Web Developer

Company profile

JumpShift Development Ltd. is a leading Leadership and Professional skills development organization. Originating in New Zealand, we are leaders in blending group facilitation and cutting-edge technology to get results at scale. Founded in 2010, JumpShift has established its presence across North America, Europe, Australia and NZ.

Adeption platform

Adeption combines behavior change science + AI + expert coaches and an iterative agile approach to develop leaders at scale.

A white-labelled, digital learning platform, Adeption enhances the experience and results of traditional learning methods. The platform is used by Fortune 5OO companies & endorsed by world-renown researchers.

We think of this behavioral-focused learning technology as a fit bit for leadership. Watching videos doesn't make you fitter, running does. Watching videos doesn't make you a better leader – leading does. We create a series of workouts that allow leaders to get clear on what matters to them, get fresh ideas, plan and do deliberate on the job experiments that they then reflect on and get feedback from peers, managers and coaches. The cycle then iterates to drive real development and new habits.

We have an exciting roadmap ahead – want to join us?

Location

Pune, India

Job Description

We are looking for an outstanding Web Developer to be responsible for the coding, innovative design and layout of our website. You will build our website from concept all the way to completion from the bottom up.
