COCOON
WIRELESS SPEAKER SYSTEM

Wireless Music Streaming
Lets you play the music you have stored on your iOS, Android or Windows smart phone wirelessly on the Cocoon

Internet Radio Presets for Android
Android phone users can store 3 of your favorite radio stations in the Cocoon so you always have something to listen to

Premium Sound Performance
Enjoy all your favorite music in true HiFi sound quality

Easy setup
With NetLink you can integrate the Cocoon into your wireless home network with just a touch of a button

Multi Room Capability
With iTunes installed on your PC/Mac® you can stream music to multiple Cocoons throughout your home at the same time

STREAM IT YOUR WAY.

Big and beautiful: the Cocoon Home is a captivating object that bears an incredible design on both, the inside and outside. The unique and iconic shape paves the way for it to become one timeless piece of entertainment technology. It is a statement that does not require any compromise on the quality of music you enjoy in your home.

The touch sensitive control buttons, smoothly integrated into the body's curves, the OLED display, the Denon Double layer woofers that reliably produce the original Denon Sound from a large variety of sources... And a remarkable set of network capabilities to round it all up. An entirely new class of sound & design is awaiting you.

DSD500 in White
