

## New Zealand Marine Protected Areas (MPAs)

New Zealand has a total of 55 MPAs - 39 Type 1 MPAs and 16 Type 2 MPAs as at 1 Aug 2014.

Type 1 MPAs are fully protected marine reserves.

Type 2 MPAs include areas that are partially protected. The areas may not have been established or managed with the primary purpose of biodiversity protection and include fisheries closure areas, mātaítai, marine parks and cable and pipeline protection zones.

Data are rounded to the nearest km<sup>2</sup> and area reported here may differ slightly from other reported figures, particularly those calculated using GIS.

Proposed Type 1 & 2 MPAs close to being established are shaded light green.

The NZ MPA policy states that an inventory of MPAs will be maintained and made publically accessible – see: <http://www.doc.govt.nz/conservation/marine-and-coastal/marine-protected-areas/>

In addition the NZ MPA policy monitoring programme will be undertaken to assess the performance of the MPA network, with respect to its viability, and the effectiveness of the individual MPAs at achieving their own specific biodiversity objectives. Results from the monitoring programme will be made publicly available. Where monitoring reveals that management tools are not adequately protecting the area, the management tools for that MPA will need to be reviewed. The agency responsible for administering the corresponding piece of legislation for a particular MPA is primarily responsible for managing, enforcing and monitoring that MPA. The nature of this monitoring varies between MPAs, depending on each MPAs purpose.
