Association is organized to foster cooperation and the exchange of technical information among its members. These worthwhile activities are sanctioned by custom and law. It is important, however, to recognize that these activities are subject to the legal limits of state and federal antitrust laws. These laws cover a variety of activities, including "combinations in restraint of trade," monopolization and discriminatory pricing. As a national trade association, NPRA is concerned primarily with the law that prohibits combinations in restraint of trade. As with most legal phrases, this has been subject to numerous court interpretations. The principle, however, is a simple one – any agreement among competitors which reduces competition is illegal. Most people are aware that agreements to raise prices are illegal, but the law also covers agreements to reduce prices, to standardize discounts, or to divide marketing territories.

A set of circumstances may be entirely innocent and lawful when viewed separately. But the same set of circumstances viewed in the aggregate, may be held to be a conspiracy. For example, a jury might infer the existence of a conspiracy if it were to find that there had been a meeting of competitors at which prices had been discussed, and that there had later been an increase in prices by those who had attended that meeting.

We cannot make a statement which will take the place of advice from your own company or that will cover every situation. We do suggest that those attending our meeting may avoid difficulties for themselves and for the Association by

1. Avoiding any discussions with competitors about customers or matters involving prices, sale terms, territories, production, or any element of competition. This is equally important in informal social gatherings and meetings; and
2. Calling to NPRA's attention any violations of these principles that you observe at any of our meetings.

NPRA Environmental Commitment Statement

Members of the NPRA are dedicated to continuing improvement of the environmental quality of our processing facilities and products. We recognize that environmental progress and protection can be achieved only through strong commitment and constant vigilance. The members believe that environmental and economic progress is linked and that the failure to achieve either would be damaging to society.

NPRA members pledge to inform, consult, and work with their employees, the general public and government leaders in addressing concerns regarding health, safety, security, and environmental matters associated with process activities and facility operations. NPRA members support research and other advancements in science and technology which enhance environmental protection and security through efficient practices.

Convention Center

2:00

2:30

3:00

3:30

4:30

5:00

5:30

6:00

Hospitality Directory

Many companies hold meetings or host hospitality suites in conjunction with the IPC. This directory lists those companies that have requested to be included as of February 9, 2007. Since the rooms and suites are used for many purposes, we have listed the companies according to function. Check the daily event boards at the individual hotels for specific locations, dates, and hours of operation.
