Abstract

Pauly, D. and S. Wade-Pauly. 1981. An Annotated Bibliography of Slipmouths (Pisces: Leiognathidae). ICLARM Bibliographies 2, 62 p. International Center for Living Aquatic Resources Management, Manila, Philippines.

A bibliography of the fishes of the *Leiognathidae* family (slipmouth, pony-fishes, silver-bellies, etc.) is presented. A total of 941 references, most of which are annotated, are listed, covering all aspects of their biology, including fishery related aspects, physiology and anatomy (e.g., their bioluminescence) as well as their use as human food. Comprehensive subject and geographic indices are provided.

Introduction

Among the many taxa of demersal fishes caught by artisanal and commercial fishermen along the shores of the tropical Indo-Pacific, one family, the *Leiognathidae*, is particularly prominent. This is so especially in Southeast Asia, off the Indian subcontinent and off East Africa, where *leiognathids* generally account for one third or more of the catches made by trawlers.

The *Leiognathidae*, also known as slipmouths, silver bellies or pony fishes, are generally small and rather bony, the result being that they are considered as "trash-fish" throughout most of their range. They are, for this reason most often thrown overboard when caught by shrimping boats, and often remain unsorted and unreported even when caught by fishery research vessels.

There are, therefore, relatively few papers dealing specifically with the fishery biology of *leiognathid* fishes; most of the information available on this group is indirect, i.e., *Leiognathidae* are mentioned *en passant* in reports dealing with the biology of other fishes.

Yet *leiognathids* are important. Being extremely abundant, especially over the muddy grounds of estuaries, they provide the bulk of the food available to larger, more valuable fishes. They are also an important source of protein for domestic animals especially in Southeast Asia. Finally, in several countries, *leiognathids*, especially

the larger species (*Leiognathus equulus*, *L. splendens*), are consumed directly by people, and often represent one of the few sources of high quality protein available for mass consumption.

In addition to representing a considerable, if often neglected resource, the fishes of the family *Leiognathidae* share a feature which has attracted the attention of numerous scientists: they are bioluminescent, and emit downward-directed light which reduces their visibility from below. The adaptations involved here, and the symbiotic bacteria which actually produce the light have generated a considerable number of interesting papers.

However, much of the physiological work on *leiognathid* bioluminescence has been done by researchers who were most often unaware of the ecological information gathered on this group by fishery biologists. Similarly, much of the fishery-oriented work on these fishes was done by researchers who were often unaware of each other's work, mainly because much of the material available on *Leiognathidae* has not been formally published. This bibliography, we hope, will help alleviate this situation.

The collection of annotated references presented here began in early 1975, at the Ichthyological Department of the Senckenberg Museum and Forschungsinstitut,

Frankfurt am Main and continued at Kiel University (FRG), where most of the standard references were consulted (*Zoologischer Anzeiger*, *Dean's Bibliography of Fishes*, *Zoological Records*, *Biological Abstracts*, *Aquatic Sciences and Fisheries Abstracts*, etc.). In 1975 and 1976, libraries and colleagues' personal reprint collections in Indonesia, Thailand and Mauritius were consulted. A preliminary version of this bibliography was prepared in 1977 and expanded until December 1980 with additional references obtained from libraries in France, the U.S.A., the Philippines, Kenya, Great Britain, Australia and Italy.

Despite all efforts, we know that the bibliography is still incomplete, because we aimed at including everything even remotely related to the Leiognathidae, whether formally published or not.

The annotations to the references are very variable in length and information content. As a general rule, anno-

tations are longer for papers that are not published formally, and/or difficult to access, and shorter for papers published in books and journals available in major libraries. We have not seen approximately one third of the papers whose references are included here. Having little prospects of ever seeing these papers and checking their contents, and not knowing what would have been gained by omitting such unchecked references, we have included here all we had on the Leiognathidae, seen or unseen, and annotated as much as we could without fantasizing. While being the most risky option (for us), this might turn out to be the most helpful one (for the reader).

We would be very thankful to be informed of errors or glaring omissions, and will consider such comments in the synopsis of data on the fishes of the family Leiognathidae, which one of us (D.P.) has begun preparing.

Acknowledgments

Many people helped, in one form or the other, with the preparation of this bibliography, and we are thankful to all of them. We are particularly indebted to the following persons and institutions:

- The Senkenberg Museum and Forschungsinstitut (Frankfurt), for funding a preliminary search of the Leiognathidae literature in the Biological Abstracts.
- Dr. W. Klausewitz of the Senkenberg Museum and Forschungsinstitut (Frankfurt), for introducing one of us (D.P.) to the literature on tropical fishes.
- Professor G. Hempel, Institut für Meereskunde, Kiel, for funding the typing of a first version of this bibliography.

- Dr. J. Paxton (Australian Museum, Sydney) and Dr. Y. Haneda (Yokosuka City Museum, Japan) for many papers difficult to access.
- Mr. L. Nhwani (Inst. Mar. Sciences, Zanzibar, Tanzania) and Mr. P.S.B.R. James (College of Fisheries, Mangalore, India), for providing corrections and additions to the bibliography.
- Mrs. Leticia Dizon (ICLARM) for her typing of the final draft.
- and especially Mrs. Helen Randall (B.P. Bishop Museum, Hawaii) for checking and annotating the references to taxonomic works included here. (However, remaining errors are ours, not hers!)

- 179 Boeseman, M. 1947. Revision of the fishes collected by Burger and von Siebold in Japan. Zoöl. Meded. 28: 1-242.
p. 109-110 list and describe *L. nuchalis* and *L. rivulatus*.
- 180 Bograd-Zismann, L. 1965. The food of *Saurida undosquamis* in the Eastern Mediterranean in comparison with that in Japanese waters. Rapp. P.-V. Réun. Comm. Int. Explor. Sci. Mer. Méditerr. 18: 251-252.
Lists *L. klunzingeri*.
- 181 Boisvert, H., R. Chatelain and J.M. Bassot. 1967. Etude d'un *Photobacterium* isolé de l'organe lumineux de poissons Leiognathidae. Ann. Inst. Pasteur (Paris) 112(4): 520-524.
Describes *Photobacterium leiognathi*.
- 182 Bonnaterre, J.P. 1988. Tableau encyclopédique et méthodique . . . Ichthyologie. Paris, 4, 205 p.
Equula equula.
- 183 Borgstrom, G., editor. 1961-65. Fish as Food: Vol. I-IV. Academic Press, New York and London.
Leiognathus bindus and *L. equula* listed as common food fishes in India.
- 184 Borodin, N.A. 1930. Scientific results of the yacht "Ara" expedition during the years 1926 to 1930. Fishes. Bull. Vanderbilt Mar. Mus. 1(2): 39-64.
p. 294 *E. ruconia*.
- 185 Borodin, N.A. 1932. Scientific results of the yacht "Ara" world cruise July 1931-March 1932 in command of William K. Vanderbilt. Bull. Vanderbilt Mar. Mus. 1(3): 65-101.
p. 78 *E. ruconia*, *G. equuliformis*.
- 186 Botros, G.A. 1971. Fishes of the Red Sea, p. 221-348. In H. Barnes (ed.) Oceanography and marine biology annual review, Volume 9. George Allen and Unwin, London.
Lists under Scombridae: *E. berbis*, *E. equula*, *E. fasciata*, *E. klunzingeri*, *G. equulaeformis* and *G. argentaria*, with some data on their distribution.
- 187 Boulenger, G.A. 1904. Fishes (Teleostei). In S. Harmer, W. Herdman, T. Bridge and G.A. Boulenger (eds.) Hemicordata, Ascidian, Fishes. Macmillan and Co., London.
p. 663 lists *Equula* and *Gazza* among the Gerriidae and comments on osteology.
- 188 Branch, G.M. and J.R. Grindley. 1979. Ecology of Southern African estuaries. Part XI. Mngazana: a mangrove estuary in Transkei. S. Afr. J. Zool. 14(3): 149-170.
Reports a few *L. equulus* caught in the middle reach of the estuary in summer. Classify species as subtropical-tropical.
- 189 Breder, C.M. and D.E. Rosen. 1966. Modes of reproduction in fishes. Natural History Press, Garden City, New York.
Discusses only the paper of Fujita (1960).

- 190 Briggs, J.C. 1961. Emended generic names in Berg's classification of fishes. *Copeia* (2): 161-166.
 Points out that *Leiognathus* Lac. was changed by Agassiz (1846) into *Liognathus*, a usage continued by Berg (1940, 1958).
- 191 Budker, P. and P. Fourmanoir. 1954. Poissons de la Mer Rouge et du Golfe de Tadjoura (Missions Budker: 1938-39 et Chedeville: 1953). *Bull. Mus. Natl. Hist. Nat. Bot. Paris* 2(26): 322-325.
Reports Leiognathus equulus.
- 192 Burgess, W. and H.R. Axelrod. 1973. Pacific marine fishes. Book 1. Coastal waters of southern Japan and the Ryukyu Islands. TFH Publ., New Jersey.
 p. 236 gives a color photo of *L. nuchalis* (= *L. nuchalis*).
- 193 Burgess, W. and H.R. Axelrod. 1974. Pacific marine fishes. Book 5. Taiwan and adjacent waters. TFH Publ., New Jersey.
 p. 1164-1166 contain a brief discussion of Leiognathidae biology and drawings and photos reportedly of *L. equulus*, *L. rivulatus*, *Secutor ruconius*, *L. elongatus* and *L. dussumieri*. Fig. 90 is probably not *L. equulus* (cf. fig. 95). Figs. 91, 92 and 94 probably do not depict the same fish (reportedly *L. rivulatus*).
- 194 Butler, T.H. 1959. Report to the Government of Indonesia on marine fishery biology. FAO/UNDP (Tech. Assist.) Rep. Fish. 1057, 57 p. FAO, Rome.
 Reports on the predominance of "Leiognathus sp." in trawl catches from the Java Sea. Proposes the construction of a fish meal plant at Kota Baru (southern Kalimantan) for processing the large *Leiognathus* catch made there. (The species was probably *L. splendens*.)
- 195 Bykhovskij, B.E. and L.F. Nagibina. 1971. [New and little known species of the genus *Haliotrema* Johnston et Tiegs, 1922 (Monogenoidea). 2.] *Zool. Zh.* 50: 25-40. (In Russian, English summary)
- 196 Bykhovskij, B.E. and L.F. Nagibina. 1976. [New species of the genus *Telegamatrix*] *Biol. Morya, Vladivostok* 2: 10-15. (In Russian)
Gazza minuta reported as host.
- 197 Caces-Borja, P. 1966. Status of trawling data in the Philippines. *Proc. Indo-Pacific Fish. Counc.* 12(2): 172-177.
- Reports that slip-mouths are caught in littoral areas by small otter trawls rigged to a motorized dug-out.
- 198 Caces-Borja, P. 1974. On the ability of otter trawls to catch pelagic fish in Manila Bay. *Proc. Indo-Pacific Fish. Counc.* 15(3): 376-386.
 From 1957 to 1962 trawler catches consisted predominantly of leiognathids. Reduction of the c.p.u.e. to 1966, matched later by better nets and more powerful engines.
- 199 Caces-Borja, P. 1975. The biology of some important Philippine commercial fishes, p. 52-62. In Second Fisheries Forum, Philippine Council for Agriculture and Resources Research, Los Baños, Laguna, Philippines.
 3-page review of various aspects of Leiognathidae biology, including identification, bionomics, population dynamics and food and feeding habits.
- 200 Caces-Borja, P., R. Bustillo and S. Ganaden. 1972. Further observations on the commercial trawl fishery of Manila Bay (1960-1962). *Proc. Indo-Pacific Fish. Counc.* 13(3): 631-637.
 Catch data of leiognathids show irregular monthly yields related to spawning migrations. Decrease of average catches from 12% in 1960 to 4.5% of total in 1962.
- 201 Canagaratnam, P. and J.C. Medcof. 1956. Ceylon's beach seine fishery. *Bull. Fish. Res. Stn., Ceylon* (4): 1-32.
 Lists *L. ruconius*, *L. insidiator*, *L. lineolatus*, *L. splendens*, *L. equulus*, *L. dussumieri*, *G. minuta* among the catch.
- 202 Cantor, T.E. 1849. Catalogue of Malayan fishes. *J.R. Asiatic Soc. Bengal* 18(2): 983-1042. Reprinted as a separate volume, 1850.
 Contains descriptions of *Equula*, *E. caballa*, *E. bindus*, *E. splendens*, *E. insidiatrix*, *E. longimanus*, *Gazza*, *G. equulaeformis*.
- 203 Castelnau, F.L. 1872. Contributions to the ichthyology of Australia. *Proc. Zool. Acclim. Soc. Victoria* 2: 37-158.
 p. 114 *E. caballa*.
- 204 Castillo, B.B. and F.B. Barenguel. 1975. Hydrobiological survey of Calatagan Peninsula, Balayan and Pagapas Bay, p. 29-82. In Third Fisheries Forum, Philippine Council for Agriculture and Resources Research, Los Baños, Laguna, Philippines.

- 205 Central Fisheries Dept. Pakistan. 1955. Marine fishes of Karachi and the coasts of Sind and Makran. Govt. of Pakistan Press, Karachi.
Lists and describes 5 species of Leiognathidae.
- 206 Chabanaud, P. 1926. Inventaire de la faune ichthyologique de l'Indochine, Première liste. Inst. Oceanogr. Indochine, première note.
Lists *L. equula* from Poulo-Condore.
- 207 Chabanaud, P. 1933. Sur divers poissons de la Mer Rouge et du Canal de Suez. Description de deux espèces nouvelles. Bull. Inst. Océanogr., Monaco 627: 1-12.
On *L. klunzingeri*, new to the Suez Canal.
- 208 Chabanaud, P. 1934. Poissons recueillis dans le Lac Timsah (Isthme de Suez) par M. le Professeur A. Gruvel, en 1933. Bull. Mus. Nat. Hist. 6: 156-160. p. 158 records *L. klunzingeri* from Lake Timsah.
- 209 Chabanne, J. and R. Plante. 1969. [The benthic populations (endofauna, penaeid shrimps, fishes) of a bight of the North West Coast of Madagascar: ecology, biology and fishery] Cah. ORSTOM (Océanogr.) 7(1): 41-71. (In French)
Detailed length-frequency data for *L. equulus*, list *S. ruconius*, *L. equulus*, *L. leuciscus* and *G. minuta*.
- 210 Chacko, P.I. 1944a. On the bionomics of the Leiognathidae. Curr. Sci. 13(8): 214-215.
- 211 Chacko, P.I. 1944b. The silver bellies of Pamban. Proc. 31st Indian Sci. Congr. 31(3): 86 (Abstract).
G. minuta and *Leiognathus*, food and spawning.
- 212 Chacko, P.I. 1949. Food and feeding habits of the fishes of the Gulf of Manaar. Proc. Indian Acad. Sci. 29B(3): 83-97.
Food of *L. bindus*, a zooplanktophage.
- 213 Chacko, P.I. 1950. Marine plankton from the waters around Krusadi Island. Proc. Indian Acad. Sci. 31B(3): 162-174.
- 214 Chacko, P.I. 1973. An appraisal of the fisheries resources of the coastal waters of Madras State, p. 258-260. In Proceedings of the Symposium on Living Resources of the Seas Around India. Spec. Publ. Cent. Mar. Fish. Res. Inst. Cochin.
Reports that silver-bellies make up 18%, on the average, of the landing of Madras State.
- 215 Chacko, P.I., J.G. Abraham, R. Srinivasan, N. Radhakrishnan Nair and R. Anantanarayanan. 1967. On the fish landings and fishery trend at Cape Comorin. Madras J. Fish. 3: 121-129.
Catch data for silver-bellies.
- 216 Chakraborty, D. 1973. An evaluation of marine resources of India, p. 229-240. In Proceedings of the Symposium on Living Resources of the Seas Around India. Spec. Publ. Cent. Mar. Fish. Res. Inst. Cochin.
Determines "trend lines" for *Leiognathus* and *Gazza* fisheries, and predicts catch for 1968 through 1972 (MS submitted in 1968).
- 217 Chaudhuri, B.L. 1923. Fauna of the Chilka Lake: Fish. Part 4. Mem. Indian Mus. 5(11): 711-736.
- 218 Chellappa, D.E. 1959. A note on the night-fishing operations from a Kelong. J. Mar. Biol. Assoc. India 1(1): 93-94.
Trial operations with a kelong (a lighted dip-net) off Mandapam. Catches of *Gazza minuta*.
- 219 Chervinsky, J. 1959. [A systematic and biological comparison between the lizard fish (*Saurida grandisquamis*) from the Mediterranean and the Red Sea] Fishermen's Bull., Haifa 19: 10-14. (In Hebrew, with English abstract)
Lists *L. klunzingeri* among food items.
- 220 Chevey, P. 1932. Inventaire de la faune ichthyologique de l'Indochine, Deuxième liste. Inst. Océanogr. Indochine 19^{ème} Note.
Lists under Gerridae: No. 522 *Secutor ruconius* and No. 523 *Leiognathus brevirostris*.
- 221 Chevey, P. 1934. Révision synonymique de l'oeuvre ichthyologique de G. Tirant. Inst. Océanogr. Indochine. 7^{ème} Note.
Assigns *E. brevirostris* to *Leiognathus brevirostris* and *E. edentula* to *L. equula*.
- 222 Chia-Jui, S. 1957. Parasite copepods from fishes of China. Part I. Cyclopoida. Acta Zool. Sinica 9(4): 297-328.
Gazza mentioned as host for various copepod species.
- 223 Chindambaram, K. and R.S. Venkataram. 1946. Tabular statements on the natural history of certain marine food-fishes of the Madras Presidency—West Coast. Govt. Press, Madras.

- p. 19-20 catch data for "silver bellies," by month, size ranges, food, breeding season, economic importance, etc.
- 224 Chilvers, R.M. 1974. A preliminary report on a bottom trawl survey of the north shelf region of the South China Sea, March 1972 to March 1973, p. 367-386. In P. Cheosakul et al. (eds.) The Kuroshio III; proceedings of the third symposium on the results of the Cooperative Study of the Kuroshio and Adjacent Regions, 1973. Bangkok, Thailand. Mongkol Karnpim Press and Publ., Bangkok.
Reports catch of *Leiognathus* spp. listed among the edible fish.
- 225 Chu, K.Y. 1959. A list of fishes from Pescadore Islands. Rep. Inst. Fish. Biol. Taipei 1(2): 14-23. *Leiognathus berbis* recorded.
- 226 Chua, T.E. and Lai H.C. 1978. "Fishes," p. 49-87. In Chua T.E. and J.A. Mathias (eds.) Coastal resources of West Sabah. Penerbit Universiti Sains Malaysia, Pulau Pinang.
List from West Sabah *G. minuta*, *L. daura*, *L. equulus*, *L. splendens*, *S. insidiator* and *S. ruconius*. Catch and landing data given which suggest large-scale dumping of Leiognathidae at sea.
- 227 Cleaver, F.C. and B.M. Shimada. 1950. Japanese skipjack (*Katsuwonus pelamis*) fishing methods. Commer. Fish. Rev. 12(11): 1-27.
Reports of *Gazza minuta* as live bait.
- 228 Commerson, P. 1803. In Lacépède, Histoire Naturelle de Poissons. Vol. V.
p. 462 on *Halex*, syn. of *Leiognathus* Lac.
- 229 Conlu, P.V. 1977. A guide to Philippine flora and fauna. Vol. I. Fishes. Nat. Sci. Res. Cent. Press, University of the Philippines, Quezon City.
- 230 Cushing, D.H. 1971. Survey of resources in the Indian Ocean and Indonesian area. IOFC/DEV/71/2, 123 p. Indian Ocean Fish. Comm. FAO, Rome.
Discusses leiognathids as a resource (presumably based on Balan, 1963).
- 231 Cuvier, G.L. 1817. Le règne animal distribué d'après son organisation, pour servir de base à l'histoire naturelle des animaux et d'introduction à l'anatomie comparée. Poissons. 1st Edition. Vol. 2. Mém. Mus. Hist. Nat. Paris.

Mentions *Leiognathus* among the "good" fish, gives catch data for Leiognathidae.
- 429 Isarankura, A.P. 1971b. Present status of trawl fisheries resources in the Gulf of Thailand and the management program, p. 15-27. In Annual Report 1971. Demersal Fisheries Investigation Unit, Division of Research and Investigation, Department of Fisheries, Bangkok.
Lists *Leiognathus* spp. among those groups whose biology was to be studied.
- 430 Isarankura, A.P. 1971c. Present status of trawl fisheries resources in the Gulf of Thailand and the management program. Proc. Indo-Pacific Fish. Counc. 14(2): 105-114.
Lists *Leiognathidae* spp. among the groups whose biology is to be studied.
- 431 Isarankura, A.P. 1972. Present status of trawl fisheries resources in the Gulf of Thailand and the management program, p. 450-464. In K. Sugawara (ed.) The Kuroshio II; proceedings of the second symposium on the results of the Cooperative Study of the Kuroshio and Adjacent Regions, Tokyo, Japan, September 28-October 1, 1970. Saikou Publ. Co., Tokyo.

- Lists *Leiognathus* spp. among the groups whose biology is to be studied.
- 432 Isarankura, A.P. 1976. Conventional and unconventional fisheries resources in Southeast Asia, p. 95-119. In K. Tiews (ed.) Proceedings of the international seminar on fisheries resources and their management in Southeast Asia, Berlin (West), 19 November-6 December 1974. Westkruez-Druckerei, Berlin.
Mentions *Leiognathus* spp. among the groups commonly caught.
- 433 Isarankura, A.P. and G. Kühlmorgen-Hille. 1966. Demersal fish resources investigations in the Gulf of Thailand. Proc. Indo-Pacific Fish. Counc. 12(2): 162-171.
Mentions that *Leiognathus* sp. is being investigated by the Thai Demersal Fish Investigation Units.
- 434 Jakob, P. 1950. The bionomics of ribbon fishes (*Trichiurus* spp.) and their fishery on the West Coast of Madras Province. J. Bombay Nat. Hist. Soc. 48(2): 261-264.
Records *Leiognathus* spp. as food of ribbon fishes.
- 435 James, P.S.B.R. 1966. Notes on the biology of the butterfly ray, *Gymnura poecilura* (Shaw) from the Palk Bay and Gulf of Mannar. Indian J. Fish. 13(1-2): 150-157.
Remains of *Leiognathus* recorded from a few stomachs.
- 436 James, P.S.B.R. 1967. The ribbon-fishes of the Family Trichiuridae of India. Mém. Biol. Assoc. India. 1. 226 p.
Mentions *Leiognathidae* among the food items.
- 437 James, P.S.B.R. 1969. *Leiognathus leuciscus* (Günther) and *Leiognathus smithursti* (Ramsey & Ogilby) Family Leiognathidae—Pisces)—two new records from the Indian Seas. J. Mar. Biol. Assoc. India 9(2): 300-302.
As per title.
- 438 James, P.S.B.R. 1971a. A new species of silver-belly, *Leiognathus jonesi* (Family Leiognathidae: Pisces) from the Indian Seas. J. Mar. Biol. Assoc. India 11(1/2): 316-319.
Description of *L. jonesi* which is closely allied to *L. splendens*.
- 439 James, P.S.B.R. 1971b. On the occurrence of a blue-green algae on fishes of the family Leiognathidae. J. Mar. Biol. Assoc. India 13(1): 1-3.
Occurrence of chroococcaceae growing on the bodies of *L. dussumieri*, *L. brevirostris*, *L. splendens*, *L. lineolatus* and *L. berbis*. The occurrence is common in the two former species.
- 440 James, P.S.B.R. 1973a. The fishery potential of silver bellies, p. 439-444. In Proceedings of the symposium on living resources of the seas around India. Spec. Publ. Cent. Mar. Fish. Res. Inst., Cochin.
A review of catch data from Indian waters.
- 441 James, P.S.B.R. 1973b. Sharks, rays and skates as a potential fishery resource off the east coast of India, p. 483-494. In Proceedings of the symposium on living resources of the seas around India. Spec. Publ. Cent. Mar. Fish. Res. Inst., Cochin.
Carcharhinus melanopterus reported to feed on silver bellies.
- 442 James, P.S.B.R. 1975. A systematic review of the fishes of the family Leiognathidae. J. Mar. Biol. Assoc. India 17(1): 139-172.
Most recent revision of the family Leiognathidae.
- 443 James, P.S.B.R. and C. Adolph. 1966. Observations on trawl fishing in the Palk Bay and Gulf of Mannar in the vicinity of Mandapan. Indian J. Fish. 12(2): 530-545.
Gives catch data for Leiognathidae. The newly described species, *L. jonesi*, is predominant.
- 444 James, P.S.B.R. and M. Badrudeen. 1969. On certain anomalies in the fishes of the family Leiognathidae. J. Mar. Biol. Assoc. India 10(1): 107-113.
Anomalies listed for *L. dussumieri*, *L. brevirostris*, *L. bindus*, *L. fasciatus*, *L. leuciscus* and *L. lineolatus*.
- 445 James, P.S.B.R. and M. Badrudeen. 1975. Biology and fishery of *Leiognathus brevirostris* (Valenciennes) from the Palk Bay and the Gulf of Mannar. Indian J. Mar. Sci. 4(1): 50-59.

Wien* 80(1): 325-430 and Schweizerbartsche Verlagshandlung, Stuttgart. 133 p. (Reprint edition: Dr. W. Junk BV Publ., The Hague, 1975).
 Describes *L. fasciatus*, *L. equulus*, *L. splendens*, *L. berbis*, *G. minuta*, *G. argentaria* and *G. equulaeformis*.
- 510 Kner, R. 1865-1867. Reise der Österreichen Fregatte "Novara" um die Erde in den Jahren 1857-59 unter den Befehlen des Commodore B. von Wüllersdorf-Urbain. *Zoologischer Theil. Fische*. 1. und 2. Abtheilung, Wein, 1865: 272 p. 3. Abtheilung, Wein, 1867: 275-433.
 p. 166-170 descriptions of *E. ensifera*, *E. dussumieri*, *E. bindoides*, *E. splendens*, *E. insidiatrix*, *E. interrupta*, *G. minuta*.
- 511 Kosswig, C. 1950. Erythräische Fische im Mittelmeer und an der Grenze der Agäis. *Syllegomena Biologica. Festschrift Kleinschmidt Akad. Verlag*, Leipzig. 203-212.
L. klunzingeri from Suez to Rhodes.
- 512 Kotthaus, A. 1974. Fische des Indischen Ozeans. Ergebnisse der ichthyologischen Untersuchungen während der Expedition des Forschungsschiffes "Meteor" in den Indischen Ozean, Oktober 1964 bis 1965. A. Systematischer Teil 12 Percomorphi (5). *Meteor. Forsch. Ergebn.* (18): 44-54.
Gazza minuta and *Leiognathus equulus*: meristics and morphometrics.
- 513 Koumans, F.P. 1940. On a collection of fishes from East Java. *Zool. Meded.* 22: 257-264.
 List *L. daura* and *L. brevirostris*.
- 514 Koumans, F.P. 1953. Biological results of the Snellius Expedition. XVI. The Pisces and Leptocardii. *Temminckia* 9: 177-275.
 Lists (?) *Leiognathus splendens*, from Beo, Taland Island and *L. brevirostris* from Menado.
- 515 Kowtal, G.V. 1967. Occurrence and distribution of pelagic fish eggs and larvae in the Chilka Lake during the years 1964 and 1965. *Indian J. Fish.* 14(1/2): 198-214.

- Occurrence of *Leiognathus* eggs during a spawning season lasting about 6 months.
- 516 Krishnapillay, V., A.P. Valson and M. Rajendranathan Nair. 1956. Studies on the chemical quality of cured fish products from the west coast of India. Indian J. Fish. 3(1): 43-58.
- 517 Krishnamurthi, B. 1958. Fishery resources of the Rameswaran Islands. Indian J. Fish. 4(2): 229-253. *L. splendens* reported as an important item in the catch of beach and boat seines, and gill nets.
- 518 Krishnamurthy, K. and M.J.P. Jelyaseelan. 1979. The early life history of fishes from Pichavaram mangrove ecosystem in India. ICES/ELH Symp/RA:15, 13 p. Early Life History Symposium, Int. Counc. Explor. Sea, Woodshole, U.S.A.
Gazza minuta, *Leiognathus equulus*, *L. sp.*, *S. ruconius* and *S. insidiator* listed among the fishes occurring in Pichavaram (mangrove), with *L. equulus* also occurring there as adult. Jan-March and April-June given as spawning season for the two *Secutor* spp.
- 519 Kühlmorgen-Hille, G. 1968. An illustrated field key to the fish family Leiognathidae in the Gulf of Thailand. Contrib. Mar. Fish. Lab. Bangkok. 12. 7 p.
As per title.
- 520 Kühlmorgen-Hille, G. 1974. *Leiognathidae*. In W. Fischer and P.J.P. Whitehead (eds.) Vol. 2 FAO identification sheets for fishery purposes, Eastern Indian Ocean (Fishery Area 57) and Western Central Pacific (Fishery Area 71). FAO, Rome.
Contains descriptions, figures and aids to proper identification of 13 common species.
- 521 Kuroda, N. 1958. [On the life color of some fishes. VII] Jap. J. Ichthyol. 7(1): 25-31. (In Japanese, English summary).
- 522 Kuronuma, K. 1961. A check list of fishes of Vietnam. Div. Agric. and Nat. Resources, U.S. Operations Mission to Vietnam, Contract IV-153. 66 p.
Lists *G. minuta*, *L. berbis*, *L. brevirostris*, *L. equulus*, *L. fasciatus*, *L. splendens*, *S. insidiator* and *S. ruconius*.
- 523 Kuronuma, K., editor. 1974. Arabian Gulf fishery-oceanography survey by Umitika-Maru, etc. Trans. Tokyo Univ. Fish. 1: 1-118.
Gives catch data and distribution (in detail) of *L. equulus* and *L. lineolatus*.
- 524 Kuronuma, K. and Y. Abe. 1972. Fishes of Kuwait. Kuwait Institute for Scientific Research, Kuwait. General description of the slipmouth morphology and ecology. Plate with *L. bindus* and *L. fasciatus* (?).
- 525 Kusaka, T. 1974. The Urohyal of fishes. Univ. of Tokyo Press, Tokyo.
Gives description and figure of the urohyal bone of *L. elongatus*, *L. equulus*, *L. rivulatus*, *L. nuchalis*, *Equilites novaehollandiae*, *Gazza minuta* and another unidentified species.
- 526 Kuthalingam, M.D.K. 1955. Food and feeding habits of juveniles and adults of four fishes of Madras. J. Madras Univ. 25B(3): 235-253.
Stomachs of 128 *Leiognathus ruconius* were examined. The food consisted mainly of small planktonic crustaceans.
- 527 Kuthalingam, M.D.K. 1958. The food and feeding habits of some young silver bellies. J. Madras Univ. 28B(1): 13-22.
As per title.
- 528 Kuthalingam, M.D.K. 1959. The life history and feeding habits of the tripod fish (*Triacanthus brevirostris* Tem. & Schl.) of the Indian Sea. Treubia 25(1): 159-164.
Lists *Leiognathus* sp. among the fishes of economic value preyed upon by adult tripod fishes.
- 529 Kuthalingam, M.D.K. 1965. Notes on some aspects of the fishery and biology of *Nemipterus japonicus* (Bloch) with special reference to feeding behavior. Indian J. Fish. 12A & B(2): 500-506.
Leiognathus spp. belong to the main food items.
- 530 Kuthalingam, M.D.K., P. Mazumdar and A.K. Chatterjee. 1973. Offshore fishery resources of the Bay of Bengal from Sandheads to Gopalpur, p: 333-364. In Proceedings of the symposium on living resources of the seas around India. Spec. Publ. Cent. Mar. Fish. Res. Inst., Cochin.

- Discusses leiognathid catch by research vessels, reports best catches from the month of November, suggests shoaling behavior. *L. splendens* and *S. insidiator* reported as most abundant, with *L. daura*, *L. brevirostris* and *G. minuta* forming the rest of the bulk.
- 531 Kvaran, E. 1971. Marine fisheries potential in the Philippines and South East Asia. Philipp. Fish. Comm. Fish. News.: 8-17.
Suggests that high fishing effort may have a negligible effect on recruitment of fishes such as *Leiognathus*.

Analysis of 6 trawl hauls containing *L. splendens* and other unspecified slipmouths, with length range given.
- 541 Le Mare, D.W. and Tham Ah Kow. 1954. On the inshore fish population of the Straits of Singapore. List *Leiognathus* spp. among the most abundant species. Species list includes: *L. insidiator*, *L. ruconius*, *L. fasciatus*, *L. equulus*, *L. splendens*, *L. bindus*, *L. berbis*, *L. lineolatus* and *G. minuta*.
- 542 Le Minh, Vien. 1968. Commercial ichthyofauna of the Gulf of Tonkin. J. Ichthyol. (Vopr. Ikhiol.) 8(5): 655-667.
Gives distribution of *L. equulus* in the Indo-Pacific, and a maximum size of 23.0 mm; important in the Gulf of Tonkin, used for production of fish pastes. Lists *Therapon theraps* as predator of Leiognathidae.
- 543 Lewis, A.D., B.R. Smith and R.E. Kearney. 1974. Studies on tunas and baitfish in Papua New Guinea waters. II. Res. Bull. No. 11, 112 p. Dept. Agric., Stock Fish., Port Moresby.
p. 65 discusses the low bait potential of leiognathids.
- 544 Lichtenstein, M.H.C. 1844. Descriptiones animalium quae in itinere ad maris Australis terras per annos 1772-1774 suscepto, collegit, observavit et delineavit Joannes Reinoldus Forster. Berlin.
p. 96 *Zeus argentarius* (Tanna Isl.).
- 545 Liebmann, E. 1934. Contribution to the knowledge of Palestine sea fishes. Pt. 1. Rapp. Comm. Explor. Mediterr. Paris 8: 317-327.
- 546 Liem, D.S. and A.K. Haines. 1977. The ecological significance, and economic importance of the mangrove and estuarine communities of the Gulf Pro-

- vince, Papua New Guinea. Office of Environment and Conservation, Waigani (Port Moresby), Papua New Guinea. Purari River (WABO) Hydroelectric Scheme Environmental Studies 3. 35 p.
- Lists among the predominantly marine fishes occurring in the Purari-Kikori mangrove areas: *Gazza achlamys*, *Secutor* sp., *E. equula* and *E. berbis*.
- 547 Lin, S.Y. 1934. A study of Foochow fishes. *Lingnan Sci. J. (Canton)* 13(4): 671-691.
p. 676 *L. ruconius*.
- 548 Lindberg, G.U. and Z.V. Krasyukova. 1969. Fishes of the Sea of Japan and adjacent waters of the Sea of Okhotsk and the Yellow Sea. Part 3. Teleostomi XXIX. Perciformes. Opred. Faune SSSR 99: 1-479. English ed. 1971. Israel Progr. Sci. Trans. Key to leiognathid spp. from Japanese waters. Describes *L. ruconius*, *L. elongatus*, *L. nuchalis*, *L. rivulatus*, *L. lineolatus* and *L. daura*.
- 549 Lindley, R.H. 1980. Cod-end escapement from a demersal trawl with particular reference to the Leiognathidae. Jabatan Perikanan Brunei, Brunei Fish. Dept. 19 p. (mimeo)
Detailed data on trawl selection of leiognathids.
- 550 Lindsay, C.C. 1963. Guide to families of Malaysian fishes. Dept. of Zoology, Univ. of Singapore.
Key to Leiognathidae.
- 551 Longhurst, A. 1969. Species assemblage in tropical fisheries, p. 147-168. In Proceedings of the symposium on the oceanography and fishery resources of the tropical Atlantic. UNESCO, Paris.
Discusses the leiognathid niche in relation to that of the Sciaenidae and Gerridae.
- 552 Losse, G.F. 1964. A purse seine fishery in East African coastal waters. Proc. East Afr. Acad. 2: 88-91.
Reports that Leiognathidae are well represented in the catch (Zanzibar Channel), occasionally making 30 to 60% of the total catch from June to October. Species in order of abundance: *G. minuta*, *S. insidiator*, *L. spp.*
- 553 Losse, G.F. 1966. Fishes taken by purse-seines and dipnet in the Zanzibar Channel. East Afr. Agric. For. J. 32(1): 50-53.
- Lists *G. minuta*, *S. insidiator* and *L. fasciatus*, which are abundant during the southeast monsoon.
- 554 Losse, G. and A. Dwippongo. 1977. Report on the Java Sea southeast monsoon trawl survey, June-December 1976. Contrib. Demersal Fish. Proj. Mar. Fish. Res. Inst., Jakarta 3. 119 p.
Gives catch rates for *L. splendens* and other Leiognathidae. Defines "inshore" and "offshore" in terms of *L. splendens* occurrence and non-occurrence respectively, with map.
- 555 Love, M. 1970. The chemical biology of fish, with a key to the chemical literature. Academic Press, London and New York.
Gives an index listing *L. argenteus*, *L. nuchalis*, *L. equulus*, *L. daura* and *L. sp.*, the substances analyzed and the references.
- 556 Luther, G. 1973. Observations on the biology and fishery of the Indian mackerel *Rastrelliger kanagurta* (Cuvier) from Andaman Islands. Indian J. Fish. 20(2): 425-447.
Leiognathus listed among the occasional food items, together with other, mainly clupeoid fishes.
- 557 McAllister, D.E. 1966. The significance of ventral bioluminescence in fishes. J. Fish. Res. Board Can. 24(3): 537-554.
As per title, including Leiognathidae.
- 558 McCulloch, A.R. 1929. A check-list of the fishes recorded from Australia. Mem. Aust. Mus. 5: 1-534.
- 559 McCulloch, A.R. and G.P. Whitley. 1925. Fishes recorded from Queensland. Mem. Queensl. Mus. 8(2): 125-182.
- 560 Maclean, J. 1973. An analysis of the catch by trawlers in Moreton Bay (Qld.) during the 1966-67 prawning season. Proc. Linn. Soc. N.S.W. 98(1): 35-42.
Reports the "sixpence" *Leiognathus moretonensis* contribute < 0.1% of the catch, in weight.
- 561 Macleay, W. 1880. Note on some fishes from the Solomon Islands. Proc. Linn. Soc. N.S.W. 4(1): 60-65.
E. edentula.

- 562 Macleay, W. 1881. Descriptive catalogue of the fishes of Australia. Vol. 1. F.W. White, Sydney. p. 185 lists and describes *E. edentula* and *E. interrupta*.
- 563 Macleay, W. 1883. Contributions to a knowledge of the fishes of New Guinea. Part 4. Proc. Linn. Soc. N.S.W. 8(2): 252-82.
E. edentula (Normandy Is., New Guinea).
- 564 Macleay, W. 1883. Notes on a collection of fishes from the Burdekin and Mary River. Proc. Linn. Soc. N.S.W. 8: 199-213.
Equula recorded from lower course of Burdekin River.
- 565 Macleay, W. 1884. Supplement to descriptive catalogue of the fishes of Australia. Proc. Linn. Soc. N.S.W. 9: 2-64.
p. 25 lists and describes *E. splendens* and *E. edentula*.
- 566 Magnusson, J. 1972. On the trawl fishery in the Philippines. Proc. Indo-Pacific Fish. Counc. 13(3): 597-604.
Reports on p. 601 that slipmouth (*Leiognathus*) are by far the most common species in the catch (about 1/3 with the gerreid *Pentaprion*).
- 567 Mahadevan, Pillay P.K. 1972. Fecundity and spawning habits of some silver bellies. Indian J. Fish. 19(1/2): 196-199.
- 568 Mahadevan, S. 1958. Report on the 'kaaral' (*Leiognathus* spp. and *Gazza minuta*) fishery of Rameswaram Island in the Gulf of Mannar and Palk Bay. Proc. 45th Indian Sci. Congr. Part III Abstract No. 91.
- 569 Malpas, A.H. 1926. Biological survey of the littoral waters of Ceylon. Ceylon J. Sci. Sect. C2: 13-165.
Gives miscellaneous biological data for 8 spp. of leiognathids.
- 570 Manacop, P.R. 1937. The fisheries of Lake Mainit and of Northern Surigao, including the Island of Dinagat and Siargao. Philipp. J. Sci. 64(4): 341-355.
"Danutan (Leiognathidae)" reported among "the principal species found in the lake."
- 571 Manacop, P.R. 1956. Commercial trawling in the Philippines. Philipp. J. Fish. 3(2): 117-183.
- Leiognathus spp. reported to make the bulk of trawl catches in Manila Bay and other areas of the Philippines.
- 572 Mangalik, A. 1966.. [Food and feeding habits of two species of Leiognathidae, *L. splendens* (Cuv.) and *Gazza minuta* Bleeker] Bogor Agric. Inst., Indones. 30 p. Thesis. (In Indonesian)
Author thanks God for HE created the Leiognathidae, so even the poor people can afford to eat fish; *L. splendens* feeds mainly on copepods and benthic organisms, *G. minuta* on young fishes.
- 573 Marr; J.C. 1976. Fishery and resource management in Southeast Asia. RFF/PISFA Paper 7. 62 p. Resources for the Future, Washington, D.C.
Catch data of Leiognathidae, emphasize importance of this family.
- 574 Marshall, T.C. 1954. Revised and illustrated (version of): The commercial fishes and fisheries of Queensland, an essay by J. Douglas Ogilby. Dept. Harbors and Marine, Brisbane, Queensland.
Report of enormous catches of leiognathid, which are often mistaken for the young of valuable species.
- 575 Marshall, T.C. 1964. Fishes of the Great Barrier Reef and coastal waters of Queensland. Angus and Robertson, Sydney.
- 576 Martosubroto, P. 1973. [Studies on the demersal fisheries stock in the Malacca Strait and Jambi Bay.] Laporan Penelitian Perikanan Laut [Mar. Fish. Res. Rep.] 1: 1-33. (In Indonesian)
Catch data for Leiognathidae according to depth zone. Catch list includes *G. minuta*, *S. ruconius*, *L. brevirostris*, *L. splendens* and *L. equulus*.
- 577 Martosubroto, P. and D. Pauly. 1976. R/V *Mutiaria* IV survey data, November 1974 to July 1976. Contrib. Demersal Fish. Proj. Mar. Fish. Res. Inst. Jakarta 2. 136 p.
Gives rough estimates of leiognathid stock size and potential yield, by subareas (Western Indonesian waters). Contains also length frequency data for various Leiognathidae spp.
- 578 Marukawa, H. 1939. [Fisheries of the South Seas IV. Bait fishes for tuna and skipjack] South Sea Fish. 5(5): 4-10. (In Japanese. English translation South West Fisheries Center NMFS, NOAA, Honolulu).

- Mentions *G. minuta* as live bait, used only where other fishes are scarce.
- 579 Masuda, H., C. Araga and T. Yoshino. 1975. Coastal fishes of Southern Japan. Tokai Univ. Press, Tokyo.
p. 253 presents excellent color photos and descriptions of *L. nuchalis*, *L. equulus*, *L. rivulatus*, *L. leuciscus* and *L. fasciatus*.
- 580 Matsubara, K. 1955. [Fish morphology and hierarchy] Ishizuki-Shoten, Tokyo. (In Japanese).

- 582 Mees, G.F. 1959. Additions to the fish fauna of Western Australia—1. Fish. Bull. W. Aust. 9(1): 5-11.
Leiognathus fasciatus recorded.
- 583 Menasveta, D. 1970. Potential demersal fish resources of the Sunda Shelf, p. 525-555. In J.C. Marr (ed.) The Kuroshio: A symposium on the Japan current. East-West Center Press, Honolulu.
- 584 Menasveta, D., S. Shindo and S. Chullasorn. 1973. Pelagic fishery resources of the South China Sea and prospects for their development. SCS/DEV/73/6. 68 p. FAO, Rome.
- 585 Menasveta, P. 1976. Ecology of fish population in the coastal area of Bang Pra. MS presented at the Symposium on Mangrove Ecology, Phuket, Thailand, Jan. 1976.
Catch and length data for *L. elongatus*, *S. ruconius*, *L. sp.* and *L. splendens*.
- 586 Mendis, A.S. 1954. Fishes of Ceylon (a catalogue, key and bibliography) Bull. Fish. Res. Stn., Ceylon No. 2. 222 p.
p. 128-129 list under Liognathidae *G. minuta*, *G. achlamys*, *L. bindus*, *L. daura*, *L. equulus*, *L. fasciatus*, *L. insidiator*, *L. ruconius*, *L. splendens*.
- 587 Menon, A.G.K. and P.K. Talwar. 1972. Fishes of the Great Nicobar Expedition, 1966, with description of a new gobioid fish of the family Kraemeriidae Rec. Zool. Surv. India 66(1/4): 35-61.
- Gives distribution, description and partial synonymy of *G. minuta*, *L. blochi*, *L. daura*, *L. dussumieri*, *L. equulus* and *S. insidiator*.
- 588 Menon, M.A.S. 1963. On a collection of fish from Lake Chilka, Orissa. Rec. Indian Mus. 59(1/2): 41-69.
Lists *L. daura*, *L. dussumieri*, *L. equulus*, *S. insidiator*, *L. blochii* and *G. minuta*.
- 589 Meyer, A.B. 1885. Catálogo de los peces recolectados en el archipiélago de las Indias orientales durante los años 1870 á 1873. An. Soc. Esp. Hist. Nat. 14: 5-49.
p. 26 *G. argentaria*.
- 590 Michel, C. 1974. Notes on marine biology studies made in Mauritius. Bull. Mauritius Inst. 7(2). 284 p.
Lists *Equula dentex*, *E. ensifera* and *E. parviceps* recorded from Mauritius.
- 591 Migdalski, E.C. and G.S. Fichter. 1976. The fresh and salt water fishes of the world. Vineyard Books, New York.
Discusses the Leiognathidae (Genera *Leiognathus*, *Gazza* and *Secutor*) and depicts *L. equulus*. German edition of this book gives "Stülpmauler" for slipmouths.
- 592 Minagawa, O. et al. 1972. [Pesticide residues in dairy products and meat. III. Organochlorine pesticide residues in fishes and shellfishes.] Study Group of the Min. Health & Welfare for Pesticide Residues in Dairy Products and Meat. J. Food Hyg. Soc. Jap. 13(4): 317-325. (In Japanese, with English abstract).
- 593 Misra, K.S. 1959. An aid to commercial fishes. Rec. Indian Mus. 57: 255-259.
- 594 Mito, S. 1966. [Identification sheets of Japanese marine plankton] Soyo-sha Vol. 7. Tokyo. (In Japanese)
Describes (with figures) eggs and larvae of *Leiognathus nuchalis* and *L. rivulatus*.
- 595 Mito, S., M. Ukawa and M. Higuchi. 1973. Growth of some marine fish larvae hatched out from pelagic eggs. J. Mar. Biol. Assoc. India 15: 490-495.
Give data on the growth of larval *Leiognathus nuchalis*.

- 596 Moazzam, M. and S.H. Niaz Rizvi. 1980. Fish entrapment in the seawater intake of a power plant at Karachi coast. Environ. Biol. Fish. 5(7): 49-57.
S. insidiator, *G. minuta*, *L. daura*, *L. bindus* and *L. dussumieri* listed among the entrapped fishes, with length range.
- 597 Mohammed Shaari bin Sam Abdul Latif, G. Rauck, K.S. Ong and T.S. Peng. 1974. Demersal fish resources in Malaysian waters. 2. Trawl survey of the coastal waters off the west coast of Peninsular Malaysia (12th December 1970-22nd January 1971). Min. Agric. Rural Dev., Malays. Fish. Bull. 3. 41 p.
 Catch data for large-sized Leiognathidae, by depth range and bottom type.
- 598 Monkolprasit, S. 1966. Preliminary faunal data on marine tidal and sea shore habitats of Klong-Wan area, Thailand. Bull. Kasetsart Univ. Fish. Res. 3: 1-27.
 Lists from a market collection: *G. minuta*, *L. daura*, *L. elongatus*, *L. equulus*, *L. fasciatus*, *L. insidiator*, *L. lineolatus*, *L. splendens*. From the seashore are listed: *G. minuta*, *L. berbis*, *L. brevirostris*, *L. daura*, *L. equulus*, *L. insidiator*, *L. ruconius*, *L. splendens* and *L. spp.* many of which were juveniles.
- 599 Monkolprasit, S. 1973. The fishes of the leiognathid genus *Secutor* with the description of a new species from Thailand. Bull. Kasetsart Univ. Fish. Res. 6: 10-17.
 Description of *S. indicus* nov. sp., and comparison with *S. ruconius* and *S. insidiator*.
- 600 Monkolprasit, S. et al. 1971. [Systematics of Thai fishes] Fac. Fish. Kasetsart Univ., Bangkok. (In Thai) (mimeo).
 Gives a general description of leiognathids and a species list.
- 601 Monkolprasit, S. et al. 1972. [Guide to fish identification in Thai waters] Fac. Fish. Kasetsart Univ., Bangkok. (In English with title in Thai) (mimeo).
 Contains a key to three genera and seventeen species of Thai Leiognathidae.
- 602 Montalban, H.R., G. Blanco and I.A. Ronquillo. No date. Philippine fishes. Philipp. Dept. Agric. Nat. Resources, Pop. Bull. 46: 1-16.
- 603 Mori, T. 1928. A catalogue of the fishes of Korea. J. Pan-Pac. Res. Inst. 3(3): 3-8.
 Lists *L. argentea* (Houttuyn) and *L. rivulatus* (T & Schl.) from Fuson.
- 604 Mori, T. 1952. Check list of the fishes of Korea. Mem. Hyogo Univ. Agric. 1(3): 1-228.
- 605 Mori, T. 1956. Fishes, San-in District. Mem. Hyogo Univ. Agric. 2(3): 1-62.
- 606 Morin, J.C., A. Harrington and J.W. Hastings. 1975. Protective illumination by the pony fish: a confirmation of the countershading hypothesis. Alpha Helix Bioluminescence Expedition Indonesia. (MS)
 Reports that the light emitted by *G. minuta* changes proportionately to that of a lamp placed above the fish.
- 607 Morin, J.G. 1975. Light for all reasons: versatility in the behavioral repertoire of the flashlight fish. Science 190: 74-76.
 Mentions luminescent camouflage in leiognathids.
- 608 Del Mundo, C.M., T.G. Pimentel, A.B. Olandez and A.M. Galicia. 1980. Preliminary report on the hydrobiological and fisheries survey of Asid Gulf, Masbate, March 14-28, 1980. Bur. Fish. Aquat. Res. [Philippines] Tech. Pap. Ser. 4(4). 12 p.
 Catch of a "bahau" (small trawl) analyzed, consisting of a *L. equulus* sample ($N = 100$, range 31-85 mm, all immature), a *S. ruconius* sample ($N = 5$, range 33-57 mm, all immature), and a sample of *Leiognathus* spp., all immature. Catch of fish corrals consisted of 9.90% Leiognathidae.
- 609 Mouneimne, N. 1977. Liste des poissons de la côte du Liban (Méditerranée Orientale). Cybium 3^{ème} Ser. (1): 37-66.
 Lists *L. klunzingeri*, mentioning its Red Sea origin.
- 610 Munro, I.S.R. 1955. The marine and freshwater fishes of Ceylon. Dept. of External Affairs, Canberra.
 A key to description, brief synonymy and figures of *S. ruconius*, *S. insidiator*, *L. splendens*, *L. dussumieri*, *L. fasciatus*, *L. equulus*, *L. brevirostris*, *L. daura*, *L. bindus*, *L. lineolatus*, *G. minuta* and *G. achlamys*.

- 611 Munro, I.S.R. 1958. The fishes of the New Guinea region: a check-list of the fishes of New Guinea. Fish. Bull. Ter. Papua New Guinea 1: 97-369. Also in Papua New Guinea Agric. J. 10(4): 97-369.
- 612 Munro, I.S.R. 1960. Handbook of Australian Fishes No. 33. Fish. News Lett. Aust. 19(6): 17-20.
- 613 Munro, I.S.R. 1964. Additions to the fish fauna of New Guinea. Papua New Guinea Agric. J. 16(4): 141-186.
Description of *L. rapsoni* nov. spec. Lists *L. bindus*, a new record for the New Guinea area.
- 614 Munro, I.S.R. 1967. The fishes of New Guinea. Dept. Agric., Stock Fish. Port Moresby, New Guinea. p. 237-241 list, describe and figure *G. minuta*, *G. achlamys*, *S. ruconius*, *L. equulus*, *L. fasciatus*, *L. bindus*, *L. novaehollandiae*, *L. splendens*, and *L. rapsoni*.
- 615 Munro, I.S.R. 1968. Survey of the prawn resources of the Gulf of Carpentaria, January-August 1968. 74 p. (Unpublished MS).
Lists *Equulites novaehollandiae* and *Leiognathus* spp. among the dominant fishes in the trawl catches.
- 616 Murty, V. Sriramachandra. 1969. Catalogue of fishes (excluding from the Laccadives) in the reference collection of the Central Marine Fisheries Research Institute. Bull. Cent. Mar. Fish. Res. Inst., Cochin 10: 1-36.
Lists 15 leiognathid species.
- 617 Muthu, M.S., K.A. Narsimhan, G. Sudhakar Rao, Y. Appanna Sastry and P. Ramalingam. 1975. On the commercial trawl fisheries off Kakinada during 1967-70. Indian J. Fish. 22(1-2): 171-186.
Catch rates of Leiognathidae.

Discuss catches, including of *Leiognathus* spp.
Suggest that *L. bindus* was mostly immature (in March 1974).
- 651 Pai, M.V. and P.K. Mahadevan Pillai. 1973. Trawl fishery potential of the south-east coast of India, p. 261-279. In Proceedings of the symposium on living resources of the seas around India. Spec. Publ. Cent. Mar. Fish. Res. Inst., Cochin.
Discusses catch rates of leiognathids in different subareas.
- 652 Panikkar, N.K. and R.V. Nair. 1945. Progress report of the scheme of research on the fish eggs and larvae of the Madras plankton (1944-1945), Madras.
Describe the eggs of *Secutor ruconius*.
- 653 Paradice, W.E.J. and G.P. Whitley. 1927. Northern territory fishes. Mem. Queensl. Mus. 9: 76-106.
- 654 Pathansali, D., K.S. Ong, S.S. Latiff, and L.J. Carvalho. 1967. Preliminary results of trawling investigations off Penang. Proc. Indo-Pacific Fish. Counc. 12(2): 181-207.
Reports the dominance of Leiognathidae in the catch, their low commercial value, and the feature that they are replaced by Gerridae (especially *Pentaprion longimanus*) at greater depth ("ecological counterpart").
- 655 Pathansali, D., G. Rauck, A.A. Jothy, Mohammed Shaar Bin Sam Abdul Latiff and T.B. Curtin. 1974. Demersal fish resources in Malaysian waters. 1. Trawl survey of the coastal waters off the east coast of West Malaysia. Min. Agric. Fish. Malays. Fish. Bull 1. 46 p.
Gives catch data per depth and sub-area, mentioning that *L. equulus* and some *L. splendens* constitute most of the leiognathid catch (1.95% of total catch).
- 656 Pauly, D. 1977a. The Leiognathidae (Teleostei): their species, stocks and fisheries in Indonesia, with notes on the biology of *Leiognathus splendens* (Cuv.) Penelit. Laut Indones. [Mar. Res. Indones.] 19: 73-93.
As per title, but growth parameters for *L. splendens* ($L_{\infty} = 13$ cm and $K = 3.3$) are erroneous. (See Beck and Sudradjat, 1978).
- 657 Pauly, D. 1977b. The Leiognathidae (Teleosts): an hypothesis relating their mean depth occurrence to the intensity of their countershading bioluminescence. Penelit. Laut Indones. [Mar. Res. Indones.] 19: 137-146.
As per title.
- 658 Pauly, D. 1978a. A preliminary compilation of fish length growth parameters. Ber. Inst. Meereskunde (Kiel) No. 55. 200 p.
Gives growth parameters (L_{∞} and K) for 18 stocks and 6 species of Leiognathidae, all based on analysis of length frequencies.
- 659 Pauly, D. 1978b. A discussion of the potential use in fish population dynamics of the interrelationships between natural mortality, growth parameters and mean environmental temperature in 122 fish stocks. I.C.E.S. CM 1978/G:21. 36 p. Demersal Fish Committee, Int. Counc. Explor. Sea, Copenhagen.
Estimation of $M = 1.8$ in *Leiognathus splendens*, when $LT_{\infty} = 14.3$ cm, $K = 1.04$, at a mean temperature of 28.5°C .

- 660 Pauly, D. 1979a. Gill size and temperature as governing factors in fish growth: a generalization on Von Bertalanffy's growth formula. Ber. Inst. Meereskunde (Kiel) No. 63. 156 p.
Gives in Table VIIIb growth parameters for *Leiognathus equulus* as estimated from data in Chabanne and Plante (1969).
- 661 Pauly, D. 1979b. Theory and management of tropical multispecies stocks: a review, with emphasis on the Southeast Asian demersal fisheries. ICLARM Studies and Reviews 1. 35 p. International Center for Living Aquatic Resources Management, Manila.
Discusses the stock dynamics of Leiognathidae as typical representative of "prey" fishes in the Gulf of Thailand. Yield-isopleth diagram for *Leiognathus splendens*.
- 662 Pauly, D. 1979c. Biological overfishing of tropical stocks. ICLARM Newsl. 2(3): 3-4.
Yield-isopleth diagram for *Leiognathus splendens*.
- 663 Pauly, D. 1980a. The use of a pseudo catch curve for the estimation of mortality rates in *Leiognathus splendens* (Pisces: Leiognathidae) in western Indonesian waters. Meeresforsch. 28(1): 56-60.
New method led to estimate of natural mortality $M \approx 1.8$.
- 664 Pauly, D. 1980b. On the interrelationships between natural mortality, growth parameters and mean environmental temperature in 175 fish stocks. J. Cons., Cons. Int. Explor. Mer. 39(3): 175-192.
L. splendens from Western Indonesia included among stocks used for derivation of general relationship. Parameters used were $L_{\infty} = 14$ cm (LT), $W_{\infty} = 64$ g, $K = 1.04$ and $M = 1.8$.
- 665 Pauly, D. and N. David. 1980a. An objective method for determining growth from length-frequency data. ICLARM Newsl. 3(3): 13-15.
Growth parameters of *L. bindus* ($L_{\infty} = 12.2$, $K = 1.3$) estimated by means of a new, computer-based method. Based on length-frequency data of Balan (1967).
- 666 Pauly, D. and N. David. 1980b. A BASIC program for the objective extraction of growth parameters from length-frequency data. I.C.E.S. CM 1980/D:7. 14 p. Statistics Committee, Int. Counc. Explor. Sea, Copenhagen.
Same as in Pauly and David (1980a).
- 667 Pearson, J. and A.H. Malpas. 1926. A preliminary report on the possibilities of commercial trawling in the sea around Ceylon. Ceylon J. Sci. Sect. C2: 1-165.
On *L. bindus*, *L. edentula*, *L. fasciata*, *L. insidiatrix*, *L. lineolata*, *L. ruconius*, *L. splendens*, *G. minuta*; catch data, length, weight, food for both sexes.
- 668 Peiris, T.S.S. and J. Grero. 1973. Chemical analyses of some Sri Lanka fishes—3. Bull. Fish. Res. Stn., Ceylon 24(1/2): 1-12.
p. 7 figures of *G. minuta*, and analysis of its constituent parts (muscles, skin, head, viscera etc.); data are given for: % water, % ash, % fat, % protein and cal/100 g.

- 678 Pillai, N. Krishna. 1973. Three new bomolochid parasitic on fishes of the Kerala coast. Indian J. Fish. 20(2): 487-496.
Description of *Nothobomolochus quadriceros* sp. nov. cop. from the inner surface of the opercle of *Gazza minuta*.
- 679 Pillai, P.K.M. 1972. Fecundity and spawning habits of some silver bellies. Indian J. Fish. 19 (1/2): 196-199.
Reports of a prolonged spawning period in *S. insidiator*, *S. ruconius* and *L. dussumieri* and a restricted spawning period in *G. minuta*.
- 680 Pillay, T.V.R. 1948. Marine fisheries of Kodinar in Kathiavar. J. Bombay Nat. Hist. Soc. 48(1): 47-61.
Lists *L. dussumieri*, *L. edentula* and *L. fasciatus* caught by drift nets.
- 681 Pillay, T.G. 1965. Brackish-water fishery resources. Bull. Fish. Res. Stn. Ceylon 18(2): 75-85.
L. equulus (Singhalese: Maskarella) and *L. fasciatus* listed among the marine fishes occurring in brackish waters.
- 682 Pillay, T.V.R. 1967. Estuarine fisheries of the Indian Ocean coastal zone, p. 647-667. In Lauff (ed.) Estuaries. Amer. Assoc. Adv. Sci. Publ. 83.
L. brevirostris, *L. blochii*, *L. equulus*, *L. fasciatus*, *S. ruconius*, *S. insidiator* and *G. minuta* listed as common estuarine fishes in the Indian Ocean coastal zone.
- 683 Playfair, R.L. 1868. On a collection of fishes from Madagascar. Proc. Zool. Soc. London: 9-12.
- 684 Playfair, R.L. and A. Günther. 1866. The fishes of Zanzibar. Acanthopterygii by R.L. Playfair; Pharyngognathi, etc. by A. Günther. van Voorst, London.
p. 65 lists *Equula edentula* from Aden and Zanzibar and *Gazza equulaeformis* from Zanzibar.
- 685 Plessis, Y. and P. Fourmanoir. 1966. Mission d'étude des récifs corallien de Nouvelle Calédonie. Liste des poissons recoltés par Y. Plessis en 1961. Cah. Pac. (9): 123-147.
L. fasciatus listed.
- 686 Por, F.D. 1971. One hundred years of Suez Canal. A century of Lessepsian migrations: retrospects and new viewpoints. Syst. Zool. 20: 138-159.
Lists *L. klunzingeri*.
- 687 Por, F.D. 1978. Lesspsian migrations. Ecological studies No. 23, 228 p. Springer Verlag, Berlin.
Discuss migration and population dynamics of *L. klunzingeri* into and in the Mediterranean respectively.
- 688 Pownall, P.C. 1975. Marine fisheries. In Fisheries of Indonesia—Special Feature. Aust. Fish. 34(2): 2-30.
"Slipmouts" among the demersal species of commercial value.
- 689 Prabhu, M.S. 1955. Some aspects of the biology of the ribbonfish *Trichiurus haumela* (Forskål) Indian J. Fish. 2(1): 132-163.
Leiognathus spp. as food of *T. haumela*.
- 690 Prabhu, M.S. and R.M. Dawan. 1974. Marine fisheries resources in the 20 and 40 meter region off the Goa coast. Indian J. Fish. 21(1): 40-53.
Catch data for *Leiognathus* spp. including *L. splendens*, *L. bindus*, *L. insidiator*.
- 691 Prabhu, M.S., S. Ramamurthy, M.D.K. Kuthalingam and M.H. Dhulkhed. 1967. On the experimental fishing of Ullal (Mangalore). Indian J. Fish. 14 (1/2): 225-231.
Biological notes on *L. splendens*.
- 692 Probst, K. 1963. Meeresaquaristik. Teil III. Fische: 77 Lehrmeister Bücherei No. 75. Albrecht Philler Verlag, Minden.
Mentions the Leiognathidae, *L. klunzingeri*, and its lessepsian migration.
- 693 Qureshi, M.R. 1961. Pakistan's fisheries. Govt. Press, Karachi.

- Leiognathus* listed among the important genera of fishes in Pakistan.
- 694 Qureshi, M.R. 1964. A field guide to the identification of fishes, order Perciformes. Part 1. Suborder Percoidei (Families Lutjanidae, Lobotidae, Gerriidae). Scientist (Karachi) 7: 20-36.
- 695 Radhakrishnan, N. 1969. On the pelagic fishery resources off Vizhinjam on the South West coast of India III. Proc. Indian Sci. Congr. Assoc. 56 (3): 541.
Rate of growth of *Secutor ruconius*.
- 696 Radhakrishnan, N. 1973. Pelagic fisheries of Vizhinjam. Indian J. Fish. 20(2): 584-598.
Gives 1,264 tons as average annual catch of silver bellies for the entire South Kerala Coast.
- 697 Radhakrishnan, N. 1974. Demersal fisheries of Vizhinjam. Indian J. Fish. 21(1): 29-39.
Catch data for *Leiognathus* spp., and growth data for *Secutor ruconius* and *S. insidiator*.
- 698 Rajan, S. 1964. Environmental studies of the Chilka lake. I. Feeding spectrum of fishes. Indian J. Fish. 11(2): 521-532.
Mentions that *L. equulus* in the sample investigated had fed mainly on lamellibranchs, and that the fishes are generally benthophagous.
- 699 Ramsay, E.P. and J.D. Ogilby. 1886. A contribution to the knowledge of the fish fauna of New Guinea. Proc. Linn. Soc. N.S.W. 2nd Ser. 1. 11 p.
Original description of *L. smithursti* from Hood Lagoon, New Guinea. p. 8 lists *G. minuta* from Papua New Guinea.
- 700 Randall, J.E., G.R. Allen and W.F. Smith-Vaniz. 1971. Illustrated identification guide to commercial fishes. FI:DP/RAB/71/278/3. 221 p. Reg. Fish. Surv. Dev. Proj., Doha, Qatar.
p. 101 includes a figure of *Leiognathus bindus* from the Persian Gulf.
- 701 Ranisingh and P.K. Talwar. 1978. On a new species of silver belly, *Leiognathidae* (from the Bay of Bengal). Bull. Zool. Surv. India 1(3): 275-277.
- 702 Ranisingh and P.K. Talwar. 1978. On the little known pony fish, *Gazza achlamys* Jordan and Starks (Pisces: *Leiognathidae*) in the Indian waters. Curr. Sci. 47(23): 930-931.
- 703 Rao, G.N. Subba. 1967. Fish processing in the Indo-Pacific area. Reg. Stud. Indo-Pacific Fish. Counc. 4. 23 p.
Leiognathus sp. being dried in Burma. Called "nga-tanga." *Leiognathus* sp. raw material for fermented fish sauce in the Philippines.
- 704 Rao, K. Satyanarayana. 1967. Reproductive cycles and lipid levels in *Leiognathus splendens* (Cuvier). J. Mar. Biol. Assoc. India 9(2): 303-322.
Data indicate prolonged spawning period, with a peak in January and a secondary peak in June. Lipids are stored in the liver, intestine and lateral muscles prior to spawning period.
- 705 Rao, K. Srinivasa. 1967. Food and feeding habits of fishes from trawl catches in the Bay of Bengal with observations on diurnal variations in the nature of the feed. Indian J. Fish. 11(1): 277-314.
Gives food items for 5 leiognathid spp., items ordered according to "points" and time of the day.
- 706 Rao, K. Virabhadra. 1967. Exploratory fishing, p. 25-36. In Souvenir, 20th Anniversary, Central Marine Fisheries Research Institute, Cochin.
- 707 Rao, K. Virabhadra. 1969. Distribution pattern of the major exploited marine fishery resources of India. Bull. Cent. Mar. Fish. Res. Inst. 6. 69 p.
Discusses catch data of *Leiognathidae*.
- 708 Rao, K. Virabhadra. 1969. Trawl fishing in India. Proc. Indo-Pacific Fish. Counc. 13(3): 566-575.
p. 571 states that most of the high catch in the Palk Bay and Gulf of Manaar area consists of small fishes, predominantly silver-bellies.
- 709 Rao, K. Virabhadra. 1973. Distribution pattern of the major exploited marine fishery resources of India, p. 18-101. In Proceedings of the symposium on living resources of the seas around India. Spec. Publ. Cent. Mar. Fish. Res. Inst., Cochin.
p. 43 discusses catch data of *Leiognathidae*.
- 710 Rapson, A.M. and C.R. McIntosh. 1971, 1972. Prawn surveys in Papua New Guinea. First ed. (1971): Biol. Ser. 10/5. Second ed. (1972). Res. Bull. No. 3. 98 p. Dept. Agric., Stock Fish., Port Moresby.
Lists *Leiognathidae* [genera *Gazza*, *Secutor*, *Equula*, *Equulites* and *Leiognathus*] among the fishes commonly associated with prawns (prawn "indicators"). Suggest that *Leiognathidae* complete for food with prawns.

- 711 Rau, N. and A. Rau. 1980. Commercial fishes of the Philippines. German Agency for Technical Cooperation (GTZ), Eschborn, Germany. 623 p. p. 306 description and drawings of *G. minuta*, *L. bindus*, *L. brevirostris*, *L. daura*, *L. elongatus*, *L. equulus*, *L. fasciatus*, *L. leuciscus*, *L. lineolatus*, *Leiognathus* sp. (as in Kühlmorgen-Hille, 1974) *L. splendens*, *S. insidiator* and *S. ruconius*. Includes *L. rivulatus*, which would represent a first record from the Philippines and is a probable misidentification. Also, the remark "known from southern Japan, possibly occurring in the Philippines Wongratana, pers. comm. 1978" probably refers to *L. rivulatus*, not to *L. lineolatus* (see p. 314) which is known to occur in the Philippines.

Includes data on *Leiognathus*.
- 827 Tarbit, J. 1980. Demersal trawling in Seychelles waters. Fish. Div. Dept. Agric. and Land Use. Fish. Bull. No. 4, 84 p.
p. 75 lists *G. minuta*, *L. fasciatus*, *L. equulus*, *L. elongatus* and *L. leuciscus* (all "sap-sap") from Seychelles waters, the latter two being new distributional records.
- 828 Taylor, W.R. 1964. Fishes of Arnhem Land. Rec. Amer.-Aust. Sci. Exped. Arnhem Land. 4: 45-307.
p. 213-218 key to 5 leiognathid species of Arnhem Land (included in family Gerridae) with description and synonymy.
- 829 Tchaw-ren, C. 1960. Contributions to the fishes from Quemoy (Kinmen). Q. J. Taiwan Mus. 13: 191-213.
Key to genera and species of leiognathids from Quemoy.
- 830 Temminck, C.J. and H. Schlegel. 1842. Fauna Japonica. (Part 1R, Pisces), C.T.E. von Siebold (ed.).
Original description of *L. nuchalis*.
- 831 Thailand. Department of Fisheries. 1964. [Marine fishes of Thailand] Dept. of Fisheries, Bangkok. (In Thai).

- 832 Tham Ah Kow. 1950. The food and feeding relationships of the fishes of Singapore Straits. Colon. Off. Fishery Publ. 1(1). 35 p. Gives data by month for *Gazza minuta*, *L. bindus* and *L. lineolatus*, with miscellaneous data for other *Leiognathus* spp.
- 833 Tham Ah Kow. 1954. On the inshore fish population of the Strait of Singapore. Indo-Pacific Fish. Counc., 5th Session Doc. C54/Tech. 35. 12 p. and Proc. Indo-Pacific Fish. Counc. 5(2): 168-176.
- 834 Tham Ah Kow. 1973. Sea fish, p. 202-226. In S.H. Chuang (ed.) Animal life and nature in Singapore. Singapore Univ. Press, Singapore. Mentions that large "kekek" such as *L. equulus*, *L. fasciatus* and *L. splendens* are popular as food fish while the smaller ones are used as duck food. Leiognathidae are plankton feeders and commonly caught by kelong and beach seines. Bioluminescence and slime production mentioned.
- 835 Tham, Ah Kow. 1974. *Stolephorus* resources in the South China Sea. Proc. Indo-Pacific Fish. Counc. 15(3): 182-191. *Gazza minuta* mentioned as predator of *Stolephorus* in Singapore Strait.
- 836 Thiemmedh, J. 1966. Fishes of Thailand: their English, scientific and Thai names. (Reprint 1968) Bull. Kasetsart Univ. Fish. Res. (4): 1-212. As per title for *G. minuta*, *L. daura*, *L. equulus*, *L. splendens*, *S. insidiator* and *S. ruconius*.
- 837 Thirumathi Gemma Evangeline, M.A. 1975. Hydrobiology of the estuaries and backwaters of Ramana-thapuram District, Tamilnadu, p. 193-211. In R. Natarajan (ed.) Recent researches in estuarine biology. Hindustan Publishing Corp., Delhi. Lists *Leiognathus* among the fishes caught seasonally from Kottakudi estuary, and commonly from Malattar estuary.
- 838 Tholasilingham, T., K.C. George, M.G. Dayandan, P. Karunakaran Nair and K. Nandakumaran. 1973. Exploratory trawl fishing and ground resources along the Kerala coast and adjacent waters, p. 241-257. In Proceedings of the symposium on the living resources of the seas around India. Spec. Publ. Cent. Mar. Fish. Res. Inst., Cochin. Mention *Leiognathus* spp. among the common fishes caught at intermediate depth (22-35 m).
- 839 Tholasilingham, T., G. Venkataram and K.N. Krishnakartha. 1964. A study of the fishery and estimation of abundance of ground fish off Cochin. Indian J. Fish. 11(2): 709-734. *L. bindus* comprises 1.3% of total catch. Catch data as related to depth for *L. bindus* and *L. splendens*.
- 840 Thoilliére, V.J. 1857. Essai sur la faune de l'île de Woodlark ou Moiou, par le P. Montrouzier. Ichthyologie: 139-222. Ann. Soc. Hist. Nat. Lyons: 139-222. *Equula neb* (type loc. Woodlark Island).
- 841 Thomas, P.A. 1969. Goat fishes (family Mullidae) of the Indian Seas. Mem. No. 3. Mar. Biol. Assoc., India. Records *Leiognathus* from the stomach of *Upeneus tragula* and *U. vittatus* from the Mandapam Area, India.
- 842 Thomson, J.M. 1959. Some aspects of the ecology of Lake Macquarie, N.S.W., with regard to an alleged depletion of fish. IX. The fishes and their food. Aust. J. Mar. Freshwater Res. 10(3): 365-374. *Equulites moretonensis* (spotted ponyfish) recorded from Lake Macquarie.
- 843 Thompson, J.C. and A. Scott. 1903. Copepoda. Ceylon Pearl Oysters Fisheries Report. Report the parasitic copepod *Anchovella* (= *Clavella*) *uncinata* from the operculum folds of *Gazza minuta*.
- 844 Tiews, K. 1958. Research activities on marine fisheries biology in 1957. Philipp. J. Fish. 6(1): 71-105. An account of biological work on Leiognathidae with some preliminary results.
- 845 Tiews, K. 1959. Report to the Government of the Republic of the Philippines on marine fishery resources. Rep. FAO/ETAP No. 1141: 1-88 and Philipp. J. Fish. 6(2): 107-208. 1962. Results of research on the leiognathid stock in Manila and San Miguel Bay. Food, fecundity, etc. Mentions *Saurida* as predator of Leiognathidae, primarily of *L. insidiator*.
- 846 Tiews, K. 1962. Experimental trawl fishing in the Gulf of Thailand and its results regarding the possibilities of trawl fisheries development in Thailand. Veröff. Inst. Küst. Binnenfisch. 25: 1-53.

- 847 Tiews, K. 1965a. Bottom fish resource investigation in the Gulf of Thailand and an outlook on further possibilities to develop the marine fisheries in Southeast Asia. Arch. Fischereiwiss. 16(1): 67-108.
Remarks on leiognathid catches.
- 847 Tiews, K. 1965b. The German Fisheries Mission to Thailand (2nd project phase, 1962-1964). Veröff. Inst. Küst. Binnenfisch. 36: 1-32.
- 849 Tiews, K. 1966a. On the possibilities for further developments of the South East Asian fisheries. IPFC Curr. Aff. Bull. (47): 1-13. and Proc. of the Seventh Int. Congr. Nutrition 4: 3-11.
- 850 Tiews, K. 1966b. Third report to the Director General of the Department of Fisheries on marine fisheries research programming—Marine Fisheries Laboratory. Circ. Pap. Mar. Fish. Lab. Bangkok (2): 1-25. (In Thai and English).
Mentions *Leiognathus* as object of research.
- 851 Tiews, K. 1969a. Biological bases of fishery development with special regard to conditions in Southeast Asia, p. 157-162. In K. Tiews (ed.) Proceedings of the international seminar on possibilities and problems of fisheries development in Southeast Asia, September 10-30, 1968, Berlin.
Suggests that the Leiognathidae are plankton feeders.
- 852 Tiews, K. 1969b. Role and possibilities of the trawl net fishery in Southeast Asia, p. 319-323. In K. Tiews (ed.) Proceedings of the international seminar on possibilities and problems of fisheries development in Southeast Asia, September 10-30, 1968, Berlin.
Lists the Leiognathidae among the most important families in Southeast Asian waters.
- 853 Tiews, K. 1973. Fishery development and management in Thailand. Arch. Fischereiwiss. 24(1/3): 271-300.
Quantitative catch data, Gulf of Thailand, for leiognathids and other groups.
- 854 Tiews, K. and P. Caces-Borja. 1965. On the availability of fish of the family Leiognathidae Lacépède in Manila Bay and San Miguel Bay and on their accessibility to controversial fishing gears. Philipp. J. Fish. 7(1): 59-86.
Basic study on the Leiognathidae of Manila Bay.
- 855 Tiews, K., P. Divino, I.A. Ronquillo and J. Marques. 1972. On the food and feeding habits of eight species of *Leiognathus* found in Manila Bay and San Miguel Bay. Proc. Indo-Pacific Fish. Counc. 13(3): 93-99.
As per title.
- 856 Tiews, K., A. Mines and I.A. Ronquillo. 1972. On the biology of *Saurida tumbil* (Bloch 1801) Family Synodontidae in Philippine Waters. Proc. Indo-Pacific Fish. Counc. 13(3): 100-120.
Leiognathids, especially *L. insidiator* and *L. bindus*, being an important food item of *S. tumbil*.
- 857 Tiews, K., J.A. Ordoñez, and I.A. Ronquillo. 1972. On the benthos biomass and its seasonal variations in Manila Bay and San Miguel Bay and a comparison of their foraminiferan fauna. Proc. Indo-Pacific Fish. Counc. 13(3): 121-138.
Mentions that certain genera of foraminferans not found in benthos sample were recorded from the diet of *Leiognathus*.
- 858 Tiews, K., P. Sucondhmarn and A. Isarankura. 1967. On the changes in the abundance of demersal fish stocks in the Gulf of Thailand from 1963/1964 to 1966 as a consequence of the trawl fishery development. Contrib. Mar. Fish. Lab., Bangkok 8. 39 p. (In Thai and English).
Reports a decrease of 70%, from 1963 to 1966 in the catch/effort of Leiognathidae, while prices went up from 0.85 to 4.00 Baht/kg at Bangkok fish market. Note that only large *Leiognathus* (*L. equulus*) are used for human consumption.
- 859 Tillier, J.B. 1902. Le Canal de Suez et sa faune ichthyologique. Mém. Soc. Zool. Fr. 15: 279-318.
L. klunzingeri in Suez Canal.
- 860 Tomiyama, J. 1972. List of the fishes preserved in the Aitsu Marine Biological Station, Kumamoto University. Amakusa Rinkai Jinkenjo Reikoku/ Publ. Amakura Mar. Biol. Lab. 3(1): 1-21.
Lists *L. nuchalis* and *L. rivulatus*.

- 861 Tortonese, E. 1948. Ricerche zoologiche nel canale di Suez, II. Arch. Zool. Ital. 33: 275-292. On *L. klunzingeri*.
- 862 Tortonese, E. 1953. p. 390 In Hureau, J.C. and T. Monod (eds.) Check-list of the fishes of the north-eastern Atlantic and the Mediterranean (CLOFNAME) Unesco, Paris.
- L. klunzingeri* from the Mediterranean.
- 863 Tortonese, E. 1975. Fauna d'Italia. Osteichthys (Pesci Ossei) Parte Seconda Edizioni Calderini. Bologna.
p. 149-150 description of Leiognathidae and *Leiognathus*, record and description of *L. klunzingeri* from Lampredusa Island, Italy.
- 864 Tweedie, M.W.F. 1936. A list of the fishes in the collections of the Raffles Museum. Bull. Raffles Mus., Singapore 12: 16-28.
Lists *L. blochii* from Singapore and *L. fasciatus* from the east coast of the Malay Peninsula.
- 865 Tweedie, M.W.F. 1940. Additions to the collection of fishes in the Raffles Museum. Bull. Raffles Mus., Singapore 16: 68-82.
p. 76 *L. equulus*, *L. insidiator*, *L. ruconius* from Singapore and Selangor, Malaysia.
- 866 Uchida, K.S. and H. Yabe. 1939. The fish fauna of Saisyu-to (Quelpart Island) and its adjacent waters. J. Chosen Nat. Hist. Soc. 25: 3-16.
Mentions *L. equulus*.
- 867 Uchida, K.S. et al. 1958. Studies on the eggs, larvae and juveniles of Japanese fishes. Ser. I, Kyushu Univ., Fac. Agric. Dept. Fish.
- 868 U Khin. 1948. Fisheries in Burma. Govt. Printing, Rangoon.
p. 20 describes "silver-bellies"; gives figure of *L. splendens*, and Burmese names; reports that "it is caught in very large quantities."
- 869 Umali, A.F. 1932. The Japanese beam trawl used in Philippine waters. Philipp. J. Sci. 48(3): 389-410.
- 870 Umali, A.F. 1934. Fishing industry of southwestern Samar. Philipp. J. Sci. 54: 365-392.
p. 371 *L. equulus*.

- 872 Umali, A.F. 1937. The fishery industry of San Miguel Bay. Philipp. J. Sci. 63: 227-258.
p. 234 *L. equulus*.
- 873 Umali, A.F. 1950. Key to the families of common commercial fishes in the Philippines. U.S. Fish Wildl. Serv. Res. Rep. 21. 47 p.
Key to the family Leiognathidae with figures. Leiognathidae (slipmouth) in the Philippines include: *Gazza minuta*, *L. bindus*, *L. daura*, *L. equulus*, *L. fasciatus*, *L. insidiator*, *L. ruconius* and *L. splendens*. Localities: throughout the Philippines, especially in bays, gulfs and straits with smooth bottoms.
- 874 Unar, M. 1968. The "Chantrang" Danish seine fishery of the North Coast of Java. Proc. Indo-Pacific Fish. Counc. 13(3): 546-553.
Reports that *Leiognathus* spp. comprise an average of 60% of the catch.
- 875 Unar, M. and M. Sachlan. 1960. A list of commercial fishes of Indonesia. Proc. Indo-Pacific Fish. Counc. 8(2): 32-33. (Abstract).
Lists *L. splendens*.
- 876 Uyengco, V., I. Lawax, P.R. Briones and R.S. Taruc. 1952. Mechanics of *bagoong* (fish paste) and *patis* (fish sauce) processing. Proc. Indo-Pacific Fish. Counc. 4(II): 1-13.
List *Leiognathus* among the fish used to make "patis."
- 877 Van der Elst, R.P. 1976. Game fish of the east coast of Southern Africa. I. The biology of the elf, *Pomatomus saltatrix* (Linnaeus) in the coastal waters off Natal. Ocean. Res. Inst. Invest. Rep. S. Afr. 44: 1-59.
Secutor insidiator and *L. equulus* recorded as food items.
- 878 Van Rosendaal, A.M. and P.N. van Kampen. 1909. Verslag van de verrichtingen van het Onderzoekingsvaartuig "Gier" etc.... Mededelingen van het visscherij-station te Batavia (3), Buitenzorg.
Trawl catch data for Leiognathidae.
- 879 Vatanachai, S. 1972. The identification of fish eggs and fish larvae obtained from the survey cruise in the South China Sea. Proc. Indo-Pacific Fish. Counc. 13(3): 111-143 and Third Symp. on Mar. Fish., Mar. Fish. Lab., Bangkok MF 72/10. 27 p.

- 879 Nineteen larvae of *Leiognathus* spp. were collected (peak in April), one figure of *Leiognathus* larva. Identification key included.
- 880 Velasquez, C.C. 1959. Studies on the family Bucephalidae Poche, 1907, from Philippine food fishes. J. Parasitol. 45(2): 135-147.
- 881 Velasquez, C.C. 1975. Digenetic trematodes of Philippine fishes. Univ. of the Philipp. Press, Quezon City.
Leiognathidae (*G. minuta* and *Leiognathus* sp.) as host species and their parasites.
- 882 Venkataraman, G. 1960. Studies on the food and feeding relationships of the inshore fishes off Calicut on the Malabar Coast. Indian J. Fish. 7(2): 275-306.
Detailed study of the food of 5 *Secutor* and *Leiognathus* spp. Mentions *Lactarius lactarius* as a predator of *Leiognathus* spp.
- 883 Venkataraman, G. and M. Badrudeen. 1974. On the diurnal variation in the catches of silverbellies in Palk Bay. Indian J. Fish. 21(1): 254-265.
- 884 Venkataraman, R.S. 1944. Food of ribbon fishes. Curr. Sci. 13(9): 239.
Records *Leiognathus* spp. as food of ribbon fishes.
- 885 Venkataraman, R.S. and S.T. Chari. 1955. Trimethylamine oxide content of marine fishes. Indian J. Fish. 2(1): 37-40.
Includes data for *L. bindus*.
- 886 Venkataraman, R.S. and S.T. Chari. 1957. Amino acid composition of some marine fishes. Indian J. Med. Res. 45(1): 77-80.
Leiognathus bindus contained all essential amino acids.
- 887 Vermeij, G.J. 1978. Biogeography and adaptations patterns of marine life. Harvard Univ. Press, Cambridge.
p. 25 discusses possible effect of *Saurida undosquamis* predation on *L. klunzingeri* biomass in the Mediterranean.
- 888 Villadolid, D.V. 1937. The Fisheries of Lake Taal, Pansipit River and Balayan Bay, Batangas province, Luzon. Philipp. J. Sci. 63(2): 191-225.
p. 215-217 *L. equulus*, *L.* spp. from Balayan Bay.
- 889 Villaluz, D.K. 1953. Fish farming in the Philippines. Bookman, Manila.
List *Leiognathus caballus* (C. & V.) ("malaway") among the marine fishes known from Lake Naujan, northeastern Mindoro, Philippines.
- 890 Vinciguerra, D. 1889. Viaggio di Leonardo Fea in Burmania e regioni vicine: Pesci. Ann. Mus. Civ. Storia Nat. Genova (2) ser. 9: 129-362.

p. 45 lists from Australia: *Gazza minuta*, *Equula equula*, *Equulites novaehollandiae*, *Equulites hastatus*, *Equulites moretoniensis*, *Equulites bindus*, *Aurigequula longispinis*, *Secutor profundus*, *Eubleekeria ovalis* and *Eubleekeria* (*Nucshequula nuchalis*).

Subject Index

Note: This index also contains selected references to three commercially important species, *Leiognathus bindus*, *L. equulus* and *L. splendens*; all references to "Mediterranean and Suez Canal" pertain to *L. klunzingeri*, and all references to "paleontology" refer to *L. altipinnis*. A detailed taxonomic index was not feasible because of the presently confused state of leiognathid taxonomy.

- Anatomy (incl. light organs)
003, 006, 063, 064, 081, 340, 348, 355, 357, 359,
360, 361, 368, 369, 370, 376, 412, 453, 634, 822,
931
- Aquaculture ponds, occurrence in
408, 770, 795
- Baitfish, use as
054, 227, 493, 543, 578
- Behavior (schooling, circadian rhythm, etc.)
054, 082, 355, 370, 376, 494, 537, 606, 744, 854,
883, 931
- Bioluminescence (general)
003, 006, 081, 082, 097, 176, 181, 230, 319, 353,
354, 355, 356, 357, 358, 359, 360, 361, 369, 370,
372, 373, 374, 376, 377, 378, 379, 382, 412, 448,
453, 494, 535, 539, 557, 606, 607, 633, 634, 657,
717, 718, 719, 737, 924, 930, 931
- Body constituents
087, 310, 313, 351, 498, 555, 621, 668, 670, 704,
815, 885, 886, 891
- Catch and landings
019, 021, 025, 044, 055, 056, 088, 089, 090, 091,
214, 215, 216, 223, 226, 230, 251, 267, 320, 337,
371, 440, 455, 460, 496, 573, 617, 625, 628, 661,
696, 697, 708, 731, 745, 773, 790, 814, 817, 818,
905, 923, 935, 936, 938
- Catch-per-effort, abundance
015, 016, 022, 023, 028, 029, 030, 031, 032, 035,
045, 058, 064, 068, 080, 086, 092, 093, 194, 197,
198, 200, 224, 226, 250, 262, 325, 327, 380, 413,
428, 432, 443, 452, 485, 500, 530, 537, 540, 541,
552, 553, 554, 560, 566, 570, 571, 574, 576, 577,
583, 597, 615, 617, 620, 627, 630, 644, 648, 649,
- 650, 651, 654, 655, 656, 661, 664, 667, 676, 677,
690, 706, 707, 709, 713, 724, 725, 726, 734, 736,
743, 744, 779, 781, 791, 792, 801, 812, 814, 816,
837, 838, 845, 846, 847, 853, 854, 858, 868, 874,
878, 883, 897
- Diseases, parasites and anomalies
195, 196, 222, 266, 347, 349, 362, 439, 444, 482,
504, 536, 678, 733, 760, 788, 843, 880, 881
- Ecology (habitat description, communities, competitors,
etc.)
007, 082, 188, 209, 247, 275, 355, 423, 492, 502,
523, 551, 585, 598, 636, 649, 650, 654, 655, 710,
786, 813, 854, 903
- Fishing gears and methods
015, 040, 041, 197, 201, 218, 226, 265, 312, 323,
455, 479, 486, 491, 517, 549, 552, 553, 568, 596,
608, 680, 729, 732, 748, 801, 816, 834, 869, 874
- Food for humans and domestic animals
036, 043, 059, 183, 236, 320, 418, 516, 542, 572,
703, 742, 747, 803, 834, 858, 876, 928
- Food and feeding habits
057, 062, 094, 176, 199, 211, 212, 223, 256, 322,
492, 526, 527, 569, 572, 635, 667, 698, 705, 710,
822, 832, 834, 835, 845, 851, 855, 857, 882, 933
- Growth and mortality
042, 053, 068, 095, 199, 209, 445, 595, 656, 658,
659, 660, 661, 663, 664, 665, 666, 695, 697, 909
- Leiognathus bindus*
