DISCRIMINATION PROHIBITED

Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Title IX of the Education Amendments of 1972, Public Law 92-318, states: "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance." Therefore, career education projects supported under Sections 402 and 406 of the Education Amendments of 1974, like every program or activity receiving financial assistance from the U.S. Department of Health, Education, and Welfare, must be operated in compliance with these laws.

RESOURCES FOR CAREER EDUCATION

A multitude of resources for career education are available to Iowans from many sources. The primary source for identification of national resources for career education is the Iowa Network for Obtaining Resource Materials for Schools (INFORMS). INFORMS is a state and federally funded dissemination center which provides Iowa teachers, administrators, Department of Public Instruction (DPI) personnel, and others with information related to instructional materials and educational problems and issues. INFORMS provides abstracts of ERIC documents, bibliographies of resource materials, and directories of current Iowa projects including contact persons for those projects.

INFORMS resources include: 1) DIALOG on-line computer retrieval system; 2) DPI personnel; 3) State Library Commission resources; 4) Drake University Library resources; 5) all State Agency professional libraries; and 6) the ERIC information system. Additional resource identification will continue to be a function of DPI personnel with specific career education responsibilities.

As a member of the Midwest Curriculum Coordinations Network, the Career Education Division receives copies of new materials developed and information about curriculum projects under development, projects planned for development, and identified needs of member states. Through the regional network information is obtained from and shared with the National Network for Curriculum Coordination for Vocational-Technical Education.

The Support Services Section of the Career Education Division in cooperation with the Educational Media Section of the Department of Public Instruction has established a collection of recent career education curriculum guides, pamphlets, biographical materials, text and resource materials, and a publishers' file on sources of materials. These materials are routed to staff consultants, housed in the DPI media center, and are available for review by check out through staff consultants.

Iowa has State Library services which provide periodicals, books, articles, government documents, audio/visual materials, and bibliographies to the requestor.

A Cooperative Network of Inservice Resources (CNIR) is a source of films, filmstrips, video tapes, kits, and tape cassettes for educators. This network is a cooperative project of fourteen of Iowa's fifteen area education agencies.

Career education research and exemplary projects which have been undertaken in Iowa have produced knowledgeable individuals who have contributed to inservice efforts in many workshops for teachers and administrators. Staff of the projects have identified in-state

and out-of-state resource personnel and have produced publications which are excellent resource materials. Some of the projects are resources in themselves.

Occupational information and guidance in career decision making are provided through the Career Information System of Iowa (CISI), with access by needle-sort card decks and by computer terminal. The computer software (programs and files) of CISI contains a program and associated file for managing information on identified human and other resources related to specific occupations. While the primary thrust is user access to human resources, "workers-on-the-job" who have volunteered to share on a one-to-one basis the various aspects of their total work experience, there also is the potential for the inclusion of resource personnel for classroom presentations as well as the gamut of various print and other media.

As noted in the State Plan for Career Education in Iowa many needs surveys and studies have been used to establish needs upon which the State Plan is based. One resource for these data is a career education management information system for gathering and disseminating data pertaining to such things as student enrollments, student characteristics, and costs. A second resource for data is the Career Education Information System (CENIS) which provides data on labor demand, labor supply, student interest, and student outcomes.

Identification of existing educational facilities and assistance in planning for improvement of school facilities is available through the School Plant Facilities Unit of the Department of Public Instruction as well as from local and area schools.

Since 1974, a total of three State level committees have been involved at various stages in the development and implementation of career education in Iowa. The third committee currently in existence is responsible for the coordination of activities in the State Department of Public Instruction. It is composed of representatives of a number of the units in the Department. All major units in the Department have been resources for the development of the State Plan for Career Education in Iowa.

Fifteen Area Education Agencies serve elementary and secondary schools in the fifteen geographic areas of the State. Each of these area agencies provides area media support services to the school districts in its area through a media center which includes the following:

- Materials lending library
- Professional library
- Curriculum laboratory
- Production services
- Personnel
- Facilities
- Delivery system
- Consultative services

Some of the Area Education Agencies have begun putting their list of resources, including resource persons, on computer with access through terminals in local schools.

Lists of resources for career education provided to the DPI from AEA media centers are presented in the following pages along with a listing of resource persons for the area.

INTRODUCTION TO RECOMMENDED
RESOURCES FOR CAREER EDUCATION

The material on the following pages is a listing recommended by a career education consultant for consideration by local schools in providing resources for staff and students.

It is recommended that evaluation of student progress in attaining career education objectives be a planned integral part of implementing career education. Through an exemplary project, A Career Education Articulation, Model K-14, an inventory for identifying student progress toward attainment of career education objectives as described in the Iowa State Plan for Career Education has been developed. Information pertaining to this evaluation document may be obtained from the Career Education Division, Department of Public Instruction.

Other Resources which may be helpful in planning for evaluation include:

Evaluation and Education Decision-Making, Development Associates, Inc., Washington, D. C., September 1975

Values & Information. . .An Approach to Evaluation Planning, Experienced-Based Career Education, Far West Laboratory for Educational Research and Development, San Francisco, California, November 15, 1976

Experience-Based Career Education, Evaluation Handbook, Appalachia Educational Laboratory, Charleston, West Virginia, July, 1977

Career Education Learning System, A Division of Program Planning and Needs Assessment, Texas Education Agency, Austin, Texas, 1975

Assessment of Basic Life Skills, National Assessment of Education Progress, Department of Field Services, Denver, Colorado

Rural America Guidance Series, Career Guidance Resources, The Center for Vocational Education, The Ohio State University, Columbus, Ohio

Needs Assessment and Evaluation Guide, Partners in Career Education, Austin, Texas, 1977

Evaluation of Career Education Elements, Educational Testing Services, Princeton, New Jersey

SOURCES OF "FREE" MATERIALS

The following pages contain current mailing addresses for over two hundred organizations which have been helpful in assembling student-oriented career information. This listing is not represented as a complete file, but rather as one illustrating the wealth of sources of information available for the cost of a form letter.

Care should be exercised that the form letter requesting materials be sufficiently clear in pointing out the nature of the career information center under development.

Materials compiled through this activity, in addition to the low-cost feature, are easily renewed on a yearly basis.
