selfCheck™ 1000

crafted with purpose

We listened to the needs of our customers and crafted a self-service kiosk that would simplify the lives of both library staff and its users. Offering the most ergonomic, user friendly experience, the selfCheck™ 1000 was designed to maximize the day-to-day activities of a library, while promoting the activities and programmes available within your community or academic setting.

mix and match to fit your specific needs

Numerous integrated options have been aesthetically considered from the very beginning to fit perfectly into this all-in-one self-service kiosk. Libraries can create their ideal kiosk with a range of mix and match features.

natural placement creates convenience

The placement of each feature ensures a workflow that is natural for the user. Whether placing extra items on the extended glass shelf or making a contactless payment, the location and workflow of each add-on option has been carefully considered to maximise convenience and be easy-to-use.

helpful guidance to assist library users

By combining screen animations with LED guidance, the selfCheck™ 1000 navigates users effortlessly through the entire self-service process. The ease and simplicity of the entire transaction ensures they have a pleasant experience during their library visit and are happy to return in the future.

engaging experience with quickConnect™

By combining the selfCheck™ 1000 with our intuitive self-service software, library users receive a wonderful self-service experience. With the ability to promote your upcoming library events and programmes, suggest relevant recommendations and integrate cloudLibrary™ digital titles, quickConnect™ delivers a seamless experience that goes beyond just lending materials.

many benefits of the selfCheck™ 1000

increase your marketing efforts

With our 22" portrait screen, we've dedicated more real estate for library promotions and recommended reads which allows you to create and share more valuable information with your users.

quick and easy access to user accounts

Users can quickly login and get started without the need for staff assistance. Ways to login include typing the account number on screen, scanning a physical or virtual barcode card or tapping a Mifare or RFID library card.

large surface for users to place extra items

Our illuminated glass shelf is an extension of the standard surface, allowing users plenty of space to place items and free their hands up to perform the transaction.

matching desktop versions for any space

For libraries who like to mix and match throughout their space, we have designed a desktop model to fit perfectly on any counter top area within your library.

users can conveniently process secured media

Keep your valuable media items secured with locking cases and give your users the power to unlock the same cases right from the selfCheck™ 1000 within one simple and guided transaction.

visually guide users through the entire process

By guiding users through a natural self-service transaction using animated instructions on the screen and LED lighting on the kiosk, users can complete the process without needing staff assistance and leave your library with an overall positive experience.

view warnings from across the room

We incorporated health status lighting for staff to see alerts and warnings from across the library, eliminating the need to be standing directly in front of the kiosk, and allowing matters to be addressed right away.

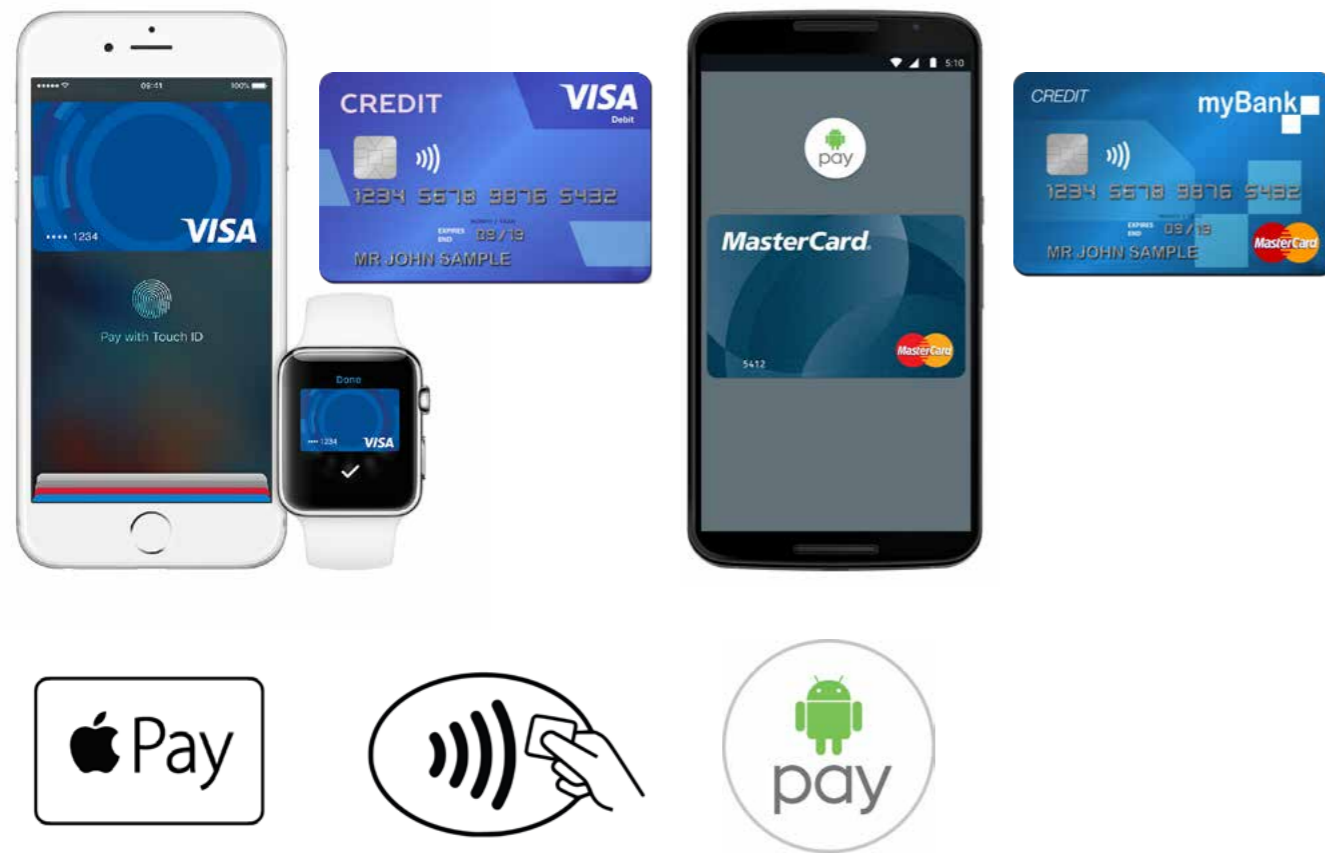

swap the receipt paper in seconds

Save valuable staff time with the ability to quickly change the receipt paper. Our simple-to-access front panel allows staff to quickly unlock and replace the receipt roll in seconds, minimising disruption for users.

accept all forms of payment

We set out to design the selfCheck™ 1000 so it could have every form of payment integrated without the need for extra hardware mounted off to the side. In addition to credit and debit cards, we integrated a cash machine quality notes handling system. When library users pay fines with large notes, they will receive £5, and £10 notes as change, instead of a pocket full of coins.

We also added the capability to accept the increasingly popular contactless payments. With millions of people now equipped with contactless-enabled debit cards, credit cards and other payment devices, contactless payments are incredibly fast and can increase your payment collection as well as provide a better user experience.

contactless payments

elegant and convenient returns

Ideal for libraries with confined spaces, we incorporated return bins to fit perfectly underneath and to the side of the selfCheck™ 1000. Integrated bins make returns at the kiosk quick and easy for users, allowing them to clear their account and continue borrowing additional items. With automatic sensors to alert staff when they are full, over 60 items can be returned in each bin before needing to be emptied.

the greatest level of accommodation

With our unique height-adjustable* feature, libraries can give users the flexibility to adjust the entire kiosk at any point during the self-service transaction. This feature is perfect for small children, tall library users or anyone with a disability, making sure their experience meets their exact needs.

* Integrated return bins cannot be combined with a height adjustable base

quickConnect™, the ultimate self-service user experience

Our intuitive self-service software has been designed from the ground up, specifically for library users. quickConnect™ delivers an engaging experience for users of all ages and abilities – making borrowing and returning library items a breeze.

In our dedicated quickConnect™ brochure

promote your value-added services

Make a lasting impression on users and ensure they know about all your library has to offer. With an ever-growing set of catchy templates to choose from, we ensure that you can easily edit and create visually appealing promotions in minutes. Go one step further and schedule promotions to change throughout the day to target users effectively.

drive attendance to your programs

quickConnect™ allows you to promote your library's programmes and services on the self-service home screen. By helping you build awareness of all your educational opportunities through this key touch point, your library can increase its marketing efforts and drive more traffic to programs and events.

offer digital titles at the selfCheck™

quickConnect™ and cloudLibrary™ deliver your entire digital collection to users right at the selfCheck™. Suggested reads are presented in a clear and unobtrusive way, allowing eBooks and eAudiobooks to be immediately added to the user's digital shelf. This seamless integration feels magical to users, with titles ready and waiting for them the next time they use cloudLibrary™!

help readers find more books they will love!

We partner with industry-leading providers to display relevant recommendations that librarians and readers trust. Keep users coming back for titles that match their reading preferences. Allow users to discover hidden gems already in your collection, and take these recommendations home with them, either by printed receipt or email.

grab users' attention with colours & wraps

By customising your selfCheck™ 1000, you can match your library brand, attract users' eyes to your self-service area or integrate with existing interior designs. With over 200 custom colours to choose from and the ability to apply graphic wraps, you can make the selfCheck™ 1000 a perfect match for your library.

selfCheck™ 1000 features & options

Build your perfect full height or desktop kiosk with all the features that matter to your library and users. Integrated options along with standard features help create a unique experience tailored to your users needs.

Reporting:

Configuration and reporting is made available in real-time via our optional libraryConnect™ central management software

Software:

selfCheck™ 1000 comes pre-loaded with our quickConnect™ self-service software, which provides the customer with the full range of borrow, return and account functions. The software is configured for connection to the library ILS/LMS through SIP2. Access to the library's network via Ethernet is required.

Colour options:

selfCheck™ 1000 is available in a variety of custom colours to match any library atmosphere. 213 RAL classic colours choices can be viewed at <http://bit.ly/RALcolors>. A custom graphic wrap can also be applied to the selfCheck 1000.
