Received 26-VI-2001. Corrected 5-IV-2002. Accepted 14-V-2002.

Abstract: More new species, new combinations and new distributions are made in the large and difficult genus *Elaphoglossum* in Neotropic. Ten new species are described, this are: *Elaphoglossum adrianae* A. Rojas, *E. betancuri* A. Rojas, *E. caridadae* A. Rojas, *E. glabromarginatum* A. Rojas, *E. kessleri* A. Rojas, *E. macdougallii* A. Rojas, *E. paramicola* A. Rojas, *E. paxense* A. Rojas, *E. pseudoherminieri* A. Rojas and *E. solomonii* A. Rojas. Three species are combined, this are: *Elaphoglossum beitelii* (Mickel) A. Rojas, *E. curvans* (Kunze) A. Rojas and *E. eutecnum* (Mickel) A. Rojas. Finally, 86 species are reported from other countries and some species names are synonymized.

Key words: *Elaphoglossum*, Lomariopsidaceae, Neotropic, new combinations, new distributions, new species.

Several new species have been described in different taxonomic works for the Neotropic in the last five years as Arens y Smith 1998, Labiak 2000, Lorea y Smith 1999, Mickel 2001, Mickel y Smith 2000, Moran 2000, Moran y Øllgaard 1998, Mendoza *et al.* 2001, Navarrete y Øllgaard 2000, Pacheco y Moran 1999, Prado 2000, Prado y Smith 2002, Rojas 2001a, 2001b, 2001c, 2002a, 2002b, Smith *et al.* 2001, Tejero y Pacheco 2002, Tuomisto y Moran 2001.

The exhaustive studies during the last three decades have generated the description of many new species, can be appreciated in recent regional treatments for Mexico (19 new of 45; Mickel 1980, 1981, 1988, 1992, Smith 1975), Venezuela (35 new of 101; Mickel 1985a, 1990a, 1991a), and Perú (51 new of 122; Mickel 1990b, 1991b). Other papers including new species of *Elaphoglossum* are, Gómez 1972a, Gómez 1972b, describing six new species for Costa Rica, Mickel 1979 describing three new species from Guatemala, Mickel

1985b with 14 new species of proliferous *Elaphoglossum*, Mickel 1992 with 33 new species from Mesoamerica, Rojas 1996 describing 12 new species from Costa Rica and Panama and Rojas 1997 describing 14 new species from Mesoamerica.

The new species described and the new combinations are organized in sections and subsections according to the system of Mickel and Atehortúa (1980), as indicated in Table 1.

MATERIALS AND METHODS

The new taxa are circumscribed on the basis of material seen at the Museo Nacional de Costa Rica (CR), Instituto Politécnico Nacional (ENCB), Field Museum of Natural History (F), Harvard University (GH), Instituto de Ecología (Sede Regional del Bajío) (IEB), Instituto Nacional de Biodiversidad (INB), Universidad Nacional Autónoma de México (MEXU), Missouri Botanical Garden (MO), New York

TABLE 1

The new species described and the new combinations in the present paper are organized in sections and subsections

| SECTION | SUBSECTION | SPECIES |
|----------------------|---------------------|-----------------------------------------------------------------------|
| <i>Elaphoglossum</i> | <i>Pachyglossa</i> | <i>E. paramicola</i> <i>E. pseudoherminieri</i> |
| <i>Lepidoglossa</i> | <i>Microlepidea</i> | <i>E. caridadae</i> <i>E. curvans</i> |
| | <i>Muscosa</i> | <i>E. betancuri</i> |
| | <i>Pilosa</i> | <i>E. macdougalii</i> |
| <i>Polytrichia</i> | <i>Hybrida</i> | <i>E. beitellii</i> <i>E. kessleri</i> <i>E. solomonii</i> |
| <i>Setosa</i> | <i>Setosa</i> | <i>E. adrianae</i> |
| <i>Undulata</i> | | <i>E. eutecnum</i> <i>E. glabromarginatum</i> <i>E. paxense</i> |

Botanical Garden (NY), Universidad Autónoma Metropolitana, Iztapalapa (UAMIZ), University of California (UC) and Smithsonian Institution (US). The names according with index herbariorum in (Anonimous 2002).

The types that I saw are indicated with admiration marks, the holotypes that I could not see are indicated with -n.s. as abbreviation of not seen. Some herbaria that probably have a specimen cited here but not revised are indicated with interrogation marks.

The countries indicated in bold represent the new distribution no previously reported, the countries indicated between quotation marks represent the known distribution of the synonyms (if this is different to valid species distribution).

NEW SPECIES

Elaphoglossum adrianae

A. Rojas, sp. nov. (Fig. 1). **Type:** COSTA RICA. **Cartago:** Cantón de Paraíso, Parque Nacional Tapantí, Cuenca del Reventazón, Orosi, Sendero Palmitos o T6, 9° 43'35" N, 83° 46' 28" W, 1 450-1 600 m, A. Rojas & R. Delgado 3793 (Holotype: INB; Isotype: CR, MO, NY, UC, US).

Ab E. curtii rhizomatis squamis longioribus; lamina linear-ob lanceolatis cum

basin attenuatis et crenulatis marginen, magis distantibus venis, et reddish stipitis laminaeque squamis distans.

Terrestrial; rhizomes 1.5-2 mm diam., compact; rhizome scales 2.0-3.5 x 0.2-0.5 mm, linear-lanceolate, brown, lustrous, marginally entire; fronds (6-) 9-18 (-25) cm, approximate; phyllospodia absent; stipes 1/4-1/3 of the frond length; stipe scales 1-3 x 0.05-0.20 mm, subulate, dark reddish brown to atropurpleous, patent, lustrous, disperse, marginally dispersedly denticulate, mixed with glandular hairs; blades (4-) 12-16 x 1.2-1.8 (-2.7) cm, linear-ob lanceolate (rarely narrowly elliptic), papiraceous, basically cuneate to attenuate, apically cuspidate to attenuate, marginally undulate; blade scales 2.5-4.0 x 0.2-0.5 mm, subulate, dark reddish brown to atropurpleous, lustrous, patent, dispersedly in both surfaces, marginally entire to undulate; veins evident, free, simple or rarely 1-forked, 2-3.5 mm apart, diverging at ca. 50-60° angle from costa; hydathodes present; fertile fronds 8-14 cm; stipes 2/3-4/5 of the frond length; fertile blades 2-4 x 0.8-1.1 cm, lanceolate narrowly elliptic, basically cuneate, apically acute to acuminate; intersporangial scales 3-5 x 0.2-0.4 mm, subulate, dark reddish brown to atropurpleous, patent, lustrous, dispersed, entire margin.

Distribution: Costa Rica and Panama, only on Cordillera de Tilarán, Cordillera Central and atlantic slope of Cordillera de Talamanca, at (850-) 1 000-1 900 m.

Fig. 1. *Elaphoglossum adrianae* (A. Rojas and R. Delgado 3793, INB): a) Type specimen. b) Rhizome scale. c) Stipe scales. d) Costal scale. e) Blade scale. (scales b-e: 25x).

Paratypes: COSTA RICA. **Alajuela:** near La Laguna, 6 to 8 km S of Villa Quesada, 1 200 m, A. Molina et al. 17515 (CR).

Cartago: Reserva Tapantí, 1 300-1 800 m, L.

Gómez 18838 (NY, UC), muestra mixta con *E. curtii*, L. Gómez 19408 (UC); Paraíso, Orosí, Parque Nacional Tapantí, subiendo por Quebrada Segundo hasta la cabecera del Río

Taurito, 1.800im, *G. Herrera* 5756 (CR); along trail leading eastward into mountains from road into Tapantí Reserve, ca. 1 km S of jct. of Quebrada Salto and Río Grande de Orosi, 9° 43' N, 83° 47' W, 1 500-1 800 m, *A. Smith et al.* 2161 (CR,UC). **Guanacaste:** La Cruz, Parque Nacional Guanacaste, Estación Cacao, 10° 55'38" N, 85° 29'38" W, 1 100 m, *R. Espinoza* 322 (CR, INB); Las Nubes de Tilarán, along Quebradas Valdivia and Azul, 10° 23' N, 84° 52'W, 1 000-1 150 m, *C. Ivey & W. Haber* 136 (CR); a 2 km NE de Tilarán, 850 m, *A. Jiménez* 1341 (CR). **Heredia:** Sarapiquí, Virgen del Socorro, 800-1 000 m, *L. Gómez* 18216 (CR); along ridge between Río Sardinal and near waters of Quebrada Arrayanes, N Slope of Volcán Barva, 10° 12'N, 84° 07'W, 1 850-2 000 m, *M. Grayum* 7310 (CR); 0.5-1 km W of the Río Las Vueltas (Río Patria), 0.5 km NE of Cerro Chompipe, ca. 11 km NNE of Heredia, ca. 1 950 m, *D. Lellinger & J. White* 983 (F, US); road to Volcán Barva, *R. Lloyd* 4127 (NY); Volcán Barva, at top of saddle, 8 300 ft., *R. Lloyd* 4206 (NY), *R. Lloyd* 4211 (NY); 10 km N of San Rafael de Heredia on Volcán Barva, 1 950 m, *J. Mickel* 3017 (NY); end of the Rte. 113, where road crosses Río Patria, about 100-200 m upstream, *R. Moran* 3084 (F); Cerro de Las Lajas, N of San Isidro, 2 000-2 400 m, *P. Standley & J. Valerio* 51623 (US); Cerro Las Caricias, N of San Isidro, 2 000-2 400 m, *P. Standley & J. Valerio* 52123 (US); along Río Vueltas (upper Río Patria), at end of Rte. 113, 9 km N of Angeles, 10° 06'N, 84° 04'W, 1 900 m, *R. Stolze* 1624 (F). **Limón:** Bratsi, Amubri, Alto Lari, Kivut, siguiendo la fila divisoria entre Ríos Lari y Dapari, cuenca superior de ambos, 9° 22' 45" N, 83° 06' 15" W, 1 900 m, *G. Herrera* 5462 (INB, MO); Cantón de Talamanca, Bratsi, Amubri, Alto Lari, Kivut, siguiendo la fila divisoria entre Ríos Lari y Dapari, cuenca superior de ambos, 9° 22' 45" N, 83° 06' 15" W, 1 900 m, *G. Herrera* 5480 (INB, MO); Cantón de Limón, El Progreso, cabeceras del Río Cariei, Fila Matama, Valle de La Estrella, 9° 47' 80" N, 83° 08' 18" W, 1 400 m, *G. Herrera & A. Chacón* 2812a (CR, INB, MO).

Puntarenas: atlantic facing ridge beyond the Monteverde Forest Reserve near road across the ridge, ca. 1600 m, *D. Lellinger et al.* 1762 (US). **San José:** ca. 10 km N of San Rafael de Heredia, on Volcán Barva, 1 950 m, *D. Lellinger* 645 (US). **PANAMA.** **Bocas del Toro/Chiriquí:** trail along continental divide to ca. 3 km E of Cerro Pate Macho, 8° 49' N, 82° 23' W, 2 000-2 200 m, *A. Smith et al.* 2429 (MO), *A. Smith et al.* 2431 (MO).

Elaphoglossum adrianae differs of *E. cur-tii* Rosenst. in having longer (2.0-3.5 mm vs. 1-2 mm) rhizome scales; longer [4-12 (-16) vs. 2-6 cm] and linear-ob lanceolate (vs. oblong-elliptic) blades; attenuate (vs. broadly cuneate) blade base; crenulate (vs. entire or nearly so) blade margin; veins 2.0-3.5 mm [vs. 1-2 (-3)] apart; longer (2.5-4.0 mm vs. 2.0-2.5 mm) and atropurpureus (vs. reddish) stipe scales; and longer (2-3 mm vs. 1-2 mm) and atropurpureus (vs. reddish) blade scales.

This species is dedicated to my daughter Adriana María.

Elaphoglossum betancuri

A. Rojas, sp. nov. (Fig. 2). **Type:** COLOMBIA. **Antioquia:** Mpio. San Luis, Piedra del Castrillón, Cordillera Central, ladera oriental, 6° 4.30' N, 74° 59.74' W, 1 500-1 700 m, *J. Betancur et al.* 650 (Holotype: UC).

Ab E. lepidothrix frondibus minoribus, stipitis squamis minoribus, lamina minoribus ovata cum basi truncata vel cordata diversa.

Epiphytic; rhizomes 3-5 mm diam., compact, radial; rhizome scales 3-6 x 0.3-0.5 mm, linear, dark brown, lustrous, marginally entire; fronds 7-10 cm, approximate; phylloodia 2-4 mm; stipes 2/5-1/2 of the frond length; stipe scales 2-5 x 0.5-1.5 mm, ovate to lanceolate, black with brown margin, patent, lustrous, dense, long ciliate marginally and in few times medially, the cilia to 0.5 mm long; blades 3-5 x 1.8-2.9 cm, ovate, chartaceous, basically truncate to cordiform, apically rounded; costal scales 2-4 x ca. 1 mm, lanceolate, orange to reddish-brown, ciliate margin; blade scales 1-3 x ca. 1 mm, ovate to lanceolate, orange to reddish-brown,

Fig. 2. *Elaphoglossum betancuri* (J. Betancur et al. 650, UC): a) Type specimen. b) Rhizome scale. c) Stipe scale. d) Costal scale. e) Blade scale. (scales b-e: 25x).

marginally ciliate, deciduous adaxially, more dense in the margin; blade surface darker adaxially; veins evident, free, 1-2-forked, ca. 1 mm apart; hydathodes absent; fertile fronds 9 cm; stipe ca. 3/5 of the frond length; fertile blade 4 x 0.9 cm, elliptic, basically cuneate, apically obtuse; costal scales 1-2 mm diam., ovate to skeletonized, marginally long ciliate; intersporangial scales absent.

Distribution: Apparently endemic to Colombia at 1 500-1 700 m. Known only from the type collection.

This species is similar to *E. lepidothrix* Mickel in the rhizome and blade scales, but differs in shorter (7-10 cm long vs. 12-31 cm) fronds; shorter (2-5 x 0.5-1.5 mm vs. 5-8 x 0.5-1.0 mm) and ovate to lanceolate (vs. linear) stipe scales; shorter (3-5 x 1.8-2.9 cm vs. 8-16 x 3.0-4.3 cm) and ovate (vs. lanceolate-oblong) blade with truncate to cordiform (vs. broadly cuneate to rounded) base.

This species is dedicated to Julio Betancur, Colombian botanist and collector of the type.

Fig. 3. *Elaphoglossum caridadae* (A. Rojas and L. Mejía 1374, INB): a) Type specimen. b) Rhizome scale. c) Stipe scale. d) Costal scale. e) Blade scales. (scales b-e: 25x).

Elaphoglossum caridadae

A. Rojas, sp. nov. (Fig. 3). **Type:** COSTA RICA. **Cartago:** Paraíso, Orosi, Estación de Biología Tropical Río Macho y alrededores, 10° 06' 20" N, 83° 50' 40" W, 1 300 m, A. Rojas & L. Mejía 1374 (Holotype: INB; Isotype: CR).

Ab E. cuspidato squamis rhizomatis longioribus pallidioribus, squamis stipitis costae - que rotundatis (iis stipitis basin autem lanceolatis), laminae basi plerumque longe cuneata vel attenuata, somate centrali minuto aurantiaco, necnon lamina squamis abaxialiter longius ciliatis differt.

Epiphytic; rhizomes 3-4 mm diam., short-creeping, dorsiventral; rhizome scales 3-5 x ca. 0.5 mm, linear-lanceolate, brown to atropurpureous, marginally ciliate-dentate, the cilia 0.3-0.5 mm long; phyllopodia 7-10 mm long; fronds 34-53 cm long; stipes 1/4-1/3 of the frond length; stipe scales 0.5-1 mm long (to 2.5 mm on the first 1 (-3) cm of the stipe base with scales lanceolate or linear-lanceolate), ovate to rounded, black, marginally ciliate, with long-ciliate margin and small central body; blades 15-37 x 1.2-2.8 cm, linear-elliptic, chartaceous to subcoriaceous, basically cuneate to attenuate, apically acuminate; abaxial blade scales ca. 0.5 mm diam., rounded, peltate, stellate, concolorous, orange-yellowish to brown, with long cilia margin and small central body, persistent; adaxial blade scales 0.5-0.7 mm diam., rounded, peltate, stellate, concolorous, in two types, orange-yellowish to whitish mixed with blackish, with small to large central body; veins evident, free, simple or more commonly 1-(2) forked, ca. 1 mm apart, diverging at ca. 80° angle from costa; hydathodes absent; fertile fronds 38-44 cm long; stipes 1/3-3/5 of the frond length; fertile blades 20-25 x 0.6-1.1 cm, linear, basically cuneate to obtuse, apically acute; intersporangial scales not seen.

Distribution: Known only from Costa Rica in Valle de Orosí, at the northern extreme of the Cordillera de Talamanca at 1 300-1 700 m.

Paratype: COSTARICA. Cartago: Paraíso, Valle del Reventazón, Estación de Biología Tropical Río Macho y alrededores, 9° 46' N, 83° 52' W, 1 580-1 700 m, A. Rojas & L. Mejía 1406 (INB, MO).

This species is similar to *E. cuspidatum* (Willd.) T. Moore in its blade shape, dentate stipe and costal scales and persistent scales on the abaxial blade, but differs in having longer (3-5 mm vs. 1.5-2.5 mm) and paler rhizome scales; rounded (except lanceolate on the stipe base) [vs. ovate to lanceolate] stipe and costal scales; commonly long-cuneate to attenuate (vs. widely cuneate to obtuse) blade base; and stellate (vs. ciliate-denticulate to erose) scales with a small central body and long-ciliate margins on the abaxial blade. It is similar to *E. furfuraceum*

(Mett. in Kuhn) H. Christ in its rhizome scales and blade size and shape, but differs in having shorter (3-5 mm vs. 5-8 mm) and dentate (vs. subentire to deciduously dentate) rhizome scales; rounded and dentate [vs. ovate to lanceolate and ciliate-denticulate] stipe and costal scales; commonly long-cuneate to attenuate (vs. widely cuneate) blade-base, more linear blades; and persistent (vs. deciduous) abaxial blade scales.

This species is dedicated to my mother Caridad Alvarado, for her unconditional support and help.

Elaphoglossum glabromarginatum

A. Rojas, sp. nov. (Fig. 4). **Type:** BOLIVIA. Cochabamba: Prov. José Carrasco Torrico, 112 km antigua carretera Cochabamba-Villa Tunari, 17° 08' S, 65° 38' W, 2 700 m, M. Kessler et al. 6821 (Holotype: UC; Isotype: LPB?).

Ab E. albescenti frondibus longioribus, laminae basi cuneata, laminae squamis nigris sparsis, laminae fertili facie abaxiali cum margine nudum abiens.

Epiphytic; rhizome 4-8 mm diam., compact, radial; rhizome scales 1.5-3.0 x 0.2-0.4 mm, lanceolate, brown to blackish, marginally dentate; phyllopodia absent; fronds (35-) 50-85 cm long; stipes 1/4-2/5 of the frond length; stipe scales 2-4 x 0.3-0.6 mm, linear-lanceolate, brown, sometimes with darker center, patent, marginally dentate; blades (20-) 30-60 x 4-7 cm, oblong to oblong-elliptic, papiraceous, basically cuneate, apically cuspidate; blade scales 1-3 x 0.3-0.7 mm, ovate to lanceolate, dark brown to blackish, dispersed, marginally dentate; veins 1-2-forked, ca. 2-3 mm apart, diverging at 70-80° angle from costa; hydathodes evident, dark brown to blackish; fertile fronds 37-55 cm long; stipes 3/4-4/5 of the frond length; stipe scales 1-3 x 0.3-0.7 mm, ovate to lanceolate, blackish, peltate, marginally dentate; fertile blades 10-18 x 1.8-2.8 cm, lanceolate, basically cuneate to obtuse, apically acuminate; intersporangial scales ca. 1 mm, ovate, black, marginally dentate; blade margin without scales or sporangia in 1-2 mm marginal.

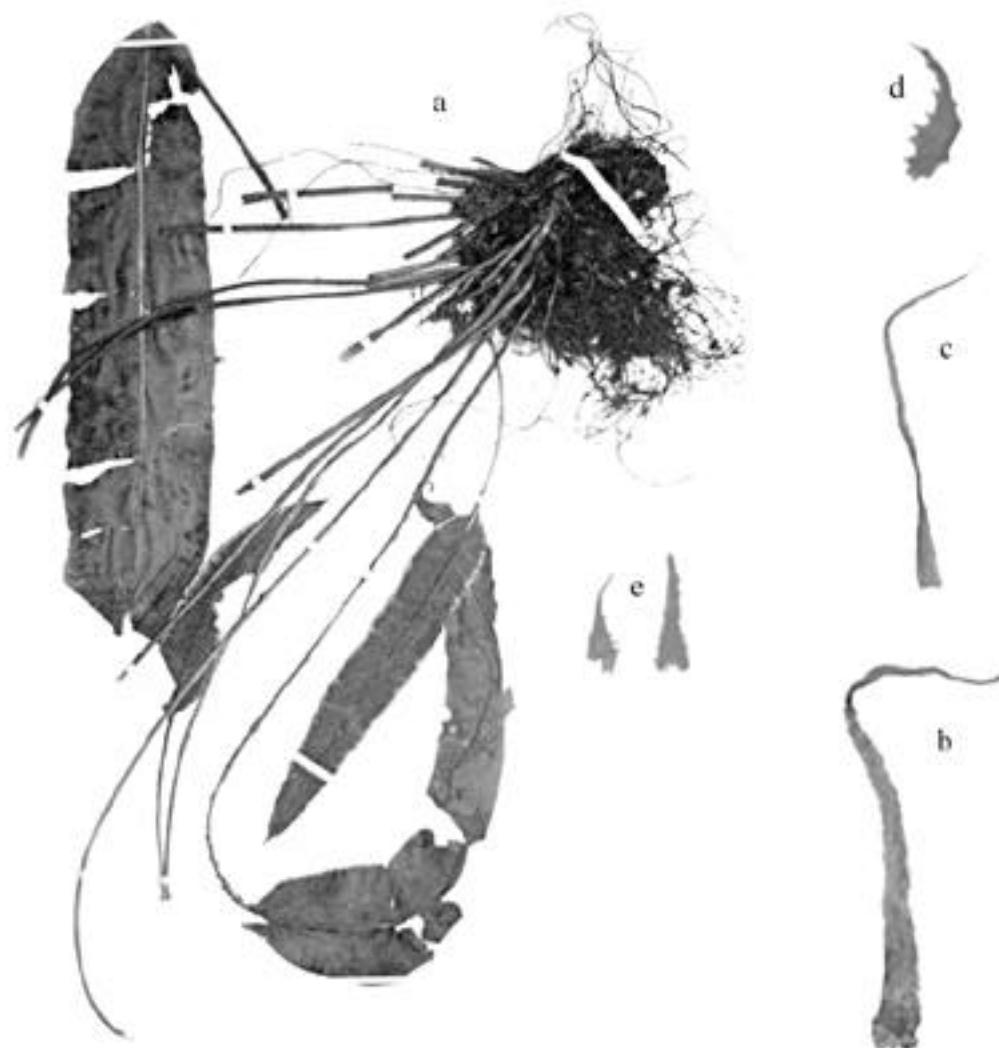

Fig. 4. *Elaphoglossum glabromarginatum* (M. Kessler et al. 6821, UC): a) Type specimen. b) Rhizome scale. c) Stipe scale. d) Costal scale. e) Blade scales. (scales b-e: 25x).

Distribution: Apparently endemic to Bolivia at 2 500-3 050 m.

Paratypes: BOLIVIA. Cochabamba: Prov. José Carrasco Torrico, 108 km antigua carretera Cochabamba-Villa Tunari, 17° 09' S, 65° 38' W, 2 950 m, M. Kessler et al. 6593 (LPB?, UC); Prov. José Carrasco Torrico, 107 km antigua carretera Cochabamba-Villa Tunari, 17° 10' S, 65° 38' W, 3 050 m, M. Kessler et al. 6672 (LPB?, UC); Prov. José Carrasco Torrico, 110 km antigua carretera Cochabamba-Villa Tunari, 17° 08' S, 65° 38' W, 2 800 m, M.

Kessler et al. 6798 (LPB?, UC); Prov. José Carrasco Torrico, 115 km antigua carretera Cochabamba-Villa Tunari, 17° 08' S, 65° 38' W, 2 500 m, M. Kessler et al. 6959 (LPB?, UC).

This species is similar to *E. albescens* (Sodiro) H. Christ, but its different in longer [(35-) 50-85 cm long vs. 16-40 cm] fronds; blade base cuneate (vs. broadly cuneate to rounded), black (vs. brown) abaxial blade scales and more dispersed; 1-3 m long (vs. 3-5 mm long), black (vs. blackish with brown margin) and concolorous (vs. bicolorous) costal scales;

Fig. 5. *Elaphoglossum kessleri* (M. Kessler et al. 7345, UC): a) Type specimen. b) Rhizome scale. c) Stipe scale. d) Blade margin scale. (scales b-d: 25x).

and glabrous in 1-2 mm (vs. completely covered with sporangia) fertile blade margin.

The name refers to fertile blade without scales or sporangia in the 1-2 mm marginal.

Elaphoglossum kessleri

A. Rojas, sp. nov. (Fig. 5). **Type:** BOLIVIA. **Cochabamba:** Prov. José Carrasco Torrico, 137 km antigua carretera Cochabamba-Villa Tunari, 17° 06'S, 65° 34'W, 1700 m, M. Kessler et al. 7345 (Holotype: UC; Isotype: LPB?).

Ab E. erinaceo stipitis squamis planata cum basi ciliata, lamina angustiori textura tenui, costa squamis minoribus planata, iis marginalisque minoribus abstat.

Epiphytic; rhizome 5-8 mm diam., compact, radial; rhizome scales 6-10 x 0.5-1.0 mm, linear-lanceolate, yellowish to brown, flaccid, marginally entire; phylloodia 2-5 mm; fronds (16-) 35-65 cm long; stipes ca. 1/3 of the frond length; stipe scales 2-4 x 0.4-0.6 mm, lanceolate, atropurpleous to black, dispersed, plane, with few long cilia at the base and entire apex;

blades (11-) 22-43 x 2.0-3.6 cm, papiraceous, narrowly elliptic to oblong-elliptic, basically narrow to broadly cuneate, apically acuminate; costal scales same as stipe scales; abaxial blade scales 0.1-0.2 mm diam., as stellate hairs, black, few dense, with long cilia margin; adaxial blade scales same as abaxial but with shorter cilia; marginal scales 1.0-1.5 x 0.3-0.6 mm, lanceolate, dark brown, rolled, dense; veins simple to 1-forked, 1-2 mm apart; hydathodes absent; fertile fronds 25-37 cm long; stipes 2/5-2/3 the frond length; fertile blades 8-16 x 1.2-2.3 cm, elliptic-lanceolate, basically cuneate, apically acuminate; interporangial scales absent.

Distribution: Apparently endemic to Bolivia at 1 700-2 200 m.

Paratypes: BOLIVIA. Chiquisaca: Sud Cinti Province, base oriental del Cerro Bufete, aprox. 200 m al E del Campamento Rinconada del Bufete, 20° 49' 49" N, 64° 22' 28" W, 2 000 m, L. Arroyo et al. 917 (USZ, UC). Cochabamba: Prov. José Carrasco Torrico, 130 km antigua carretera Cochabamba-Villa Tunari, 17° 07'S, 65° 36' W, 2 200 m, M. Kessler et al. 7247 (LPB?, UC).

This species is similar to *E. erinaceum* (Fée) T. Moore rhizome scales and blade distribution scales, but different in plane (vs. rolled) with ciliate base (vs. entire) stipe scales; narrower [2.0-3.6 cm wide vs. (4-) 5-9 (-11.5) cm] and thinner texture (papiraceous vs. chartaceous to subcoriaceous) blade; shorter (2-4 mm long vs. 3-6 mm) and plane (vs. rolled) costal scales; and shorter (1.0-1.5 mm long vs. 2-4 mm) marginal blade scales.

This species is dedicated to German ecologist Michael Kessler, collector of the type material and many others ferns from Bolivia.

Elaphoglossum macdougalii

A. Rojas, sp. nov. (Fig. 6). **Type:** COLOMBIA. Antioquia: Mpio. Urrao, Páramo de Prontino, between Llano Grande and Churrumblum, 6° 28' N, 76° 05' W, 3 320-3 550 m, J. MacDougal et al. 4339 (Holotype: MEXU; Isotype: MO).

Ab E. petiolato rhizomatis squamis latoribus, necnon frondibus, phyllopodiis stipitisque magnis, costae squamis ovata cum margine integra absimilis.

Epiphytic; rhizome 3-5 mm diam., compact to short creeping, dorsiventral; rhizome scales 4-7 x 0.3-0.5 mm, linear, black, lustrous, marginally entire; phyllopodia 5-10 mm long; fronds (20-) 36-55 cm long; stipes 3/5-2/3 the frond length; stipe scales ca. 1 x 0.5-1.0 mm, ovate, brown, dispersed, marginally entire, mixed with resinous dots; blades (8-) 15-22 x 1.5-2.5 cm, chartaceous, narrowly elliptic to oblong-elliptic, basically cuneate, apically long acuminate; costal scales 1-2 x ca. 1 mm, ovate, pale yellowish, dispersed, opaque, marginally entire to erose, basically cordate; abaxial blade scales absent or very few, with abundant resinous dots; adaxial blade scales 0.5-1.0 x 0.5-1.0 mm, pale yellowish, opaque, marginally entire to few erose; veins simple to 1-forked, 1.0-1.5 mm apart; hydathodes absent; fertile fronds 25-30 cm long; stipes 2/3-3/4 the frond length; fertile blades 8-10 x 1.4-1.7 cm, elliptic, basically cuneate, apically acute; interporangial scales absent.

Distribution: Apparently endemic to Colombia. Known only for the type collection.

Differs from *E. petiolatum* (SW.) Urb. in broader (0.3-0.5 mm wide vs 0.05-0.20 mm) rhizome scales; longer [(20-) 36-55 cm long vs. (10-) 15-30 (-40) cm] fronds; longer (5-10 mm long vs. 2-3 mm) phyllopodia; longer [3/5-2/3 the frond length vs. (1/5-) 1/4-1/3] stipe, ovate (vs. linear-lanceolate), pale yellowish (vs. orange-yellowish) and entire to erose (vs. ciliate) costal scales. Also is similar to *E. angustius* Mickel in fronds shape and size, but differs in longer [3/5-2/3 the frond length vs. 1/6-1/3] stipe; entire to erose (vs. ciliate) stipe and costal scales; and resinous (vs. scaly) abaxial surface. In the entire to erose stipe and costal scales is similar to *E. huacsaro* (Ruíz) H. Christ, but differs in compact to short-creeping (vs. ascending) rhizome; and acuminate to caudate (vs. obtuse to rounded) blade apex.

Fig. 6. *Elaphoglossum macdougalii* (J. MacDougal et al. 4339, MEXU): a) Type specimen. b) Rhizome scales. c) Stipe. d) Costal scale. (scales b-d: 25x).

This species is dedicated to John MacDougal botanist at the Missouri Botanical Garden and collector of the type material.

Elaphoglossum paramicola

A. Rojas, sp. nov. (Fig. 7). **Type:** COLOMBIA. **Tolima:** Nevado del Ruiz Massiff, ESE of

Manizales, 5 000 m, J. Archibald 4015 (Holotype: F).

Ab E. atrosquamato lamina ovata cum basi obtusa et apice obtusa vel rotundata divergens.

Terrestrial; rhizome 1-2 mm diam., long creeping, dorsiventral, branched each 1.5-4 cm; rhizome scales 2-5 x ca. 1 mm, linear-lanceolate, orange to brown, sometimes with

Fig. 7. *Elaphoglossum paramicola* (J. Archibald 4015, F): a) Type specimen. b) Rhizome scale. c) Stipe scale. d) Blade scale. (scales b-d: 25x).

blackish apex, marginally entire to occasionally dispersed dentate; phylloodia 8-30 mm long; fronds 4.5-11.0 cm long, 1.5-3.0 cm distant; stipes (1/2-) 2/3-3/4 the frond length; stipe scales 1-3 x ca. 1 mm, same as rhizome scales; blades (1.5-) 2.5-5.5 x (1.0-) 1.5-2.5 (-3.0) cm, coriaceous, ovate to rhomboid, basically broadly cuneate, apically obtuse to rounded,

marginally commonly revolute; costal scales 0.5-2.5 mm ovate to stellate, dark brown to blackish, dentate to ciliate margin; blade scales 0.2-1.0 x 0.2-0.5 mm, deltate to stellate, dark brown to blackish, dispersed, marginally dentate to ciliate; veins simple to 1-forked, ca. 1 mm apart, diverging at 65-70° from costa; hydathodes absent; fertile fronds 8-13 cm

long; stipes ca. 3/4 the frond length; fertile blades 2-4 x 1-2 cm, ovate to rhomboid, basically cuneate to obtuse, apically obtuse to rounded; interporangial scales absent.

Distribution: Apparently endemic to Colombia at 4 000-5 000 m.

Paratype: COLOMBIA. Pasto (Nariño): Volcán Galeras, 4 000 m, T. Plowman 1948 (F).

This species is similar to *E. atrosquamatum* Mickel in creeping rhizome, black and dense rhizome scales and shorter fronds, but is distinct

in branched (vs. not branched) rhizome, fronds 1.5-3.0 cm distant (vs. 0.5-1.5 cm), ovate (vs. elliptic) blade, with broadly cuneate (vs. attenuate) base and obtuse to rounded (vs. acuminate) apex. Also is similar to *E. affine* (M. Marten et Galeotti) T. Moore in its creeping rhizome and blade size, but differs in longer (2-5 vs. 2-3 mm) and linear-lanceolate (vs. ovate) rhizome scales with blackish apex (vs. blackish center); ovate to rhomboid (vs. elliptic), basically broadly cuneate (vs. cuneate) and apically obtuse to rounded (acute to obtuse) blades; and bigger

Fig. 8. *Elaphoglossum paxense* (J. Solomon 14954, F): a) Type specimen. b) Stipe scale. c) Costal scale. d) Blade scale. (scales b-d: 25x).

(0.2-1.0 x 0.2-0.5 mm vs. 0.2-0.4 mm diam.) and dark brown to blackish (vs. orange-yellowish) blade scales.

The name refers to habitat of the species.

Elaphoglossum paxense

A. Rojas, sp. nov. (Fig. 8). **Type:** BOLIVIA. La Paz: Nor Yungas Province, 10 km NE of Chusipata on the road to Coroico, 16° 16' S, 67° 47' W, 2 300 m, J. Solomon 14954 (Holotype: F; Isotypes: UC, MO).

Hac combinatione distinguendum: lamina lanceolata, textura crassiori, laminae basi truncata, hydathodiis manifestis induito.

Epipetric; rhizome 5-7 mm diam., compact, ascending; rhizome scales 1-3 x ca. 1 mm, ovate, yellowish to brown, marginally entire; phylloodia absent; fronds (16-) 25-33 cm long; stipes 2/9-2/5 the frond length; stipe scales 1-2 x ca. 0.5-1.0 mm, ovate, brown, opaque, dispersed, marginally entire; blades 12-21 x 4-7 cm, lanceolate, chartaceous to spongiosus, basically truncate equilateral to inequilateral, apically acute to acuminate; costal scales 1-2 x 0.5-1 mm, ovate, brown, dispersed, marginally entire to erose; blade scales 0.5-1 x 0.2-0.4 mm, ovate, light brown, dispersed, basically erose to ciliate; veins few evident, simple to 1-forked, 1-2 mm apart, diverging at 60-70° from costa;

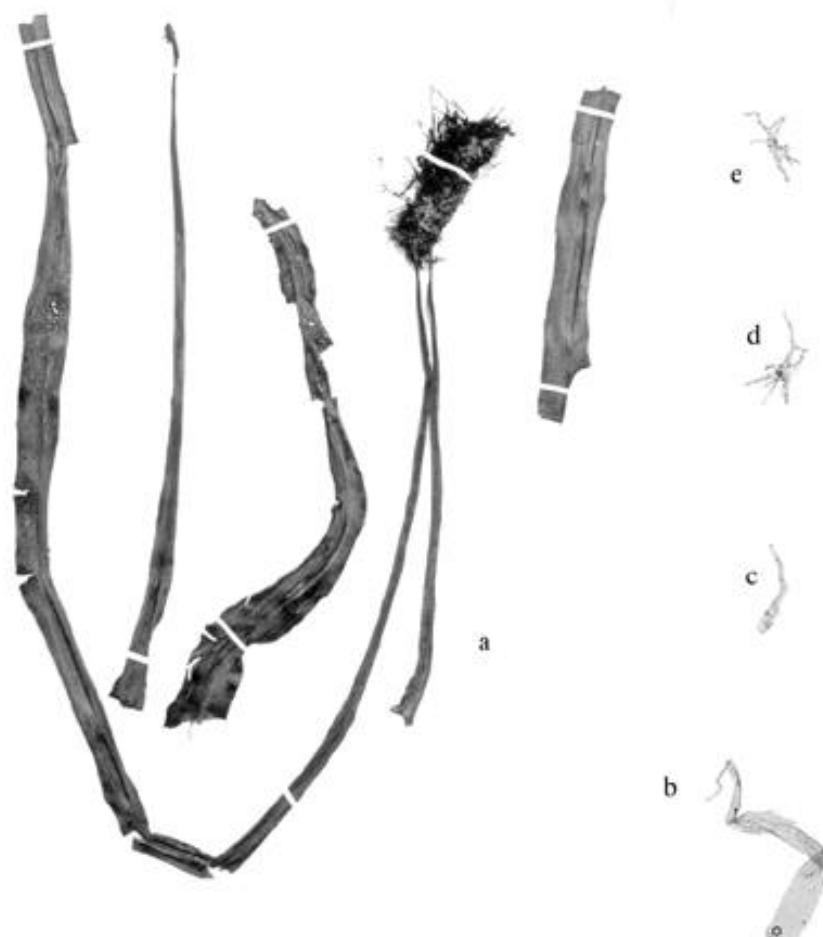

Fig. 9. *Elaphoglossum pseudoherminieri* (R. Moran 5083, F): a) Type specimen. b) Rhizome scale. c) Stipe scale. d) Costal scale. e) Blade scale. (scales b-e: 25x).

hydathodes very evident, black; fertile fronds 25-36 cm long; stipes 2/3-3/4 the frond length; fertile blades 9-12 x 2.3-2.7 cm, lanceolate to lanceolate-oblong, basically truncate to cordiform, apically acute; interporangial scales ca. 1 mm, ovate to rounded, dispersed, marginally ciliate.

Distribution: Apparently endemic to Bolivia at 2 300 m. Known only for the type material.

Elaphoglossum pseudoherminieri

A. Rojas, sp. nov. (Fig. 9). **Type:** PANAMA. **Darién:** Cerro Pirre Massif, ridge trail up from Cana, 700-900 m, R. Moran 5083 (Holotype: F; Isotype: MO).

Ab E. herminieri rhizomatis squamis minoribus, stipitis squamis margine integra, lamina linearis vel linearis-ob lanceolata angustior, laminae squamis minoribus diversa.

Epiphytic; rhizome 3-5 mm diam., compact, dorsiventral; rhizome scales 5-10 x ca. 1 mm, linear, yellowish to gold, marginally entire to dispersedly long ciliate; phylloodia 1-3 mm (not visible for the scales); fronds 30-75 cm long; stipes absent or less than 1/15 (rarely to 1/6) the frond length; stipe scales 1.5-4.0 x ca. 0.1-0.2 mm, linear to subulate, dark brown, dispersed, marginally entire; blades 28-70 x 0.7-2.2 cm, linear to linear-ob lanceolate, chartaceous to spongiosus, blue-green, basically attenuate, apically acuminate, margin revolute; blade scales absent or 0.1-0.3 mm diam., deltate to stellate, orange, dispersed, marginally ciliate; veins no evident; hydathodes absent; fertile fronds not seen.

Distribution: Panama and Colombia? at 700-900 m.

Paratypes: PANAMA. **Darién:** Cerro Pirre Massif, ridge trail up from Cana, 700-900 m, R. Moran 5085 (F, MO), R. Moran 5089 (F, MO).

Is similar to *E. herminieri* (Bory ex Féé) T. Moore in frond size and blue-green blade, but *E. pseudoherminieri* have shorter (5-10 mm long vs. 15-40 mm) and yellowish to gold (vs. orange) rhizome scales, entire (vs. dentate to ciliate) stipe scales, narrower (0.7-2.2 cm wide

vs. 1.7-4.0 cm) and linear to linear-ob lanceolate (vs. linear-elliptic) blade, and smaller (0.1-0.3 mm diam. vs. 0.2-1.0 x 0.2-0.5 mm) blade scales.

Elaphoglossum solomonii

A. Rojas, sp. nov. (Fig. 10). **Type:** BOLIVIA. **La Paz:** Murillo Province, Valle del Río Zongo, 36.7 km al N (abajo) de La Cumbre, ca. 2 km al N de la Planta Hidroeléctrica Chururáqui, 16° 05' S, 68° 03' W, 1 800 m, J. Solomon 18827 (Holotype: UC; Isotype: LPB?, MO).

Ab E. cordifolio rhizomatis squamis minoribus, frondibus minoribus, stipitis squamis sparsis, lamina ovata, fronde fertili iis sterilibus breviori differt.

Epipetric; rhizome 2-3 mm diam., compact, dorsiventral; rhizome scales 2-3 x 0.2-0.4 mm, linear-lanceolate, atropurpleous to black, lustrous, marginally entire; phylloodia 1-3 mm long; fronds (3.5-) 6.0-15.0 cm long; stipes 2/5-3/4 the frond length; stipe scales 2-4 x 0.2-0.4 mm, linear, rolled, atropurpleous to black, patent, dispersed, marginally entire, mixed with hairs 0.1-0.2 mm, glandular, yellowish; blades (2-) 4-9 x (1.5-) 2.0-3.0 cm, ovate, papiraceous, basically cordiform, apically acute to acuminate; abaxial blade scales 0.1-0.3 mm diam., stellated to arachnoid, black, dispersed, margin long ciliate; costal and marginal scales 1-2 x 0.1-0.3 mm, linear, rolled, atropurpleous to black, dense, marginally denticulate, mixed with glandular hairs; adaxial blade surface only with glandular hairs; veins 1-2-forked (rarely simple), 1.5-2.0 mm apart; hydathodes absent; fertile fronds 3-10 cm long; stipes 3/5-4/5 the frond length; fertile blades 0.7-2.5 x 0.5-1.2 cm, ovate to lanceolate, basically cordiform, apically acute to obtuse; interporangial scales absent, with scales only on costa; blade margin without scales or sporangia in 1 mm marginal.

Distribution: Endemic to Bolivia at 1 800-3 200 m.

Paratypes: BOLIVIA. **Cochabamba:** Incayaita, Pocona, 3 000 m, J. Steinbach 8675 (F). **Unduavi:** Nord Yungas, 3200 m, O. Buchtien 415 (F).

Fig. 10. *Elaphoglossum solomonii* (J. Solomon 18827, UC): a) Type specimen. b) Rhizome scale. c) Stipe scale. d) Costal scale. e) Blade margin scales. (scales b-e: 25x).

This species differs from *E. cordifolium* by shorter (2-3 mm long vs. 4-7 mm) rhizome scales, shorter [(3.5-) 6.0-15.0 cm long vs. 12-25 cm) fronds, dispersed (vs. dense) stipe scales, ovate (vs. lanceolate) blade, and fertile fronds shorter than the sterile (vs. longer than the sterile).

This species is dedicated to James Solomon, collector of the type material.

NEW COMBINATIONS WITH RANGE EXTENSION

Elaphoglossum beitelii

(Mickel) A. Rojas, st. nov. *E. crispatum* Mickel var. *beitelii* Mickel, Brittonia 39 (3): 316. 1987. Type: Venezuela, Amazonas, J. Beitel 85133 (Holotype: NY!; Isotype: MO!).

Distribution: Previously known only from Venezuela, but now also from **Colombia**.

Material of new distribution: COLOMBIA. Comisaría del Putumayo, above Sibundoy, 2 500 m, A. Alston 8368 (MO).

Elaphoglossum curvans

(Kunze) A. Rojas, comb. nov. *Acrostichum curvans* Kunze, Linnaea 9: 30. 1834. Lectotype: Perú, Pampayaco, E. Poeppig 1115 (MO!). (designated here).

Elaphoglossum nigrocostatum Mickel, Brittonia 39: 322. 1987. Type: Venezuela, Táchira, J. Steyermark & R. Liesner 118270 (Holotype: MO).

Distribution: Previously known from “Venezuela” and Perú, but now also from **Colombia** and **Ecuador**.

Material of new distribution: COLOMBIA. Valle del Sombrerito, 1 400 m, L. André 2330 (F). **Antioquia:** Mpio. Urrao, Parque Nacional Natural Las Orquídeas, Vereda Calles, margen derecha con el Río Calles, 6° 32'N, 76° 19' W, 1 450-1 500 m, J. Pipoly et al. 17347 (MO); **Cauca:** Yumbo, S. Herrera 879 (F); Parque Nacional Munchique, km 50-55 along road above Uribe, 1 875-2 256 m, J. Luteyn et al. 7482 (NY); Morales S of Morales, 1 680-1 720 m, F. Pennell & E. Killip 8297 (US); Mpio. Ciclito, West Cordillera, 1 600 m, Xhyander 2384 (F). **Cundinamarca:** carretera entre Aguabonita y Fusagasuga, 2 000 m, J. Duque 3306 (MEXU). **El Valle:** La Cumbre, Cordillera Occidental, 1 600-1 800 m, E. Killip 5677 (NY), 1 700-2 200 m, E. Killip 5690 (NY, US). **Huila:** La Plata, 2 800 m, K. Sneidern 2166 (NY). **Nariño:** Río San Juan near junction of Río San Juan drainage, Río Puelmambi, 1 540 m, J. Ewan 16045 (UC). **San Francisco:** Corregimiento Aquitamia, 1 150-1 250 m, Fon - negra et al. 4345 (MO). **Santa Marta:** H. Smith 11337 (MO). **Santander Norte:** along road between Pamplona and Chorro Colorado, Via Chiquira at km 128, marker, 7° 22' N, 72° 38' W,

2 580 m, T. Croat 56412 (MO, NY). ECUADOR. Cerro “Ilalo”, M. Acosta 14054 (F). **Carachi:** Maldonado, 1 500 m, M. Madison 3908 (NY); Carretera entre Maldonado y Chical, frontera con Colombia, 0° 56' N, 78° 08' W, 1 500 m, W. Palacios & Rubio 7265 (MO, QCNE?, UC). **Loja:** trails ca. 5 km ENE of San Pedro de Vilcabamba, from “El Bosque” to Quebrada Romerillos and Banderilla, 4° 14' S, 79° 10' W, 2 000-2 200 m, B. Øllgaard & H. Nava - rrete 105956 (AAU?, NY, QCA?). **Morona-Santiago:** Morona Cantón, near city of Macas, 2° 20'S, 78° 08'W, 1 100 m, A. Fay & L. Fay 4083 (MO, UC). **Napo:** Quijos Cantón, Baeza, 0° 30'S, 77° 50' W, 2 000 m, A. Fay & L. Fay 2658 (MO); El Chaco Cantón, on the Baeza-La- go Agrio road, turn E to the bridge over Río Quijos to Sala Honda, near the bridge, 0° 24' S, 77° 49' W, 1 560 m, A. Fay & L. Fay 3905 (MO); Archidona Cantón, Southern slopes of Volcán Sumaco, along Hollín-Loretp road, 0° 35' S, 77° 40'W, 1 200 m, R. Moran & Rohr - bach 5163 (MO, UC), R. Moran & Rohrbach 5171 (MO, UC). **Pichincha:** km 10 Nono-Tan - dayapa, 2 320 m, C. Dodson & W. Clendenin 10754 (F); Quito-Santo Domingo via Chiriboga, km 30, 2 950 m, C. Dodson & W. Clendenin 10868 (F); Quito-Santo Domingo via Chiriboga, km 82, 1 400 m, C. Dodson & W. Clendenin 10981 (F).

Elaphoglossum eutecnum

(Mickel) A. Rojas, st. nov. *Elaphoglossum boryanum* (Fée) T. Moore var. *eutecnum* Mickel, Brittonia 37 (3): 266. 1985. Type: Trinidad, Tucuche, Britton et al. 1300 (Holotype: NY!; Isotype: NY).

Distribution: Previously known from Venezuela, Granada, Guadalupe, Monserrat and Trinidad, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Nariño:** Mpio. Ricaurte, Corregimiento de Altaquer, 13-16 km W de Ricaurte, ca. 1° 14-14' N, 78° 1-3'W, 1 045-1 175 m, H. Churchill et al. 18313 (NY).

NEW RECORDS

Elaphoglossum acrocarpum

(Mart.) T. Moore, Index Fil. 4. 1857. *Acrostichum acrocarpum* Mart., Icon. Pl. Crypt. 85, t. 23. 1834.

E. gamboanum A. Rojas, Brenesia 47-48: 3. 1997. Type: Costa Rica, Limón, A. Rojas et al. 2364 (Holotype: INB!; Isotypes: CR!, MO, NY, US).

Distribution: Previously known from "Mexico", "Costa Rica", Venezuela and Brazil, but now also from **Ecuador** and **Perú**.

Material of new distribution: ECUADOR. **Zamora-Chinchipe:** New road Loja-Zamora, trail to Podocarpus patch at Quebrada del Diablo, 2 000-2 400 m, H. Werff & W. Palacios 9253 (MO, UC). PERU. **Junín:** Satipo, Gran Pajonal, E of Chequitavo on trail to Kotampaz, 10° 45' S, 74° 23' W, D. Smith 6733 (MO, UC).

The Mexican specimen (*J Rzedowsky & R. McVaugh* 10, ENCB) is different from others because the fertile fronds scales are orange-yellowish (vs. blackish).

Elaphoglossum amazonicum

Atehortúa ex Mickel, Fieldiana Bot., n. s. 27: 122. 1991. Type: Perú, San Martín, Zepelacio, near Moyobamba, G. Klug 3330 (Holotype: US!; Isotypes: BM, MO!, NY!).

Distribution: Previously known only from Perú, but now also from **Ecuador**.

Material of new distribution: ECUADOR. **Napo:** Cantón Putumayo, Río Aguarico, town on Dureno, 1 500 ft., T. Plowman et al. 4017 (US).

Elaphoglossum ambiguum

(Mett. ex H. Christ) Alston, J. Wash. Acad. Sci. 48: 234. 1958. *Acrostichum ambiguum* Mett. ex H. Christ, Neue Denkschr. Allg. Schweiz. Ges. Gesammten Naturwiss. 36: 60. 1899. Type: Venezuela, A. Fendler 283 (US!).

Distribution: Previously known from Panama?, Colombia, Venezuela, Ecuador and Bolivia, but now also from **Perú** and **Brazil**.

Material of new distribution: PERU. Cundinamarca: Contumazá, Bosque Cachil, 2 500 m, A. Sagástegui et al. 15907 (F). BRAZIL. Paraná: Jáguaiahya su Silvila, 760 m, P. Dusén s. n. (F).

Grayum (pers. comm.) think that this species is not valid (art. 34 of International Code of Botanical Nomenclature) because was published as a synonym of *Acrostichum flaccidum*, on this case is necessary a new name for this species.

Elaphoglossum andicola

(Fée) T. Moore, Index Fil. 5. 1857. *Acrostichum andicola* Fée, Mém. Foug., Hist. Acrostich. 2: 28, t. 2, F. 1. 1845.

Distribution: Previously known from Costa Rica, Colombia and Venezuela, but now also from **Ecuador**, **Perú** and **Bolivia**.

Material of new distribution: ECUADOR. Galápagos Island, Albemarie Island, 3150 ft., A. Stewart 775 (US). **Bolívar:** Simiatug, Had. Talahua, 2 300 m, C. William & R. Summers 656 (F). **Cotopaxi:** W and N of Pilaló, on Quevedo-Latacunga road, 0° 56' S, 76° W, 2 350-2 450 m, L. Holm et al. 3394 (AAU?, UC); around Pilalo, 0° 57' S, 79° 02' W, 2 400m, L. Holm & S. Jeppesen 1368 (F). PERU. **Amazonas:** Luya, Jaipe, Fundo El Paraíso, 1 780 m, C. Díaz & J. Campos 3616 (MO); ca. 12-18 trail km E of La Peca in Serranía de Bagua, 1 800-1 950 m, A. Gentry et al. 22886 (F); Prov. Chachapoyas, Cerros Calla Calla, west side, 45 km above Balsas, midway on the road to Leimebamba, 3 100 m, P. Hutchison & J. Kennet 5796 (F, MO, UC). **Cajamarca:** Prov. Cutervo, La Pucarilla, entre Socota y San Andrés, 2 500 m, I. Sánchez et al. 5991 (F). **Cusco:** Urubamba, Machu Pichu, on a hillside above the Río Mandor, 3 km from km 114 of the Urubamba Railroad, 2 450 m, B. Peyton & S. Peyton 1304 (MO). **Junín:** Tarma, Agua Dulce, 1 900 m, Woytkowski 35437 (UC). **Pasco:** Oxapampa, San Alberto, Cordillera de Yanachaga, 2 300-2 500 m, H. Werff et al. 8426 (MO). BOLIVIA. **Cochabamba:** Prov. José Carrasco Torrico, 8 km de Empalme hacia Siberia, 17° 46' S, 64° 48' W, 2 900 m, M. Kessler et al. 9191 (LPB?, UC). **La Paz:** North

Yungas Prov., off the La Paz- Yolosa Road, along road, about 1 km E of Cotapata Gas Station, and on a trail on left (from La Paz), roughly north, $16^{\circ} 17' N$, $67^{\circ} 50' W$, 3 200 m, A. Fay & L. Fay 2995 (MO).

Elaphoglossum angustius

Mickel, Fieldiana Bot., n. s. 27: 124. 1991.
Type: Perú, San Martín, Zepelacio, near Moyobamba, G. Klug 3503 (Holotype: NY!); Isotypes: F!, GH, K).

Distribution: Previously known from Perú and Bolivia, but now also from **Colombia, Ecuador and Brazil.**

Material of new distribution: COLOMBIA. Duult 2462 (F). ECUADOR. **Carchi:** environs of Chical, 12 km below Maldonado on the Río San Juan, $1^{\circ} 04' N$, $78^{\circ} 17' W$, 1 200 m, M. Madison et al. 4183 (F, SEL?). BRAZIL. **Rondonia:** along Río Dos Pacoás Novas, just above and below the first Cachoeira, ca. 220 m, W. Anderson 12274 (F).

Elaphoglossum atrobarbatum

Mickel, Novon 2: 368. 1992. Type: Panama, Panamá, I. Valdespino & J. Aranda 167 (Holotype: NY!; Isotype: UC!).

Distribution: Previously known only from Panama, but now also from **Colombia.**

Material of new distribution: COLOMBIA. **Antioquia:** Mpio. San Francisco, Corregimiento Aquitamia, 1 150-1 250 m, Fonnegra et al. 4345 (MO).

Elaphoglossum atrorubens

Mickel, Brittonia 39: 314. 1987. Type: Venezuela, Mérida, L. Ruiz and M. López 1754 (Holotype: NY!).

Distribution: Previously known only from Venezuela, but now also from **Colombia and Ecuador.**

Material of new distribution: COLOMBIA. **Cauca:** Parque Nacional Nevado del Huila, ca. 23-31 km E of Tocueyo, $3^{\circ} 2' N$, 76°

$2' W$, 3 075-3 300 m, J. Luteyn et al. 10324 (NY). ECUADOR. **Napo:** Oyacachi, 5 km después del paso, $0^{\circ} 12' S$, $78^{\circ} 06' W$, 3 500 m, H. Navarrete 1373 (AAU?, NY, QCA?), H. Navarrete 1402 (AAU?, NY, QCA?). **Pichincha:** Ruminahui Cantón, Bosque Protector Paschoa, linea de cumbre de Paschoa, $0^{\circ} 22' S$, $78^{\circ} 27' W$, 3 870-3 900 m, Cerón & Alarcón 12337 (QCNE?, MO).

Elaphoglossum atrosquamatum

Mickel, Brittonia 39: 315. 1987. Type: Venezuela, Táchira, J. Steyermark et al. 98348-A (Holotype: NY!; Isotype: MO!).

Distribution: Previously known from Colombia, Venezuela and Perú, but now also from **Costa Rica and Dominican Republic.**

Material of new distribution: COSTA RICA. **Cartago:** Cantón de Paraíso, investigation area of the CATIE, $9^{\circ} 33' 30'' N$, $83^{\circ} 41' 30'' W$, 2 600-2 700 m, J. Bittner 142 (CR); southern slopes of Volcán Turrialba, near the finca del Volcán Turrialba, 2 000-2 400 m, P. Standley 35252 (US), P. Standley 35253 (US), P. Standley 35310 (US); Volcán Turrialba, 3.300 m, A. Torres 24 (US), A. Torres 134 (US). **Limón:** Cordillera de Talamanca, southwestern foot of Cerro Kámuk, $9^{\circ} 16' N$, $83^{\circ} 02' 30'' W$, 3 200-3 350 m, G. Davidse et al. 25953 (CR, MO, UC). **Cartago/San José:** Cantones de Paraíso/Pérez Zeledón, Carretera Interamericana, entre Cerro Estaqueró y la entrada a las torres, $9^{\circ} 33' 35'' N$, $83^{\circ} 45' 25'' W$, 3 100-3 300 m, A. Rojas 4522 (INB); road from Cartago to San Isidro del General (Pan American HWY, Rt 2), km 87-88, ca 1 km NW of Asunción, 3 200 m, A. R. Smith & T. Béliz 2021 (UC); Interamerican Hwy., ca. 1.5 km NW of Restaurant La Georgina, 3 100 m, J. Utley & K. Utley 2967 (CR). **San José:** Cerro Chirripó, SW slopes, along trail from Canaán to summit, nr. La Caverna, 9 800-10 300 ft., A. Evans et al. 88 (US). DOMINICAN REPUBLIC. La Vega, ca. 13 km from Valle Nuevo on road to San José de Ocoa, 2 500 m, G. Gastony et al. 717 (US).

Elaphoglossum auricomum

(Kunze) T. Moore, Index Fil. 7. 1857. *Acrostichum auricomum* Kunze, Linnaea 9:28. 1834. Type: Perú, Poeppig s. n. (fragm. P!).

Distribution: Previously known from Mexico, Guatemala, Honduras, Costa Rica, Colombia, Venezuela, Ecuador, Perú, Bolivia and La Española, but now also from **French Guyana**.

Material of new distribution: FRENCH GUYANA: **Mont Atachi Bacca:** Région de l'Inini, cam II, 3° 33'N, 53° 55'W, 500 m, G. Cremers et al. 1989 (B?, CAY?, MO, NY, P?, U?, US), G. Cremers et al. 10161 (B?, CAY?, MO, NY, P?, U?, S?).

Elaphoglossum balansae

C. Chr., Index Fil. 303. 1905. Type: Paraguay, B. Balansa 390 (Holotype: P-n.s.).

Elaphoglossum tenerum (Baker) H. Christ, Mon. Elapho.: 62. 1899. *Acrostichum tenerum* Baker, J. Bot. 302. 1878. (no Kunh, Linnaea 36: 52. 1869).

Distribution: Previously known from Brazil and Paraguay, but now also from **Colombia**. (probably also in Venezuela).

Material of new distribution: COLOMBIA. **Antioquia:** Mpio. Urrao, Parque Nacional Natural Las Orquídeas, Quebrada Honda, en el filo al NW de la Cabaña Calles, 6° 27' N, 76° 14' W, 1 330 m, J. Pipoly et al. 16933 (JAUM?, MO); Mpio. Urrao, zona limítrofe del Parque Nacional Natural Las Orquídeas, Vereda Calles, Alto de Palmitas, ca. 1 km de la Cabaña de Cañales del INDERENA, 6° 32' N, 76° 19' W, 1 300-1 400 m, J. Pipoly et al. 17456 (JAUM?, MO), J. Pipoly et al. 17502 (JAUM?, MO), J. Pipoly et al. 17521 (JAUM?, MO); Mpio. Urrao, Parque Nacional Natural Las Orquídeas, Vereda Calles, 6° 32' N, 76° 19' W, 1 350-1 450 m, J. Pipoly et al. 17741 (JAUM?, MO).

Elaphoglossum boquetense

Mickel, Novon 2: 369. 1992. Type: Panama, Chiriquí, J. Dwyer & W. Hayden 7706 (Holotype: NY!; Isotype: MO!).

Distribution: Previously known only from Panama, but now also from **Venezuela**.

Material of new distribution: VENEZUELA. **Trujillo:** road to peak above Bocono Mun. Park, 9 000 ft., A. Fay 1602 (MO), A. Fay 1603 (MO); Páramo de Guaramacal, F. Ortega 2632 (MO); al S de Boconó, en la vertiente N de Guaramacal, en los alrededores de la Laguna de los Cedros, en la toma de agua de INOS, F. Ortega et al. 2957 (MO); Boconó, 22 km SE of Boconó, road to Guaramacal, ca. 9° 12' N, 70° 10' W, 2 300 m, A. Smith et al. 1526 (MO, UC).

Elaphoglossum burchellii

(Baker) C. Chr., Index Fil. 304. 1905. *Acrostichum burchellii* Baker, Syn. Fil. 401. 1868. Type: Brazil, W. Burchell 5155 (Holotype: K!).

Distribution: Previously known from Colombia and Brazil, but now also from **Costa RicaVenezuela, Perú and Dominan Republic**.

Material of new distribution: COSTA RICA. **Puntarenas:** Buenos Aires, Cordillera de Talamanca, Río Kuiyé, near by the camp upstream, 9° 17'30" N, 83° 16'00" W, 1 530 m, J. Bittner 1722 (CR, MO, NY); Buenos Aires, Escalera, camino a Olán, 9° 15'50" N, 83° 13' 30" W, 1 600 m, M. Valerio 64 (CR, MO). **San José:** San Pablo, Cerro Abejonales, M. Chavarría & G. Herrera 24 (MO). VENEZUELA. *H. Cristiana* 13563 (F). PERU. **Amazonas:** Bangara, 8 km above Pedro Ruiz (Jazan) on road to Pomacocha, 5° 55'S, 77° 55' W, 1 500-1 600 m, S. Knapp & Alcorn 7550 (MO). DOMINICAN REPUBLIC. *M. Coneja* s. n. (US).

Elaphoglossum castaneum

(Baker) Diels, Nat. Pflanzenfam 1: 333. 1899. *Acrostichum castaneum* Baker, J. Linn. Soc. Bot. 15: 166. 1877. Type: Ecuador, Corazón, L. Sodiro s. n. (Holotype: K-n.s.; Isotypes: B, S, US!).

Distribution: Previously known from Costa Rica, Panama, Colombia, Ecuador, Perú and Bolivia, but now also from **Venezuela**.

Material of new distribution: VENEZUELA. **Táchira:** Montaña of Río Táchira at base of Páramo de Tamá, between Betania and Tamá, by Colombian-Venezuelan boundary, 2 430 m, *J. Steyermark 57179* (F).

Elaphoglossum chloödes

Mickel, Fieldiana Bot. n. s. 27: 127. 1991.
Type: Perú, Ayacucho, *E. Killip & A. Smith 22391* (Holotype: NY!; Isotype: US!).

Distribution: Previously known only from Perú, but now also from Ecuador.

Material of new distribution: ECUADOR. **Pichincha:** Calacali-Nanegalito road, 8° 0' S, 78° 35' W, 1850 m, *Billier & Jadin 6735* (BR, MO).

Elaphoglossum chrysopogon

Mickel, Brittonia 39: 316. 1987. Type: Venezuela, Aragua, *A. Fendler 279* (Holotype: NY!; Isotype: MO!).

Distribution: Previously known only from Venezuela, but now also from Colombia.

Material of new distribution: COLOMBIA. **Cundinamarca:** 7 km NNW of Sibate, 2 530 m, *R. Tryon & A. Tryon 6091* (GH, US). **Norte de Santander:** Páramo del Hatico, in route from Toledo to Pamplona, about 2 900 m, *E. Killip & A. Smith 20689* (UC, US).

Elaphoglossum cinctum

Rosenst., Fedde Rep. 25: 63. 1928.

Distribution: Previously known from Colombia, Perú and Bolivia, but now also from Panama.

Material of new distribution: PANAMA. **Bocas del Toro:** Oleoducto Road, near continental divide, Fortuna Dam area, 8° 48' N, 82° 12' W, 1 000 m, *H. Churchill et al. 4612* (MO); along trail on divide separating Chiriquí and Bocas del Toro, 8° 45' N, 82° 15' W, *G. McPherson 7239* (MO). **Chiriquí:** Fortuna Dam area, near forestry experiment station, S of Lake, 8° 45' N, 82° 15' W, 1 150 m, *G. McPherson 7872* (MO); slopes NW of conflu-

ence of Río Hornito and Río Chiriquí, ca. 8° 44' N, 82° 13' W, 1 050-1 100 m, *W. Stevens 18358* (MO). **Panamá:** 2.4 mi. beyond Cerro Jefe, on road to Altos de Pacora, 800-1 000 m, *T. Croat 22656* (F, MO).

Any specimens of Perú have been confused and bat identified as *E. elegantipes* Mickel, but the first species belong to at the Section *Polytrichia* Subsection *Hybrida* and the second species belong to the Section *Elaphoglossum* Subsection *Pachyglossa*.

Elaphoglossum corderoanum

(Sodiro) H. Christ, Monogr. Elapho. 81. 1899. *Acrostichum corderoanum* Sodiro, Crypt. Vasc. Quit. 470. 1893. Tipo: Ecuador, Pichincha, Ríobamba, *L. Sodiro s. n.* (HT: Q? or K?).

Distribution: Previously known only from Ecuador, but now also from Costa Rica, Panama and Colombia.

Material of new distribution: COSTA RICA. **Alajuela:** Quisarrá, above lechería on Volcán Poás, 7 500 ft., *H. Stork 3371* (UC). **Cartago:** Cantón de Paraíso, Investigation Area of the CATIE, 9° 33' 30" N, 83° 41' 30" W, 2 600-2 700 m, *J. Bittner 156* (NY), *J. Bittner 180* (NY); Irazú W, 2 000 m, *L. Brade 184* (NY, UC); E of Irazú, 9 500 ft., *C. Lankester 2078* (US); El Guarco, Reserva Forestal Río Macho, Cordillera de Talamanca, Tres de Junio, San Isidro, 9° 40'50" N, 83° 51'10" W, 2 670 m, *A. Rojas 329* (INB); Cordillera de Talamanca, cerca de Villa Mills, *Merz 218* (CR); S slope of Volcán de Turrialba, near the finca del Volcán de Turrialba, 2 400-2 600 m, *P. Standley 35349* (US); E of Irazú, 9 500 feet, *H. Stork 2078* (UC); San Cristóbal Road, SW of Cartago, 8000 ft., *H. Stork 2192* (UC); Cerro Cuericí, 3010 m, *Y. Widmer 414* (NY). **Cartago/San José:** Cerro de La Muerte, Pensión Georgina, *T. Croat 850* (CR); along Int. Hwy., ca. 15-20 km SE by road to El Empalme, ca. 2 600 m, *D. Lellinger & J. White 1171* (US); at km 60 on Pan American Hwy., S of San José, on road to San Isodro del General, *R. Lloyd 4260* (NY); slope behind Hotel La Georgina, 8 100 ft., *R. Lloyd 4270* (NY); Interamerican Hwy., vicinity

of Villa Mills and 1 km NW (vicinity of Hotel La Georgina), 2 800-2 900 m, *J. Mickel* 2180 (NY). **Puntarenas:** Dota, camino a Providencia de Dota, entrando por Ojo de Agua, frente al Restaurant Chespiritos, 9° 37' 00" N, 83° 49' 10" W, 2 500-2 950 m, *A. Rojas & M. Coto* 2730 (CR, INB, MO, NY, US, UC); carretera de Cartago a San Isidro del General (Carretera Interamericana), km 96-97, aprox., a 1,5 km de Villa Mills (cerca de Siberia), 2 900 m, *A. Smith* 2052 (CR, UC); km 69, or 18 km SE of El Empalme, 2 600 m, *A. Smith & T. Béliz* 2095 (CR, MO, UC?). **San José:** Cerro Chirripó, SW slopes along ridge trail from Canaán to summit, 8 500-1 000 ft., *A. Evans et al.* 85a (US); Cerro de La Muerte, near Villa Mills, *C. Seidenschnur* 226 (NY), *C. Seidenschnur* 242 (NY); road from Cartago to San Isidro del General (Pan American Hwy., Rte. 2), km 96-97, ca. 1.5 km S of Villa Mills (near Siberia), 2 900 m, *A. Smith & T. Béliz* 2052 (UC); San Cristóbal road, 8 000ft., *H. Stork* 2192 (US). PANAMA. **Chiriquí:** above Guadalupe, ca. 2 km N of Cerro Punta, 8° 52'N, 82° 33'W, 2 200 m, *P. Maas & R. Dressler* 4852 (MO, U?). Above Camp Aguacatal, E slope of Chiriquí Volcano, 2 400-2 500 m, *W. Maxon* 5297 (US). COLOMBIA. **Cundinamarca:** Macizo de Sumapáz, Cuchilla La Rabona, 3 900-3 950 m, *S. Diaz et al.* 2886 (COL, MO).

Elaphoglossum correae

Mickel, Novon 2: 372. 1992. Type: Costa Rica, Heredia, *R. Lloyd* 4284 (Holotype: NY!).

Distribution: Previously known from Costa Rica and Panama, but now also from **Belize**.

Material of new distribution: BELIZE. **Toledo:** Southern Maya Mountains, Bladen nature Reserve, trail from Central Snake, Creek Camp to Roothire Selipan Archeological site, 16° 27'48" N, 88° 58'42" W, 450 m, *G. Davidse & A. Buchanan* 36941 (MO); Maya Mountains, Richardson Peak, 16° 36' N, 88° 47' W, 800-920 m, muestra mixta con *Elaphoglossum* sp., *G. Davidse & A. Brant* 32241 (MO), *G. Davidse & A. Brant* 32242 (MO).

Elaphoglossum crassipes

(Hieron.) *Diels*, Nat. Pfl. 1: 334. 1899. *Acrostichum crassipes* Hieron., Engl. Jahrb. 22: 409. 1896.

Distribution: Previously known from Argentina and Paraguay, but now also from **Bolivia**.

Material of new distribution: BOLIVIA.

Yungas: *A. Bang* 260 (F), *A. Bang* 434 (F).

Elaphoglossum crispatum

Mickel, Brittonia 39: 316. 1987. Type: Venezuela, Mérida, *A. Smith* 954 (UC!).

Distribution: Previously known only from Venezuela, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Santa Marta:** Sierra de Maca, 4 000-5 000 ft., *H. Werff & Ortiz* 5918 (Holotype: MO; Isotype: MO).

Elaphoglossum decursivum

Mickel, Brittonia 32: 334. 1980. Type: Mexico, Oaxaca, *J. Mickel* 6417 (Holotype: NY!; Isotypes: ENCB, NY, UC, US!).

Distribution: Previously known from Mexico, Guatemala and Costa Rica, but now also from **Belize, Honduras, Nicaragua, Panama, Colombia, Haití and Santo Domingo**.

Material of new distribution: BELIZE.

Toledo: Southern Maya Mountains, Bladen Nature Reserve, ridge just S of the main divide of the Maya Mountains, Augusta Divide Camp, *G. Davidse & D. Holland* 36729 (MEXU); Southern Maya Mountains, Bladen Nature Reserve, West Snake Creek, 16° 27'24" N, 89° 01' 01" W, 500 m, *D. Holland & Kid* 90 (MO); along divide of Maya Mountains, Bladen Nature Reserve, Medium Height, 16° 31'N, 88° 57' W, 950-1 000 m, *B. Holst et al.* 5204 (NY); Columbia River Forest Reserve, Little Quartz Ridge, SW slopes, NE of Camp 1, 16° 23' 25" N, 89° 06' 40" W, 800-850 m, *B. Holst* 5924 (SEL, MO). HONDURAS. **Comayagua:** near El Achote, hills above pains of Siguatepeque,

1 350 m, *T. Yuncker et al.* 5977 (NY, UC, US). **Francisco Morazán:** Cerro Uyuca, 1 650-2 000 m, *C. Morton* 7189 (MO). NICARAGUA. **Zelaya:** Costado S del Cerro La Pimienta, N del Cerro Hormiguero, a orillas del Caño Hormiguero, 13° 44' 45" N, 84° 59' 45" W, 800-900 m, *A. Grijalva* 297 (CR, HNMN?, MO); Caño El Hormiguero, ca. 13° 46' N, 84° 59' W, ca. 750-800 m, *J. Pipoly* 5922 (CR, MO). PANAMA. **Bocas del Toro:** along road between Gualaca and Chiriquí Grande, 6.6 mi N of middle of bridge over Fortuna Lake, 8° 45' N, 82° 18' W, 780 m, *T. Croat* 66766 (MO). **Chiriquí:** 2.5 km from Cuesta Piedra along Río Monte road, *J. Folsom* 3981 (MO, UC); vicinity of El Boquete, 1 000-1 300 m, *W. Maxon* 5067 (US). **Darién:** Parque Nacional del Darién, ridge between N and S branches of Río Pucuro, N of Old Village of Tacarcuna, ca. 18 km E of Pucuro, 8° 05' N, 77° 16' W, 600-800 m, *B. Hammel et al.* 16463 (MO). **Veraguas:** Cerro Tute, ridge up from former Escuela Agrícola, Santa Fé, 81° 05' N, 8° 35' W, 800-1 100 m, *G. Hamilton & Krager* 3944 (MO). COLOMBIA. **El Valle:** Cordillera Occidental, La Cumbre, 1 900-2 100 m, *E. Killip* 11624 (US), *E. Killip & T. Hazen* 11130 (NY). HAITÍ. Massif de La Pelle, Tr. Prebe a Piquands, Port au Prince, mosne malanga, shady gulch, 1200 m, *L. Ekman* 7375 (US). SANTO DOMINGO. **Monte Cristi:** Cordillera Central, Mansión, ridge between Río Cenobí and Río de la Cidra, 800 m, *E. Ekman* 12698 (F, US).

Elaphoglossum delasotae

Mickel, Brittonia 45: 216. 1993. Type: Colombia, Chocó, D. Lellinger & E. Sota 736 (Holotype: US!).

Distribution: Previously known only from Colombia, but now also from **Perú** and **Bolivia**.

Material of new distribution: PERU. **Cusco:** Quillabamba, Santa Teresa, on a hill-side called Mandornillo, 0.5 km W of La Playa, 2615 m, *B. Peyton & S. Peyton* 1267 (MO); Oxapampa, trail to summit of Cordillera Yanachaga via Río San Daniel, 10° 25' S, 75° 27' W, 2500 m, *D. Smith et al.* 7833 (MO). BOLIVIA.

Cochabamba: Provincia José Carrasco Torrico, 115 km antigua carretera Cochabamba-Villa Tunari, 17° 08' S, 65° 38' W, 2 500 m, *M. Kessler et al.* 6960 (LPB?, UC); Provincia José Carrasco Torrico, 118 km antigua carretera Cochabamba-Villa Tunari, 17° 08' S, 65° 38' W, 2 300 m, *M. Kessler et al.* 7098 (LPB?, UC); Provincia José Carrasco Torrico, 123 km antigua carretera Cochabamba-Villa Tunari, 17° 08' S, 65° 37' W, 2 100 m, *M. Kessler et al.* 7123 (LPB?, UC). **La Paz:** Murillo Province, Zongo Valley, 1.6 km down the valley from Sainani, 16° 07' S, 68° 05' W, 2 100 m, *A. Fay & L. Fay* 2898 (MO, UC), *A. Fay & L. Fay* 2904 (MO, UC).

Elaphoglossum dendricola

(Baker) H. Christ, Mon. Elaph. 94. 1899.
Acrostichum dendriculum Baker, Syn. Fil. 521. 1874.

Distribution: Previously known only from Colombia, but now also from **Ecuador**.

Material of new distribution: ECUADOR. **Carchi:** Maldonado-Tulcán road, ca. km 30, 2 900-3 100 m, *L. Werling & S. Leth* 243 (F).

Probably this species is coespecific with *E. vulcanicum*.

Elaphoglossum doanense

L. D. Gómez, Revista Biol. Trop. 20: 181. 1972. Type: Costa Rica, Cartago, *L. Gómez* 1307 (Holotype: CR!).

Distribution: Previously known from Costa Rica, Panama, Colombia and Venezuela, but now also from **Ecuador**.

Material of new distribution: ECUADOR. **Zamora-Chinchipe:** Parque Nacional Podocarpus, Quebrada Río San Francisco, at new road (Loja-Zamora), 3° 58' S, 79° 05' W, *B. Øllgaard* 74977 (AAU?, NY, QCA?).

Elaphoglossum dombeyanum

(Fée) T. Moore et Houlst., Gard. Mag. Bot. 3: 95. 1851. Type: Venezuela, *Linden s.n.* (not localized).

Distribution: Previously known from Colombia and Venezuela, but now also from **Ecuador.**

Material of new distribution: ECUADOR. Cordillera de Quito, *Jameson s. n.* (US); Andes of Quito, *Jameson* 88 (NY).

Bolívar: Had. Talanva, Simiatug, 3 400 m, *C. William & R. Summers* 577 (F). **Carchi:** road Tulcán-Maldonado, W of the pass (base of Volcán Chiles), 0° 49' N, 78° W, 3 650 m, *B. Øllgaard & H. Balslev* 8406 (F).

Elaphoglossum eriopus

Mickel, Brittonia 39: 318. 1987. Type: Venezuela, Portuguesa, *A. Smith* 1145 (Holotype: UC!).

Distribution: Previously known only from Venezuela, but now also from **Colombia** and **Ecuador.**

Material of new distribution: COLOMBIA. **Meta:** above Villavicencio, 950 m, *A. Alston* 7669 (MO); Cordillera de Macarena, (extremo NE), Macizo Renjifo, faldas orientales, 600-1 300 m, *J. Idrobo & R. Evans* 877 (F). ECUADOR. **Loja:** Trails ca. 5 km ENE of San Pedro de Vilcabamba, from "El Bosque" to Quebrada Romerillos and Banderilla 4° 14' S, 79° 10' W, 2 000-2 200 m, *B. Øllgaard & H. Navarrete* 105956 (AAU?, NY, QCA?).

Elaphoglossum erythrolepis

(Fée) T. Moore, Index Fil. 9. 1857. *Acrostichum erythrolepis* Fée, Mém. Foug. 2: 60. 1845. Type: Perú, *J. Dombey s. n.* (Holotype: P-n.s.).

Distribution: Previously known from Ecuador and Perú, but now also from **Colombia.**

Material of new distribution: COLOMBIA. **Cauca:** El Tambo, 1 700 m, *K. Sneidern* 384 (NY). **Cundinamarca:** Bogotá-El Colegio road, km 7-10, 2 225 m, *J. Luteyn & M. Lebrón* 7714 (NY); Guasca, Páramo de Guasca, *M. Murillo & L. Fayad* 134 (NY). **Huila:** Cordillera Oriental, E of Neiva, *H. Rusby & F.*

Pennell 590 (NY). **Santander:** between El Roble and Tona, 1 500-1 900 m, *E. Killip & A. Smith* 19436 (NY). **Tolima:** road to Nevado de Tolima, NNW of Ibagué, ca. 17-19 km beyond juntas to end of road, 2 500-2 750 m, ca. 4° 35' N, 75° 25' W, *J. Luteyn et al.* 10623 (NY).

Elaphoglossum fuliginosum

Mickel, Novon 2: 374. 1992. Type: Costa Rica, San José, *J. Taylor & C. Taylor* 11339 (Holotype: NY!).

Distribution: Previously known only from Costa Rica, but now also from **Venezuela.**

Material of new distribution: VENEZUELA. **Mérida:** Andes Venezolanos, La Montaña, study area, 1/2 km S of La Montaña Teleférico Station, *C. Kelly & Lughadha* 8702 (NY).

Elaphoglossum glabellum

J. Sm., London J. Bot. 1: 197. 1842. Type: Guyana, *Schomburgk* 477 (Holotype: BM-n.s.; Isotype: US!).

Distribution: Previously known from México, Costa Rica, Panamá, Colombia, Venezuela, Guyana, Suriname, Ecuador, Perú, Bolivia and Antilles, but now also from **El Salvador** and **Nicaragua.**

Material of new distribution: EL SALVADOR. **Ahuachapán:** Sierra de Apaneca, in the region of Finca Colima, *P. Standley* 20172 (US). NICARAGUA. **Granada:** lado NW of Volcán Mombacho, Finca San Joaquín, 11° 50' N, 85° 59' W, 800-1 000 m, *P. Moreno & J. Henrich* 8483 (HNMN?, MO); Volcán Mombacho, *J. Greenman & M. Greenman* 5795 (MO). **Jinotega:** Macizo de Peñas Blancas, top and N slope of steep ridge SW of finca of Manuel Estrada (El Cielo), S of Río Gusaneras, ca. 13° 15' N, 85° 42' W, 1 200-1 330 m, *W. Stevens & B. Krukoff* 11543a (MO).

Venezuela, Guyana and Suriname have plants with more compact rhizome and

narrower fronds, for this reason probably the Central American material correspond to another species.

Elaphoglossum gloeorrhizum

Mickel, Novon 2: 374. 1992. Type: Costa Rica, San José, J. Taylor & C. Taylor 11339 (Holotype: NY!).

Distribution: Previously known from Honduras and Costa Rica, but now also from **Venezuela**.

Material of new distribution: VENEZUELA. **Miranda:** Parque Nacional “El Avila”, quebrada que sigue a Lagunazo, 10° 32.8' N, 66° 52' W, 2 200 m, Meier 2850 (NY). **Yaracuy:** Distr. Nirgua, Serranía Santa María-Cerro La Chapa, 6 km al N de Nirgua, 10° 12' N, 68° 33' W, 1 200-1 350 m, Meier et al. 3914 (NY, VEN?).

This species probably is coespecific with *E. agostinii* Vareschi, but I not seen the type of that species (from Venezuela).

Elaphoglossum gomezianum

A. Rojas, Brenesia 45-46: 12. 1996. Type: Panama, Chiriquí, I. Valdespino & Ríos 1207 (Holotype: NY!; Isotypes: INB!, PMA!).

Distribution: Previously known from Costa Rica and Panama, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **El Valle:** Cordillera Occidental, vertiente oriental, hoyo del Río Cali, vertiente derecha confluencia del Río Pichinderito con el Pichindé, 1 580-1 650 m, J. Cuatrecasas 18754 (F).

Elaphoglossum gratum

(Fée) T. Moore, Index. Fil. 10. 1857. *Acrostichum gratum* Fée, Mém. Foug. 8: 69. 1857. Lectotype. Mexico, Mexico, Schaffner 279 (P-n.s.).

Distribution: Previously known only from Mexico, Guatemala and Costa Rica?, but now also from **Honduras**.

Material of new distribution: HONDURAS. **Cortés:** Santa Cruz de Yojoa, 2 000 ft., J. Edwards 721 (F).

The material of Costa Rica identified as this species (Mickel 1995) represents young plants of *E. furfuraceum*.

Elaphoglossum herrerae

A. Rojas, Brenesia 45-46: 13. 1996. Type: Costa Rica, Guanacaste, G. Herrera & G. Rivera 827 (Holotype: INB!; Isotype: CR!).

Distribution: Previously known only from Costa Rica, but now also from **Mexico**, **Guatemala**, **Honduras**, **El Salvador** and **Panama**.

Material of new distribution: MEXICO. **Chiapas:** Ghiesbrecht 313 (F). **Guerrero:** 25 mi. S of Chilpancingo, J. Paxson et al. 825 (F). GUATEMALA. **Sololá:** trail between slopes of Volcán Santa Clara and town to San Pedro, 1 900-2 100 m, J. Steyermark 47117 (US). HONDURAS. **El Paraíso:** barranco entre Casitas y Cuesta de Galeras, 1 500 m, A. Molina 8570 (F); Quebrada Tapahuasca, 1 300 m, A. Molina 14661 (F). EL SALVADOR. **Morazán:** road between Perquin and Sabanetas, 1 400 m, R. Seiler 1080 (F). PANAMA. **Chiriquí:** 12.4 mi. N of David, W. Lewis et al. 694 (US). **Coclé:** valley of the upper Río Mata Ahogado, 350 m, P. Allen 134 (US). **Panamá:** Río La Maestra, 0-25 m, P. Allen 7 (US); San José Island, Perlas Archipelago, Gulf of Panamá, about 15 mi. SSE of Balboa, I. Johnson 204 (US).

Elaphoglossum hieracioides

Mickel, Brittonia 39: 320. 1987. Type: Venezuela, Aragua, A. Fendler 268 (Holotype: US!; Isotypes: GH, MO!).

Distribution: Previously known from Honduras, Costa Rica, Panama, Colombia, Venezuela, Ecuador and Perú, but now also from **Guatemala**.

Material of new distribution: GUATEMALA. **Quiché:** Nebaj, 6 600 ft., A. Skutch 1759 (GH).

Elaphoglossum hymenodiastrum

(Fée) Brade, Zeitschr. Deutsch. Ver. Wiss. S. Paulo 1: 58. 1920. *Acrostichum hymenodiastrum* Fée, Crypt. Vasc. Br. 1: 3. t.5. 1869. Type: Brazil, Río de Janeiro, *Glaziou* 2152 (Isotype: P!).

Distribution: Previously known from Colombia, Venezuela and Brazil, but now also from **Panama**.

Material of new distribution: PANAMA. **Comarca San Blas:** Nusagandi, El Llano-Carti road, along trail to Quebrada of Nusagandi, 9° 19' N, 78° 55' W, 350 m, *H. Werff* 7005 (MO, NY).

This specimen was cited by Mickel (1995) as paratype of *E. lankesteri*, but the rizome scales are broader and bicolorous. Additionally, the *E. lankesteri* holotype (*R. Lloyd* 4201, NY!) is the same as *E. cismense* Rosenst. The International Code of Botanical Nomenclature (Tokyo Code, 1994), article 11 about priority establish that if the holotype is same to another species described, although the others paratypes are good, the species valid is the oldest described.

Elaphoglossum inaequalifolium

(Jenman) C. Chr., Ind. Fil. 309. 1905. *Acrostichum inaequalifolium* Jenman, J. Bot. 24: 273. 1886. Type: Jamaica, *G. Jenman s. n.* (K-n.v.).

E. alan-smithii Mickel, Brittonia 32: 334. 1980. Type: Mexico, Oaxaca, J. Mickel 3739 (Holotype: NY!; Isotypes: ENCB, IEB, UC, US!).

E. flocosum Mickel, Brittonia 39: 319. 1987. Type: Venezuela, Bolívar, Huber & Carreño 128403 (Holotype: NY!).

E. mcvaughii Mickel, Brittonia 32: 336. 1980. Type: Mexico, Michoacán, R. McVaugh 9904 (Holotype: US!; Isotype: MICH).

Distribution: Previously known from “México”, “Venezuela” and Jamaica, but now also from **El Salvador, Costa Rica, Panamá, Colombia, Ecuador, Perú and Bolivia**.

Material of new distribution: EL SALVADOR. Volcán San Vicente, Pico, 1 950 m, *R. Seiler* 322 (F). **Morazán:** 3 km S of El Zancudo, *R. Seiler* 1016 (F). COSTA RICA. **San José:** Dota, camino a San Gerardo de Dota, entrando por Jaboncillo, 9° 36' 15" N, 83° 47' 20" W, 2 400-3 000 m, *A. Rojas & M. Coto* 2707 (CR, INB, NY). **Puntarenas:** Coto Brus, Parque Internacional La Amistad, Cordillera de Talamanca, Cerro Pittier, sendero entre Cerro Gemelo y Cerro Pittier, 9° 03' 45" N, 82° 56' 15" W, 2 700-2 850 m, *M. Moraga & A. Rojas* 441 (CR, INB, MO, NY, UC). PANAMA. **Chiriquí:** mountain slopes SE of Cerro Punta, alt. 6 500-7 000 ft., *G. Proctor* 32024 (PMA, MO). COLOMBIA. *F. Lehmann* 1216 (NY, US), *F. Lehmann* 1219 (NY, US); Palasé, Capilla, 1 600-1 900 m, *F. Lehmann* 5078 (F). **Antioquia:** Mpio. Santa Rosa de Osos, Corregimiento Aragón, Finca Venecia, cerca a la carretera Santa Rosa de Osos-Aragón, 2 600 m, *F. Roldán et al.* 444 (Ant, MO). **Cauca:** Cordillera Central, 5 km E of Timbío, 2 050 m, *M. Grant & W. Drew* 10656 (NY, US). **Cundinamarca:** carretera entre Aguabonita y Fusagasuga, 2 000 m, *J. Duque* 3306 (MEXU). **Santa Marta:** Sierra de Onaca, 6 500 ft., *H. Smith* 2464 (NY). ECUADOR. **Zamora-Chinchipe:** road Loja-Zamora, km 24-25, 3° 59' S, 77° 05' W, *L. Holm et al.* 3527 (F). PERU. **Cusco:** La Convención, 139 km de Cusco en Quellomayo, subiendo hacia la “Ceja”, entre Santa Teresa y Chaullay, 13° 8' S, 72° 36' W, 1 200-2 600 m, *P. Núñez & M. Canchi* 8789 (MO). **Pazco:** Prov. Oxapampa, canyon of Huacabamba, Fundo La Esperanza, 1 000-1 500 m, *B. León* 619 (F). BOLIVIA. **La Paz:** Prov. Nor Yungas, Serranía de Bella Vista, 16 km N of Carrasco (37 km N of Caranavi) on road to Palos Blancos, 15° 35' S, 67° 34' W, 1 500 m, *J. Solomon & M. Nee* 12662 (F, MO). **Santa Cruz:** Caballero, lumbre camp above Tunal, 30 km NE of El Tambo School (17° 55' S, 64° 25' W), 2 500 m, *T. Killeen* 2555 (F).

The principal characters that were used for distinguish the synonyms species were the plants size and scales density, but I collected material of

this species (*A. Rojas & D. Padilla* 5428; CR, IZTA, MEXU) in the type location of *E. mcvaughii* (the larger species) and the plants size and scales are not different to *E. inaequalifolium*, additionally, I saw that this species is very variable in size depending of the light and nutrients.

Elaphoglossum itatiayense

Rosenst., Hedwigia 56: 370. 1915. Tipo: "Brasilia", Est. Rio de Janeiro, *F. Tamandaré* & *A. Brade* 6449 (Holotype: M?, B?).

Distribution: Previously known only from Brazil, but now also from Venezuela.

Material of new distribution: VENEZUELA. Aragua, Prope Coloniam Tovar, A. Fendler 287 (MO).

Elaphoglossum lalitae

L. D. Gómez, Phytología 60: 74. 1986. Type: Costa Rica, Cartago, *L. Gómez* 1307 (Holotype: CR!).

Distribution: Previously known from Costa Rica and Panama, but now also from Venezuela.

Material of new distribution: VENEZUELA. Amazonas: Cerro Sinapo (Paráque), *B. Maguire & Politi* 28555 (NY).

Elaphoglossum laminariooides

(Bory ex Fée) T. Moore, Index Fil. 10. 1857. *Acrostichum laminariooides* Bory ex Fée, Hist. Acrostich. (Mém. Foug. 2) 57, pl. 12. 1845. Type: Guyana, *Leprieur* 1834 (Holotype: P-n.s.).

Distribution: Previously known from Venezuela, Ecuador, Perú and Bolivia, but now also from Colombia.

Material of new distribution: COLOMBIA. Dto. Unknown: *J. Mutis* 3327 (US). **Antioquia:** Mpio. San Luis, Quebrada "La Cristalina", 6° 00' N, 74° 45' W, 560-570 m, *Ramírez & Cárdenas* 982 (JAUM, MO). **Magdalena:** between Pueblo Viejo and San Miguel, 900-1 700 m, *W. Seifriz* 558 (US).

The specimens of Costa Rica (*A. Chacón* 625, INB; *G. Herrera* 4007, CR; *G. Herrera* 4392, CR) distributed at less than 600 m are very similar to this species, because have cuspidate blade apex and the blade scales are small and adpressed.

Elaphoglossum lanatum

Mickel, Phytología 60: 74. 1986. Type: Perú, Apurimac, *P. Hutchison* 1732 (Holotype: NY!; Isotypes: F!, GH, UC, US!).

Distribution: Previously known only from Perú, but now also from Venezuela.

Material of new distribution: VENEZUELA. Amazonas: Cerro Sinapo (Paráque), *B. Maguire & Politi* 28555 (NY). **Mérida:** Valle of Chachopito near San Rafael, *H. Pittier* 13261 (F).

Elaphoglossum lanceiforme

Mickel, Novon 2: 370. 1992. Type: Costa Rica, Alajuela, *A. Brenes* 16141 (Holotype: NY!).

Distribution: Previously known from Costa Rica and Panama, but now also from Nicaragua.

Material of new distribution: NICARAGUA. Rivas: Isla de Ometepe, N slope of Volcán Maderas on trail from Balgue to Laguna Maderas, 11° 27' N, 85° 32' W, 1200 m, *W. Hahn* 505 (MO).

Elaphoglossum lanceum

Mickel, Amer. Fern J. 69: 101. 1979. Type: Mexico, Oaxaca, *J. Mickel* 4900 (Holotype: NY!).

Distribution: Previously known from Mexico, Guatemala and El Salvador, but now also from Honduras.

Material of new distribution: HONDURAS. Lempira: Montaña de Celaque, SE portion of the massif, valley of the Río Arcagual on the plateau, 14° 33' 26" N, 88° 40' 00" W, 2400 m, *G. Davidse & R. Zúñiga* 34828 (MO, TEFH?); 2 600 m, *D. Hazlett* 2600 (F); Celaque

National Park, along Río Arcagual, upstream from basee camp 2, 10.5 km WSW of the town of Gracias, 14° 34' 05" N, 88° 41' 05" W, 250 m, R. Moran 5577 (MO). **Santa Bárbara:** 7 km N of El Mochito, on the E slopes of Mt. Santa Bárbara, 14° 55' N, 88° 07' W, 2 200-2 500 m, R. Moran 5700 (MO).

Elaphoglossum langsdorffii

(Hook. et Grev.) T. Moore, Index Fil. 11. 1857. *Acrostichum langsdorffii* Hook. et Grev., Icon Fil. T. 164. 1829.

Distribution: Previously known from Bolivia and Brazil, but now also from **Perú**.

Material of new distribution: PERU. **San Martín:** Prov. Lamas, Alonso de Alvarado, San Juan de Pacayzapa, al E del puente (carretera a Moyobamba,), J. Schunke 5871 (F).

Elaphoglossum latevagans

Mickel, Fieldiana Bot. 27: 140. 1991. Type: Perú, Amazonas, P. Hutchison & Wright 5808 (Holotype: US!; Isotype: F!, GH, NY!, UC).

Distribution: Previously known only from Perú, but now also from **Colombia** and **Venezuela**.

Material of new distribution: COLOMBIA. **Cauca:** Mpio. Silva, ca. 47-48 km E of Piendame, 2° 35'N, 76° 19'W, J. Luteyn et al. 10142 (NY). VENEZUELA. **Trujillo:** Dto. Boconó, Páramo Guaracanal, 20-21 km beyond jtc. with Hwy NE of Boconó, 9° 13' N, 70° 13'W, J. Luteyn & Cotton 9706 (NY).

Elaphoglossum laxisquama

Mickel, Fieldiana Bot. 27: 141. 1991. Type: Perú, San Martín, M. Young 1741 (Holotype: NY!; Isotype: USM).

Distribution: Previously known from Perú, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Cauca:** ca. 28 km E of Totoró, ca. 2° 33' N, 76° 10'W, 3 075 m, J. Luteyn et al. 10178 (NY).

Elaphoglossum lechlerianum

(Mert.) T. Moore, Index Fil. 11. 1857. *Acrostichum lechlerianum* Mett., Fil Lechl. 1: 3. 1856. Type: Perú, Puno, W. Lechler 2522 (Isotypes: BR-n.s., S-n.s.).

Distribution: Previously known from Ecuador, Perú and Bolivia, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Cauca:** Cordillera Central, vertiente oriental, región de Moscapán, hoya del Río San José, La Chorrera de Candelaria, 2 100-2 310 m, J. Cuatrecasas 23622 (F).

Elaphoglossum lellingeri

Mickel, Brittonia 45: 216. 1993. Type: Colombia, Antioquia, R. Callejas & F. Roldán 318 (Holotype: NY!).

Distribution: Previously known only from Colombia, but now also from **Ecuador**.

Material of new distribution: ECUADOR. **Carchi:** above Maldonado, 2 400 m, H. Werff & Gudiño 10797 (MO).

Elaphoglossum lepidopodium

Mickel, Brittonia 32: 336. 1980. Holotype: México, Oaxaca, J. Mickel 6175 (Holotype: NY!).

Distribution: Previously known only from Mexico, but now also from **Guatemala, Honduras** and **El Salvador**.

Material of new distribution: GUATEMALA. **Alta Verapaz:** road from Chama x Cobán, 3 000 ft., H. Johnson 543 (US); vicinity of Cobán, about 1 300 m, P. Standley 90853 (F). **Isabal:** along Río Frío, 50-75 m, J. Steyermark 41631 (US). **Quezaltenango:** high barranco along Río Samalá, between Santa María de Jesús and Calahuaché, 1 200-1300 m, J. Steyermark 33874 (F). **San Marcos:** Finca El Porvenir, Loma Trocodoná, S facing slopes of Volcán Tajumulco, 1 300-1 500 m, J. Steyermark 37538 (F, US). **Sololá:** Volcán Atitlán, 1 700-3 800 m, J. Steyermark 47346 (US); Río

Bravo, in vicinity of Finca Mocá, S facing slopes of Volcán Atitlán, 1 000-1 100 m, *J. Steyermark* 47965 (F, US). **Suchitepéquez:** Finca Moca, W. *Muenscher* 12136 (F). HONDURAS. **El Paraíso:** Mpio. San Antonio de Oriente, La Labranza, Montaña de Uyuca, *J. Linares & R. Dressler* 3810 (MEXU); Ciudad de Yuscarán, Cerro Monserrat, 2 000 m, *M. Espinal* 120 (CR). **Francisco Morazán:** Sierra San Juancito, road to San Juancito, *J. Swallen* 11129 (US). ELSALVADOR. **Ahuachapán:** El Imposible Reserve, Campana, 13° 51' N, 89° 54' W, 1 400 m, *A. Monto et al.* 2018 (MEXU).

Elaphoglossum killipianum Mickel of Costa Rica and Panama could be coespecific with this species.

Elaphoglossum leporinum

L. D. Gómez, Rev. Biol. Trop. 20 (16): 32. 1972. Type: Costa Rica, Limón, *G. Davidse* 1579 (Holotype: CR!).

Distribution: Previously known from Mexico, Guatemala, Costa Rica and Panama, but now also from **Colombia** and **Perú**.

Material of new distribution: COLOMBIA. **Santander:** vicinity of Veras, 3 100-3 250 m, *E. Killip & A. Smith* 17880 (NY), *E. Killip & A. Smith* 17893 (NY); Páramo Frailejonale, near Veras, 3 750-3 850 m, *E. Killip & A. Smith* 17977 (NY); S slope of Páramo de Romeral, 3 800 m, *E. Killip & A. Smith* 18703 (NY). PERU. **Ancash, Yungay:** Huascarán Natural Park, Quebrada Paria, 8° 57' S, 77° 33' W, *D. Smith et al.* 9173 (MO); Huascarán Natural Park, Llanganuco sector, Josefa trail, 9° 05' S, 77° 41' W, 3 600-3 700 m, *D. Smith et al.* 9411 (MO).

See discussion under *E. rufescens*.

Elaphoglossum longicaudatum

Mickel, Ann. Missouri Bot. Gard. 77: 594. 1990. Type: Venezuela, Amazonas, *R. Liesner & G. Carnevali* 22993 (Holotype: NY!; Isotypes: MO!, VEN).

Distribution: Previously known only from Venezuela, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Amazonas-Vuapés:** Río Apaporis, entre el Río Pacoa y el Río Mananarí, 250 m, *Sokatama et al.* 13655 (NY).

Elaphoglossum longicrure

H. Christ, Bull. Herb. Boissier sér. 2, 7: 273. 1907. Type: Costa Rica, San José, *C. Biolley* s. n. (Holotype: P-n.s.).

Distribution: Previously known from Costa Rica and Panama, but now also from **Nicaragua** and **Colombia**.

Material of new distribution: NICARAGUA. Along Karawal River, *E. Schramm* s. n. (GH). COLOMBIA. **Chocó:** Río San Juan, margen derecha, Quebrada del Taparal, 5-20 m, *J. Cuatrecasas* 21486 (F); Mpio. Bahía Solano, Parque Nacional Natural Ensenada de Utria, camino entre Punta Diego y Caida Co-calito, 6° 21' N, 76° 26' W, 0-100 m, *T. Espi -na et al.* 3622 (MO); slopes and ridge of Loma del Cuchillo, ca. 15 km WSW of Chigorodó, ca. 150-400 m, *D. Lellinger & E. de la So -ta* 667 (CR).

Elaphoglossum longistipitatum

A. Rojas, Brenesia 47-48: 6. 1997. Holotype: Costa Rica, Heredia, *D. Lellinger & J. White* 1041 (Holotype: CR!, Isotypes: INB!, US).

Distribution: Previously known from Mexico, Guatemala, Honduras, Costa Rica and Panama, but now also from **El Salvador**.

Material of new distribution: EL SALVADOR. **Santa Ana:** wedel unterseits blaugrün gefärbt, Miramundo, 2 300 m, *W. Lötschert* 375 (US).

Elaphoglossum meridense

(Klotzsch) T. Moore, Index Fil. 12. 1857. *Acrostichum meridense* Klotzsch, Linnaea 20:

427. 1847. Type: Venezuela, Mérida, *J. Moritz* 320 (US?).

Distribution: Previously known only from Venezuela, but now also from **Ecuador** and **Bolivia**.

Material of new distribution:
ECUADOR. **Chimborazo:** Páramo de Pinllilic, Cordillera Oriental, 3 750 m, *M. Acosta* 7708 (F). **Pichincha:** Chaparro de Sebritano, Sec. Oriental de las Haciendas "pedregal" y "Yanurcu", 3 400-3 500 m, *M. Acosta* 8357 (F), *M. Acosta* 8360 (F). **Tungurahua:** Páramo of Minza, 3 700 m, *C. William & R. Summers* 348 (F). **BOLIVIA.** **Cochabamba:** Prov. Chapare, Incachaca, 2 200 m, *J. Steinbach* 8901 (F).

Elaphoglossum monicae

Mickel, Flora Novo-Galicana vol. 17: 273. 1992. Type: Mexico, Jalisco, *J. Rzedowski* 26695 (Holotype: NY!; Isotype: ENCB).

Distribution: Previously known only from Mexico, but now also from **Guatemala** and **Honduras**.

Material of new distribution:
GUATEMALA. **Zacatepequez:** Volcán de Agua, 10 000 ft., *J. Smith* 4696 (US). **HONDURAS.** **Lempira:** Celaque National Park, near camp 2, 10.3 km WSW of the town of Gracias, 14° 33' N, 88° 39' W, 2 500 m, *R. Moran* 5627 (MO).

Elaphoglossum moralesii

A. Rojas, Brenesia. 45-46: 18. 1996. Type: Costa Rica, San José, *F. Morales* 4459 (Holotype: INB!; Isotype: NY).

Distribution: Previously known only from Costa Rica, but now also from **Panama**.

Material of new distribution: **PANAMA.** **Coclé:** vicinity of El Valle, 800-1 000 m, *P. Allen* 222 (US); *T. Croat* 67453 (MO, UC); foot of Cerro Pilón, above El Valle de Antón, 2 000 ft., *D. Porter et al.* 4672 (MO); *T. Croat* 67453 (MO, UC).

Elaphoglossum muelleri

(E. Fourn.) C. Chr., Index Fil. 311. 1905. *Acrostichum muelleri* E. Fourn., Mexic. Pl. 1: 68. 1872. Type: Mexico, Veracruz, Müller 41 (Holotype: P-n.s.).

Distribution: Previously known from Mexico, Guatemala and Honduras, but now also from **El Salvador**.

Material of new distribution: **EL SALVADOR.** **San Salvador:** San Salvador Volcano on trail in crater, 1 800 m, *R. Seiler* 31 (F).

Elaphoglossum nivosum

(Kunze) Mickel, Fieldiana Bot, n. s. 27: 148. 1991. *Acrostichum nivosum* Kunze, Bot Zeit. (Berlin) 1845: 281. 1845. Type: Venezuela, Caracas, *J. Moritz* s. n. (Holotype: LZ, destroyed).

Distribution: Previously known from Venezuela, Ecuador, Perú and Bolivia, but now also from **Colombia**.

Material of new distribution: **COLOMBIA.** Rayon, *B. Apollinaire & B. Arthur* 97 (US); Quebrada Surbar, along road between Duitama and Charalá, 3 273 m, *J. Langenheim* 3543 (US). **Boyacá:** Cordillera Oriental, slopes S of Río Gomeza (Río Arzobispo), 6° N, 72° 55-57' W, 3 050-3 070 m, *F. Fosberg* 22299 (US); Eastern Cordillera, W slopes Páralo La Rusia, km 7-20 along road from Duitama to San Gil, 2 900-3 375 m, *J. Lutelyn et al.* 7592 (NY).

Cundinamarca: al S de Usme, entre La Reganera y El Hato, Estación Agrícola Experimental "Usme", 3 000-3 100 m, *J. Idrobo et al.* 402 (US). **Norte de Santander:** edge of Páramo de Las Vegas, 3 300-3 700 m, *E. Killip & A. Smith* 15771 (US); Mountain E of Las Vigas, 3 000-3 300 m, *E. Killip & A. Smith* 15807 (NY, US); Eastern Cordillera, vicinity of Veras, 3 100-3 250 m, (mezclado con *E. dombeyanum*), *E. Killip & A. Smith* 17289 (NY, US); Eastern Cordillera, Páramo del Romeral, 3800-4 200 m, *E. Killip & A. Smith* 18673 (NY,

US); vicinity of Veras, 3 100-3 200 m, *E. Killip & A. Smith 21181* (NY, US).

Elaphoglossum obovatum

Mickel, Brittonia 39: 322. 1987. Type: Venezuela, Amazonas, *J. Steyermark & G. Bunting 103199* (Holotype: US!; Isotype: NY!).

Distribution: Previously known from Venezuela and Perú, but now also from **French Guyana**.

Material of new distribution: FRENCH GUYANA. **Saitl:** near Eaux Claires along the Sentier Botanique, 3° 37'N, 53° 12'W, 200-400 m, *S. Mori et al. 21544* (NY).

Elaphoglossum odontolepis

Mickel, Fieldiana Bot, n. s. 27: 150. 1991. Type: Perú, Cuzco, *B. Peyton & S. Peyton 356* (Holotype: MO!).

Distribution: Previously known only from Perú, but now also from **Ecuador**.

Material of new distribution: ECUADOR. *E. Lehmann 5700* (F).

Elaphoglossum ornithoglossum

Mickel, Brittonia 39: 323. 1987. Type: Venezuela, Mérida, *A. Smith 1454* (Holotype: UC!).

Distribution: Previously known only from Venezuela, but now also from **Ecuador**.

Material of new distribution: ECUADOR. **Azuay:** Carretera Sayausid, área de recreación Caja, 3 400 m, *J. Jaramillo 9887* (F).

Elaphoglossum orosense

A. Rojas, Brenesia 45-46: 21. 1996. Type: Costa Rica, Cartago, *A. Rojas 1075* (Holotype: NY-n.s.; Isotypes: CR!, INB!).

Distribution: Previously known only from Costa Rica, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **El Valle:** Cordillera Occidental, Corregimiento de La Elvira, carretera al mar o

Simón Bolívar, vía a Dapa, Finca Zingara, 1 800 m, *J. Giraldo 124* (CUVC, UC).

Elaphoglossum ortegae

Mickel, Brittonia 39: 323. 1987. Type: Venezuela, Portuguesa, *F. Ortega et al. 1423* (Holotype: NY!).

Distribution: Previously known from Colombia and Venezuela, but now also from **British Guayana and Bolivia**.

Material of new distribution: BRITISH GUAYANA. Cuyuni-Mazaruni, Pakatalma Mts, base camp 8.6 km Imbaimadai on Partang and tributary, 0.25 W-NW, 5° 46'N, 60° 15'W, 650 m, *C. Hoffman et al. 1805* (MO, US). BOLIVIA. **Santa Cruz:** Prov. Sara, Buena Vista, 500 m, *I. Steinbach 5684* (F).

Elaphoglossum pachyphyllum

(Kunze) C. Chr. Index Fil. 312. 1905. *Acrostichum pachyphyllum* Kunze, Linnaea 9: 26. 1834. Type: Perú, Pampayacu, *Poeppig s. n.* (Holotype: LZ, destroyed; Isotype: P-n.s.).

Acrostichum corpulentum Kunze ex Kuhn, Linnaea 36: 61. 1869. Type: Venezuela, Mérida, *J. Moritz 321* (Isotype: MO!).

Distribution: Previously known from "Venezuela" and Perú, but now also from **Ecuador**.

Material of new distribution: ECUADOR. **Amazonas:** Dto. Río Negro, Camp XI, Cerro de la Neblina, 6.2 km NNE Pico Phelps (= Neblina), 20.5 km ENE Neblina Base Camp, along stream (Caño Beitel), S of Camp, 0° 51' 45" N, 65° 58' 52" W, *J. Beitel 85284* (MO). **Morna-Santiago:** Mutintz, SE of Makuma, ca. 1 km along trail to Tunantza, 2° 11' S, 77° 44' W, 675 m, *B. Øllgaard & H. Navarrete 1942* (AAU, QCA); road Paruca-Santiago, km 44, 3° 1' S, 78° 12' W, *B. Øllgaard et al. 2894* (AAU, QCA). **Napo:** Quijos Cantón, Within 5 km of the Town of Baeza, 0° 27' 5" S, 79° 53' 5" W, 2 100 m, *A. Fay & L. Fay 3880* (MO), *A. Fay & L. Fay 3888* (MO).

Elaphoglossum pallidiforme

Mickel, Novon 2: 380. 1992. Type: Panama, Panama, *T. Croat* 22656 (Holotype: NY!; Isotypes: MO!, UC!).

Distribution: Previously known from Costa Rica and Panama, but now also from **Ecuador**.

Material of new distribution: ECUADOR. Carchi: Reserva Etnica y Forestal Awá, trail Gualpí bao-Tarabita, 1° 08' N, 78° 23' W, 500-600 m, *Jørgensen et al.* 65237 (NY).

This species differs from *E. albomarginatum* A. R. Sm. only in brown (vs. yellowish) rhizome scales, it seems likely that these two species are coespecific.

Elaphoglossum pilosius

Mickel, Brittonia 39: 324. 1987. Type: Venezuela, *J. Luteyn* 6139 (Holotype: NY!; Isotypes: MO!, UC!).

Distribution: Previously known from Costa Rica, Panama, Colombia, Venezuela, Ecuador and Perú, but now also from **Mexico, Guatemala and Honduras**.

Material of new distribution: MEXICO. Chiapas: Mpio. Motozintla de Mendoza, on the N and W slope of Cerro Mozotal below the microwave tower along the road from Huixtla to El Porvenir and Siltepec, 3 000 m, *D. Breedlove & A. Smith* 22806 (MO); Mpio. Motozintla de Mendoza, Cerro Mozotal, a 27 km al SO de Motozintla, camino a El Porvenir, 15° 26' 13" N, 92° 20'28" W, 2 850-3 000 m, *E. Martínez et al.* 22435 (FCMF?, MEXU). Guererro: Mpio. Chichihualco, 17 km adelante de La Vuelta rumbo a Puerto del Gallo, 2 930 m, *F. Lorea* 676 (FCMF, MEXU); Mpio. Tlacotepec, Cerro Teotepec, 3 150 m, *F. Lorea* 4206 (ENCB, FCMF, IEB, MEXU); Mpio. Tlacotepec, 1 km al SO de Puerto San Juan, 2 900 m, *F. Lorea* 4211 (ENCB, FCMF?, IEB, MEXU). México: Ameyalco, km 75 de la carretera Amecameca-Tlamacas, 3 100 m, *J. Rzedowski* 21861 (ENCB). Veracruz: Mpio. Calcahuasco, 1.3 km N of Vaquería, 3 km by road from

junction with the Coscomatepec-Escola-Jacal road, 14 km (by road) W of Escola, 19° 07' N, 97° 14' W, 2 900 m, *M. Nee* 23102 (NY).

GUATEMALA. Quezaltenango: NE facing, slopes of barranco of Volcán Zunil, 3 000 m, *J. Steyermark* 34910 (F, US). **San Marcos:** mountains along the road between San Marcos and Serchil, 2 700-3 150 m, *P. Standley* 85406 (F); below Comitancito and Santa Rosa junction, Sierra Madre Mountains, 2 900 m, *L. Williams et al.* 27074 (F), *L. Williams et al.* 27074A (F). **HONDURAS. Lempira:** Celaque National Park, along Río Arcáugal, upstream from base camp 2, 10.5 km WSW of the town of Gracias, 14° 34' 05" N, 88° 41' 05" W, 2 500 m, *R. Moran* 5600 (MO).

Elaphoglossum polyblepharum

Mickel, Ann. Missouri Bot. Gard. 78: 259. 1991. Type: Venezuela, Amazonas, *R. Liesner & B. Holst* 21517 (Holotype: NY!; Isotype: MO!).

Distribution: Previously known only from Venezuela, but now also from **Bolivia**.

Material of new distribution: BOLIVIA. **Santa Cruz:** Velasco, Parque Nacional Noel Kempff M., Campamento Las Gamas, 14° 48' 14" S, 60° 23' 59" W, 850 m, *L. Arroyo et al.* 810 (MO).

Elaphoglossum propinquum

(Mett. ex Kuhn) H. Christ, Monogr. *Elaphoglossum* 115. 1899. *Acrostichum propinquum* Mett. ex Kuhn, Linnaea 36: 45. 1869. Type: Perú, Agapata, *Lechler* 2007 (Holotype: B-n.s.; Isotype: P).

Distribution: Previously known only from Perú, but now also from **Brazil**.

Material of new distribution: BRAZIL. **Minas Gerais:** Rio de Tan, Ouro Preto, Rochedas dos Camprinhos, *Damazio* 36800 (Jard. Bot. Río, MO). **Río de Janeiro:** Estado do Rio, Itatiaia, 2 200-2 400 m, *L. Brade* 15515 (MO), *L. Brade* 15516 (MO). **Sao Pablo:** Pedro do Baú, 1 900 m, *Leite* 3885 (MO).

Elaphoglossum pusillum

(Mett. ex Kuhn) C. Chr., Index Filic. 314. 1905. *Acrostichum pusillum* Mett. ex Kuhn, Linnaea 36: 43. 1869. Type: Cuba, Wright 794 (Holotype: B-n.s.; Isotype: NY!).

Distribution: Previously known from Mexico, Central America, Colombia, Venezuela and Cuba, but now also from Perú and Jamaica.

Material of new distribution: PERU. **Junín:** Chanchamayo Valley, 1 500 m, C. Schunke 318 (F). JAMAICA. 2nd. Breakfast Spring, lowerside, N. Harris 7434 (F).

Elaphoglossum revolutum

(Liebm.) T. Moore, Index Fil. 365. 1862. *Acrostichum revolutum* Liebm., Kongel Danske Vidensk. Selsk. Skr., Naturvidensk. Math. Afd. ser. 5, 1: 163. 1849. Type: Mexico, F. Liebmann 2427 (C-n.s.).

Elaphoglossum xiphoides Mickel, Ann. Missouri Bot. Gard. 78: 259. 1991. Type: Venezuela, Bolívar, B. Stergios 10310 (Holotype: NY!).

Distribution: Previously known from Mexico, Guatemala, Honduras, Costa Rica, Panama, Colombia, "Venezuela" and Antillas, but now also from French Guyana and Brazil.

Material of new distribution: FRENCH GUYANA. Mont. Atachi Bacca, Región de l'Znini, extrémite nord, Camp II, 3° 33'N, 55° 55' W, 450 m, G. Cremers et al. 10353 (US).

BRAZIL. **Río de Janeiro:** Goyaz, Goiania, L. Brade 31050 (MO).

Range extension: Mexico, Guatemala, Honduras, Costa Rica, Panama, Colombia, Venezuela, and Antillas.

Elaphoglossum rimbachii

(Sodiro) H. Christ, Monogr. *Elaphoglossum* 115. 1899. *Acrostichum rimbachii* Sodiro, Crypt. Vasc. Quit. 478. 1893. Type: Ecuador, Cuenca, Rimbach s. n. (not located).

Distribution: Previously known from Ecuador and Perú, but now also from Colombia.

Material of new distribution:

COLOMBIA. **Antioquia:** Mpio. de Urroa, Páramo de Frontino, Llano Grande an hill to N, 6° 28' N, 76° 05' W, 3 320-3450 m, J. MacDougal et al. 4462 (MO). **Caldas:** Risaralda, Mpio. Santa Rosa de Cabal, camino real entre Termales de Santa Rosa y Hacienda La Sierra, 4° 49.5' N, 75° 30.5' W, 3 370 m, Wolf 825 (COL, MO). **Meta:** Macizo de Sumapáz, cabeceras de la Quebrada El Buque, 3 460 m, S. Díaz et al. 2628 (COL, MO).

Elaphoglossum rosenstockii

Rosenst., Repert. Spec. Nov. Regni Veg. 4: 6. 1907. Type: Ecuador, Rimbach 8 (Holotype: S-n.s.; Isotype: US!).

Elaphoglossum anceps Mickel, Brittonia 39 (3): 313. 1987. Type: Venezuela, Mérida, B. Stergios 1276 (Holotype: PORT).

Distribution: Previously known from "Venezuela", Ecuador, Perú and Bolivia, but now also from Colombia.

Material of new distribution: COLOMBIA. **Antioquia:** Paramo of Mono Frontino N of Urroa, 11 800 ft., E. Core 401 (US). **Boyacá:** Nevado del Cucuy, Chorreón de San Paulino, 3750 m, J. Cuatrecasas 1345 (F). **Caldas:** Cerro Tatema, 3 400-3 700 m, F. Pennell 10547 (US). **Cundinamarca:** cerca a la Laguna de Chissaca, km 31 de la carretera, 3 670 m, C. Acosta 304 (NY).

Elaphoglossum rufescens

(Liebm.) T. Moore, Index Fil. 365. 1862. *Acrostichum rufescens* Liebm., Kongel Danske Vidensk. Selsk. Skr., Naturvidensk. Math. Afd. ser. 5, 1: 188. 1849. Type: Mexico, Veracruz, F. Liebmann s. n. (Holotype: US!).

E. laxipes Mickel, Flora Novo-Galiciano. p. 271. Type: Mexico, Jalisco, B. Hinton 2750 (Holotype: NY!; Isotypes: MO!, NY).

Distribution: Previously known only from Mexico, but now also from Guatemala and Chile.

Material of new distribution: GUATEMALA. **San Marcos:** between La Vega ridge

along Vega and NE slopes of Volcán Tacaná, to 3 mi. from Guatemala-Mexico boundary in vicinity of San Rafael, 2 500-3 000 m, J. Steyermark 36166 (F). CHILE. **Llanquihue:** Parque Nacional Vicente Pérez Rosales, 14.5 km E of Ensenada on the road to Petrohue, above Río Petrohue, 185 m, T. Lammers et al. 7841 (F).

The distribution of this species is very irregular, probably this and the distribution of *E. leporinum* in South America is an indicate that *E. dombeyanum*, *E. leporinum* and *E. rufescens* are the same species, and only have ecological variations. *E. dombeyanum* have imbricated and bicolorous scales on abaxial lamina (vs. more patent and concolorous scales in *E. leporinum* and *E. rufescens*), between this two last species *E. leporinum* has shorter blade and thicker stipe.

Elaphoglossum russelliae

Mickel, Fieldiana Bot. n. s. 27. 160. 1991. Type: Perú, Cajamarca, S. Diaz & Asores 2587 (Holotype: NY!).

Distribution: Previously known from Costa Rica and Perú, but now also from **Panama**.

Material of new distribution: PANAMA. **Bocas del Toro:** SE slope of Cerro Echandi, (between Jilguero and Danta camps), 2 600-2 800 m, L. Gómez et al. 22276 (MO); heatwaters of Río Colubre, 2 400-2 550 m, L. Gómez et al. 22409 (NY).

Elaphoglossum sartorii

(Liebm.) Mickel, Mem. New York Bot. Gard. 46: 181. 1988. *Acrostichum sartorii* Liebm., Mexic. Bregn. 166 (seors. 14). 1849. Tipo: México, Veracruz, F. Liebmann (Pl. Mex. 2430, 2752, 2753; Fl. Mex. 12, 14, 660, 661, 662) (fragm. US!).

Elaphoglossum subarborescens Rosenst., Repert. Spec. Nov. Regni Veg. 4: 295. 1907. Type: Brasil, São Paulo, Serra do Mar, Wacker s. n. (BM-n.s.).

Distribution: Previously known from Mexico, Guatemala, Honduras, Costa Rica,

Panama, Venezuela and "Brazil", but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Santa Marta:** H. Smith 1066 (US).

Elaphoglossum seminudum

Mickel, Brittonia 32: 338. 1980. Type: Mexico, Oaxaca, J. Mickel 4908 (Holotype: NY!; Isotypes: MEX, UC, US!).

Distribution: Previously known only from Mexico, but now also from **Guatemala**.

Material of new distribution: GUATEMALA. **Quetzaltenango:** Volcán Santa María, 3 200 m, M. Véliz et al. 9552 (MEXU).

Elaphoglossum setigerum

(Sodiro) Diels, Nat. Pflanzenfam. 1(4): 333. 1899. *Acrostichum setigerum* Sodiro, Anales Univ. Centr. Ecuador 4: 174. 1890. Type: Ecuador, L. Sodiro s. n. (Q-n.s.).

Distribution: Previously known from Mexico, Guatemala, Costa Rica, Panama, Colombia, Ecuador, Perú and Haití, but now also from **Honduras**.

Material of new distribution: HONDURAS. **Lempira:** Montañas de Celaque, SE part of massif, canyon of the Quebrada El Naranjo, 14° 33'N, 88° 39'W, 1 800-1 900 m, G. Davidse & R. Zúñiga 34677 (TEFH?, MO).

Elaphoglossum smithii

(Baker) H. Christ, Neue Denkschr. Allg. Schweiz. Ges. Gesammten Naturwiss. 36: 106. 1899. *Acrostichum smithii* Baker, Ann. Bot. 5: 169. 1891. Type: St. Vincent, G. Smith 1135 (Holotype: K-n.s.; Isotype: IJ).

Distribution: Previously known from Nicaragua?, Costa Rica, Panama, Haiti, Dominican Republic and Lesser Antilles, but now the Nicaraguan distribution is confirmed and also is known from **Venezuela**.

Material of new distribution: NICARAGUA. **Granada:** Volcán Mombacho, ca. 11° 50' N, 85° 59' W, 1 000-1 222 m, (mixed with *E. cf. furfuraceum*), J. Henrich &

P. Moreno 214 (NY). VENEZUELA. **Bolívar:** NW slopes of Cerro Venama, SE of Camp 125, 1 100 m, *J. Steyermark & S. Nilsson* 443 (US).

Elaphoglossum sporadolepis

(Kunze ex Kuhn) T. Moore ex C. Chr., Index Filic. 316. 1905. *Acrostichum sporadolepis* Kunze ex Kuhn, Linnaea 36: 59. 1869.

Distribution: Previously known from Costa Rica, Panama, Venezuela, Guyanas, Suriname and Brazil, but now also from **Colombia, Perú and Bolivia**.

Material of new distribution: COLOMBIA. **Antioquia:** Medellín-Dorada road, páramo of Sonson, 10 km from Mpio. of Sonson, 2 850 m, *L. Atehortúa* 1036 (NY, UC); Municipio de Santa Rosa, Llanos de Quiba area, ca. 24 km N of Santa Rosa de Osos, 6° 50' N, 75° 30' W, 2 625 m, 27 May 1984, *J. Luteyn et al.* 10795 (MO). PERU. **Cajamarca:** Prov. Contumazá, Bosque Cachil, 2 500 m, *A. Sagástegui et al.* 15907 (F). BOLIVIA. **La Paz:** Nor Yungas Prov. Off the La Paz-Yolosa Road, along road about 1 km E of Cotapata Gas Station, and on trail on left (from La Paz), roughly North, 16° 19' S, 67° 50' W, 3 200 m, *A. Fay & L. Fay* 2989 (F).

Elaphoglossum squamiferum

A. Rojas, Brenesia 45-46: 21. 1996. Type: Costa Rica, Heredia, *G. Rivera* 28 (Holotype: INB!).

Distribution: Previously known only from Costa Rica, but now also from **El Salvador, Colombia, Venezuela and Ecuador**.

Material of new distribution: EL SALVADOR. **Chalatenango:** Cerro Pital, 2 700 m, *R. Seiler* (F). COLOMBIA. **Bogotá:** Cordillera Oriental, Sueva Valley, 9 km W of Junín, 45 km NE of Bogotá, 2 400 m, *J. Grant* 9087 (NY). **Caldas:** Salento to "Saguneta", old Quindío Trail, Cordillera Cetral, 2 400-2 700 m, *E. Killip & T. Hazen* 9125 (US); Cordillera Central, "Pinares", above Salento, 2 600-2 800 m, *F. Pennell*

9252 (NY, US). VENEZUELA. **Lara:** Dist. Montes, vertiente larense del Páramo de El Jábón, en dirección E a partir de la casa del señor Emiliano Vergara, 3 000-3 050 m, *L. Ruiz & M. López* 976 (NY). **Mérida:** Distr. Rangel, Cuenca del Río Los Granates, entre la Casa Grande y el Hático, páramo de Los Granates, 2 940 m, *L. Ruiz* 8313 (NY); La Mucuy, 3 000 m, *V. Vareschi & Pannier* 1359 (US). **Táchira:** trail leading to summit of Páramo de Táma, 2 500-3 200 m, *J. Luteyn et al.* 5336 (NY). **Trujillo:** Guirigay, hacia Peña Blanca, 3 200 m, *Aristeguieta* 3608 (NY). ECUADOR. **Imbabura:** "Shanshipamba", Macholoma, 2 900 m, *A. Acosta* 14320 (F).

Elaphoglossum squamocostatum

A. Rojas, Brenesia 47-48: 13. 1997. Type: Costa Rica, Cartago, *A. Rojas* 1104 (Holotype: INB!; Isotype: CR!, MO).

Distribution: Previously known from Costa Rica and Ecuador, but now also from **Guatemala, Honduras, Panama, Haití, Dominican Republic, Porto Rico and Trinidad**.

Material of new distribution: GUATEMALA. **Quezaltenango:** along old road between Finca Pirineos and Patzulín, 1 200-1 400 m, *P. Standley* 87147 (F). **Zolapa:** bordering Quebrada Alejandría, summit of Sierra de Las Minas, vicinity of Finca Alejandría, 2 500 m, *J. Steyermark* 29845 (F). HONDURAS. **Ocotepeque:** Aldea El Portin, Agua Caliente (Guatemala border)-Santa Rosa de Copán, 18.1 mi E of Santa Fé, 26.8 mi SW of bridge over Río Hiquito (or Río Grande) near Village of Cucuyagua Copan, 14° 28' N, 89° 15' W, 1 800 m, *T. Croat & C. Hannon* 63800 (MO, NY). PANAMA. **Chiriquí:** Holcomb's Trail, 6-10 mi. above El Boquete, 1 400-1 600 m, *E. Killip* 5170 (US); above Camp I, Holcomb's Trail, upper Caldera Watershed (above El Boquete), *E. Killip* 5343 (US); vicinity of El Boquete, 1 000-1 300 m, *W. Maxon* 5058 (US). HAITI. Vicinity of Mission, Fonds Varettes, 1 000 m, *E. Leonard* 4019 (US). DOMINICAN REPUBLIC. **Barahona:** Cordillera de Bahoruco, Sierra de Los Comisarios, above Gros-Figuier, 1 000 m, *E. Ekman* 6768 (US). PORTO RICO.

Mount. Torresilla, *Hioram* 248 (US). TRINIDAD. Morne Bleu ridge from Textel Station to Morne Blue Peak, 2 400-2 700 m, *without collector* (NY).

Elaphoglossum stenoglossum

Mickel, Brittonia 39: 325. 1987. Type: Colombia, Antioquia, *L. Atehortúa* 1040 (Holotype: NY!).

Distribution: Previously known from Costa Rica, Panama, Colombia and Venezuela, but now also from **Bolivia**.

Material of new distribution: BOLIVIA. **Cochabamba:** Provincia José Carrasco Torrico, 123 km antigua carretera Cochabamba-Villa Tunari, 17° 08' S, 65° 37' W, 2 100 m, *M. Kessler et al.* 7145 (LPB?, UC).

Elaphoglossum styriacum

Mickel, Brittonia 39: 326. 1987. Type: Venezuela, Bolívar, *J. Steyermark* 75347 (Holotype: MO!).

Distribution: Previously known from Venezuela and Perú, but now also from **Colombia and Brazil**.

Material of new distribution: COLOMBIA. **Vaupés:** Río Papuri, Teresita, *R. Evans & I. Cabrera* 19445 (US); Río Kuauyari (tributary of Río Vapués), middle and lower course, 700-800 ft., 1° 15' N, 70° 5' W, *R. Evans & I. Cabrera* 20023 (US). BRAZIL. Anhaniga, *Pédelof s. n.* (F).

Elaphoglossum vagans

(Mett.) Hieron., Engl. Jahrb. 34: 543. 1904. *Acrostichum vagans* Mett. Linnaea 36: 58. 1870. Type: Brazil, Caldas, *Lindberg* 539 (Holotype: K-n.s.).

Distribution: Previously known only from Brazil, but now also from **Bolivia**.

Material of new distribution: BOLIVIA. **Cochabamba:** km 104 camino al Chapare, 3 100 m, *I. Steinbach* 583 (MO). **Santa Cruz:** Provincia Caballero, 50 km al N de Matarol (en la carretera Santa Cruz-Comarapa), pasando por

San Juan del Potrero y bajando a la cuenca del Alto Río Ichilo, 2 000 m, *D. Smith et al.* 13368 (LPB?, MO).

Elaphoglossum vulcanicum

H. Christ, Monogr. *Elaphoglossum*. 131. 1899. Type: Ecuador, Quito, *L. Sodiro* s. n. (Holotype: K-n.s.).

Distribution: Previously known from Ecuador, Perú and Bolivia, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Meta:** Macizo de Sumapáz, vertiente oriental de la Cord., Hoya de la Quebrada El Buque, 2 900-3 000 m, *S. Díaz et al.* 2751 (COL, MO).

E. wurdackii

Vareschi, Acta Bot. Venez. 1: 107, fig. 11C. 1966. Tipo: Venezuela, Bolívar, *J. Steyermark* 58734 (no localized).

Distribution: Previously known only from Venezuela, but now also from **Colombia**.

Material of new distribution: COLOMBIA. **Santander:** Mesa de Los Santos, 1 500 m, *E. Killip & A. Smith* 15339 (NY).

Elaphoglossum zosteriformis

Mickel, Ann. Missouri Bot. Gard. 78: 261. 1991. Type: Venezuela, Bolívar, *B. Stergios* 11930 (Holotype: NY!; Isotype: UC!).

Distribution: Previously known only from Venezuela, but now also from **French Guyana**.

Material of new distribution: FRENCH GUYANA. **Eau Claire:** near Saül, 200 m, *H. Werff & George* 12984 (MO). **Saül:** Monts La Fumée, 3° 37'N, 53° 12'W, 200-400 m, *Boom & S. Mori* 1593 (MO).

ACKNOWLEDGMENTS

This work has been possible thanks to the agreement between INBio-SINAC. To the herbaria for the specimens loans, to Teresa

Terrazas for the critical revision, to Robbin Moran for his help with the original descriptions and types, and to all who, in one way or another, made this work possible.

RESUMEN

Nuevas especies, nuevas combinaciones y nuevas distribuciones adicionadas en el grande y difícil género *Elaphoglossum*. Diez especies nuevas son descritas, estas son: *Elaphoglossum adrianae* A. Rojas, *E. betancuri* A. Rojas, *E. caridadiae* A. Rojas, *E. glabromarginatum* A. Rojas, *E. kessleri* A. Rojas, *E. macdougalii* A. Rojas, *E. paramicola* A. Rojas, *E. paziente* A. Rojas, *E. pseudohermenierii* A. Rojas y *E. solomonii* A. Rojas. Tres especies son combinadas, estas son: *Elaphoglossum beitelii* (Mickel) A. Rojas, *E. curvans* (Kunze) A. Rojas y *E. eutecnum* (Mickel) A. Rojas. Finalmente, se amplía la distribución de 86 especies y algunos nombres de especies son sinonimizados.
