Mushfiq Mobarak , Ahmed; **Rajkumar** , Andrew Sunil

The political economy of health services provision and access in Brazil

Branch: risk of sickness and promotion of health

Subject: Brazil ; access to care ; economic evaluation ; health service ; political aspect

Language of text: English

Publication Details: Washington, United States: World Bank, 2005; 3508. - (Policy research working paper; 3508)

Abstract: The authors examine the impact of local politics and government structure on the allocation of publicly subsidized (SUS) health services across municipios (counties) in Brazil, and on the probability that uninsured individuals who require medical attention actually receive access to those health services. Using data from the 1998 PNAD survey they demonstrate that higher per capita levels of SUS doctors, nurses, and clinic rooms increase the probability that an uninsured individual gains access to health services when he, or she seeks it (Source: WB.)

Primary health care in practice : is it effective?

Branch: risk of sickness and promotion of health

Subject: Developing countries ; El Salvador ; access to care ; low income ; model ; poverty ; primary health care ; social security financing

Language of text: English

Publication Details: Washington, United States: Center for Global Development, 2005; 55. - (Working paper; 55)

Abstract: Primary health care is accepted as the model for delivering basic health care to low income populations in developing countries. Using El Salvador as a case study, the paper draws on three data sets and a qualitative survey to assess health care access and utilization across public and private sector options (including NGOs). Multivariate analysis is used to estimate the quantitative determinants of health seeking behavior (Source: CGD)

Transforming the developmental welfare state in East Asia

Branch: risk of sickness and promotion of health ; risk of unemployment and employment policy ; social policy

Subject: Asia and the Pacific ; China, The People's Republic of ; Hong Kong (China) ; Japan ; Korea, Republic of ; Malaysia ; Singapore ; Taiwan (China) ; Thailand ; comparison ; employment policy ; health policy ; political aspect ; social development ; welfare state

Language of text: English

Publication Details: Basingstoke, United Kingdom: Palgrave, 2005. - (Social policy in a development context) . - ISBN: 1-4039-4166-1. - **Price:** £65.-

Abstract: Since the economic crisis of 1997, there have been significant social policy reforms in East Asia. Using the concept of the developmental welfare state, this book seeks to answer

whether the welfare reforms in East Asia have extended social rights while maintaining its developmental credentials. Transforming the Developmental Welfare State in East Asia explains the way in which the shift in economic strategy has influenced social policy reform in East Asia. It also analyzes the political dynamics of social policy in which economic imperatives for social reform were transformed into social policy reform (Source: Palgrave).

Turkish private health insurance system

Branch: risk of sickness and promotion of health

Subject: Turkey ; access to care ; health insurance ; medical care ; private insurance ; scope of coverage ; social security financing

Language of text: English

Publication Details: Istanbul, Turkey: Prizma, 2005. - ISBN: 975-6118-01-6. - **Price:** €130.-/240.-

Abstract: Turkey, with its changing economic environment, its young population and new steps taken in order to be accepted by European Union, has more or less become a cynosure for the global investors and entrepreneurs. In light of this understanding, this report is prepared in order to give some detailed information about the Turkish Private Health Insurance system to the parties either interested in or within insurance market. In the first part of the report, demographic and economic highlights and indicators are introduced; second part is composed of brief information about the market, the players, premium volumes and it deals with some key concepts. The last part just focuses on main type of products/benefits and main features of individual/group business (Source: Prizma).
