

Check-list of the recent non-marine Ostracoda (Crustacea) of Belgium*

by Karel WOUTERS

Abstract

A check-list of the non-marine Ostracoda of Belgium is here presented for the first time. Thus far, 76 species, belonging to 35 genera, have been found in Belgium. The present list is based on data from the literature, on old collections (before 1950) and on more recently collected material (after 1950, mainly between 1976 and 1988).

Faunistic data are now available from 154 U.T.M. squares (on a total of 375). A review of the 38 papers dealing with Belgian Ostracoda is given.

Key-words : Ostracoda, non-marine, check-list, Belgium.

Résumé

Une liste faunistique des ostracodes non-marins de la Belgique est présentée pour la première fois. Jusqu'à présent 76 espèces, qui appartiennent à 35 genres, ont été observées en Belgique. La liste a été établie en fonction de données bibliographiques, et de matériel présent dans d'anciennes collections (avant 1950) et dans des collections plus récentes (après 1950, surtout pour la période 1976-1988). Des données faunistiques sont disponibles pour 154 carrés U.T.M. (sur un total de 375). Un aperçu général des 38 publications sur les ostracodes belges est donné.

Mots-clés : Ostracoda, eaux continentales, liste faunistique, Belgique.

Samenvatting

Voor de eerste maal wordt een faunalijst voorgesteld van de Belgische niet-mariene Ostracoda. 76 soorten, behorende tot 35 genera werden tot nog toe in België waargenomen. De faunalijst is gebaseerd op gegevens uit de literatuur, op oude collecties (vóór 1950) en op verzamelingen van meer recente datum (na 1950, vooral van 1976 tot 1988). Van 154 U.T.M.-hokken (op een totaal van 375) zijn faunistische gegevens beschikbaar. Er wordt een overzicht gegeven van de 38 publicaties die handelen over Belgische Ostracoda.

Trefwoorden : Ostracoda, niet-mariene wateren, faunalijst, België.

Bibliographical review

Thirty-eight papers on Belgian non-marine Ostracoda have this far been published, but only eleven are dealing exclusively with ostracods of the Belgian fauna. These are : KLIE (1936, 1937), ROME (1943, 1947, 1954), PIERRE (1973), WOUTERS, (1975), MARTENS (1982), WOUTERS (1983, 1984) and MARTENS & DUMONT (1984).

* Contributions to the Study of Belgian Ostracoda, N° 3.

Four other publications on Ostracoda contain data on Belgian species : BRADY (1869), MEISCH (1984, 1985) and WOUTERS & BLESS (1986).

Lists of various animal groups, including ostracods were published by PLATEAU (1870), BRADY & ROBERTSON (1870), LAMEERE (1895), LERUTH (1939), VERRAES (1968), DUMONT & GYSELS (1971), HEIP (1971), GYSELS et al. (1976) and WOUTERS (1985).

During the forties and fifties DOM R.J. ROME identified non-marine Ostracoda of Belgium in the collections of the Koninklijk Belgisch Instituut voor Natuurwissenschaften. Some of his determinations were published in ecologically oriented papers by different authors : CONRAD (1942), LELOUP et al. (1954), LELOUP & KONIETZKO (1956), LEFEVERE et al. (1956), LELOUP (1957), LELOUP & VAN MEELEN (1958), JACQUEMART & LELOUP (1958a), JACQUEMART & LELOUP (1958b), LELOUP & JACQUEMART (1963) and VAN MEELEN (1982).

Finally, four papers on the biology and ecology of *Cyprideis torosa* from a brackish water pond in N.W. Belgium were published by HEIP (1976a, 1976b), HERMAN & HEIP (1982) and HERMAN et al. (1983). Although the number of publications is rather restricted, it has to be stressed that research on non-marine ostracods of Belgium is in fairly good health. This is largely due to the efforts of the late DOM D.J. ROME (1893-1974), who contributed a lot to our present knowledge, and to the renewed interest in non-marine ostracods during the last decade by different authors.

Check-list

Class OSTRACODA LATREILLE, 1806
ORDER PODOCOPIDA SARS, 1866
Suborder PODOCOPINA SARS, 1866

Superfamily Cytheracea BAIRD, 1850
Family Limnocytheridae KLIE, 1938
Subfamily Limnocytherinae KLIE, 1938
Limnocythere inopinata (BAIRD, 1843)

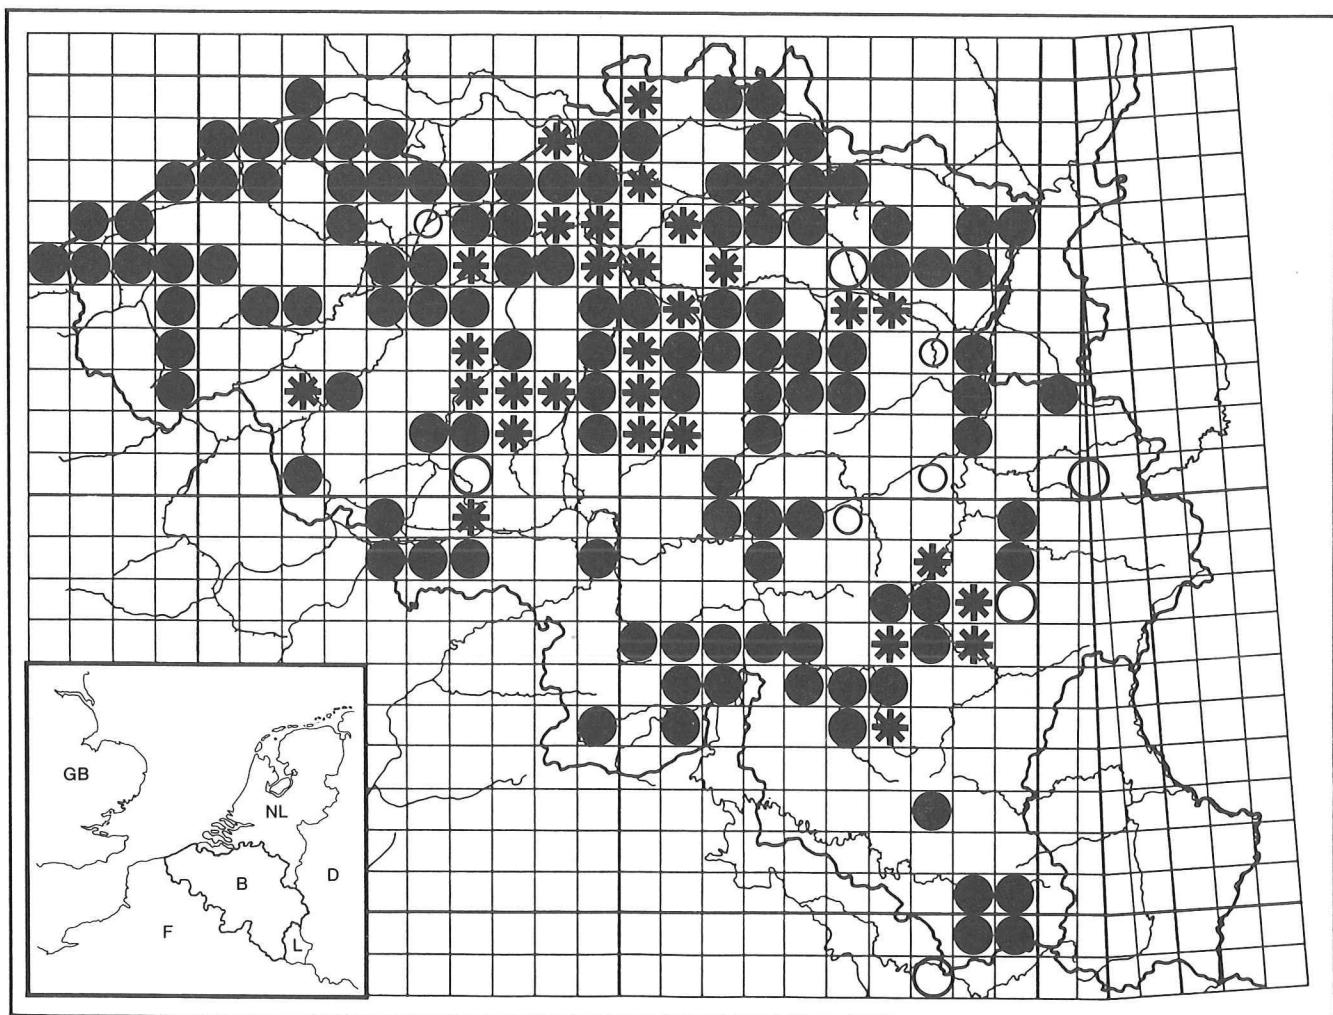

Fig. 1. Map of Belgium with U.T.M. grid (10×10 km squares), showing the coverage of records. Black circles : specimens collected after 1950; stars : specimens collected before 1950 ; large open circles : literature data after 1950 ; small open circles : literature data before 1950.

Subfamily Timiriaseviinae MANDELSTAM, 1960
Metacypris cordata BRADY & ROBERTSON, 1870

Family Cytheridae BAIRD, 1850
Cytheromorpha fuscata (BRADY, 1869)

Family Loxoconchidae SARS, 1925
Loxoconcha elliptica BRADY, 1868

Family Cytheruridae G.W. MULLER, 1894
Cytherura gibba (O.F. MULLER, 1785)

Family Cytherideidae SARS, 1925
Cyprideis torosa (JONES, 1850)
Romeis rivulorum (ROME, 1943)

Suborder METACOPINA SYLVESTER-BRADLEY,
 1961

Superfamily Darwinulacea BRADY & NORMAN,
 1889

Family Darwinulidae BRADY & NORMAN, 1889
Darwinula stevensoni (BRADY & ROBERTSON, 1870)

Superfamily Cypridacea BAIRD, 1845

Family Ilyocyprididae KAUFMANN, 1900
Ilyocypris bradyi SARS, 1890
Ilyocypris decipiens MAS, 1906
Ilyocypris inermis KAUFMANN, 1900
Ilyocypris gibba (RAMDOHR, 1808)
Ilyocypris monstrifica (NORMAN, 1862)

Family Candonidae KAUFMANN, 1900
 Subfamily Candoninae KAUFMANN, 1900
Candonia angulata G.W. MÜLLER, 1900
Candonia candida (O.F. MÜLLER, 1776)
Candonia neglecta SARS, 1887
Candonia weltneri HARTWIG, 1898

Fabaeformiscandonia caudata (KAUFMANN, 1900)
Fabaeformiscandonia fabaeformis (FISCHER, 1854)
Fabaeformiscandonia fragilis (HARTWIG, 1898)
Fabaeformiscandonia holzkampfi (HARTWIG, 1900)
Fabaeformiscandonia hyalina (BRADY & ROBERTSON, 1870)
Fabaeformiscandonia protzi (HARTWIG, 1898)

Pseudocandona albicans (BRADY, 1864)
Pseudocandona belgica (KLIE, 1937)
Pseudocandona compressa (KOCK, 1837)
Pseudocandona crispata (KLIE, 1926)
Pseudocandona hartwigi (G.W. MÜLLER, 1900)
Pseudocandona lobipes (HARTWIG, 1900)
Pseudocandona marchica (HARTWIG, 1899)
Pseudocandona pratensis (HARTWIG, 1901)
Pseudocandona triquetra (KLIE, 1936)
Pseudocandona zschorkei (WOLF, 1919)
Cryptocandona leruthi (KLIE, 1936)
Cryptocandona vavrai (KAUFMANN, 1900)
Candonopsis kingsleii (BRADY & ROBERTSON, 1870)
Subfamily Cyclocypridinae KAUFMANN, 1900
Cyclocypris globosa (SARS, 1863)
Cyclocypris laevis (O.F. MÜLLER, 1785)
Cyclocypris ovum (JURINE, 1820)
Cyclocypris serena (KOCH, 1837)
Cypria exsculpta (FISCHER, 1855)
Cypria ophthalmica (JURINE, 1820)
Cypria subsalsa REDEKE, 1936
Physocypris kraepelini G.W. MÜLLER, 1903

Family Notodromadidae KAUFMANN, 1900
Notodromas monacha (O.F. MÜLLER, 1776)

Family Cyprididae BAIRD, 1845
Subfamily Isocypridinae ROME, 1965
Isocypris beauchampi (PARIS, 1919)
Subfamily Herpetocypridinae KAUFMANN, 1900
Herpetocypris brevicaudata KAUFMANN, 1900
Herpetocypris chevreuxi (SARS, 1896)
Herpetocypris reptans (BAIRD, 1835)
Psychrodromus olivaceus (BRADY & NORMAN, 1889)
Subfamily Cyprinotinae BRONSTEIN, 1947
Heterocypris incongruens (RAMDOHR, 1808)
Heterocypris salina (BRADY, 1868)
Subfamily Dolerocypridinae TRIEBEL, 1961
Dolerocypris fasciata (O.F. MÜLLER, 1776)
Subfamily Eucypridinae BRONSTEIN, 1947
Eucypris elliptica BAIRD, 1846
Eucypris pigra (FISCHER, 1851)
Eucypris virens (JURINE, 1820)
Prionocypris zenkeri (CHYZER, 1858)
Tonnacypris lutaria (KOCH, 1838)
Subfamily Cypridinae BAIRD, 1845
Cypris pubera O.F. MÜLLER, 1776
Subfamily Cypriocercinae MCKENZIE, 1971
Bradleystrandesia reticulata (ZADDACH, 1844)
Bradleystrandesia fuscata (JURINE, 1820)
Strandesia (Neocypris) obliqua (BRADY, 1868)
Subfamily Scottinae BRONSTEIN, 1947
Scottia pseudobrowniana KEMPF, 1971
Subfamily Cypridopsinae KAUFMANN, 1910
Cavernocypris subterranea (WOLF, 1919)
Cypridopsis hartwigi G.W. MÜLLER, 1900
Cypridopsis parva G.W. MÜLLER, 1900

Cypridopsis vidua (O.F. MÜLLER, 1776)
Plesiocypridopsis newtoni (BRADY & ROBERTSON, 1870)
Sarscypridopsis aculeata (COSTA, 1847)
Potamocypris arcuata (SARS, 1903)
Potamocypris fulva (BRADY, 1868)
Potamocypris similis G.W. MÜLLER, 1912
Potamocypris smaragdina (VAVRA, 1891)
Potamocypris unicaudata SCHÄFER, 1943
Potamocypris villosa (JURINE, 1820)
Potamocypris zschorkei (KAUFMANN, 1900)

Comments

1. The present check-list is based on data from literature, on old collections (i.e. before 1950) deposited in the Koninklijk Belgisch Instituut voor Natuurwetenschappen and on recently collected material (i.e. after 1950, mainly from the period 1976-1988), deposited in the same Institute. It is the first check-list of Belgian non-marine Ostracoda.

The Universal Transverse Mercator grid (U.T.M.) of the Belgian territory consists of 375 squares of 10 x 10 km each (with exception of the compensation zone in the eastern part of the country, where the squares are smaller).

Fig. 1 shows the coverage of records mapped using the 10 km grid squares, and using four symbols to distinguish the different types of records. Black circles : specimens collected after 1950 ; stars : specimens collected before 1950 ; large open circles : literature data after 1950 ; small open circles : literature data before 1950.

The total number of 10 km squares from which faunistic data are available is 154. Blank squares, of which there are 221, indicate that there are no records of ostracods. This is in all probability due to an absence of recording rather than to an absence of ostracods. This means that data are available from only 41% of the grid squares. This assessment is the main reason why the present check-list is considered preliminary. Future collecting is required if real distribution patterns are to be discerned.

2. The presently known non-marine ostracod fauna of Belgium consists of 76 species, belonging to 35 genera. Some species are rare to very rare, others are common to very common. In order to give an approximate idea of their distribution in Belgium, the species are listed according to the number of U.T.M. squares in which they were found (numbers of squares indicated between brackets).

More than 20 squares :

Cypria ophthalmica (75), *Cypridopsis vidua* (46), *Candonia candida* (46), *Cyclocypris ovum* (39), *Herpetocypris reptans* (29), *Heterocypris incongruens* (25), *Candonia neglecta* (21).

11 to 20 squares :

Ilyocypris bradyi (20), *Eucypris virens* (20), *Physocypris kraepelini* (18), *Notodromas monacha* (18), *Limnocythere inopinata* (17), *Cyclocypris laevis* (16), *Psychrodromus olivaceus* (16), *Ilyocypris gibba* (16), *Bradleystrandesia fuscata* (15), *Potamocypris zschokkei* (15), *Sarscypridopsis aculeata* (13), *Candonopsis kingsleii* (13), *Plesiocypridopsis newtoni* (12), *Potamocypris unicaudata* (12), *Herpetocypris chevreuxi* (12), *Eucypris pigra* (12), *Pseudocandona pratensis* (11), *Isocypris beauchampi* (11), *Fabaeformiscandona fabaeformis* (11), *Cypria subsalsa* (11).

6 to 10 squares :

Darwinula stevensonii (10), *Bradleystrandesia reticulata* (10), *Cyprideis torosa* (10), *Cypria exsculpta* (8), *Potamocypris villosa* (8), *Heterocypris salina* (8), *Cypris pubera* (8), *Loxoconcha elliptica* (7), *Pseudocandona albicans* (7), *Tonnacypris lutaria* (7), *Pseudocandona hartwigi* (6), *Scottia pseudobrowniana* (6).

1 to 5 squares :

Ilyocypris monstrifica (5), *Candona angulata* (5), *Pseudocandona compressa* (5), *Pseudocandona zschokkei* (5), *Cyclocypris serena* (5), *Cavernocypris subterranea* (5), *Ilyocypris inermis* (4), *Fabaeformiscandona hyalina* (4), *Fabaeformiscandona protzi* (4), *Pseudocandona triquetra* (4), *Cryptocandona vavrai* (4), *Strandesia (Neocypris) obliqua* (4), *Fabeformiscandona fragilis* (3), *Pseudocandona crispata* (3), *Pseudocandona marchica* (3), *Cryptocandona leruthi* (3), *Cyclocypris globosa* (3), *Cypridopsis hartwigi* (3), *Cypridopsis parva* (3), *Herpetocypris brevicaudata* (3), *Prionocypris zenkeri* (3), *Ilyocypris decipiens* (2), *Candona weltneri* (2), *Fabaeformiscandona caudata* (2), *Potamocypris arcuata* (2), *Potamocypris fulva* (2), *Potamocypris smaragdina* (2), *Dolerocypris fasciata* (2), *Eucypris elliptica* (2), *Metacypris cordata* (1), *Cytherura gibba* (1), *Romeis rivulorum* (1), *Fabaeformiscandona holzkampfi* (1), *Pseudocandona belgica* (1), *Pseudocandona lobipes* (1), *Potamocypris similis* (1).

3. Nine species are here reported from Belgium for the first time : *Cytherura gibba*, *Ilyocypris inermis*, *Fabaef-*

formiscandona caudata, *Fabaeformiscandona holzkampfi*, *Fabaeformiscandona protzi*, *Pseudocandona lobipes*, *Potamocypris similis*, *Dolerocypris fasciata* and *Prionocypris zenkeri*.

4. Taxonomic remarks

Herpetocypris lenta ROME, 1947 is a junior synonym of *Herpetocypris brevicaudata* KAUFMANN, 1900. *Herpetocypris caerulea* ROME, 1954 and *Herpetocypris agilis* ROME, 1954 are both junior synonyms of *Herpetocypris chevreuxi* (SARS, 1896).

Physocypris perlata ROME, 1943 is a junior synonym of *Physocypris kraepelini* MÜLLER, 1903 (see SLUYS, 1979 and MEISCH, 1982). *Isocypris quadrisetosa* ROME, 1947 is a junior synonym of *Isocypris beauchampi* (PARIS, 1919) (see MEISCH, 1980). Finally, *Cypridopsis mariae* ROME, 1943 probably is a junior synonym of *Cypridopsis parva* MÜLLER, 1900, but this needs further elaboration.

5. Some species remain unknown from Belgium, although they occur in one or more adjacent countries : *Stenocypris fischeri* (LILLJEBORG, 1883), *Trajancypris clavata* (BAIRD, 1838), *Eucypris ornata* (O.F. MÜLLER, 1776), *Eucypris lilljeborgi* (G.W. MÜLLER, 1900), *Cyprois marginata* (STRAUSS, 1821), *Potamocypris variegata* (BRADY & NORMAN, 1889), *Potamocypris pallida* ALM, 1914, *Potamocypris fallax* FOX, 1967, *Fabaeformiscandona acuminata* (FISCHER, 1854), *Pseudocandona rostrata* (BRADY & NORMAN, 1889), *Pseudocandona insculpta* (G.W. MÜLLER, 1900), *Paracandona euplectella* (BRADY & NORMAN, 1889), and perhaps also a number of other candonids.

Acknowledgements

The author owes special thanks to Dr. Koen MARTENS (Koninklijk Belgisch Instituut voor Natuurwetenschappen, Brussels) and to Claude MEISCH (Musée d'Histoire naturelle, Luxembourg) for their critical comments and valuable suggestions.
