Vaughan's BOOK FOR FLORISTS *Spring* 1944

601 W. JACKSON BLVD., CHICAGO 6—47 BARCLAY ST., NEW YORK 7

DELPHINIUM

PACIFIC GIANT (Vetterle and Reinelt)

This strain produces plants that are 60 to 65 per cent mildew resistant. The flowers are of immense size, tightly set on straight stems that are strong and whippy. The flowers do not shatter and represent a truly outstanding addition to the cut flower market.

Sowing and planting times vary according to climatic conditions. In regions with severe winters, sow either early in January and plant out in the spring or sow in April or May, so that the young plants can be established before the winter frosts come.

Vegetable Seeds for Victory Gardens

Vegetable seeds sold so rapidly last spring that every store offering them enjoyed a big increase. Government officials say the campaign last year was only a rehearsal for the real effort which will come this year. Vaughan's Victory Garden assortments have both vegetables and flowers, balanced to match present day sales. We have a few assortments allotted to new customers, which will be assigned to those who first send in contracts, as printed below.

Red, White and Blue Display

We continue to use for 1944 the strikingly beautiful Victory Garden Display Rack designed in our national colors. The slogan on the lower panel has been changed to read "Vaughan's Seeds for Victory Gardens." The top panel will be red, the lower one white, and the sides and bottom will be blue. It makes a brilliant eye-catching combination and will give your store a patriotic atmosphere.

Design and construction of the rack will otherwise follow the model which has proved so satisfactory last year.

The illustration shows how it holds each variety where the customer can see it.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets.

Our New Packets. All flower seed packets of 1944 will be 3 1/4 by 4 1/2 inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower or vegetable seed.

Brilliantly Colored Posters and Streamers. Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

Vaughan's Novelties and Specialties for 1944

CARNATION Vienna Dwarf Prof. Malmgreen

AGERATUM

Dwarf Blue Bedder. The average height of Dwarf Blue Bedder is four inches. The habit of growth is uniform, and the compact little plants are alive with large clusters of deep lavender-blue flowers. The coloring is richer and deeper than that of Blue Ball Improved. Ideal as an edging or low border. Trade pkt., 50c; $\frac{1}{4}$ oz., \$1.25; oz., \$4.00.

ANTIRRHINUM Large Flowering Rust Resistant Padre. A glistening crimson rich and beautiful, an excellent grower with uniformly compact contrasting foliage; one of the best. Trade pkt., 25c; $\frac{1}{4}$ oz., 75c.

ASTER, Extra Early Giant Crego, Navy Blue. Honorable Mention All-America 1943. First of a new race of large flowered, early Asters. In fact, it seems as early as Queen of the Market class, so should be quite satisfactory also in the South. While not wilt-resistant, it has fair growth, true and uniform 4 inch flowers on 12 to 20 inch branching plants and averaging 10 inch, strong cutting stems. Narrow, purplish green foliage and stems. Trade pkt., 25c; $\frac{1}{8}$ oz., 50c; $\frac{1}{4}$ oz., 85c; oz., \$2.50.

CALENDULA Giant Glowing Gold. 2 $\frac{1}{2}$ ft. Vivid color coming between gold and orange which does not fade. Flowers are fully double, 4 in. across, with loose and fluffy petals that give the appearance of a golden ball. Long, wiry stems. Trade pkt., 25c; $\frac{1}{4}$ oz., 40c; oz., \$1.20.

CALENDULA Orange Beauty. Blooms are large, 3 $\frac{1}{2}$ in. and more across of curved loose petal formation and freely borne on long stems. The color is bright, deep orange slightly suffused with yellow at the base of the florets, the inner petals gracefully curling over the lighter colored center. 2 ft. Trade pkt., 50c; $\frac{1}{4}$ oz., 80c; $\frac{1}{2}$ oz., \$1.40.

CARNATION Malmaison J. M. Bridgeford. Of sturdy habit, upright growing plant bearing large flowers. 3 $\frac{1}{2}$ to 4 inches across, all being of equal size. The chief merit lies in the extensive color range. Some 25 different colors have been counted. Trade pkt., 50c; $\frac{1}{8}$ oz., \$1.00; $\frac{1}{4}$ oz., \$1.75.

CARNATION Super Giant Mixed. A strain similar in habit and earliness to Chabaud Giant Improved but with extra large flowers. Very double and strongly clove scented. Trade pkt., 50c; $\frac{1}{4}$ oz., \$1.50; oz., \$5.00.

Easter 1944 is April 9th

CARNATION Prof. Malmgreen. A new early flowering Vienna dwarf double type with gay brick red flowers. Fine for cutting. 14 in. Trade pkt., 50c.

CELOSIA Gilbert's Maple Gold. The blooms are the crested type. The color is an attractive pink tipped yellow but may vary somewhat. Plant grows about 30-36 in. tall with 8-12 heads normally, more if center is pinched. Trade pkt. (300 seeds), 50c.

CHRYSANTHEMUM

Maximum Fringed Semi-Double and Double. The plants are extremely vigorous, producing at one time from 25 to 40 feathered fringed blooms. The strong heavy stems support blooms that average from 5 to 8 inches in diameter. A percentage of the plants will produce full double blooms, the balance semi-double and fringed. Trade pkt., 50c; $\frac{1}{4}$ oz., 90c; oz., \$3.00.

Carinatum Rainbow Mixture. A surprising blend of entirely new shades and color combinations in Annual Chrysanthemums. The very free flowering 2 feet high plants are early blooming, coming into flower 2 months from the time of sowing; from June until September they give a truly amazing display. As a cut-flower this lovely Chrysanthemum will prove of outstanding value. Trade pkt., 30c; $\frac{1}{4}$ oz., 60c; oz., \$2.00.

COLEUS Glory. A mixture of bronze, pink, apricot shades, cream, etc. A remarkably fine strain, it is unequalled for the beautiful form and coloring of its large leaves. Sow seed January 1st for Memorial Day plants. Trade pkt., \$1.00.

DAHLIA Unwin's Dwarf Hybrids, XXX Strain. The plants are dwarf, semi-double flowers of the most attractive form in fine range of color. Seed sown in March, plants will be in bloom by end of June. Seed sown in January and early February and grown cool will make fine plants for Mothers' Day. These dwarf Dahlias are very popular for border planting and bedding work. Trade pkt., 25c; $\frac{1}{4}$ oz., 65c; oz., \$2.20; 4 oz., \$6.50.

DIANTHUS BARBATUS (Sweet William) Special Giant White. Is pure white. The flower clusters are at least $\frac{1}{3}$ larger than the ordinary white with a good strong wiry stem from $\frac{1}{3}$ to $\frac{1}{2}$ longer than the ordinary. In growth it resembles the Perennial Phlox and is a splendid cut flower. The individual florets average from $\frac{1}{2}$ to $\frac{3}{4}$ of an inch in diameter, their size depending somewhat on the culture. Under our conditions the flower clusters range from 4 to 7 inches. Trade pkt., 35c; $\frac{1}{4}$ oz., 75c; oz. \$2.40.

MARIGOLD Honeycomb

NIEREMBERGIA *Coerulea Purple Robe*

NIEREMBERGIA, Coerulea, Purple Robe. This is a half hardy perennial, treated as an annual, blooms in about 15 weeks from date of sowing. It prefers full sun, sandy loam, and makes a grand border and edging subject. Very dwarf, about 6 inches tall, cushion-like plant, surmounted with violet blue flowers. Trade pkt., 50c; 1/32 oz., \$1.65; 1/16 oz., \$3.00.

PETUNIA

All-Double America. Silver Medal All-America 1943. America is the all-double, type, of medium size, carnation-flowered, and rose-pink in color, somewhat a reminder of the color of *Gladiolus America*, which for many years was our most popular Glad. America Petunia is a hybrida nana, an abundant bloomer from early summer to frosts, for bedding and cutting. It is uniform and true. 200 seeds, 75c; 500 seeds, \$1.75; 1000 seeds, \$3.00; 1/64 oz., \$11.00.

All Double Petunias separate sorts and mixed—See general list.

Large Flowering Single Fringed Blushing Maid. The flowers are of largest size, deeply fringed and ruffled, of a rosy pink and white with yellow veins and throat. One of the loveliest giant single Petunias. Trade pkt., 50c.

Pink Glory Hybrids (Windmill). Their large blossoms, bright colors, branching habit and long life are hard to match. The hybridizer states "As a porch box Petunia they have proven superior to any we know of; that on Decoration Day the sales of this item in their place were 1000 plants in 5 hours." Trade pkt., \$1.00.

Hybrida Compacta. Windmill Pink (Sunrise). The growth is very compact and branching, attaining at maturity a height of 10-12 in. and a spread of 15-18 in. At no time does the plant become "leggy" but always presents a solid mass of deep green foliage studded with blooms. The 2 inch flowers have slightly frilled edges and are brilliant rose, with a flush of scarlet radiating from a small yellow throat. 1000 seeds 50c.

Dwarf Bedding Cheerful. Received Bronze Medal in the All America Selection of 1944. The clear salmon pink flowers have a deeper rose veining toward the throat. The growth is low spreading close to the ground, later the plants form a mound 10-12 in. high with a spread of 2 ft. Growth is densely compact and the plants are studded from early summer until frost with flowers 2 1/2 in. across. Trade pkt., 50c; 1/16 oz., 90c; 1/8 oz., \$1.60; 1/4 oz., \$2.70; oz., \$9.75.

Igloo. Free blooming habit and compact and uniform growth. The flowers are medium size, pure white with a slightly yellowing in the throat, and are 100% true. Every plant is a perfect mound of white 8 to 10 inches high, reminding one of an Eskimo igloo. Trade pkt., 50c; 1/8 oz., \$1.10.

PRIMULA

Giorgis. (This is a cross between *Primula Malacoides* and *Primula Chinesis Fimbriata*). The flower formation is that of the Chinese Primrose, while the short compact thick foliage reveals the *Malacoides* blood. Finely fringed, double rowed, single flowers 1 1/4 inches in diameter. Dark green foliage. The color is a strong carmine rose with a strong yellow center. Trade pkt., \$1.00.

Obconica Gigantea Wyaston Wonder. A new type of *Primula Obconica*, producing flowers of truly immense size; it is by far the largest flowered variety in existence. The general growth of the plant is of exceptional vigor and robustness; the foliage of fine growth and texture. The huge heads of bright crimson flowers are carried on strong stems well above the foliage. Trade pkt., \$1.25; 1/4 oz., \$3.00; 1/2 oz., \$5.50; 1/6 oz., \$10.50.

Polyanthus Giant Bouquet Mixed. A magnificent development of this old garden favorite, the flowers being of exceptional size, often 2 inches across. They are produced in great numbers and display an immense variety of coloring from white to cream, yellow, scarlet, purple and crimson. Borne on strong stems they are excellent for cutting, as well as making a splendid show in the garden. Trade pkt., \$1.00; 1/16 oz., \$2.00; 1/8 oz., \$3.50.

Polyanthus (Primula Veris) Pink Shades. A selection from the Giant strain of this wonderful hardy primrose. The flowers, which often open up to 2 1/2 inches in diameter, are borne on stiff stems well above the foliage. These primroses require a semi-shaded position. 100 seeds, 65c; 500 seeds, \$2.75; 1000 seeds, \$5.00.

Vaughan's ^{The} World's _{Best} Flower Seeds

All Flower Seeds Are Scarce!

Production of flower seeds in 1943 was reduced to less than a third of the previous year; and in 1944 this is to be cut still further. We have eliminated all varieties which we cannot supply, and hold stocks of everything offered; but since replacements are uncertain we urge you to order early, to make sure of your requirements in full.

Buyers of seeds are dependent upon the experience, ability and integrity of the seedsmen to insure the quality and identity of the seeds they buy. Our customers are protected by the skill of an organization which for more than sixty years has specialized in seeds for florists.

Carl Cropp, vice president of Vaughan's Seed Store since 1884, and his son Carl, Jr., are in touch with expert growers; by frequent inspection trips and careful checking in our trial gardens, they make sure that we supply you with the best seed obtainable in the world.

TESTING AND TRIALS Every lot of flower seed sold by us is tested in OUR OWN laboratory, where we prove the germination and make certain that the percentage is up to the high level of our standards. Trueness to type is determined and checked by the hundreds of tests grown in our greenhouses and trial grounds.

Flower Seeds for Summer Sowing—We issue a special catalogue in June. Should you fail to receive one, please write for it.

For Seeds of Perennials and Biennials, see pages 38 to 52.

Trade packets contain considerably more seed than ordinary or retail packets, being based on Florists' needs for ordinary purposes.

Florists invariably get trade packets unless otherwise specified.

Quantities of 1/4 lb. and over are charged at the pound rate; unless stated otherwise, 1/8 lb. is at the oz. rate; 1/2 oz. is at the ounce rate only when the price per ounce is 20c or more and 1/2 oz. rate is not otherwise quoted.

We do not sell 1/2 oz. where the price per ounce is 15c or less.

Cash Discounts on Flower Seeds: On all orders for flower seeds, totaling less than \$25.00, 5%, and over \$25.00, 8%, may be deducted if cash is enclosed, except Cyclamen seed, which is net.

Asters

WILT-RESISTANT

Asters have been widely attacked by the Fusarium Wilt, which condition has been overcome in growing the Wilt-Resistant Strains, which, although grown in infected soil, proved immune to the disease. Aster Yellows is also an enemy. This has been found to be transferred to the plants by tiny insects called leaf hoppers, and the only way to overcome this is to grow the plants under a cloth cover.

As the roots of Asters are produced near the surface, a mulch of some kind spread over them in hot weather is very beneficial and will be repaid by fine plants, large blooms, stronger stems, and more profuse blooming.

Annual Larkspur

For outdoor blooming start in flats in the house, shift into 2-inch pots and plant in April or sow in the open as soon as ground is ready. To get satisfactory germination from Larkspurs in the hot weather, it is necessary to chill the seeds in an ice box for several days before sowing. Larkspurs must be grown cool. For a greenhouse crop in May, sow in January or February.

GIANT DOUBLE IMPERIAL—4 ft.

This type is the most desirable for outdoor growing. A new race of annual Larkspur of upright growth, branching from the base of plant, producing more and longer flower stems for cutting:

PANSY VAUGHAN'S SUPER SWISS GIANT MIXTURE

PANSIES

Pansies have long been a favorite with us. We introduced the Swiss Giants to American gardens and named and introduced the lovely Canadian variety, Maple Leaf, several years ago.

GIANT MIXTURES

VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—salmons, yellows, pinks, rich reds and blues, are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 60c; $\frac{1}{8}$ oz., \$1.20; $\frac{1}{4}$ oz., \$2.00; oz., \$7.00; lb. \$80.00.

VAUGHAN'S SUPER SWISS PANSIES MIXTURE

One of our leaders and represents the choicest strain of this popular and profitable flower. Combining the finest selections of several Pansy specialists, the perfect blending is further insured by the addition of separate colors that do not generally appear in the average mixture. Without question, the finest mixture of Swiss Giant Pansies on the market. How to Sow Pansy Seeds

Sow the seeds in a cold frame in light soil without any fertilizer. Cover the seeds very lightly with the same soil and keep moist. Shade the seed bed with cheesecloth or a muslin screen, and as soon as all the plants are up, remove the screen. Or you may sow them in a large pot or seed pan.

To be sure of fine, strong Pansy plants, we suggest the following, applied as a top-dressing by the end of March or early April. 2 parts dried blood. 2 parts steamed bone meal. 1 part potash.

PLEASE NOTE:

Highly bred double petunia seed is not as vigorous in growth as is that of single strains. To some extent this lack of vigor extends to the seed. Seed of our all-double strains has been carefully tested in soil, on Aug. 15th, 1943 and, when carefully handled, we know it will germinate 60-70%. For this reason and because of its high cost we cannot entertain claims of non-germination of this seed.

ACHILLEA, The Pearl

We recommend sowing perennial seeds in spring. Seed germinates better in the cool weather than in the heat of mid-summer, and the long growing season produces larger plants that winter over more successfully.

ALYSSUM Saxatile Compactum

ANTHEMIS Sancta Johannis

Seeds of Biennials and Hardy Perennials

Perennials fill a large and interesting place in the operations of an up-to-date florist establishment. Some are as easily raised as annuals; quite a few may be forced; others make fine pot plants; and many furnish splendid cutting material. The rock garden requirements absorb all the low-growing varieties and the florist with his eye to the future will devote considerable space to perennials of all kinds. They require little heat, if any, and not much care.

SEED GERMINATES SLOWLY AND IRREGULARLY
of the following varieties and seed bed should be prepared where it will be undisturbed for a year or more.
Aconitum, Anemone, Clematis, Delphinium Cardinale, Delphinium, Nudicaule, Dictamnus, Dielytra, Dornicum, Incarvillea, Iris, Phlox Decussata, Primulas Trollius and nearly all Alpines.

ACHIMENES

AMARYLLIS

Large Flowering Hybrids

One of the finest strains of Amaryllis we have ever seen, raised by eminent growers whose stock and hybridization for many years we have purchased in its entirety. Flowers are immense, borne as a rule four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains.

ACHIMENES

This is closely related to the Gloxinia. Plant 6 to 7 bulbs in a 5-inch pot, or 9 to 10 in a 6-inch pot. The soil used for potting should be rich in humus and of an open, porous nature, allowing perfect drainage. A good mixture to use is equal parts of loam, leaf mold and sand. About one-third of the depth of the pots or pans should be occupied with drainage. After the young growth appears, great care should be taken to keep the soil moist, for a single severe drying will ruin the plant. Blooming time 8 to 10 weeks after planting.

BEGONIAS

Tuberous-Rooted

Every florist should grow some of these bulbs, as they make showy plants that find ready sales in the spring and summer. Use 4-inch pots and shift later to 5 and 6-inch pots if larger plants are wanted. A compost of one part rotted cow manure to two parts loam and one part leaf mold will give good results. Water sparingly until growth is started. They like a 55-58 degree temperature at night.

Gladiolus Crop Extremely Short

The gladiolus situation is very critical this year.

First. Many growers did not plant gladiolus in order to grow more food crops. Because gladiolus bulbs have been unprofitable for a number of years, they gladly made the change.

Second. With the late spring and labor so short, many did not get their bulbs planted until very late and with wet weather, a great deal of rot developed, especially in Picardy.

Third. Most growers, like ourselves, left the crop in the ground as late as possible in order to get large bulbs after a late start, and then due to shortage of help, could not harvest the entire crop.

Now, with so many early booked orders, we can only ask those who are still interested in buying gladiolus bulbs to write us after January 15 for our prices, and quantities, if available.

From information now on hand the following varieties are most likely to be available, if any bulbs are left after advance orders have been filled.

Vaughan's Chrysanthemum Rooted Cuttings

Orders must be in multiples of 50 of a variety. 5% Discount on orders of 10,000. Write for discounts on larger quantities.

We regret to announce that conditions make it impossible for us to make shipment of Chrysanthemum cuttings from Yoder Brothers to customers who did not receive stock from them last year. Their entire 1944 production will be distributed among last year's purchasers in proportion to their receipts of last year, 2/3 of which can be shipped as rooted cuttings and 1/3 in unrooted cuttings if desired. Since other sources of supply will be called upon to fill extra quantities any additional supplies will be hard to locate, but we will give the best attention possible to such orders.

1944 NOVELTIES

\$15.00 per 100—\$125.00 per 1000

- Nancy Crain.** A large white button which possesses perfect form and excellent substance, high production. Matures about the 5th of November. Easy to grow.
- Argo.** Late large pompon with good rounded form and excellent substance. Color beautiful bronzy orange, shading to rust. Does not fade. Should not be planted late. Stem and foliage are excellent. Blooms normally the first week in December.
- Nevada.** White anemone suitable for growing in natural sprays. Excellent substance. Blooms normally the end of November into December.
- Minuet.** A beautifully formed, clear pink pompon of medium size that blooms for Thanksgiving. Easy culture. Strong stems and upright sprays. Bunches, keeps, and ships unusually well.
- Bronze Goldsmith.** A beautifully blended orange and Brazil red sport from Goldsmith.
- Yellow Albatross** A light lemon yellow sport from the well-known variety Albatross.
- Sylvanna.** A medium size orange bronze single with outstanding brilliance that does not fade. Its blooming date is November 10. Good substance. Excellent keeping qualities.
- Lodestar.** An intense lemon yellow single that blooms for Thanksgiving. This single, medium in size, has a very attractive star-like form. The substance and keeping quality improves any existing yellow single of similar flowering date. Color does not fade.

All cuttings of the following two varieties will be sold with the following restrictions: Purchaser may grow them for flower production only; propagation rights are reserved and stock must be discarded after the flowering season. Contract forms will be supplied by the originator and must be signed and returned before shipments are made.

\$5.00 per 100—\$45.00 per 1000

- Sunnyside.** The quality, production and ease of culture should excite the critical eye of any grower. Sunnyside is a small golden yellow pompon of very hard substance, on sprays of unsurpassed rigidity. It matures November 20 to 25 to be had for Thanksgiving. Unhesitatingly we recommend Sunnyside as high quality, productive pompons.
- Revelation.** A clear white medium size pompon for early January. The flower is of good form and substance; larger and more fully double than Snow. The small hard stems are extremely rigid, with attractive dark green and healthy foliage. It is not at all sensitive to cultural environment.

BROCCOLI

Green Sprouting Calabrese. 70 days. The best strain for Market, Home Garden or freezing, suitable in north or south. 18 inches tall; branching, forming compact head of bluish green flower buds. After the main head is removed smaller heads are produced from the branches which continue to the end of the season. Pkt., 25c; oz., 50c; ¼ lb., \$1.50; lb., \$5.00.

YELLOW-RESISTANT CABBAGE

We offer the best resistant strains of cabbage seed through the cooperation of some of the best cabbage experts in the district of Racine, Wisconsin. We can not offer anything resistant to virus, as no method of breeding or treatment is known to have any effect on this disease. As a second precaution, everyone should give the hot water treatment to cabbage seed to insure freedom from black rot. Just before planting soak the seed for 30 minutes in water heated to 122° F.

Bugner. 100 days. This is the most popular of all the green types of cabbage for Market, Home Garden, Kraut and storage. It is one of the heaviest for size of head, being firm, tender and excellent quality. 8 inches round, flattened slightly, deep through, 7 inches, weighing 10 pounds or more, outer leaves deep purplish green with a tight folded leaf covering the head. Pkt., 20c; oz., \$1.20; ¼ lb., \$3.50; lb., \$10.00.

Resistant Golden Acre (Racine Market). Matures in about 60 days. The earliest yellows-resistant cabbage yet developed. A solid, round head of excellent flavor, crisp and tender. Pkt., 20c; oz., 70c; ¼ lb., \$2.35.

Jersey Queen. 60 days. Very similar to Early Jersey Wakefield, but bred for resistance to yellows. Pkt., 15c; oz., 70c; ¼ lb., \$2.25; lb., \$6.75.

Mammoth Rock Red. 100 days. While this is not quite as large as the Long Island Mammoth Rock Red strain, it is darker and more uniform; being yellows resistant, is safer to grow. All sections of the country are becoming infested with yellows so it is important that resistant strains be more extensively used. Pkt., 20c; oz., 85c; ¼ lb., \$2.60.

Marion Market. 75 days. The third yellows-resistant cabbage to mature. Of an excellent Copenhagen Market type, though later than select Copenhagen, coming a short time before Glory of Enkhousen. Pkt., 15c; oz., 70c; ¼ lb., \$2.45.

Standard Bred Cabbages

Reselected Copenhagen Market Extra Early. Matures in about 62 days. Earliest of the large heading cabbages, maturing even before the conical types. Market growers have reported their entire crop of this strain harvested before heads from other seed of this variety were ready to cut.

Reselected Tested Stock. Oz., 85c; ¼ lb., \$2.50; lb., \$7.50.

Early Jersey Wakefield. 62 days. Very pointed, hard head, 7 inches long, 5 inches wide. Desirable for the southern trade; stands close planting, weight 3 lbs. Pkt., 10c; oz., 60c; ¼ lb., \$1.75; lb., \$5.25.

Golden Acre.

Matures in about 60 days. This early round headed variety is slightly earlier than our reselected extra early Copenhagen Market and is similar in most other respects, except that its heads are slightly smaller weighing 4 to 5 lbs. Oz., 65c; ¼ lb., \$2.10; lb., \$6.70.

GOLDEN ACRE DANISH GROWN. Oz., 75c; ¼ lb., \$2.50; lb., \$7.50.

Cauliflower

Vaughan's New Snowball. Matures in about 55 days. For early outdoor planting and forcing, as well as for late sowing for the fall crop, this variety is standard. A well grown head measures 9 to 10 inches across with depth in proportion and a perfectly white core. Pkt., 30c; ¼ oz., 90c; ½ oz., \$1.60; oz., \$3.00.

Resistant Celery

Michigan Golden (College Golden). Developed at Michigan State Agricultural College. A new strain of self-blanching celery resistant to root rot or crown rot "Fusarium Yellows," bred from the tall strain of Golden self-blanching. Pkt., 40c; ½ oz., \$1.15; oz., \$2.00; ¼ lb., \$6.00.

The Vaughan. 74 days. The largest of outdoor cucumbers, it is also of first table quality. Compared to other Long White Spine varieties, it is much darker in color, more uniform in shape and size, thinner, and more prolific. It is the ideal American forcing variety, as well as an outdoor sort. Pkt., 10c; oz., 35c; ¼ lb., \$1.00; lb., \$3.00.

Colorado, or "A and C." 68 days. A beautifully long, slender, dark green cucumber of excellent shape and intense dark color which is maintained longer than in any other variety. Fruit is inclined to taper, especially at stem end. Seeds form late in season and are few. Pkt., 10c; oz., 35c; ¼ lb., \$1.00; lb., \$3.00.

Straight Eight. 60 days. A white spine which produces a high percentage of fruits perfectly straight, and 8 or more inches long. Pkt., 10c; oz., 35c; ¼ lb., \$1.00; lb., \$3.00.

EGG PLANT

Bibb Lettuce

Bibb lettuce, sometimes called Limestone, is a fast growing, loose heading variety of exceptional tenderness, which for several years has been grown in the vicinity of Louisville, Ky., and marketed in luxury hotels of the central west.

As the market spreads, other sections will find it profitable to grow this excellent variety. It produces a crop two weeks earlier than Grand Rapids. It is usually sown in flats, and the plants are transplanted to the bench spaced 6 by 6 inches. When the temperatures run above 75 degrees, this variety quickly bolts. It should be grown with a night temperature about 48-52 degrees, and the day temperature not over 60 degrees on cloudy days.

Lettuce Bibb (Limestone). 57 days. This dark green, tender, brittle lettuce, which quickly makes loose heads as big as your fist, is becoming well known to chefs of luxury hotels and to high priced food shops. Some say it was once known as "Half Century," others that it was bred by Maj. John Bibb, of Kentucky, born in 1789. It is making a comeback and we can promise you a fine spring crop, but must warn that it goes to seed quickly in hot weather. Pkt., 20c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$3.75.

Grand Rapids. About 45 days. This home garden favorite, also extensively planted for hotbed or greenhouse growing. The leaves are light green, daintily curled, tender, crisp, delicious. Our selected stock has been bred to a high degree of uniformity in type and season.

Vaughan's Extra Selected Stock. Pkt., 10c; oz., 30c; $\frac{1}{4}$ lb., 70c; lb., \$2.25.

May King. 60 days. Very early variety. The outer leaves are tinged with brown; they fold close, permitting close planting in frames—tender yellow heart. Pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 65c; lb., \$2.00.

ONION

Valencia Sweet Spanish. Matures in about 110 days. Here is a mild, sweet, giant onion of the true Spanish type. From seed it will produce onions weighing a pound; if started in the hotbed, two pound specimens can be grown. Pkt., 20c; $\frac{1}{4}$ lb., \$3.20; lb., \$9.50; 5 lbs., \$9.40.

Prizetaker—American Grown. 105 days. A m o n g large onions this one is exceptional for size and beauty. Our American-grown seed has become thoroughly acclimated through many years of very careful, painstaking culture. Prizetaker is a yellow globe that matures to great size under right conditions; it requires a long season and should be started early in hotbed. Pkt., 20c; $\frac{1}{4}$ lb., \$3.20.

Peppers

Vaughan's Giant Magnum Dulce.

This fine mild pepper can be grown to immense size—seven inches long and 4 inches through—but when grown so large the yield is small. To get a large yield of medium sized peppers, pinch off the "king flowers," the first ones to open. Pkt., 15c; $\frac{1}{2}$ oz., 35c; oz., 65c; $\frac{1}{4}$ lb., \$2.00.

California Wonder. A mild, sweet, mid-season variety, very large, measuring 4 $\frac{1}{2}$ inches in length by 4 inches in diameter. It resembles Chinese Giant in form, but has much thicker flesh. It has a crimson fruit. One of the heaviest peppers grown, not as prolific as some, but much more desirable. $\frac{1}{2}$ oz., 35c; oz., 65c; $\frac{1}{4}$ lb., \$2.00.

Early California Wonder. Very similar to California Wonder. 10 days earlier, more prolific and better for northern latitudes. $\frac{1}{2}$ oz., 40c; oz., 75c; $\frac{1}{4}$ lb., \$2.25.

Crimson Giant. One of the earliest large red sweet peppers. In habit the plant grows two and one-half feet high and bears a large quantity of fruits. The peppers are large, deep green when young and a rich red when ripe; flesh thick, sweet and mild. Pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c; $\frac{1}{4}$ lb., \$1.50.

Hungarian (Hot). In 65 days. A slender hot pepper much prized for canning. It is 1 $\frac{1}{2}$ inches in diameter at the base and often 10 inches long. Pale green turning to red. Pkt., 15c; $\frac{1}{2}$ oz., 35c; oz., 65c; $\frac{1}{4}$ lb., \$2.00.

Bull Nose, Hot. In 70 days. A pungent pepper. Pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c; $\frac{1}{4}$ lb., \$1.50.

Vaughan's New Snowball

One of our Specialties. We know our strain is the equal of any that can be produced. We have tried nearly every other on the market and we have never yet come across anything superior to Vaughan's New Snowball. It is the result of years of careful selection by a most capable and painstaking gardener who grew the seed especially for us on the island of Amagar, near Copenhagen, Denmark, where growing conditions are ideal for the production of perfect seed heads. Vaughan's New Snowball is the best general purpose variety for either spring or fall planting. Heads are usually 9 to 10 inches across, perfectly white, solid, deep and compact.

Pkt., 30c; ¼ oz., 90c; ½ oz., \$1.60; oz., \$3.00.

Vaughan's Earliest Dwarf Erfurt

Combines all pedigree points—earliness, purity of color, dwarf habit and fine grain. A profitable market garden sort.

Pkt., 30c; ¼ oz., 90c; ½ oz., \$1.60; oz., \$3.00.

Danish or Dry Weather

For dry climate and dry seasons. Very sure heading and second early. Heads larger than Snowball and snow-white.

Pkt., 30c; ¼ oz., 90c; ½ oz., \$1.60; oz., \$3.00.

Autumn Giant. Very large and productive.

Pkt., 30c; ¼ oz., 65c; ½ oz., \$1.10; oz., \$2.00.

Freshly Packed and Tested Lawn Seed in 1945 for Your Unsold 1944 Stock

Federal Seed Law Requires Dated Germination Tests

OUR dealers can purchase cartons and 5-lb. bags of our branded seed with no fear of carrying over out-dated seed into the following year. We will allow unsold packages to be returned to us and replace them with freshly packed and tested seed the following spring.

Dealers who have tried this plan report that it enables them to keep up stocks and get maximum sales throughout the season with no fear of inventory losses.

This offer is NOT in any way to be considered on a consignment basis but is solely for the protection of our dealers against having to carry into the following year unsalable, outdated and soiled cartons.

The terms of payment are absolutely the same as heretofore.

This offer does not apply in any way whatsoever to bulk seed or non-branded seed and this is in no way to be considered a guarantee sale. All seed to be exchanged must positively be returned to us prepaid by December 1, 1944, and replacement will be made by March 1, 1945.

NOTE—We cannot accept broken cartons and wet or otherwise damaged seed for exchange.

For Your Protection

All our grass seeds are carefully analyzed in our own fully equipped laboratory and tagged or labelled to conform to the complicated requirements of the state laws. Errors in labelling might be costly and troublesome. Play safe.

With each of the deals below we furnish the vividly colored window streamer illustrated on the opposite page.

Gladiolus Display Box Holding 500 1st Size Bulbs, 50 each of 10 Named Varieties

F. O. B. Chicago or New York

VAUGHAN'S GLADIOLI are famous. For years they have been nationally advertised. You have only to put this box on your counter to sell out quickly.

We use **FIRST SIZE BULBS**, the size which sells best over the counter. The 10 named varieties (50 each) include the show winners **Picardy, Maid of Orleans, Dr. Bennett, Wasaga, Margaret Fulton, Giant Nymph, Gold Eagle, Minuet, Berty Snow, Red Phipps**—none better known. The price to you is \$15.00 for the box and 500 bulbs of 10 named varieties. You retail them for 75c a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. After the display box and first collection have been bought, refill orders will be accepted for \$14.50 for 500 bulbs, 50 each of 10 varieties, in bags of 50; or \$28.00 for 1,000 bulbs, 100 each of ten varieties. Colored pictures are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value. **Varieties Subject to Change Without Notice.**

GIANT MIXTURES

VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—salmons, yellows, pinks, rich reds and blues, are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 60c; $\frac{1}{8}$ oz., \$1.20; $\frac{1}{4}$ oz., \$2.00; oz., \$7.00; lb., \$80.00.

VAUGHAN'S SUPER SWISS PANSIES

One of our leaders and represents the choicest strain of this popular and profitable flower. Combining the finest selections of several Pansy specialists, the perfect blending is further insured by the addition of separate colors that do not generally appear in the average mixture. Without question, the finest mixture of Swiss Giant Pansies on the market. Trade pkt., 75c; $\frac{1}{8}$ oz., \$1.30; $\frac{1}{4}$ oz., \$2.20; oz., \$8.00; $\frac{1}{4}$ lb., \$28.00; lb., \$90.00.
