

Optant 30 Plus II

Therapy Laser System

*The Therapy laser system from DAESHIN is one of the most technically advanced laser of its kind and combines the innovative design with uncompromising performance Optant 30 plus system is biostimulation therapeutic device with two different beam sources :
650nm(Red Beam) and 413nm(violet Beam)*

APPLICATIONS

- * ENT
- * Oral
- * Dental
- * General Surgery
- * Antalgic Therapy
- * Dermatology
- * Geriatrics & Aesthetics
- * Physiotherapy
- * Rheumatology
- * Traumatology

TECHNICAL SPECIFICATION

- Laser Type : Therapy Laser
- Laser Wavelength : 650nm, Red Light
- Output Power : 15mW
- Violet Light
 - 1) Wavelength : 413nm
 - 2) Output Power : 30W

SCANNER

- 1) Circle, Vertical, Atomic, Spot and Rectangular
- 2) Combination Ray by Red and Violet Light Radiation Time : 1~60min

SYSTEM SPECIFICATION

- Main Electrical Power : 220V AC 60Hz
- Dimensions : 450(W) X 520(D) X 1500(H)mm
- Weight : 25kg
