# CN43N ENHANCEMENT

Overview

Transaction CN43N – Project Info System: WBS Elements Initial Screen has been <u>modified to include DOTD User Fields (State, FHWA, and Phase Level)</u> as ***Dynamic Selections*** (Shift + F4). These dynamic selections provide you more options for narrowing down your record selection.
Retrieve this report by entering transaction code **CN43N**. A pop up box will appear. Select **000000000001** as your **Database prof.**

These additional selections can be found at the **end** of the Dynamic selections list. If you don't see any

Dynamic Selection values, click to unhide these fields.

Click ▷ to open the desired folder and see available fields.

- To include a field in dynamic selections, select it in the overview tree and choose ▶ *Copy selected*.

Below is what you will then see:

- To remove a field from dynamic selections, select it and click 🗑 *Delete Selections*.

Once you've chosen the fields you want to use, fill in your desired selection values.

Hint: If you want to use these same selections again, click 💾 to save these dynamic selections. The *Variant Attributes* screen will then display.

- ❖ Type a name Variant Name field. This name should begin with a "/" and your personnel area (e.g., 0107, 0276)
- ❖ Type a description in Meaning field.
- ❖ To save as variant click 💾.

- ❖ Next time you wish to run CN43N using these same selections, click 📇 to get a listing of available variants. Double click on your variant name and then click 🌈 to display the *Dynamic Selections* dialog box.

IMPORTANT:

CN43N cannot be executed solely using dynamic selections. You <u>must</u> enter a value in the Project or WBS Element field. If a value is not known, an entry can be made using a wildcard such as "H.*".
