### Applications on Fiber Bundle Over Circle

A Question Examples Other Questions

・ロト ・ 日 ・ ・ 日 ・ ・ 日 ・

For surface automorphism  $\phi$  generated by Dehn twist along disjoint essential circles (D-type automorphism):

• Generate circles:  $\Gamma(\phi) = \{\gamma_1, \ldots, \gamma_n\};$ 

For surface automorphism  $\phi$  generated by Dehn twist along disjoint essential circles (D-type automorphism):

- Generate circles:  $\Gamma(\phi) = \{\gamma_1, \ldots, \gamma_n\};$
- $\Sigma(\phi) = \{\Sigma \mid \Sigma \text{ is a component of } F N(\Gamma(\phi))\};$

For surface automorphism  $\phi$  generated by Dehn twist along disjoint essential circles (D-type automorphism):

- Generate circles:  $\Gamma(\phi) = \{\gamma_1, \ldots, \gamma_n\};$
- $\Sigma(\phi) = \{\Sigma \mid \Sigma \text{ is a component of } F N(\Gamma(\phi))\};$
- ►  $\forall \Sigma \in \Sigma(\phi), \ \Omega(\Sigma) = \{\gamma \mid \gamma \text{ is a component of } \partial \Sigma, \text{ but not a component of } \partial F\}.$

・ロット (雪) (日) (日)

 $I(\phi, \gamma)$ :

•  $|I(\phi, \gamma)| = n$  if the Dehn twist along  $\gamma$  is a rotation of  $2n\pi$ ;

 $I(\phi, \gamma)$ :

- $|I(\phi, \gamma)| = n$  if the Dehn twist along  $\gamma$  is a rotation of  $2n\pi$ ;
- The sign is decided by whether the direction of the restriction of rotation to one component is coincide with the induced orientation or not;

 $I(\phi, \gamma)$ :

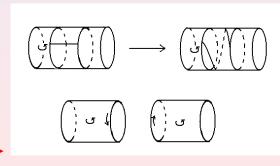

- $|I(\phi, \gamma)| = n$  if the Dehn twist along  $\gamma$  is a rotation of  $2n\pi$ ;
- The sign is decided by whether the direction of the restriction of rotation to one component is coincide with the induced orientation or not;
- In the figure,  $I(\phi, \gamma) = -1$ .

 $I(\phi, \gamma)$ :

- $|I(\phi, \gamma)| = n$  if the Dehn twist along  $\gamma$  is a rotation of  $2n\pi$ ;
- The sign is decided by whether the direction of the restriction of rotation to one component is coincide with the induced orientation or not;

• In the figure,  $I(\phi, \gamma) = -1$ .

 $\blacktriangleright \ I(\phi,\gamma) = I(\phi^k,\gamma)/k;$ 

・ロト ・四ト ・ヨト ・ヨト

- $\blacktriangleright I(\phi, \gamma) = I(\phi^k, \gamma)/k;$
- ►  $b_{\Sigma,n}(\phi) = \#\{\gamma \in \Omega(\Sigma) | I(\phi, \gamma) = n\}, n \in \mathbb{Q} \{0\};$
