

## Wales Moth List

A list of all the moth species known to have been recorded in Wales, including species that have been recorded rarely or once only, and which may not have resident breeding populations in Wales. Includes records that may be historic only and species that are now thought to be extinct in Wales (e.g. Conformist).

Compiled by Butterfly Conservation Wales using lists supplied by County Moth Recorders. Complete with records up to and including 2021 (2019-2021 new records marked as such).

Covers the 13 Welsh vice-counties: Monmouthshire (VC35), Glamorgan (VC41), Breconshire (VC42), Radnorshire (VC43), Carmarthenshire (VC44), Pembrokeshire (VC45), Cardiganshire (VC46), Montgomeryshire (VC47), Merionethshire (VC48), Caernarvonshire (VC49), Denbighshire (VC50), Flintshire (VC51) & Anglesey (VC52).

U = Unsupported. These are moth records which are not supported by a full record and hence may be missing from the county datasets, despite being present on MBGBI maps.

List order follows Agassiz, Beavan and Heckford (ABH) *Checklist of the Lepidoptera of the British Isles (2013)* and including recent changes to the list. Bradley & Fletcher (B&F) numbers are also provided.

Names are based on the ABH checklist; for the micro-moths some additional English names in regular use are also included.
