WELCOME TO BURNCOOSE NURSERIES

Dear Customer,

2014 saw us celebrate our thirtieth year at Burncoose and it certainly produced record turnover and a bumper crop of orders on the back of a wonderful spring flowering season and a successful Chelsea. The appalling storms and flooding in the West Country last February now seem a distant memory but they do serve to remind us again how utterly dependent our industry is on good weather. The highlights of the year have been the end of the recession for our landscape teams, a brand new 10 acre woodland land garden at Belvoir Castle and several lorry loads of plants to a major new garden in Yorkshire.

Our theme at Chelsea was '101 plants from China' in the RHS 101st Chelsea Flower Show. It was a very different type of stand for Burncoose with less of our normal colour but concentrating on reminding visitors where the vast majority of the plants we all know, love and grow in our gardens actually came from. The archive pictures from George Forrests 1908 plant hunting expedition to China which we showed on screen made the point and attracted great interest not least from Chinese journalists resulting in a full page article in China Today newspaper.

Chelsea also served to remind us that Burncoose is now the only generalist mail order business offering thousands of rare trees, shrubs and herbaceous plants that still exhibits in the great Marquee. This years catalogue contains 100 new entries including our Chelsea highlights of *Stewartia rostrata*, *Calycanthus 'Hartlage Wine'* and *Dipelta yunnanensis*.

Set against the now very obvious and clearly out of control ash disease and the awful damage to Larch plantations from *Phytophthora ramorum* the proposed new European Union bans on 'non nature' plants may seem to make sense. However what does not make sense is the plant list of what Europe considers 'invasive' and 'non native' in addition to the proposals for all new plants to be (expensively) registered. Big brother and the socialist union do not approve of small growers and must try to standardise everything as usual.

In the public perception all rhododendrons are now vilified and poor old *Rhododendron ponticum* is well up the list of nasties. *Rh. ponticum* arrived in the UK in the 1760's about 20 years after Bonnie Prince Charlies march on London. The Scots may have only got as far as Derby but the *ponticum* has been native to the UK ever since. Rhododendrons other than *Rh. ponticum* do not get infected by *P. ramorum* but one of our greatest garden plant is now out of favour because of non native political correctness. Defra might have scratched their heads at our Chelsea stand where 101 plants had only been native to the UK for around 100 years. Send them all back to China and close the borders!

Our new catalogue contains very few price rises (except where sizes have altered) and our carriage and packing charges remain unaltered from 2013 as well. We have always charged c&p at a break even rate to us after allowing for couriers, packaging and skilled packers rather than simply a nominal amount with the balance included in the cost of the plants themselves. In this we remain unusual but, now that every household is used to having couriers deliver their internet shopping, the public perception of the reality of c&p costs has changed. With our two packing sheds and increasing use of pallets for larger orders we have contained our packing and delivery costs at what we believe to be reasonable and competitive levels. Speed and careful packing of fragile plants comes at a cost.

Customers will find that quite a few well known plant names have been changed this year by the botanists. In part this is the result of publication of the latest Hilliers Manual which was undertaken by the RHS and, in part, this reflects the name changes in the 2014 RHS Plantfinder. Many will find the changes confusing and unnecessary to put it politely! Where plant name changes have been made in this years catalogue we have attempted to provide cross references designed to explain what has occurred as a result of botanical tinkering.

Let us hope for another fine spring and a year with no more 'extremes' of weather.

Thank you for all your orders and many thanks also to Terra Firma Capital Partners our longstanding Chelsea sponsors.

With kind regards

Charles Williams

Nurseries

Burncoose is a working nursery of around 10 acres producing one of the widest ranges of plants available by mail order anywhere in the U.K. Although mail order is our main business we welcome locals and holiday visitors alike to Cornwall and to the nursery 7 days a week to browse around at their leisure and select their own plants while also taking a stroll through the gardens for inspiration.

Gardens

The Burncoose woodland garden of some 30 acres, which was once described as "A garden oasis in the mine wastelands of Cornwall", has progressed over the years from being a typical Cornish spring garden into a garden for all seasons. It contains as extensive and diverse a range of plants as can be found anywhere in the West of England. The early spring display of Camellias, Rhododendrons and Magnolias moves on through to the late summer show of Hydrangeas and Eucryphias, then a warm symphony of autumn colours.

Packing at Burncoose Nurseries

Charles Williams is the senior partner of Burncoose Nurseries. He also owns and runs Caerhays Estate. Charles' great grandfather bred the original x williamsii strain of camellias at Caerhays in the 1920s. Caerhays are the holders of The Plant Heritage National Collection of Magnolias. Charles is a member of the RHS Rhododendron and Camellia sub committee and has put forward many new magnolias, rhododendrons and camellias for registration and awards

Stephen Dance is the Office Manager at Burncoose. Stephen's father was Head Gardener at Burncoose for over 40 years so his life has always revolved around plants. Stephen managed the landscaping at Peter de Savary's Port Pendenis Marina in Falmouth before returning to Burncoose to use his plant skills and extensive knowledge in the office. Stephen is your first contact for all gardening advice or queries.

Andrew Mills the Nursery Manager, has over 20 years experience in plant production. After starting work in agriculture Andrew then moved on to horticulture and worked at Kehelland Horticultural Centre where he gained wide experience in the cultivation and growing of nursery stock. He took up the post of Nursery Foreman at Burncoose over 6 years ago and in September 2007 was appointed Nursery Manager. Andrew deals with all trade enquiries.

How to Pay

Cards: Payment may be made by any major recognised Credit Card or Debit Card except *Diners Card* and *American Express*. Payment will be taken at the time of ordering on our website. You will then be refunded at the time of despatch for any plants not supplied.

Telephone or Post: Where orders are placed by telephone or by post, payment will only be taken from your credit card after despatch has actually taken place. In this situation you will not therefore be charged for any plants which cannot be supplied.

Delivery Charges: See Order Form or website.

Despatch Times: All UK orders will be despatched within 5 - 10 working days from receipt by us (10 - 15 working days in the busy spring season) except at times of drought or extreme cold.

Guarantee: We guarantee to replace or refund the cost of any plant which fails to survive for a reasonable period of time after delivery providing it has been cared for correctly especially during extremes of weather.

Trade Orders Welcome: Please contact Andrew Mills, The Nursery Manager or see our website for more details of credit terms and discounts available.

Export Orders: Please let us have the list of plants you require. An estimate of the ancillary costs and current availability will then be submitted to you.

Terms of Business: See reverse of Order Form or website.

Pot Sizes

Almost all of our herbaceous plants are grown in 1.5 or 2 litre pots. The vast majority of our shrubs are grown in 2.5 or 3 litre pots and sometimes even larger pots particularly later in the season.

We do not offer for sale or send out tiny plug plants or small liner plants.

If we only have in stock plants which are in smaller pots and smaller in size than the normal price quoted and the standard size in our catalogue we will always reduce the price accordingly and make this clear on the delivery note.

If you need more information on specific pot sizes please call us on: 01209 860316

BURNCOOSE NURSERIES LANDSCAPING PLANNING & PLANTING SERVICE

Turfing • Seeding • Pruning • Patios • Rockeries • Paving • Pools

Burncoose Nurseries offer a full landscaping service covering all aspects of hard and soft landscaping work, but our speciality is in planning and planting. Since the nursery offers some 3,500 different varieties of ornamental trees, shrubs and herbaceous plants we have a wealth of expertise and alternative designs to offer using our own plants.

After many years experience designing Cornish Gardens, we are familiar with the problems of wind damage, exposure and salt sprays which exist in so many coastal and even inland gardens in Cornwall.

Although straightforward design and planting work is a major part of our landscape business, we are very happy to undertake patios, rockeries, paving, pools, turfing, seeding, pruning, or virtually any other landscaping work.

If you have a new garden, or wish to upgrade an existing garden or simply start again after a substantial pruning please contact: **Philip Knuckey on 01209 860316.**

Phil Knuckey
Phil is the partner who runs the landscape department. Philip has over 30 years experience designing, building and planting gardens for customers throughout Cornwall. His father David Knuckey, won more gold medals at RHS shows for Burncoose than any other exhibitor.

Left to right: Guy Hands, Jerry Hall and Charles Williams

CHELSEA 2014

After months of planning, designing and growing, all of the hard work paid off this when Burncoose Nurseries received the news that they had been awarded a well deserved Silver Gilt Medal for their '101 Plants from China' Garden at the RHS Chelsea Flower Show.

Owner of Burncoose Nurseries, Charles Williams, said, "Every year our garden design team works tirelessly, not only to come up with an inspiring garden theme, but to create a beautiful garden design and nurture hundreds of plants to make sure they are all at their best for the show, I am incredibly proud of all the hard work they have put into this garden.

Designed by Geraldine Hammond and Louisa Lazarowicz the garden, which was once again supported by Terra Firma Capital Partners, was created to illustrate how many of the most popular everyday plants in our herbaceous, ornamental and woodland gardens were in fact first discovered only 100 or so years ago in Southern China and its historical outlying provinces.

The 101 plants from China on the Burncoose stand represented the work of the great plant hunters, Ernest Wilson, George Forrest and Frank Kingdon-Ward who travelled to China after 1905 on often dangerous and difficult expeditions to collect seeds from new and unknown species of plants. These expeditions were funded by nurserymen, horticulturalists and landowners who remained safely back in the UK.

Visitors to the Burncoose stand were able to see a collection of original photographs which were taken on some of George Forrest's 11 expeditions to China between 1905 and 1932.

These photographs come from the Williams family archive on the Caerhays Estate (of which Burncoose Nurseries is part) and were sent back to Cornwall by George Forrest to J.C. Williams of Caerhays Castle, the great grandfather of the current owner, Charles Williams.

These pictures of life in China at the turn of the 20th Century and the plants that the collectors discovered in different habitats are unique and have never been seen by the public before.

Guy Hands, Chairman of Terra Firma said, "We are very proud to once again sponsor Burncoose Nurseries and to be able to highlight our support of the Prince's Trust and the outstanding work they carry out. I'm delighted for the Burncoose team. Winning an award at RHS Chelsea Flower Show is a great challenge so being awarded Silver Gilt is a superb achievement."

From our nursery safely to your door

It is rare for any two mail orders to be identical so packing individual orders which might contain a 3 metre tree as well as shrubs and herbaceous plants is a skilled business.

There is no such thing as a standard box and part of the skill of the packer is to ensure that plants are secure and fully protected for shipment.

Many customers are concerned about the risks of damage in transit. Our experience is that breakages are thankfully very rare and we hope that this is in no small measure due to the experience and expertise of our packing department.

All larger orders are dispatched by overnight courier to arrive on the next working day.

Smaller orders are dispatched by guaranteed 24-hour service which is traceable and insured. The 24-hour service applies to working days and not weekends.

During the course of one year we will despatch separate orders to well over 20 different countries.

For more information see the order form in this catalogue or visit our website: www.burncoose.co.uk

Recycling

We try to use when ever possible recycled materials for our packing. This includes the boxes, shredded material and wrapping paper.

MAGNOLIA

Close up pictures of many of these magnolia flowers can be seen on www.caerhays.co.uk as well as the Burncoose website

Large and **Specimen** sized magnolias are almost all grafted plants. Many are also very rare.

Large plants are 2-3 year old grafts and **Specimen** plants 3-5 year old grafts. Different Magnolia varieties grow at very different speeds and therefore the size of a **Large** or a **Specimen** plant and the exact pot size it is delivered in can vary markedly for plants of identical age.

Large plants: May vary in size according to variety (and also the time of year) from less than 2 feet to 4 feet in 3, 5 or 7.5 litre pots.

Specimen plants: are usually (but not always) between 4 feet and 8 feet in height in 10, 15 or 20 litre pots.

Magnolias do grow very quickly in a single season but do please ring to check the exact size of your chosen variety if you so wish.

If we are unable to offer a **Large** sized plant we may well also have smaller plants at a lower price.

7GR/TS/E **PROTEA**
 despite the casualties from the winter of 2010/11 proteas are much easier to grow than many people imagine and can readily be grown outside in milder areas PROVIDING the soil is very free draining, acidic and low in nutrients (ie no fertiliser containing phosphates). Full sun and a south facing slope would be ideal. To avoid proteas getting wet feet it is helpful to plant them on a raised mound and add bark or grit for improved drainage.

A Spectacular Collection In An Enchanted Garden

Awarded National Collection Status In 2001, the grounds at Caerhays contain over 600 magnolias, making it one of the most important collections in The British Isles.

The original home of the world famous x williamsii Camellias, Caerhays still has many original plants collected in China by the intrepid plant collectors in the early 1900's which grow happily alongside more modern hybrids bred by the Williams family, owners for nearly 150 years.

Nestled in a secluded valley above Porthluney Cove, the 120 acre gardens at Caerhays Castle are one of Britain's horticultural treasure troves.

Historic Caerhays is one of Cornwall's Great Gardens, a springtime paradise of glorious Camellias, Magnolias and Rhododendrons towering above carpets of delicate Narcissi and Primroses.

Choose between four woodland walks through magnificent displays of spring flowers which are amongst the best in Britain. Guided tours of the house are also available for a limited period. Out of season group tours can be arranged.

GIFT SHOP & TEA ROOMS

Open daily the Magnolia tea rooms situated in the inner courtyard along with the Caerhays Castle Gift shop.

RHS Lectures at Caerhays Castle 2015

Lectures by Charles Williams

Suitable for complete beginners, ideal for all, with no prior experience necessary, however all garden lovers would benefit from these interesting lectures. The tours will cover the whole garden and ignore the regular routes that visitors would normally take when visiting the gardens.

The National Magnolia Collection Friday 13th March 2015

This lecture will cover why it is important to have a National Collection. Magnolias to suit different types of garden. The breeding and selection of new varieties of Magnolia. Examples of new magnolia hybrids all over the world.

Creating A Woodland Garden Friday 10th April 2015

This lecture will cover the basics of planting a woodland garden from scratch, to revamping an old overgrown one.

RHS Members: £16.00, Non-members: £20.00

Lectures start at 10.00am - Finish approx 1pm

Booking: All tickets should be booked in advance.

By CREDIT CARD OR DEBIT CARD: By telephoning Caerhays on 01872 501310 (weekdays 9am - 5pm).
