# Aquatest Testlab Professional.

With the Colombo Testlab, you have all the Aquatest drip tests in one handy case, which is also economical.

There are videos on our website showing how to perform the water test. This makes water testing very simple!

Visit [www.colombo.nl](http://www.colombo.nl) and try it yourself.

## Including.

Acidity

Carbonate Hardness

General Hardness

Ammonia

Nitrite

Nitrate

Phosphate

## Aquatest Testlab Professional.

Complete test kit to measure the 7 important freshwater aquarium water values. Contains professional drip tests for pH, GH, KH, NO<sub>2</sub>, NO<sub>3</sub>, NH<sub>3</sub> & PO<sub>4</sub>. All supplied are in a handy plastic case.

The included test tubes and complete instructions for use make water testing very easy. In the case, you keep all tests together.

If one of the tests in the case runs out, you can use loose Colombo aqua tests as replacements.

With the Colombo Aqua testlab, you can test the 7 important water values 40 times, a total of 280 water tests!

### COLOMBO AQUA TESTLAB PRO.

S.R.P.

**£49.99**

Art. no.: A5010990

8 715897 319594

## Clean water is the base ingredient for a healthy aquarium.

Complete range of drip tests for freshwater aquariums. Tests available for pH - KH - GH - Ammonia - Nitrite - Nitrate - Phosphate. With the Quicktest strip you can test pH - KH - GH - Nitrite - Nitrate and Chlorine values. The tests are easy to use and provide a reliable measurement result. Whichever test you choose, regular testing of the water is essential to maintain your aquarium.

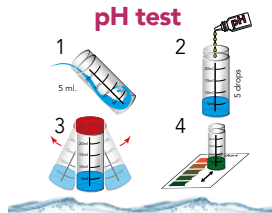

Professional drop test for precise determination of pH - acidity in freshwater aquariums.

**Test range pH 6 - 9**

The handy visualised instructions, included test tubes and colour chart make testing easy.

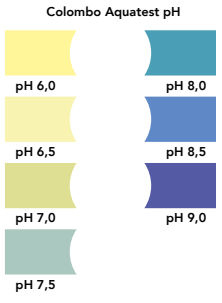

Contents sufficient for 40x pH testing.

### pH test

Ideal value/Idealwaarde/Valeur idéale/Ideale waarde  
 General pH 7.0 - 8.0    Discus & Plants pH 6.0 - 7.0    Tanganyika & Malawi cichlids pH 8.0 - 8.5

C3517100

Colombo Aquatest pH

pH 6,0    pH 8,0  
 pH 6,5    pH 8,5  
 pH 7,0    pH 9,0  
 pH 7,5

**COLOMBO AQUA PH TEST.**  
 S.R.P. **£7.99**  
 Art. no.: A5010960

Professional drop test for precise determination of KH - carbonate hardness in freshwater aquariums.

**Precise test results due to clear colour change at different values.**

The handy visualised instructions and included test tubes make testing easy.

Contents sufficient for an average of 40x KH testing.

### KH test

Ideal value/Idealwaarde/Valeur idéale/Ideale waarde  
 General KH 6 - 8 °DH    Discus & Plants KH 1 - 4 °DH    Tanganyika & Malawi cichlids KH 8 - 10 °DH

C3517100

**COLOMBO AQUA KH TEST.**  
 S.R.P. **£7.99**  
 Art. no.: A5010963

Professional drop test for precise determination of GH - total hardness in freshwater aquariums.

**Precise test results due to clear colour change at different values.**

The handy visualised instructions and included test tubes make testing easy.

Contents sufficient for an average of 40x GH testing.

### GH test

Ideal value/Idealwaarde/Valeur idéale/Ideale waarde  
 General GH 8 - 12 °DH    Discus & Plants GH 4 - 8 °DH    Tanganyika & Malawi cichlids GH 10 - 14 °DH

C3517103

**COLOMBO AQUA GH TEST.**  
 S.R.P. **£7.99**  
 Art. no.: A5010965

Professional drop test for precise determination of NH<sub>3</sub> - ammonia value in freshwater aquariums.

**Sensitive test also for measuring low values.**

The handy visualised instructions and included test tubes make testing easy.

Contents sufficient for 40x Ammonia level testing.

### NH<sub>3</sub> test Ammonia

Ideal value/Idealwaarde/Valeur idéale/Ideale waarde  
 Safe < 0,5 mg/l    Alert 0,5 - 1 mg/l    Warning > 1 mg/l

C3517103

Colombo Aquatest Ammonia (NH<sub>3</sub>)

0,0 mg/l  
 0,5 mg/l  
 1,0 mg/l  
 2,0 mg/l  
 5,0 mg/l

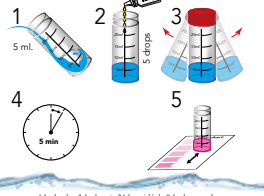

**COLOMBO AQUA AMMONIA TEST.**  
 S.R.P. **£12.49**  
 Art. no.: A5010968

### NO<sub>2</sub> test Nitrite

Ideal value/Idealwaarde/ Valeur idéale/Idiale waarde  
 ✓ Safe < 0,5 mg/l    ✓ Alert 0,5 - 1 mg/l    ✓ SHOCK > 1 mg/l

C3517101

Professional drop test for precise determination of NO<sub>2</sub> - nitrite value in freshwater aquariums.

**Sensitive test also for measuring low values.**

**The handy visualised instructions and included test tubes make testing easy.**

**Contents sufficient for 40x Nitrite level testing.**

**Colombo Aquatest Nitrite (NO<sub>2</sub>)**

	0,0 mg/l	
	0,5 mg/l

Ideal value/Idealwaarde/ Valeur idéale/Idiale waarde  
 ✓ Ideal < 1 mg/l    ✓ High 1 - 2,5 mg/l    ✓ Too high > 2,5 mg/l

C3517104

Professional drop test for precise determination of PO<sub>4</sub> - phosphate content in freshwater aquariums.

**Test range from 0.0 - 5 mg/l**

**The handy visualised instructions and included test tubes make testing easy.**

**Contents sufficient for 40x phosphate level testing.**

**Colombo Aquatest Phosphate (PO<sub>4</sub>)**

	0,0 mg/l	
	0,5 mg/l	
	1,0 mg/l	
	2,0 mg/l	
	5,0 mg/l	

**COLOMBO AQUA PHOSPHATE TEST.**  
 S.R.P. **£12.79**  
 Art. no.: A5010975

### NO<sub>3</sub> test Nitrate

Ideal value/Idealwaarde/ Valeur idéale/Idiale waarde  
 ✓ Ideal < 50 mg/l    ✓ High 50 - 100 mg/l    ✓ Too high > 100 mg/l

C3517102

Professional drop test for precise determination of NO<sub>3</sub> - nitrate value in freshwater aquariums.

**Test range from 0.0 - 100 mg/l**

**The handy visualised instructions and included test tubes make testing easy.**

**Contents sufficient for 40x Nitrate level tests.**

**Colombo Aquatest Nitrate (NO<sub>3</sub>)**

	0 mg/l	
	10 mg/l	
	20 mg/l	
	50 mg/l	
	100 mg/l	

**COLOMBO AQUA NITRATE TEST.**  
 S.R.P. **£12.79**  
 Art. no.: A5010973

Quicktest test strips for freshwater, contains 50 test strips with which you can quickly and conveniently measure the 6 most important values of aquarium water. Test the following values, pH - acidity, KH carbonate hardness, GH - total hardness, NO<sub>2</sub> - nitrite, NO<sub>3</sub> - nitrate and CL - chlorine

**Easily test your water values in 1 minute.**

**Suitable for aquarium and pond.**

**You can test 50 x 6 values, a total of 300 test values! After opening the packaging, store in a dry place and have a limited shelf life.**

**COLOMBO AQUA QUICKTEST 6 - 50 STRIPS.**  
 S.R.P. **£17.99**  
 Art. no.: A5020290

# Colombo Start.

Colombo has developed a 'starting system' to make starting the aquarium care free. Aqua Start makes tap water suitable for the aquarium and protects the fish while Bacto Start initiates and sustains your biological filtration. This way the aquarium comes to life quickly and makes keeping fish easy.

## The start up of a new aquarium will take approximately 4 weeks.

1. Fill the aquarium with water, add Aqua Start to the water and Bacto Start to the filter material.
2. After livestock has been added to the aquarium, a weekly water change of 20% needs to be made, add Aqua Start after every water change.
3. Check the ammonia and nitrite levels twice a week, make an additional water change if these values are too high.

## Pay attention to the values.

After approximately 14 days the ammonia levels will no longer rise, the ammonia test will indicate a value between 0 and 0,5 mg/l.

The nitrite level can still become too high, in order to keep the nitrite level low, for the first fortnight do a weekly water change of 20% and add Aqua Start.

## Aqua Start.

Makes tap water suitable for fish.

Colombo Aqua Start binds heavy metals, chlorine and other toxic substances, making tap water suitable for your fish. Because Colombo Aqua Start also contains coagulants, it also improves the clarity of your aquarium.

For making tap water suitable when filling, starting up and changing your aquarium.

Aqua start contains colloids and vitamins to strengthen your fish's mucous membrane, thereby reducing the risk of disease.

Contents: 100 ml, enough for 250 litres. Use: add 4 ml per 10 litres of water once when filling the aquarium, then at each water change add 4 ml per 10 litres to the fresh water only.

### COLOMBO AQUA START 100 ML.

S.R.P.

**£4.79**

Art. no.: A5010900

### COLOMBO AQUA START 250 ML.

S.R.P.

**£9.49**

Art. no.: A5010903

## Bacto Start.

Bacteria for aquarium filters.

Colombo Bactostart contains live filter and cleaning bacteria for a quick start of your aquarium. These bacteria are essential for the biological balance in the aquarium and keep the water clean and healthy. The start-up of an aquarium takes around 6-8 weeks, with Colombo Bacto Start you will shorten this period and ensure optimal filter performance.

For a quick start-up of the aquarium filter in new aquariums, so you can place fish in the aquarium quicker. Administering bacteria is also important after a major cleaning or drug treatment.

Colombo Bacto Start works best in combination with Colombo Aqua Start. Aqua Start makes the water suitable for the fish. Bacto Start provides the live bacteria.

Contents: 100 ml sufficient for 100 litres of water. Application: in new aquaria, add 10 ml of Bacto Start per 10 litres of water. In existing aquaria and after water changes, add 5 ml per 10 litres every week. Overdosage is not harmful and ensures faster results!

### COLOMBO BACTO START 100 ML.

S.R.P.

**£4.79**

Art. no.: A5010905

### COLOMBO BACTO START 250 ML.

S.R.P.

**£9.49**

Art. no.: A5010907

# Maintenance

Good water quality is essential for a healthy aquarium. With the Colombo maintenance system the maintenance of your aquarium is made easy and simple. Make a 20% water change every fortnight and add Colombo Bacto Care according to the instructions on the packaging.

New

## Black Water.

**Creates Natural Black Water and stabilizes pH.**

Colombo Black Water contains peat extracts, creating natural tropical water (so-called black water) like your fish are used to in their natural habitat. The bioactive substances and natural tannins and humic acids promote vitality, natural colouring and disease resistance of the fish. As a result, your fish will feel at home and display their natural behaviour.

Suitable for all freshwater fish such as discus and angelfish, catfish, Tetras or South American cichlids, and shrimps and crustaceans.

Colombo Black Water stabilises pH levels naturally and improves water quality. The natural peat extract colours the water slightly brownish, reducing light and algae growth.

Contents: 250 ml sufficient for 1000 litres of water. Use: At the start, pump 1 x (2.5ML) per 10 litres of aquarium water, then repeat dosing every 2 weeks, adding 2.5 ML per 10 litres of fresh water with every water change.

**COLOMBO BLACK WATER 250 ML.**

S.R.P.  
**£8.79**

Art. no.: A5010919 

## Alginis.

**Effective control of algae!**

Alginis is effective against all types of algae in freshwater aquaria. By reducing nutrient uptake, among other things, algae can no longer grow and eventually die. Aquarium plants can absorb their nutrients through the aquarium bed and are thus spared

Colombo Alginis fights algae and ensures a crystal-clear aquarium!

Alginis is effective against all types of algae and contains no copper.

Dosage: 1 ml per 20 litres of water, with 100 ml 1000 litres can be treated twice. Always test the aquarium water first and correct if necessary before adding algicide!

**COLOMBO ALGINIS AQUARIUM 100 ML.**

S.R.P.  
**£6.49**

Art. no.: A5010945 

**COLOMBO ALGINIS AQUARIUM 250 ML.**

S.R.P.  
**£12.29**

Art. no.: A5010947 

## Aqua Care.

**Naturally clean & clear water.**

Colombo Aqua Care naturally keeps your aquarium clean and clear. The breakdown of nutrients such as nitrate and phosphate is stimulated in a biological way, thus improving and stabilising water quality. Colombo maintenance products are easy to use and environmentally friendly.

Maintenance product for a healthy aquarium, change 20% of the aquarium water every 2 weeks and add Aqua Care.

Use Aqua Care in combination with Colombo Bacto Care for optimal results. Test aquarium water monthly and correct if necessary.

Contents: 100 ml sufficient for 500 litres. Dosage: 1 ml per 5 litres of water every 2 weeks. After administration, the aquarium water will be cloudy for about 24 hours.

**COLOMBO AQUA CARE 100 ML.**

S.R.P.  
**£4.79**

Art. no.: A5010910 

**COLOMBO AQUA CARE 250 ML.**

S.R.P.  
**£9.49**

Art. no.: A5010912 

## Bacto Care.

**Maintains biology.**

Colombo Bacto Care, live filter and cleaning bacteria that improve filter performance and biological balance in the aquarium. For a clean and healthy aquarium. Colombo maintenance products are easy to use and environmentally friendly.

Maintenance product for a healthy aquarium, change 20% of the aquarium water every 2 weeks and add Bacto Care.

Use Bacto Care in combination with Colombo Aqua Care for optimal results. Test aquarium water monthly and correct if necessary.

Contents 100 ml sufficient for 500 litres. Dosage: 2 ml per 10 litres of water every 2 weeks.

**COLOMBO BACTO CARE 100 ML.**

S.R.P.  
**£5.79**

Art. no.: A5010915 

**COLOMBO BACTO CARE 250 ML.**

S.R.P.  
**£10.49**

Art. no.: A5010917 

# Catappa.

Used for decades in Asia by every fish farmers as the natural method of preventing and curing disease.

## The advantages:

The leaves slowly release natural tannins and humic acids, which soften the water and increase the vitality of the fish. It stimulates the mucus layer and suppresses the level of bacteria and mould in the water.

Catappa leaves are an absolute must for South Asian fish species such as Betta and shrimp. Shrimps and bottom dwellers such as plecos see Catappa leaves as a delicacy and are therefore ideally suited as a natural supplementary food.

## Catappa Nano.

Suitable for Nano Aquariums.

Catappa leaves lower the ph, enhance the colours of fish and shrimp, are stress-reducing, and act as a preventative against diseases in the aquarium. These leaves give the aquarium a natural look and are supplementary food for shrimps and crayfish.

The leaves float for about 2 days, after which they sink.

Use: 1 leaf/15 - 30 l of water. The active ingredients are completely released after 1- 3 weeks.

Nano-Catappa, 10 leaves of 8-10 cm for small freshwater aquariums.

**COLOMBO CATAPPA NANO 10X.**

S.R.P.

**£5.99**

Art. no.: A5010835

8 715897 336195

## Catappa XL.

With antibacterial action.

Catappa leaves lower the ph, enhance the colours of fish and shrimp, are stress-reducing, and act as a preventative against diseases in the aquarium. These leaves give the aquarium a natural look and are supplementary food for shrimps and crayfish.

The leaves float for about 2 days, after which they sink.

Use: 1 leaf/50-100l water. The active ingredients are fully released after 3 weeks.

Catappa, 10 leaves from 12 to 20 cm for freshwater aquariums.

**COLOMBO CATAPPA 10X.**

S.R.P.

**£7.99**

Art. no.: A5010840

8 715897 336201

# Fresh Bacto & PSB.

The living nitrifying bacteria in Colombo Fresh Bacto immediately starts the bacterial cycle of your aquarium and prevents the buildup of toxic ammonia and nitrite. PSB Bacteria has the great ability to break down organic pollution and creates excellent water quality.

## Fresh Bacto.

Speeds up the cycle in a new aquarium.

Normally you have to wait at least a week before you can put some fish in the aquarium, with Colombo Fresh Bacto your aquarium starts up very quickly, the live nitrifying bacteria go to work immediately and prevent problems with ammonia and nitrite.

Store in the fridge <6°C, shake well, suitable for freshwater and seawater.

Colombo Fresh Bacto can also be used after a major cleaning of the aquarium or filter or after treatment with medication, this will prevent water problems.

1000 ml is suitable for 1000 litres of aquarium water, overdosing does no harm, more bacteria means faster action.

**COLOMBO FRESH BACTO 1000 ML.**

S.R.P.

**£42.99**

Art. No.: N3030113

## Fresh Bacto.

Speeds up the cycle in a new aquarium.

Normally you have to wait at least a week before you can put some fish in the aquarium, with Colombo Fresh Bacto your aquarium starts up very quickly, the live nitrifying bacteria go to work immediately and prevent problems with ammonia and nitrite.

Store in the fridge <6°C, shake well, suitable for freshwater and seawater.

Colombo Fresh Bacto can also be used after a major cleaning of the aquarium or filter or after treatment with medication, this will prevent water problems.

250 ml is suitable for 250 litres of aquarium water, overdosing does no harm, more bacteria means faster action.

**COLOMBO FRESH BACTO 250 ML.**

S.R.P.

**£13.99**

Art. No.: N3030110

## Fresh PSB.

Perfect water quality and less pollution.

PSB bacteria provide great water quality and more beautiful fish. These live PSB bacteria go straight to work in the aquarium and break down organic pollution. The strong smell of PSB is normal, this means the bacteria are alive!

Store in the fridge <6°C, shake well, suitable for freshwater and seawater.

PSB bacteria also contain many vitamins, minerals and amino acids that promote aquarium and fish health.

250 ml is suitable for 250 litres of aquarium water, overdosing does no harm, more bacteria means faster action.

**COLOMBO FRESH PSB 250 ML.**

S.R.P.

**£7.99**

Art. No.: N3030115

## Live Phytoplankton.

Healthy and natural nutrition for coral.

In your aquarium they are the start of the food chain. Nannochloropsis as phytoplankton are a direct food source for corals but also indirectly through zooplankton, larvae and small invertebrates they have many positive effects

Store cool (4°C) in original packaging, shake before usage as living algae will precipitate.

Phytoplankton absorbs Nitrate and Phosphate reducing water values and prevents algae growth.

Dosage: Start with adding 1ml per 50 litres of Seawater daily during two weeks, then increase to 1ml per 25 litres of Seawater.

**COLOMBO FRESH PLANKTON 250 ML.**

S.R.P.

**£8.99**

Art. No.: N3030100

# Substrate, Fertilizer and CO<sub>2</sub> systems.

---

◀◀  
INDEX

For beautiful aquarium plants

---

# The right substrate for healthy & optimal growth.

A good nutrient base is the basis for an attractively planted aquarium. Aquarium plants take nutrition from the ground in order to grow, and the roots can attach themselves in the ground.

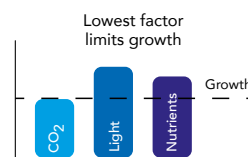

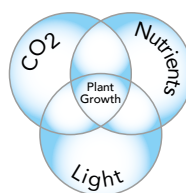

For plant species such as Echinodorus and Cryptocoryne, a nutrient base is the most important food source for growth.

## What do plants need?

For optimal plant growth, 3 factors must be in balance: light, nutrition and CO<sub>2</sub>. The factor which is least available in the trinity will restrict plant growth and thus create scope for algae growth.

The light requirements of plants can be easily met by using aquarium lighting with special lamps that promote plant growth. The Colombo plants range includes a line of products that can provide the other factors that are important for healthy plant growth, namely nutrition and CO<sub>2</sub>.

Like plants in the garden, aquarium plants also require fertilisation. In addition to the nutrients which are absorbed through the roots, aquarium plants also take up nutrients through their leaves. CO<sub>2</sub> is indispensable for healthy plant growth. Generally speaking, aquarium water does not contain sufficient CO<sub>2</sub> to enable plants to grow properly. Colombo FloraBase Pro nutrient medium lowers the pH value of the water, thereby increasing the amount of CO<sub>2</sub> available.

## Our soils.

When it comes to choosing the soil for your aquarium, Colombo has three products: NutriBase, ManoBase and FloraBase Pro.

The right soil is the base for healthy plants and optimal plant growth!

## NutriBase.

Substrate for Aquarium Plants

NutriBase is a complete nutrient base.

## ManoBase.

Natural substrate for plants & fish

ManoBase is a natural substrate that can be used as a top layer

## FloraBase Pro.

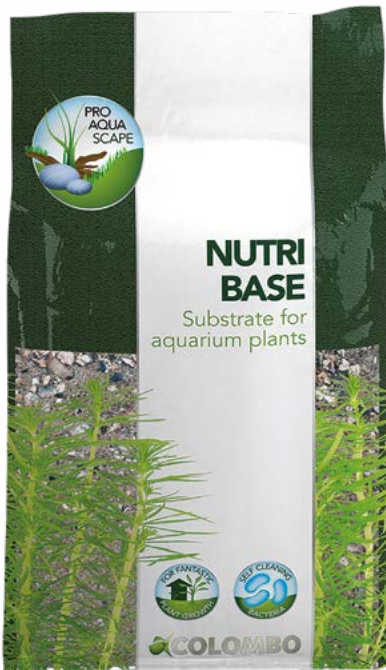

For fantastic plant growth

FloraBase Pro is a pH regulating soil for optimal plant growth.

# NutriBase.

Complete substrate for aquarium plants containing all necessary nutrients for healthy plant growth.

## NutriBase. Substrate for Aquarium Plants

Developed in collaboration with experts in growing plants, NutriBase contains all the necessary nutrients for healthy plant growth. NutriBase is the basic nutrient in the aquarium and should be covered with a top layer such as Mano Base or Flora Base Pro.

Complete substrate for aquarium plants, the open structure ensures good circulation in the aquarium bed

Added beneficial bacteria break down dirt and keep the substrate clean

Contents 5 litres, sufficient for a 5 cm layer in a 40x25 cm aquarium.

### COLOMBO FLORA NUTRI BASE 5 L.

S.R.P.

**£14.99**

Art. no.: A5010030

8 715897 164088

# ManoBase.

Colombo ManoBase is a natural soil with an open structure that enables optimal plant growth.

## 2 variants.

ManoBase is only suitable for freshwater aquaria. ManoBase is available in two colours: red and black and in 5 or 10 litre bags. The diameter of the particles is 1-2 mm.

## ManoBase Red.

Better substrate than gravel

Colombo ManoBase is a natural substrate that can be used as a top layer in any aquarium, from beginner to specialist. Unlike solid gravel, ManoBase is open and light, both in terms of particles and structure. The open particles allow rapid and massive colonisation by beneficial bacteria, which are vital for water quality stability.

ManoBase is suitable for freshwater aquaria only.

ManoBase is available in two colours: red and black and in 5- or 10-litre bags. The diameter of the particles is 1-2 mm.

Contents 5 litres, sufficient for a 5 cm layer in a 40x25 cm aquarium.

### COLOMBO FLORA MANO BASE RED 5 L.

S.R.P.

**£13.99**

Art. no.: A5010017

8 715897 337628

### COLOMBO FLORA MANO BASE RED 10 L.

S.R.P.

**£18.99**

Art. no.: A5010020

8 715897 336959

## ManoBase Black.

Contrasting colour enhances the colour of the fish

Colombo ManoBase is a natural substrate that can be used as a top layer in any aquarium, from beginner to specialist. Unlike solid gravel, ManoBase is open and light, both in terms of particles and structure. The open particles allow rapid and massive colonisation by beneficial bacteria, which are vital for water quality stability.

ManoBase is suitable for freshwater aquaria only.

ManoBase is available in two colours: red and black and in 5- or 10-litre bags. The diameter of the particles is 1-2 mm.

Contents 5 litres, sufficient for a 5 cm layer in a 40x25 cm aquarium.

### COLOMBO FLORA MANO BASE BLACK 5 L.

**£22.99**

Art. no.: A5010025

8 715897 336966

# FloraBase Pro.

pH regulating soil for fantastic plant growth.

## FloraBase Pro.

pH regulating soil for fantastic plant growth.

Made in Japan

FloraBase Pro is a unique aquarium soil produced in Japan. FloraBase lowers and stabilises the pH to 6. At this pH level, more CO<sub>2</sub> is naturally available for good plant growth. The CO<sub>2</sub> content of the water is very important for optimal plant growth. Many fish species such as Discus fish, species from South America and shrimps like a low pH of 6, these animals love FloraBase Pro! FloraBase Pro is recommended by experts!

### Attention!

FloraBase PRO should not be washed before use, any cloudiness of the water is harmless and disappears after a few days.

Starting an aquarium is much easier with FloraBase Pro, the plants grow better due to the low pH and at a pH level below 7, you will not be bothered by toxic ammonia.

FloraBase Pro is rich in nutrients and its open structure ensures strong roots. The pellets do not disintegrate and retain their shape.

Contents 1 litre, sufficient for a 5 cm layer in a 20x10 cm aquarium.

## Plant growth in 30 days with FloraBase soil.

# FloraGrow.

## FloraGrow. Liquid leaf fertilizer

FloraGrow is a liquid plant food for normally planted aquariums. It supplies the water with the nutrients that plants absorb from the water through their leaves. It contains all necessary nutrients and a special iron additive that can be absorbed directly by the plant. Dose FloraGrow once a week.

Developed by plant experts, convenient dosing with hand pump.

Plant food for normally planted aquariums, with special iron addition.

Contents: 250 ml is sufficient for 1250 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

Weekly plant food with special iron addition, for normally planted aquariums

Contents: 500 ml is sufficient for 2,500 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

Contents: 2,500 ml is sufficient for 12,500 litres of water. Dosage: 10 ml per 50 litres of aquarium water, weekly dosage.

## FloraGrow Carbo. Alternative for CO<sub>2</sub>

FloraGrow Carbo contains a substance that serves as a replacement for CO<sub>2</sub>. In aquaria without a CO<sub>2</sub> system, the use of FloraGrow Carbo is indispensable. By adding FloraGrow Carbo, plants can absorb the alternative carbon source without having to administer CO<sub>2</sub>.

Besides its positive effect on plant growth, Carbo also helps reduce algae growth!

Liquid alternative to CO<sub>2</sub>, must be added daily for optimal results.

Contents: 250 ml is sufficient for 12500 litres of water. Dosage: pump once for 50 litres of aquarium water, dose daily.

Contents: 500 ml is sufficient for 25000 litres of water. Dosage: pump once for 50 litres of aquarium water, dose daily.

Contents: 2500 ml is sufficient for 125,000 litres of water. Dosage: 1ml for 50 litres of aquarium water, dose daily.

## FloraGrow Pro. Special leaf fertilizer

FloraGrow Pro is special liquid plant food for heavily planted aquaria, Flora Grow Pro was developed together with aquarium plant nursery Aquafleur and contains all important nutrients in a balanced composition plus nitrates and phosphates for brilliant plant growth.

In normally planted aquaria, sufficient nutrients are present because they are released from fish food and transformed in the filter. In aquaria with many plants, these substances are insufficient, in this case use FloraGrow Pro.

Liquid foliar feed for heavily planted "scaped" aquariums with relatively few fish

Contents: 250 ml is sufficient for 1250 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

Contents: 500 ml is sufficient for 2,500 litres of water. Dosage: pump once for 5 litres of aquarium water, dose weekly.

# Supplements.

## Nutri Caps.

Nutri Caps allow you to introduce nutrition into the aquarium bed, directly at the roots where the plants need it. Plants take up nutrition via the leaves, but also via the soil, which is why sufficient nutrition in the soil is important, especially for plants with many roots such as Echinodorus etc.! Even if you start with a good nutrient medium, after a while the medium becomes poor in nutrients, Nutricaps offer the solution.

Fertiliser capsules for the aquarium base, provides nutrition directly to the roots of the plants.

The Nutri Caps work with Osmocote which ensures a long-term regular release of nutrients for optimal plant growth.

Package contains 10 capsules. Once every 6 months, insert 1 capsule deep into the soil on large plants or use 1 capsule per 20 cm<sup>2</sup> of soil surface.

**COLOMBO FLORA NUTRI CAPS 10X.**

S.R.P.

**£7.49**

Art. no.: A5010145

## FE-Tabs (Iron Tablets).

FE tablets deliver iron to the roots, iron is the most important trace element for aquarium plants. Many plants absorb iron only through the roots, pressing the FE tablets into the soil enriches the nutrient medium with high-quality iron, for healthy and brilliant plant growth.

Iron capsules for the aquarium base, provides iron nutrition directly to the roots of the plants.

Iron deficiency causes growth problems, especially Echinodorus, Cryptocoryne and red plants need extra iron.

Package contains 10 tablets: Use: Every 6 months, insert 1 tablet per 10 cm<sup>2</sup> of soil surface, deep into the soil, close to the roots of plants.

**COLOMBO FLORA FE TABS 10X.**

S.R.P.

**£9.49**

Art. no.: A5010150

# Plant NPF System.

You take good care of your aquarium plants and regularly apply plant food. But which nutrients do your plants really use? This is different in every aquarium. That's why Colombo has developed the NPF Plant System!

By testing, you will know exactly which nutrients are needed and then add them accordingly. This prevents overfeeding and unwanted algae growth.

**Use the 3 test kits developed by Colombo to measure Nitrate (Nitro), Phosphorus (Phospho) and Iron (Ferro) levels in aquarium water. Use the test kits to regularly measure the Nitrate, Phosphate and Ferro values of the water. Then add the exact amount of Colombo Nitro, Phospho and Ferro nutrition using the handy dosing pump on the bottle. This keeps these 3 crucial nutrient values at the right level and your plants have perfect nutrition, without too much nutrition which encourages algae growth. It's that simple.**

Professional drip test with adapted measuring range for precise determination of nitrate value for fertilisation of aquarium plants.

**Test range Nitrate 0 - 30 mg/l**

The handy visualised instructions, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

**COLOMBO FLORA NITRO TEST.**  
S.R.P. **£11.99**  
Art. no.: A5010500

Professional drop test with adapted measuring range for precise determination of phosphate value for fertilising aquarium plants.

**Test range Phosphate 0,2 - 1,5 mg/l**

The handy visualised instructions, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

**COLOMBO FLORA PHOSPHO TEST.**  
S.R.P. **£12.99**  
Art. no.: A5010505

Professional drop test with adapted measuring range for precise determination of iron value for fertilisation of aquarium plants.

**Test range Iron 0.05 - 0.75 mg/l**

The handy visualised instructions, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

**COLOMBO FLORA FERRO TEST.**  
S.R.P. **£14.49**  
Art. no.: A5010510

## What is required for beautiful plants?

The following 3 factors must be in balance: light, CO<sub>2</sub> and nutrition. The factor that is least available in this 3-unit limits plant growth and thus creates room for algae growth.

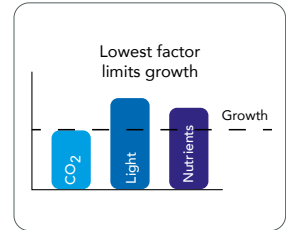

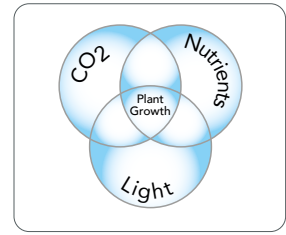

**Modern LED lighting** can meet the light requirements of plants. When buying lamps, pay attention to the PAR value of the lighting, which is the light your plants use for growth. We recommend PAR +200.

CO<sub>2</sub> should be administered with a CO<sub>2</sub> system. Colombo has various systems for every size aquarium and budget. Installing a Colombo CO<sub>2</sub> indicator to make sure you always have the optimum CO<sub>2</sub> level in your aquarium.

Proper nutrition starts with a good nutrient bed when you set up your aquarium with Colombo Nutribase and/or Florabase, for example.

However, the substrate mainly transfers nutrients to the roots, and aquarium plants in particular get a lot of nutrition from the water. The Colombo Flora Plant system is made to ensure that you always have the right amount of nutrients in the water.

In the water, 3 nutrients are important for aquarium plants: N (nitrogen), P (phosphorus) and Fe+ (iron plus). Fe+ contains all the other nutrients important for plants such as iron, potassium, magnesium, manganese, zinc, cobalt, boron and many others. If you keep these 3 groups in the right concentration in your aquarium, your plants will be able to grow optimally.

# CO<sub>2</sub> Basic Set.

Plants need CO<sub>2</sub> for their growth. During the day, when there is light, plants absorb CO<sub>2</sub> and produce oxygen. During the night this process reverses, CO<sub>2</sub> is released and oxygen absorbed.

## CO<sub>2</sub> Basic Set.

The CO<sub>2</sub> Basic Set provides an easy way to add CO<sub>2</sub> to small aquariums. Fill the diffuser with CO<sub>2</sub> and contact with the water absorbs the CO<sub>2</sub> gas.

Handy CO<sub>2</sub> basic set for small aquariums, ready to use in minutes.

Order refill bottles from your dealer so you can continue dosing CO<sub>2</sub> inexpensively when the first bottle is empty.

Contents 12 grams of CO<sub>2</sub>, check the CO<sub>2</sub> content of the aquarium water with the CO<sub>2</sub> indicator.

### COLOMBO CO2 KIT BASIC.

S.R.P.

**£12.99**

Art. no.: A5010175

8 715897 244018

## CO<sub>2</sub> Basic Set Refill.

Colombo CO<sub>2</sub> Basic Set refill, pressure bottle with 12 grams of CO<sub>2</sub>

Also suitable for the Colombo CO<sub>2</sub> basic set

Check the CO<sub>2</sub> content of the aquarium water with the CO<sub>2</sub> indicator, so you know whether you are dosing enough CO<sub>2</sub> or need to adjust the dosage.

Contents 12 grams of CO<sub>2</sub>.

### COLOMBO CO2 BASIC REFILL 12 GRAM.

S.R.P.

**£5.49**

Art. no.: A5010180

8 715897 244025

## CO<sub>2</sub> Advance Set.

The Colombo CO<sub>2</sub> advance set consists of a pressure cylinder containing 95 grams of CO<sub>2</sub>, a pressure regulator, a 3-in-1 diffuser and all connections. The pressure regulator controls the amount of CO<sub>2</sub> flowing into the diffuser. Inside the diffuser, the built-in bubble counter allows you to see how many CO<sub>2</sub> bubbles are released in a given time. The diffuser produces very fine bubbles so that the CO<sub>2</sub> gas is well absorbed by the water.

Complete CO<sub>2</sub> set for aquariums up to 100 litres

With the adaptor available as an accessory, you can upgrade this set and use a large 800 or 1200-gram CO<sub>2</sub> bottle.

Pressure regulator with 5/8-18 UNF thread and 95g CO<sub>2</sub> cylinder.

### COLOMBO CO2 KIT ADVANCE 95GR.

S.R.P.

**£125.99**

Art. no.: A5010185

8 715897 244032

## 95 gram CO<sub>2</sub> cylinder.

CO<sub>2</sub> cylinder for the Colombo CO<sub>2</sub> advance set. Contents 95 grams, for 1-time use.

Refill for Colombo CO<sub>2</sub> Advance set

With 5/8-18 UNF thread.

Contents 95 grams of CO<sub>2</sub>.

### COLOMBO CO2 ADVANCE CYLINDER 95 GRAM.

S.R.P.

**£21.99**

Art. no.: A5010190

8 715897 244186

## Advance pressure regulator.

CO<sub>2</sub> advance pressure regulator for 95-gram CO<sub>2</sub> capsules, for precise control of CO<sub>2</sub> release.

Pressure reducer with intermediate chamber for constant CO<sub>2</sub> release

Suitable for 95-gram CO<sub>2</sub> cylinders with 5/8-18 UNF connection

### COLOMBO ADVANCE CO2 PRESSURE REGULATOR.

S.R.P.

**£78.99**

Art. no.: A5010312

8 715897 081101

## CO<sub>2</sub> Advance Set with 800 gr/1200 gr. Cylinder.

Using this adapter ring, you can use the pressure regulator of the Advance set on the 800 & 1200gram cylinder. This way, the cylinder needs to be changed less often and CO<sub>2</sub> use is almost 70% cheaper.

Makes the Colombo Advance CO<sub>2</sub> set suitable for the Colombo 800 or 1200 gram CO<sub>2</sub> bottle.

Save up to 70% on the cost of CO<sub>2</sub> usage with our 800 and 1200g CO<sub>2</sub> cylinders.

Adapter from 5/8-18 UNF to M10 x1.

### COLOMBO CO2 ADAPTOR 95 -> 800&1200 GRAM.

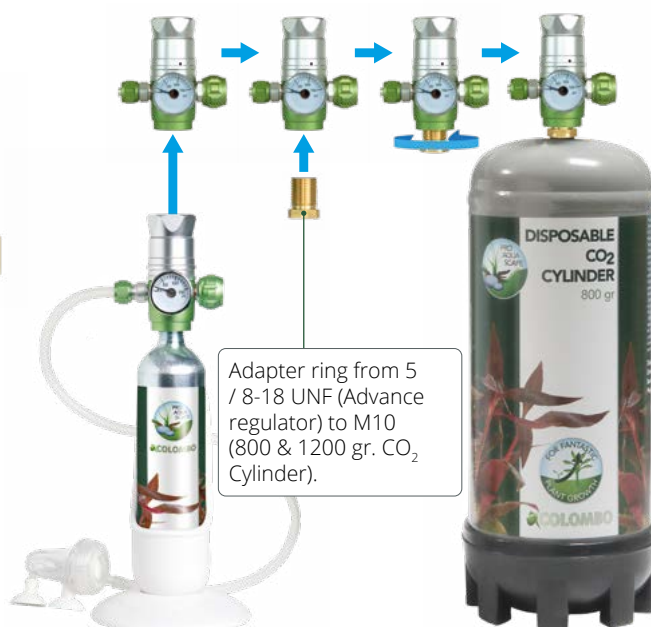

S.R.P.

**£13.99**

Art. no.: A5010200

8 715897 244209

Adapter ring from 5 / 8-18 UNF (Advance regulator) to M10 (800 & 1200 gr. CO<sub>2</sub> Cylinder).

## CO<sub>2</sub> Profi Set:

The CO<sub>2</sub> Profi Set is a professional CO<sub>2</sub> system and includes a pressure regulator, a 3-in-1 diffuser, a disposable bottle with 800 grams of CO<sub>2</sub> and all connections. You can expand the CO<sub>2</sub> Profi Set with a solenoid valve, which is available as an accessory from your dealer.

Professional CO<sub>2</sub> set for aquaria from 50 to 400 litres

The iron pressure cylinder is for single use, the cylinder is fully recyclable and therefore good for the environment. Supplied with M10 schrader valve.

Contents 800 g CO<sub>2</sub> for weeks of CO<sub>2</sub> administration

### COLOMBO CO2 PROFI SET 800 GRAM.

S.R.P.

**£179.99**

Art. no.: A5010189

8 715897 285295

## CO<sub>2</sub> Cylinder 800 grams:

Pressure cylinder for 1-time use with a capacity of 800 grams of CO<sub>2</sub> with M10 schrader valve. Suitable for the Colombo CO<sub>2</sub> profi set or with adaptor ring for the Colombo CO<sub>2</sub> advance set and other brands.

Economical refill for CO<sub>2</sub> Profi set, or with the special adapter ring on the advance set

The iron pressure cylinder is for single use, the cylinder is fully recyclable and thus good for the environment.

Contents 800 g CO<sub>2</sub> for weeks of CO<sub>2</sub> administration

### COLOMBO CO2 CYLINDER 800 GRAM.

S.R.P.

**£48.99**

Art. no.: A5010195

8 715897 244193

## CO<sub>2</sub> Cylinder 1200 grams:

Pressure cylinder for 1-time use with a capacity of 1200 grams of CO<sub>2</sub> with M10 schrader valve. Suitable for the Colombo CO<sub>2</sub> profi set or with adaptor ring for the Colombo CO<sub>2</sub> advance set and other brands.

Economical refill for CO<sub>2</sub> Profi set, or with the special adapter ring on the advance set

The iron pressure cylinder is for single use, the cylinder is fully recyclable and thus good for the environment.

Contents 1200 g CO<sub>2</sub> for weeks of CO<sub>2</sub> administration

### COLOMBO CO2 CYLINDER 1200 GRAM.

S.R.P.

**£53.99**

Art. no.: A5010197

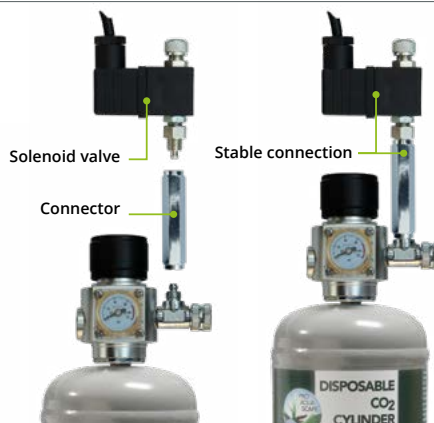

8 715897 343094

## Solenoid valve.

The system can be optionally equipped with a solenoid valve.

As plants only absorb CO<sub>2</sub> during the day, the supply can be stopped at night. By installing the solenoid valve, this can be done automatically using a time switch. The solenoid valve pays for itself, as you save a lot on CO<sub>2</sub> cylinders!

Save 50% or more CO<sub>2</sub> with this electric solenoid valve.

Easy to switch with a timer.

230 volt, 2 watts. 1.5-metre cable with UK plug. 4-6 mm connection with fixing bolt.

### COLOMBO CO2 SOLENOID CONNECTOR.

S.R.P.

**£11.99**

Art. no.: A5010255

8 715897 319600

### COLOMBO CO2 SOLENOID VALVE.

S.R.P.

**£55.95**

Art. no.: A5010205

8 715897 244216

## CO<sub>2</sub> Reactor.

**Make your own CO<sub>2</sub> with 2 components. No more changing pressure bottles!**

With the Colombo CO<sub>2</sub> reactor you can easily make CO<sub>2</sub> yourself with two components! Instead of buying or changing pressure bottles, the empty cylinder the 2-component can easily be refilled with pure CO<sub>2</sub> gas. The cylinder is made of 314 stainless steel. Complete set with bottle holder, pressure regulator, solenoid valve, bubble counter, non-return valve, outlet valve, accessories and spare parts.

**Make your own CO<sub>2</sub> with 2 components. No more changing pressure bottles!**

**How does it work? Open the cylinder and add the 2-components and 300 ml of water, close the bottle with the pressure regulator, the chemical reaction creates around 105 grams of CO<sub>2</sub> gas in 30 minutes.**

**Note: The refill is not included, buy it separately from your dealer; Colombo CO<sub>2</sub> reactor refill A5010340**

### COLOMBO CO2 REACTOR KIT 2,3L.

S.R.P.  
**£199.99**

Art. no.: A5010325

### COLOMBO CO2 REACTOR SET SPARE DIFFUSER.

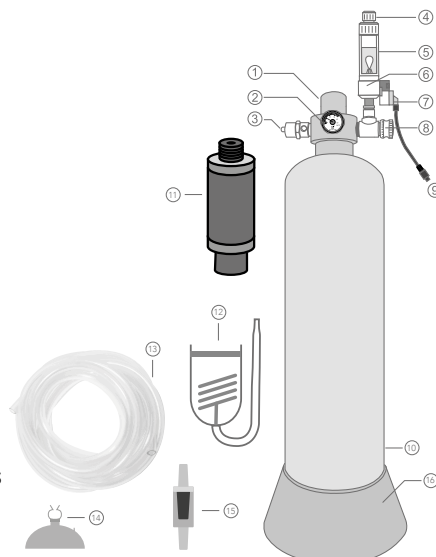

S.R.P.  
**£8.79**

Art. no.: A5010260

## CO<sub>2</sub> reactor Parts:

1. Pressure regulator
2. Pressure gauge
3. Pressure relief valve
4. Hose connector
5. Bubble counter
6. Bubble counter base
7. Solenoid
8. Adjustment knob
9. Cable connector
10. Stainless steel cylinder
11. Moisture filter
12. Diffuser
13. Hose
14. Hose clamp with suction cups
15. Non-return valve
16. Cylinder base

## CO<sub>2</sub> Reactor Refill.

Special 2-component refill for the Colombo CO<sub>2</sub> reactor, contains 3 sets of component A and B that allow you to fill the CO<sub>2</sub> reactor 3 times.

**Make your own CO<sub>2</sub> with 2 components. No more changing pressure bottles!**

**How does it work? Open the cylinder and add the 2-components and 300 ml of water, close the bottle with the pressure regulator, the chemical reaction creates around 105 grams of CO<sub>2</sub> gas in 30 minutes.**

**1 pack is thus sufficient to make about 315 grams of CO<sub>2</sub>.**

### COLOMBO CO2 REACTOR REFILL 1,2 KG.

S.R.P.  
**£16.49**

Art. no.: A5010340

## Profi pressure regulator.

Pressure regulator for M10x1 connection. With double chamber, separate fine control, an open and close valve and a mano meter.

**Suitable for Colombo 800 and 1200 gram cylinder.**

**Due to the double chamber, the amount of CO<sub>2</sub> added always remains the same.**

**M10x1 connection.**

### COLOMBO CO2 PROFI REGULATOR M10.

S.R.P.  
**£98.99**

Art. no.: A5010217

### COL. CO2 PROFI O-RING REGULATOR 2X.

S.R.P.  
**£3.49**

Art. no.: A5010219

## 3 in 1 diffuser.

With the 3 in 1 diffuser, you have a check valve, bubble counter and diffuser in one device. Available in Medium and Large models.

3 in 1 space-saving CO<sub>2</sub> diffuser.

Equipped with bubble counter for simple dosing.

Made of crystal-clear acrylic, it has the optics of glass but is not as breakable!

### COLOMBO CO2 3-1 DIFFUSER MEDIUM.

S.R.P. **£13.49**

Art. no.: A5010208

### COLOMBO CO2 3-1 DIFFUSER LARGE.

S.R.P. **£15.49**

Art. no.: A5010210

## Scaper CO<sub>2</sub> Diffuser.

Professional CO<sub>2</sub> Diffuser, perfect for Aquascaping.

### Spare Diffuser.

Made of crystal-clear acrylic with the optics of glass but not as fragile.

Available in 25, 35 and 40 cm, with catchable diffuser available as an accessory from your dealer.

For aquariums between 50-60 cm high

### SCAPER CO2 DIFFUSER 40 CM.

S.R.P. **£29.99**

Art. no.: A5010235

### SCAPER CO2 DIFFUSER 35 CM.

S.R.P. **£29.99**

Art. no.: A5010235

### SCAPER CO2 SPARE DIFFUSER.

S.R.P. **£8.49**

Art. no.: A5010237

Adapter ring to make pressure regulators with an M10x1.25 thread suitable for the Colombo 800 or 1200 gram CO<sub>2</sub> bottle.

Dennerle and other brands uses pressure regulators with an M10x1.25 thread.

### COLOMBO CO2 ADAPTOR DENNERLE 500GR.

S.R.P. **£13.99**

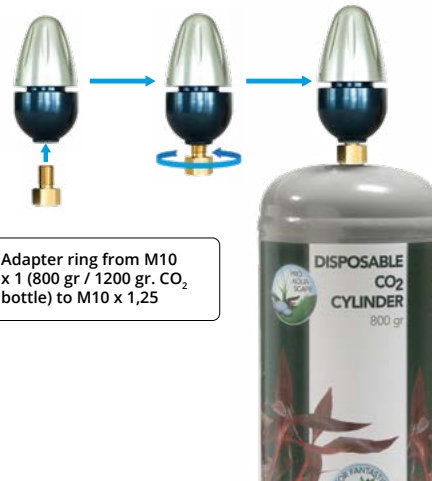

Art. no.: A5010213

### COLOMBO CO2 O-RING FOR REGULATOR 2X.

S.R.P. **£3.49**

Art. no.: A5010215

Adapter ring from M10 x 1 (800 gr / 1200 gr. CO<sub>2</sub> bottle) to M10 x 1,25

## Adapter (Dennerle).

The adapter ring allows you to use a pressure regulator with an M10x1.25 thread (Dennerle) on the Colombo 800 and 1200 gram CO<sub>2</sub> bottle with an M10x1.0 connection.

## CO<sub>2</sub> indicator.

The CO<sub>2</sub> indicator is an indispensable tool when using a CO<sub>2</sub> system. The indicator shows the CO<sub>2</sub> value, so you know how much CO<sub>2</sub> is in the aquarium water and can adjust the CO<sub>2</sub> system to the correct amount.

CO<sub>2</sub> CO<sub>2</sub> indicator for all sizes of aquariums.

By measuring the CO<sub>2</sub> value you can set the CO<sub>2</sub> system properly you save CO<sub>2</sub>.

Supplied complete with suction cup and 2x10 ml reagents.

### COLOMBO CO2 INDICATOR.

S.R.P. **£14.49**

Art. no.: A5020295

INDEX

**NITRATE TEST**  
algae  
40 tests

Professional drop test for precise determination of nitrate levels in seawater.

**Test range Nitrate 0 - 4 mg/l**

The handy visualised instructions for use, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

1. 20 ml
2. 5 drops
3. 5 drops
4. 20 secs.
5. COLOMBO

Colombo Marine Nitrate (NO<sub>3</sub>)

0,0 mg/l
0,25 mg/l
0,50 mg/l
1,0 mg/l
2,0 mg/l
4,0 mg/l

Nr.: 59238

**COLOMBO MARINE NITRATE TEST.**  
S.R.P. **£10.99**  
Art. No.: N5060530

8 715897 259258

**PHOSPHATE TEST**  
algae  
40 tests

Professional drop test for precise determination of phosphate content in seawater.

**Test range Phosphate 0.03 - 0.8 mg/l**

The handy visualised instructions for use, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

1. 20 ml
2. 10 drops
3. 2 drops
4. 10 min
5. COLOMBO

Colombo Marine Fosfaat (PO<sub>4</sub>)

0,03 mg/l
0,06 mg/l
0,10 mg/l
0,20 mg/l

**COLOMBO MARINE IODINE TEST (COLOUR 1).**  
S.R.P. **£12.49**  
Art. No.: N5060555

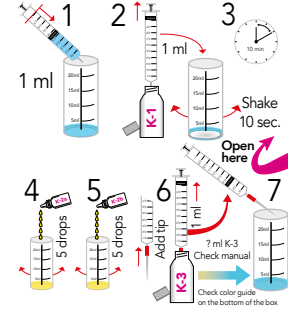

**Test range Iodine 0 - 0.1 mg/l**

The handy visualised instructions for use, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

**COLOMBO MARINE POTASSIUM TEST (COLOUR 2).**  
S.R.P. **£20.99**  
Art. No.: N5060550

**Professional drop test for precise determination of potassium levels in seawater.**

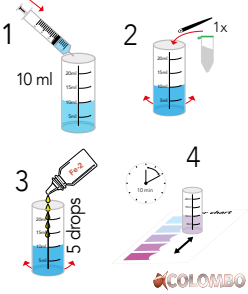

**Instructions.**  
Instructions are on the back of each test kit.

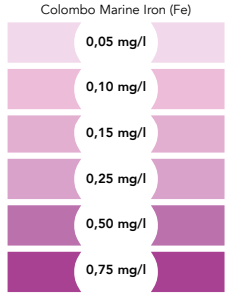

**The handy visualised instructions for use, included test tubes and accessories make testing easy.**

Depending on the potassium value, the contents of the package are on average sufficient for 40 tests

INDEX

**COLOMBO MARINE IRON TEST (COLOUR 3).**  
S.R.P. **£12.49**  
Art. No.: N5060560

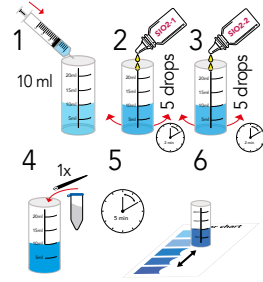

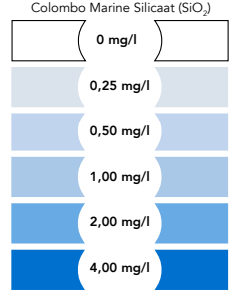

**Test range Iron 0.05 - 0.75 mg/l**

The handy visualised instructions for use, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

**COLOMBO MARINE SILICATE TEST.**  
S.R.P. **£10.99**  
Art. No.: N5060650

**Professional drop test for precise determination of Silicate content in seawater.**

**Silicate test range: 0 - 4 mg/l**

The handy visualised instructions for use, included test tubes and accessories make testing easy.

The contents in the pack are sufficient for 40 tests

## Bacto Start.

Complete & quick build up of biology

Bacto contains a unique blend of specially selected bacteria that provide a complete and rapid build-up of biology in the marine aquarium.

### COLOMBO MARINE BACTO 500 ML.

S.R.P.  
**£14.49**

Art. No.: N5060400

### COLOMBO MARINE BACTO 1000 ML.

S.R.P.  
**£20.49**

Art. No.: N5060405

At the start, rapid biological build-up is very important to avoid problems such as algae growth as much as possible.

After starting the aquarium, add Bacto weekly for optimal biology in which fish and invertebrates thrive optimally.

Contents 500 ml, sufficient for starting up 250 litres

Contents 1000 ml, sufficient for starting 500 litres

## KH Plus.

For optimal KH values

Liquid KH booster to maintain an optimal KH, between 8 and 12°DH. Test the KH value and add KH-plus to compensate for consumption.

### COLOMBO MARINE KH+ 500 ML.

S.R.P.  
**£11.49**

Art. No.: N5060410

### COLOMBO MARINE KH+ 1000 ML.

S.R.P.  
**£17.99**

Art. No.: N5060415

### COLOMBO MARINE KH+ 2500 ML.

S.R.P.  
**£32.99**

Art. No.: N5060417

This concentrated formula provides the maximum KH increase without precipitation.

Ready-to-use liquid, you can dose it directly into your marine aquarium

Contents 500 ml increases KH by 4° in 1,250 ltr

Contents 1000 ml increases KH by 4° in 2,500 ltr

Contents 2500 ml increases KH by 4° in 6,250 ltr

## Bacto Balls.

Colombo bacto balls contain a unique blend of specially selected bacteria that provide complete and stable biology in the marine aquarium.

The special bio polymer balls ensure even release.

500 ml, sufficient for 100 litres of water for 40 weeks.

1000 ml, sufficient for 200 litres of water for 40 weeks.

### COLOMBO MARINE BACTO BALLS 500 ML.

S.R.P.  
**£19.99**

Art. No.: N5060630

### COLOMBO MARINE BACTO BALLS 1000 ML.

S.R.P.  
**£28.99**

Art. No.: N5060635

## Bacto Balls Dispenser.

The handy dispenser allows easy application of the Bacto Balls and easy removal of residues from the aquarium after use.

You easily mount and remove the dispenser in your sump or aquarium with the suction cups provided

### COLOMBO MARINE BACTO BALL DISPENSER.

S.R.P.  
**£5.99**

Art. No.: N5060640

## KH Plus Powder.

KH booster to maintain an optimum KH, between 8 and 12°DH. Test the KH value and add KH-plus to compensate for consumption.

This concerns the economical powder form. With this, a stock solution can be made to maintain magnesium levels very economically.

Contains high-quality, high-purity ingredients for efficient and safe use.

Contents 1000 ml = approx. 1.3 kg. Increases the KH value by 4°DH in 10,000 litres of water.

### COLOMBO MARINE KH+ POWDER 1.000 GR..

S.R.P.  
**£17.49**

Art. No.: N5060420

## Calcium Plus.

Additives from natural seawater!

Liquid Calcium addition to maintain an optimum value, between 410 and 440 mg/l. Test the Calcium value and add Calcium plus to compensate for consumption.

**COLOMBO MARINE CALCIUM + 500 ML.**

S.R.P.

**£11.49**

Art. No.: N5060425

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

**COLOMBO MARINE CALCIUM + 1000 ML.**

S.R.P.

**£17.99**

Art. No.: N5060430

Contents 500 ml, increases Calcium content by 50 mg/l in 500 litres of water.

**COLOMBO MARINE CALCIUM + 2500 ML.**

S.R.P.

**£32.49**

Art. No.: N5060433

Contents 1000 ml, increases Calcium content by 50 mg/l in 1000 litres of water.

Contents 2500 ml, increases Calcium content by 50 mg/l in 2500 litres of water.

## Calcium Plus.

Additives from natural seawater!

Liquid Calcium addition to maintain an optimum value, between 410 and 440 mg/l. Test the Calcium value and add Calcium plus to compensate for consumption.

This concerns the economical powder form. This can be used to make a stock solution to maintain calcium levels very economically.

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

Contents 1000 ml = approx. 1.0 kg. Increases the calcium content by 115 mg/l in 1000 litres of water

**COLOMBO MARINE CALCIUM + POWDER 1L.**

S.R.P.

**£17.99**

Art. No.: N5060435

## Magnesium.

Additives from natural seawater!

Liquid Magnesium addition to maintain an optimum value, between 1250 and 1300 mg/l. Test the Magnesium value and add Magnesium plus to compensate for consumption.

Ready-to-use liquid to add magnesium, it can be added directly to seawater.

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

**COLOMBO MARINE MAGNESIUM+ 500 ML.**

S.R.P.

**£11.49**

Art. No.: N5060440

**COLOMBO MARINE MAGNESIUM+ 1000 ML.**

S.R.P.

**£17.99**

Art. No.: N5060445

Contents 500 ml, increases Magnesium content by 175 mg/l in 500 litres of water.

Contents 1000 ml, increases Magnesium content by 175 mg/l in 1000 litres of water.

## Magnesium.

Additives from natural seawater!

Liquid Magnesium addition to maintain an optimum value, between 1250 and 1300 mg/l. Test the Magnesium value and add Magnesium plus to compensate for consumption.

This concerns the economical powder form. With this, a stock solution can be made to maintain magnesium levels very economically.

Contains ingredients extracted from natural seawater by solar evaporation! This offers great advantages over products using chemical or mined raw materials

Contents 1000 ml = approx. 1.3 kg. Increases the magnesium content by 250 mg/l in 250 litres of water

**COLOMBO MARINE MAGNESIUM+ POWDER 1L.**

S.R.P.

**£17.99**

Art. No.: N5060450

## Nitrate Ex. Nitrate and phosphate removal.

Nitrate Ex is a nutrient for bacteria in marine water that can break down nitrate. By adding Nitrate Ex, Nitrate is broken down efficiently and naturally.

Bacteria that break down nitrate cannot develop properly without Nitrate Ex. After a few weeks, the bacterial colony is sufficiently developed and you will be able to observe a clear reduction in nitrate.

Daily dosing, the use of a dosing pump is recommended.

Contents 500 ml, sufficient to treat 250 litres of water for 40 days.

Contents 1000 ml, sufficient to treat 500 litres of water for 40 days.

Capacity 2500 ml, sufficient to treat 625 litres of water for 80 days.

### COLOMBO MARINE ALGAE NITRATE EX 500 ML.

S.R.P.

**£10.49**

Art. No.: N5060455

### COLOMBO MARINE ALGAE NITRATE EX 1000 ML.

S.R.P.

**£17.49**

Art. No.: N5060460

### COLOMBO MARINE ALGAE NITRATE EX 2500 ML.

S.R.P.

**£30.99**

Art. No.: N5060463

Scan for QR code for info.

## NP Pellets. Nitrate and phosphate removal.

NP pellets provide a nutrient for bacteria that can break down nitrate in seawater.

By using NP pellets, Nitrate is efficiently degraded naturally.

Preferably use in a moving bed filter

Contents 1000 ml, sufficient for 500 - 2000 litres of water.

### COLOMBO MARINE NP PELLETS 1.000 ML.

S.R.P.

**£54.99**

Art. No.: N5060565

## Phosphate EX. Nitrate and phosphate removal.

Phosphates in seawater are easily removed with Phosphate Ex.

With one dose, the desired amount of phosphate can be removed immediately.

Our unique formula offers unparalleled results.

Contents 500 ml, sufficient to remove 2,500 mg of phosphate.

Contents 1000 ml, sufficient to remove 5000 mg of phosphate.

### COLOMBO MARINE ALGAE PHOSPHATE EX 500 ML.

S.R.P.

**£12.49**

Art. No.: N5060465

### COLOMBO MARINE ALGAE PHOSPHATE EX 1000 ML.

S.R.P.

**£17.99**

Art. No.: N5060470

INDEX

## Nitrate Plus. Adding Nitrate and Phosphate

Nitrate Plus is a ready-to-use liquid to replenish nitrate levels in marine water.

In aquaria with very large numbers of corals, nitrate deficiency can occur, which can be easily supplemented with Nitrate Plus.

Powerful formula

Contents 500 ml, sufficient to increase nitrate levels by 1 mg/l in 500 litres of water.

Contents 1000 ml, sufficient to increase nitrate levels by 1 mg/l in 1000 litres of water.

### COLOMBO MARINE NITRATE PLUS 500 ML.

S.R.P.

**£10.49**

Art. No.: N5060595

### COLOMBO MARINE NITRATE PLUS 1000 ML.

S.R.P.

**£17.49**

Art. No.: N5060600

## Phosphate Plus. Adding nitrate and phosphate.

Phosphate Plus is a ready-to-use liquid to replenish phosphate levels in seawater.

In aquaria with very large numbers of corals, phosphate deficiency can occur, which can be easily supplemented with Phosphate Plus.

Powerful formula

Contents 500 ml, sufficient to increase phosphate levels by 0.1 mg/l in 500 litres of water.

Contents 1000 ml, sufficient to increase phosphate levels by 0.1 mg/l in 1000 litres of water.

### COLOMBO MARINE PHOSPHATE PLUS 500 ML.

S.R.P.

**£10.49**

Art. No.: N5060605

### COLOMBO MARINE PHOSPHATE PLUS 1000 ML.

S.R.P.

**£17.49**

Art. No.: N5060610

# Optimize colours.

## Halo Complex. Optimize colours.

Iodine addition for seawater.

Colour-1 is iodine-based, but also contains 2 other so-called halogens, namely bromine and fluorine.

Especially important for pink colour development.

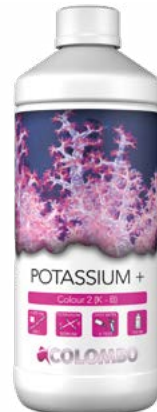

Contents 500 ml, increased iodine content by 3 mg in 500 litres of water.

**COLOMBO MARINE COLOUR 1  
HALO COMPLEX (I-F) 500 ML.**

S.R.P.

**£10.49**

Art. No.: N5060475

## Halo Complex. Optimize colours.

Potassium additive for seawater.

Colour-2 is potassium-based, but also contains the element Boron.

Especially important for pink colour development.

Contents 500 ml, increased potassium content by 200 mg in 500 litres of water.

**COLOMBO MARINE COLOUR 2  
POTASSIUM+ (K-B) 500 ML.**

S.R.P.

**£10.49**

Art. No.: N5060480

## Metals Plus. Optimize colours.

Iron addition for seawater.

Colour-3 is iron-based, but also contains the many other trace elements such as manganese, cobalt and nickel.

Especially important for the development of yellow and green colours.

Contents 500 ml, increased Iron content by 2 mg in 500 litres of water.

**COLOMBO MARINE COLOUR 3  
METALS 500 ML (FE).**

S.R.P.

**£10.49**

Art. No.: N5060485

## Coral Vits.

Optimize colours.

Liquid additive with vitamins and trace elements for marine water.

Corals get most of their nutrition from the algae they live in symbiosis with, the zooxanthellen, but this is usually not enough for optimal growth. There are also corals that do not contain zooxanthellen, such as gorgonians. So these types of corals have to get almost all their nutrition from the surrounding water.

Colombo Coral Vits provides corals with extra nutrition, it contains nutrients such as vitamins and amino acids.

Contents 500 ml, sufficient to treat 250 litres of water for a period of 100 days.

**COLOMBO MARINE CORAL VITS  
500 ML.**

S.R.P.

**£11.99**

Art. No.: N5060495

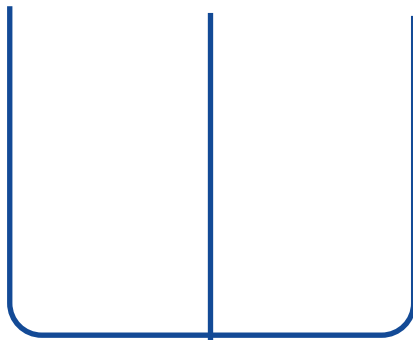

**COLOMBO MARINE CORAL VITS  
1000 ML.**

S.R.P.

**£18.49**

Art. No.: N5060497

◀ INDEX

Dosage based on Calcium consumption

**All in One.**  
Optimize colours.

Complete all-in-one additive for trace elements in seawater.

The typical colour splendour of corals only comes to fruition when all trace elements are sufficiently present in the water. With Colombo All in One, controlled trace elements such as potassium, iodine and iron can be added.

Measure only the calcium value, based on this value the trace elements can be added in a controlled way.

Contents 500 ml, sufficient to treat 250 litres of water for a period of 100 days.

Contents 1000 ml, sufficient to treat 500 litres of water for a period of 100 days.

**COLOMBO MARINE COLOUR ALL IN ONE 500 ML.**

S.R.P. **£11.99**

Art. No.: N5060490

**COLOMBO MARINE COLOUR ALL IN ONE 1000 ML.**

S.R.P. **£18.99**

Art. No.: N5060492

Dosage based on Calcium consumption

**Easy maintenance with the Colombo All4 system on a 4-channel dosing pump.**

Channel 1: Colombo KH+  
 Channel 2: Colombo Ca+  
 Channel 3: Colombo Nitrate Ex  
 Channel 4: Colombo All Four

## All Four.

Combined additive for use with the Colombo All Four care system for marine aquariums.

Colombo All Four contains Magnesium and numerous elements important for optimal colouration such as Potassium, Iron, Iodine, etc.

Use together with Colombo KH+, CA+ and Nitrate Ex. Dosing using a 4-channel dosing pump is recommended.

Contents 500 ml. Dosage based on Calcium consumption.

Contents 1000 ml. Dosage based on Calcium consumption.

Contents 2500 ml. Dosage based on Calcium consumption.

**COLOMBO MARINE ALL FOUR 500 ML.**  
 S.R.P. **£10.99**  
 Art. No.: N5060665

**COLOMBO MARINE ALL FOUR 1000 ML.**

 Art. No.: N5060675

# Marine Sand.

A fine natural substrate for marine aquaria. A perfect medium for maximum biological activity.

## Marine Sand.

Colombo marine sand is completely natural, making it the ideal substrate for marine and coral aquariums as well as freshwater aquariums with African cichlids.

A perfect medium for maximum biological activity, available as XS, S and M pellets

Before use, rinse out the sand with tap water.

### COLOMBO MARINE SAND XS 5 KG.

## Silicate Ex.

Special filter material for silicate removal.

Scan for QR code for info.

Excessive levels of silicate, or silica, are the main reason for the presence of diatoms (brown algae). By using Silicate Ex to remove the silicate, the algae can no longer grow and disappear.

Contents 500 ml, use 100 ml per 200 litres of water.

Contents 1000 ml, use 100 ml per 200 litres of water.

**COLOMBO MARINE SILICATE EX 500 ML.**

S.R.P.

**£18.99**

## Pump Clean.

Powerful cleanser/descaler for (flow) pumps and other devices. Regular cleaning of your pumps is necessary for efficient operation, longer life, and retention of warranty.

Immerse devices in the cleaning solution and leave for several hours. Rinse with tap water before returning to aquarium.

Ensures maintenance of capacity and reliability.

Contents: 1000 ml. Sufficient for 10 litres of cleaning solution.

**COLOMBO MARINE PUMP CLEAN 1000 ML.**

S.R.P.

**£11.99**

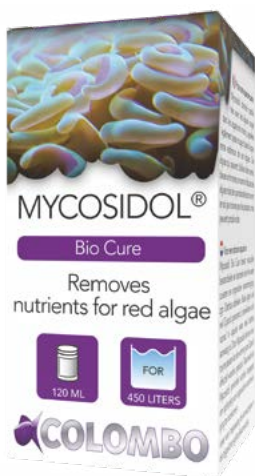

Art. No.: N5060680

New

# Fish care & Pest control.

## Mycosidol®.

**For a clean marine aquarium**  
Product for a clean marine aquarium without cyano algae.

Mycosidol Bio Cure contains natural ingredients and bacteria that purify the water and break down organic contaminants called detritus. Red algae also known as Cyanos develop mainly in aquariums where a lot of detritus is present.

Applying Mycosidol as a cure can effectively stop Cyanos formation. In addition, Mycosidol can be applied periodically to prevent accumulation of organic pollutants.

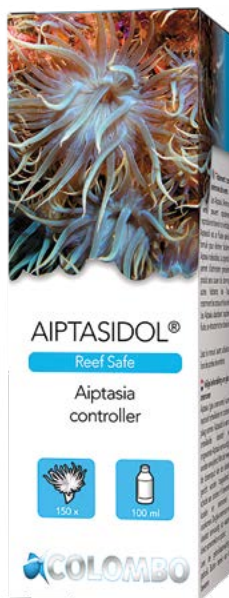

120 ml sufficient to treat 450 litres of water.

**COLOMBO MARINE MYCOSIDOL 120 ML / 450 LTR.**

S.R.P.

**£16.99**

Art. No.: N5060500

## Aiptasidol®.

Aiptasidol is a specially developed liquid that easily removes unwanted Aiptasia.

Aiptasia (glass anemones) can develop explosively and thus become a pest.

Target treatment, so no negative effects on water quality.

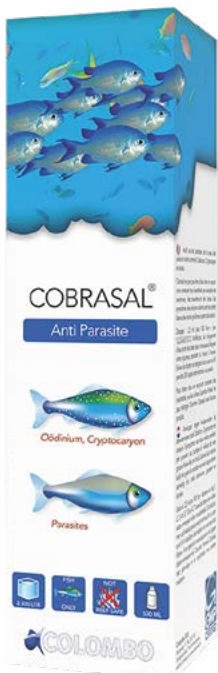

One pack can be used for 500 treatments.

**COLOMBO MARINE AIPTASIDOL 100 ML / 500 TREATMENTS.**

S.R.P.

**£11.99**

Art. No.: N5060505

## Cobrasal®.

Non-reef safe medication skin against parasites in marine fish such as: Ichthyophthirius, Oodinium, Cryptocaryon.

Highly effective treatment for fish that can be treated outside the reef aquarium.

This powerful medication contains copper sulphate, among other ingredients, and is therefore not safe for use in an aquarium with corals and/or other invertebrates.

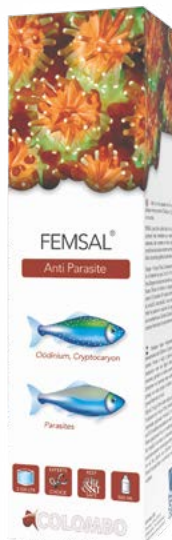

Contents 500ml, sufficient to treat 2,500 litres of water.

**COLOMBO MARINE COBRASAL 500 ML 2.500 LTR.**

S.R.P.

**£17.99**

Art. No.: N5060620

## Femsal®.

Reef safe medication effective against skin parasites in marine fish such as Oodinium, Cryptocaryon and others.

Symptoms of infected fish vary by parasite, from white dots or spots to a drab pale colour and skin.

This treatment is safe for the reef when used correctly and can therefore be used in a mixed aquarium with invertebrates

Contents 500ml, sufficient to treat 2,500 litres of water.

Capacity 2,500ml, sufficient to treat 12,500 litres of water.

**COLOMBO MARINE FEMSAL 500 ML 2.500 LTR.**

S.R.P.

**£18.49**
