Division of Drinking and Ground Water (Ohio)

| Row ID | Characteristic Name | Unit | Sample Fraction | Value Type | Statistic Type | Weight Basis | Duration Basis | Temp Basis | Field/Lab Procedure | Lab Sample Prep. Procedure |
|--------|---|-----------------------------|-----------------|------------|----------------|--------------|----------------|------------|---------------------|----------------------------|
| | Acceptable Range | 10.00000 - 1,000.00000 mg/l | | | | | | | | |
| P310 | BOD, Biochemical oxygen demand | mg/l | Total | Actual | | | 5 Day | | 310.1 | |
| | Acceptable Range | 2.00000 - 10.00000 mg/l | | | | | | | | |
| P31616 | Fecal Coliform | #/100ml | Total | Actual | | | | | 620.1 | |
| | Acceptable Range | 10.00000 - 50.00000 #/100ml | | | | | | | | |
| P38260 | MBAS (detergents, surfactants) | mg/l | Total | Actual | | | | | | |
| | Acceptable Range | 0.50000 - 25.00000 mg/l | | | | | | | | |
| P403 | pH | None | Total | Actual | | | | | PH-001 | |
| | Acceptable Range | 0.10000 - 12.00000 None | | | | | | | | |
| P410 | Alkalinity, Total (total hydroxide+carbonate+bicarbonate) | mg/l | Total | Actual | | | | | 310.1 | |
| | Acceptable Range | 5.00000 - 500.00000 mg/l | | | | | | | | |
| P410_O | Alkalinity, Total (total hydroxide+carbonate+bicarbonate) | mg/l | Total | Actual | | | | | 220.11 | |
| | Acceptable Range | 5.00000 - 500.00000 mg/l | | | | | | | | |
| P500 | Solids, Total | mg/l | | Actual | | | | | 130.1 | |
| | Acceptable Range | 5.00000 - 600.00000 mg/l | | | | | | | | |
| P530 | Solids, Total | mg/l | | Actual | | | | | 130.3 | |
| | Acceptable Range | 10.00000 - 600.00000 mg/l | | | | | | | | |
| P7000 | Tritium | T.U. | Total | Actual | | | | | TRIT | |
| | Acceptable Range | 0.80000 - 50.00000 T.U. | | | | | | | | |
| P70300 | Solids, Dissolved | mg/l | | Actual | | | | | SM 2540C | |
| | Acceptable Range | 10.00000 - 1,000.00000 mg/l | | | | | | | | |
| P70508 | Acidity, Hydrogen ion (H+) | mg/l | Total | Actual | | | | | 210.1 | |
| | Acceptable Range | 0.10000 - 25.00000 mg/l | | | | | | | | |
| P940 | Chloride | mg/l | Total | Actual | | | | | 325.1 | |
| | Acceptable Range | 5.00000 - 94.00000 mg/l | | | | | | | | |
| P940_O | Chloride | mg/l | Total | Actual | | | | | 230.1 | |
| | Acceptable Range | 5.00000 - 94.00000 mg/l | | | | | | | | |

| 53 | Styrene | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 100.00000 ppb | | | | | | | | |
| 54 | Butylbenzene, tert- | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 100.00000 ppb | | | | | | | | |
| 55 | Tetrachloroethylene | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 5.00000 ppb | | | | | | | | |
| 56 | Toluene | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 1,000.00000 ppb | | | | | | | | |
| 57 | Dichloroethene, trans-1,2- | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 100.00000 ppb | | | | | | | | |
| 58 | trans-1,3-Dichloropropene | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 100.00000 ppb | | | | | | | | |
| 59 | Trichloroethylene | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 5.00000 ppb | | | | | | | | |
| 6 | 1,1-Dichloroethylene | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 7.00000 ppb | | | | | | | | |
| 60 | Trichlorofluoromethane | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 100.00000 ppb | | | | | | | | |
| 61 | Vinyl chloride | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 2.00000 ppb | | | | | | | | |
| 7 | Dichloropropene, 1,1- | ppb | | Actual | | | | | 8260B | VOC-1 |
| | Acceptable Range | 0.00000 - 100.00000 ppb | | | | | | | | |
| 8 | Trichlorobenzene, 1,2,3- | ppb | | Actual | | | | | 8260B | VOC-1 |

Florida Keys NMS - Seagrass Monitoring Program

| Group ID | Group Name | Field Activity | Medium | Intent | Community | Result Group | Habitat |
|---------------|-------------------------------|---|--------|--------|-----------|--------------|---------|
| SGMP | Seagrass Monitoring Project | Field Msr/Obs | | | | | Y |
| Row ID | Characteristic Name | Description | | | | | |
| CGTA | Calcareous Green Abundance | Abundance of total calcareous green algae at sampling site. Values represented are Braun Blanquet scores. Abundance = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |
| CGTD | Calcareous Green Density | Density of calcareous green algae at sample site. Values represented are Braun Blanquet scores. Density = sum of Braun-Blanquet scale values/total number of quadrats. | | | | | |
| CGTF | Calcareous Green Frequency | Frequency of calcareous green algae at sample site. Values are percentages represented between 0 and 1. Frequency = number of occupied quadrats/total number of quadrats | | | | | |
| HDA | Halophila decipiens Abundance | Halophila decipiens abundance at the sample site. Values represented are Braun Blanquet scores. Abundance = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |
| HDD | Halophila decipiens Density | Halophila decipiens density at the sample site. Values represented are Braun Blanquet scores. Density = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |
| HDF | Halophila decipiens Frequency | Halophila decipiens frequency at the sample site. Values are percentages represented between 0 and 1. Frequency = number of occupied quadrats/total number of quadrats | | | | | |
| HEA | Halo. engelmannii Abundance | Halophila engelmannii abundance at the sample site. Values represented are Braun Blanquet scores. Abundance = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |
| HED | Halo. engelmannii Density | Halophila engelmannii density at the sample site. Values represented are Braun Blanquet scores. Density = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |
| HEF | Halo. engelmannii Frequency | Halophila engelmannii frequency at the sample site. Values are percentages represented between 0 and 1. Frequency = number of occupied quadrats/total number of quadrats | | | | | |
| HWA | Halodule wrightii Abundance | Halodule wrightii abundance at the sample site. Values represented are Braun Blanquet scores. Abundance = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |
| HWD | Halodule wrightii Density | Halodule wrightii density at the sample site. Values represented are Braun Blanquet scores. Density = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |
| HWF | Halodule wrightii Frequency | Halodule wrightii frequency at the sample site. Values are percentages represented between 0 and 1. Frequency = number of occupied quadrats/total number of quadrats | | | | | |
| RICHNESS | Richness | A summation of seagrass richness for the five species of seagrass at a sample site. Values represented are Braun Blanquet scores. Abundance = sum of Braun-Blanquet scale values/total number of quadrats | | | | | |

| CREMP | Generic Classifications | Field Msr/Obs | | | | | Y |
| Row ID | Characteristic Name | Description | | | | | |
| CORAL_COVER | Stony Coral Cover | This value is a summation of all the stony coral coverage values. | | | | | |
| MACROALGAE | Macroalgae | Values represent percent cover. Macroalgae is a generic classification for some submerged aquatic vegetation. Macroalgae are not plants or animals, but protists. Macroalgae produce spores and are relatively simple and unspecialized. Holdfasts anchor plants to a hard surface and do not possess roots extending below the surface. Macroalgae also use diffusion to extract nutrients from the water. Some species include Caulerpa and Halimeda. | | | | | |
| OTHER_BIOTA | Other Biota | Values represent percent cover. This characteristic refers to anything else that does not fall into the categories of seagrass, macroalgae, or substrate. Other biota can include sea anemones, crabs, and fish. | | | | | |
| SEAGRASS | Seagrass | Values represent percent cover. Seagrass is a generic classification for some submerged aquatic vegetation. Seagrasses have separate sexes; produce flowers, fruits, and seeds; and evolved from terrestrial plants and have tissues that are specialized for certain tasks. Seagrasses also possess roots, leaves, and underground stems called rhizomes that hold plants in place; use roots and rhizomes to extract nutrients from the sediment; use leaves for extracting nutrients from the water; and are categorized as vascular, with a network of xylem and phloem that transport nutrients and dissolved gases throughout the plant. Some species include: Thalassia testudinum, Syringodium filiforme, Halophila engelmannii, Halophila decipiens, and Halodule wrightii. | | | | | |
| SUBSTRATE | Substrate | Values represent percent cover. This classification includes non-biological bottom types. These include sand and crushed coral/shell. | | | | | |

MNPCA1

Minnesota Pollution Control Agency

Description Group used to transfer Chloride data to Hydstra.

| Group ID | Group Name | Field Activity | Medium | Intent | Community | Result Group | Habitat |
|----------|------------|----------------|--------|--------|-----------|--------------|---------|
| HYD2334 | 2334 | Sample | Water | | | | N |

Description Group used to transfer Nitrogen, ammonia (NH3) + ammonium (NH4) data to Hydstra.

| Group ID | Group Name | Field Activity | Medium | Intent | Community | Result Group | Habitat |
|----------|------------|----------------|--------|--------|-----------|--------------|---------|
| HYD2335 | 2335 | Sample | Water | | | | N |

Description Group used to transfer Ammonia as NH3 data to Hydstra.

| Group ID | Group Name | Field Activity | Medium | Intent | Community | Result Group | Habitat |
|----------|------------|----------------|--------|--------|-----------|--------------|---------|
| HYD2336 | 2336 | Sample | Water | | | | N |

Description Group used to transfer Kjeldahl Nitrogen data to Hydstra.

| Group ID | Group Name | Field Activity | Medium | Intent | Community | Result Group | Habitat |
|----------|------------|----------------|--------|--------|-----------|--------------|---------|
| HYD2340 | 2340 | Sample | Water | | | | N |

Description Group used to transfer Nitrogen, Nitrate (NO3) as N data to Hydstra.

| Group ID | Group Name | Field Activity | Medium | Intent | Community | Result Group | Habitat |
|----------|------------|----------------|--------|--------|-----------|--------------|---------|
| HYD2341 | 2341 | Sample | Water | | | | N |

Description Group used to transfer Nitrogen, Nitrite (NO2) + Nitrate (NO3) as N data to Hydstra.

| Group ID | Group Name | Field Activity | Medium | Intent | Community | Result Group | Habitat |
|----------|------------|----------------|--------|--------|-----------|--------------|---------|
| HYD2361 | 2361 | Sample | Water | | | | N |

Description Group used to transfer Orthophosphate as P data to Hydstra.

EPA National Aquatic Resource Survey Data

| Row ID | Characteristic Name | Description |
|----------|--------------------------------|---|
| BRUSH_F | Flag - Brush/Woody Debris | Flag for Brush/Woody Debris measurement. See WSA documentation for explanations. |
| COM_FLDF | General Measurement Comment | General comment assigned by field personnel for the measurement activity. See WSA documentation for explanation. |
| CONSTRT | Channel Constraint | Channel Constraint. See WSA documentation for explanation of letter codes. |
| MACPHY | Cvr. Class-Macrophyton | Cover class for aquatic macrophytes (water-loving plants, including mosses, in the stream that could provide cover for fish or macroinvertebrates; if the stream channel contains live wetland grasses, include these as macrophytes); "0"=absent: zero cover, "1"=sparse: <10%, "2"=moderate: 10-40%, "3"=heavy: 40-75%, or "4"=very heavy: >75% |
| MACPHY_F | Flag - Macrophyton | Flag for aquatic macrophyte measurement. See WSA documentation for explanations. |
| OVRHNG | Cvr. Class-Overhanging Veg. | Cover class for overhanging vegetation (includes tree branches, brush, twigs, or other small debris that is not in the water but is close to the stream (within 1 m of the surface) and provides potential cover); "0"=absent: zero cover, "1"=sparse: <10%, "2"=moderate: 10-40%, "3"=heavy: 40-75%, or "4"=very heavy: >75% |
| OVRHNG_F | Flag - Overhanging Veg | Flag for Overhanging Vegetation. See WSA documentation for explanations. |
| ROOTS | Cvr. Class-Roots | Flag for Living Trees or Roots (living trees that are within the channel -- estimate the areal cover provided by the parts of these trees or roots that are inundated; for ephemeral channels, estimate the proportional cover of these trees that is inundated during bankfull flows) |
| ROOTS_F | Flag - Roots | Flag for living trees or roots. |
| SEEOVRBK | Ability to See Over Bank | Flags the ability to see over bank. Y = can see over bank. N = cannot see over bank. |
| SHOR2VEG | Dist from shore to nearest veg | Distance from shore to the nearest vegetation (m) |
| STRUCT | Cvr. Class-Artificial Struct. | Cover class for artificial structures (include those designed for fish habitat enhancement, as well as in-channel structures discarded (e.g., concrete, asphalt, cars, or tires) or purposefully placed for diversion, impoundment, channel stabilization, or other purposes); "0"=absent: zero cover, "1"=sparse: <10%, "2"=moderate: 10-40%, "3"=heavy: 40-75%, or "4"=very heavy: >75% |
| STRUCT_F | Flag - Artificial Structures | Flag for artificial structures measurement. See WSA documentation for explanations. |
| UNDCUT | Cvr. Class-Bank Undercuts | Cover class for Bank Undercuts; "0"=absent: zero cover, "1"=sparse: <10%, "2"=moderate: 10-40%, "3"=heavy: 40-75%, or "4"=very heavy: >75% |
| UNDCUT_F | Flag - Bank Undercuts | Flag - Bank Undercuts measurement. See WSA documentation for explanations. |
| WOODY | Cvr. Class-Woody Debris >0.3m | Cover class for woody debris greater than 0.3m (the larger pieces of wood that can influence cover and stream morphology (i.e., those pieces that would be included in the large woody debris tally); "0"=absent: zero cover, "1"=sparse: <10%, "2"=moderate: 10-40%, "3"=heavy: 40-75%, or "4"=very heavy: >75% |
| WOODY_F | Flag - Woody Debris Understory | Flag for Woody Debris Understory (>0.3m). See WSA documentation for explanation. |

| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 208 | Bromophenyl-4 phenyl ether | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 209 | Chloroaniline, 4- | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 210 | 4-Chloro-3-methylphenol | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 211 | Chlorophenyl-4 phenyl ether | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 214 | p-Nitroaniline | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 215 | p-Nitrophenol | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 216 | Acenaphthene | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 217 | Acenaphthylene | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 220 | Aniline | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 221 | Anthracene | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 223 | Benzidine | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 224 | Benzo[a]anthracene | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 225 | Benzo[a]pyrene | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 226 | Benzo[b]fluoranthene | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
| 227 | Benzo[g,h,i]perylene | ug/l | Total | Actual | | | | | 8270B(W) | |
| | Acceptable Range | 0.00000 - 10,000.00000 ug/l | | | | | | | | |
