

Wildflower Celebration

Sunday, April 27th from 10 am to 4 pm

Join us for the 10th annual Wildflower Celebration!

Experience a picture perfect day. Dig in to discovery stations, family fun activities, live performances, and plant give-aways.

Free Admission

www.mtcubacenter.org 302.239.4244

WELCOME

I welcome you to the twenty-second annual UDBG benefit plant sale. As we put the finishing touches on the catalog, yet another snowstorm is covering the garden with a white blanket. Hopefully, the catalog will kindle the fires of spring and awaken the gardening spirit in us all.

Hydrangeas are this year's featured plant. While we have featured specifically oakleaf hydrangea in the past, this year we offer those and several other different species and cultivars. Hydrangea vine for arbors, trellises and stone walls, Smooth Hydrangea, a native compact shrub, Rough-leaved Hydrangea with velvety soft foliage, Bigleaf Hydrangea, blue or pink flowers

Hydrangea macrophylla 'Ayesha' in Alice Reilly's garden Photo: Melinda Zoehrer

that are a garden standard, Panicle Hydrangea with large flower clusters late season, and Mountain Hydrangea, exquisite mopheads and lacecaps, are all featured. All of this on compact plants with flowers that can be dried and used for decoration in the house. Most of the selections offered are less than five feet, many three feet or less.

Admittedly, I am biased toward woody plants, but I am excited about the great selection of iris we are offering. A garden favorite for decades, this list offers something for everyone. Dwarf crested iris is a native with very short stature, Japanese iris flowers splay their petals like bursting rockets, Siberian iris is adaptable from standing water to normal garden soils, and our native blueflag, typical of wet meadows has wide, linear leaves in contrast to the typical fine textured grass foliage surrounding it in its native habitat.

There is also a good selection of "edibles" at the sale. Interest in landscape plants that also offer edible fruits is growing. We have the low growing, small-fruited lowbush or the medium sized, large fruited highbush blueberry. We have three superior pawpaw cultivars, all selected for fruit size and sweetness. From the wild into the garden, persimmons offer a delicious fruit in late fall. Not to mention less common fruits such as quince, hardy orange, and rose hips. New this year, we will offer select plants of heirloom vegetables for your garden. Look for tomatoes, squash, gourds and more.

I would also like to thank our customers, advertisers and patrons. The UDBG plant sale is our primary source of funds to run the garden. We could not maintain the garden, organize tours, develop educational programs and support the education of the students without outside funds. So come enjoy the Ag Day festivities and the sale. We also hope to see you return other times to enjoy the color in the trial garden, check out the butterflies, moths and skippers in the Lepidoptera Trail, enjoy the birds in the Wetlands Garden, and, in general, enjoy the diversity of the plants in the collections. Thanks and I look forward to seeing you at the sale.

John Frett, Ph.D.

Mission

The University of Delaware Botanic Gardens contributes to an understanding of the changing relationships between plants and people through education, research, cooperative extension, and community support. This understanding instills an appreciation of plants in the landscape and natural environments.

EVENT DATES – AT-A-GLANCE

Wednesday, April 8, 7–8:30 pm, Lecture: Tending Tender Treasures for Totally Tropical Terraces

Thursday, April 9, 4–5:30 pm *Guided Walk of Plant Sale Highlights*

Wednesday, April 23, 4:30–6:00 pm Patron Plant Sale and Reception RSVP required. For more information on attending this event, please see event information below.

Thursday, April 24, 3–7 pm *UDBG Members only* Friday, April 25, 3–7 pm *General Public*

Saturday, April 26, 9:30 am-4 pm General Public

Monday, May 5, 7–8:30 pm, Lecture: Ancestral Wisdom in Modern Medicine: Plants, People, and Cultures in the Tropical Rainforest

GENERAL INFORMATION

The plant sale is organized by the UDBG staff in conjunction with the UDBG Friends and many dedicated volunteers. Visa, MC, and Discover cards, checks, and cash are accepted. The sale is located inside the fenced-in area across from Fischer Greenhouse on the University of Delaware south campus (north of the UD football stadium, near the UDairy Creamery).

Benefits of membership

The UDBG Friends-only day to shop is Thursday, April 24, 3–7 pm. *Only* on this day, select woodies and perennials will be discounted 15%. Those who join for the *first* time during the four days of the sale, will receive a free hydrangea propagated from UDBG's plant collection. Please go to UDBG's website at www.canr.udel.edu/udbg or by using the membership form on page 25.

Catalog on the Web

The plant sale catalog is available on the Web at: www.canr.udel.edu/udbg. Additional plants will be available for purchase on each day of the sale.Although they are not included in the catalog with descriptions, you may find a list of these plants on page 24.

EVENT INFORMATION

To ensure a space, registration is highly recommended for all educational events. Please e-mail botanicgardens@udel.edu to register or phone 302-831-2531.

Friends Lecture: Tending Tender Treasures for

Totally Tropical Terraces

Tuesday, April 8, 7-8:30 pm

UDBG Friends members: FREE; Nonmembers: \$10

Location: The Commons, Townsend Hall

Tropicals have become all the rage over the past decade. Their large, lush foliage, bold architecture, vibrant colors, heavenly fragrances and specific, though easy care, makes this group of plants a must-have for your garden. Join Garden Designer *Michael Bowell* as he illustrates with plants how to best use them in the garden, and care, propagation, and overwintering of these choice exotics. Plants that he will cover include: palms, agapanthus, hibiscus, orchids, cannas, brugmansias, gardenias, crinum lilies, begonias, coleus, citrus, tree ferns, giant aroids, and bananas as well as other flowering and fruiting trees, herbs and epiphytes.

A major exhibitor at the Philadelphia Flower Show, Michael is also an accredited American Orchid Society Judge who has exhibited orchids for over 30 years. Through his company, Create a Scene in Malvern, PA, Michael designs gardens, and with his artful partner Simple, designs exhibits for horticultural trade shows.

Guided Walk of 2014 Plant Sale Highlights

Wednesday, April 9, 4-5:30 pm

UDBG Friends members: \$5; Nonmembers: \$10 Location: Meet at Fischer Greenhouse entrance

Dr. John Frett will lead a guided walk through UDBG of plants offered in the plant sale, and if there's time, preview the containerized plants. Min: 10 people; Max: 25 people.

Patron Reception and Plant Sale

Wednesday, April 23, 4:30-6:00 pm

This intimate evening is a thank you event to those who have contributed \$130 or more to support UDBG's Student Program, an essential component of UDBG's functioning. Enjoy conversations with expert plant folks, a private plant sale this evening only, delicious refreshments, and the first crack at all other plant sale offerings. If interested in attending or for more information, please call 302-831-0153 or email mzoehrer@udel.edu.

Lecture: Ancestral Wisdom in Modern Medicine: Plants, People, and Cultures in the Tropical Rainforest

Monday, May 5, 7-8:30 pm

UDBG Friends members: \$15; Nonmembers: \$20

Location: The Commons, Townsend Hall

Join UD alum *Dr. Michael Balick* as he talks about his work studying plants used in traditional healing by indigenous cultures, the science of ethnomedicine, and his research in New York City, studying traditional healing practices in ethnic communities in the urban environment. Described as "one of the great botanical experts of our time," Dr. Balick has a specialty in medicinal and food plants, and the role they play in traditional health care systems. Since the early 1980's he has worked with indigenous cultures around the world studying how people interact with the plants in their environment, and toward conservation of biological and cultural diversity. He has worked to document their plant knowledge, understand the environmental effects of their traditional management systems, and develop sustainable utilization systems, while ensuring that the benefits of this work are always shared with local communities. Originally from Wilmington, Delaware, Dr. Balick will also discuss the trajectory of his career, starting with the University of Delaware.

Michael's latest book, *Rodale's 21st Century Herbal: A Practical Guide for Healthy Living Using Nature's Most Powerful Plants* will be available for purchase and to sign. The book has been inspired by texts known as "herbals," a genre of books published widely during the 15th-18th centuries that contain information on the therapeutic use of plants.

Dr. Michael Balick received his Ph.D. and M.A. in Biology from Harvard University, with an undergraduate major in horticulture and plant science from the University of Delaware. Dr. Balick references Dr. Richard W. Lighty as one of his mentors. Currently, he is Vice President for Botanical Science and Director and Philecology Curator of the Institute of Economic Botany at the New York Botanical Garden. The author of more than 16 scientific and general interest books and monographs, he teaches ethnobotany at Columbia University, where he serves as an Adjunct Professor, in addition to New York University, Yale University, and City University of New York.

Hydrangeas - Stars of the SUMMER GARDEN

John Frett

Hydrangea is an amazingly diverse genus full of summer flowering species. All have four petals and typically a mixture of shows sterile and less prominent fertile flowers. Most hydrangea flowers work well as cut or dried for decorative purposes. Flower color ranges from white for most species but blue or pink for others, varying based on soil pH. Hydrangeas are able to fill almost any garden niche. Many will flourish in full sun, all will tolerate dappled shade, and a few thrive in full shade. Plants are typically easy to grow, preferring moist, well-drained, loamy soil. They range from vines, to compact shrubs, to large shrubs but the current trend is to breed for more compact plants that are sized for the small, urban landscape. Below is a selection of the more unusual and popular species.

Latin name Common name Mature Size Light Soil Pot Size, Plant Size Price

Smooth Hydrangea is a small to medium native shrub, noted for its large globose white flower clusters in the summer that dry brown and persist into the winter. The dense twiggy habit responds well to regular removal of weak, old stems in order to maximize flowering. Flowers on current season's growth.

Hydrangea arborescens 'Abetwo'

Incrediball™ Smooth Hydrangea 4-5 \$35 Huge, globose white flower clusters are up to 12 inches in diameter, much more upright

than the traditional 'Annabelle'. June to August. N Hydrangea arborescens 'Hayes Starburst'

Smooth Hydrangea 1 g, 1

Not quite globe form, yet not quite flat topped, the white 3-4 inch flower clusters sport numerous star-shaped sterile flowers that are dramatically double petaled. June–July. N

Rough-leaved Hydrangea is anything but rough. The leaves are large and densely hairy, like velvet. The summer flowers are flat, lacey clusters with a ring of white, sterile flowers that surround blue fertile flowers in the center. The nomenclature is terribly confused but that does not make the plants any less beautiful. Fall color is yellow.

Hydrangea aspera ssp. macrophylla

Rough-Leaved Hydrangea ○ ■ 1 g, 1

Seldom seen in garden centers, this is a unique hydrangea whose leaves are covered in velvety soft hair. The summer flower clusters have sterile white flowers that surround a center of pale purple fertile flowers.

Bracted Hydrangea is a close relative of the previous species but much more compact. The velvety leaves are more lustrous on the upper surface. Flowers are lacecap form with sterile flowers that surround typically lavender fertile flowers in the center.

Hydrangea involucrata 'Wim Rutten'

○ **3** g, 1–2 Blue Bunny™ Bracted Hydrangea 2-4

This dwarf plant is ideal for small gardens or containers. The summer lacecap inflorescences have pale blue to white sterile flowers and deeper blue fertile flowers. Unlike other hydrangeas, the plant continues to produce new flowers into the fall, so there is always fresh color on the plant.

Bigleaf Hydrangea has been grown in its native Japan for centuries before being imported to Europe and the United States. It is a traditional plant from Victorian gardens that maintains its popularity to this day. Small to medium sized plants produce pink flowers in neutral to basic soils and blue flowers in acidic soils. Plants have either mophead globose flower clusters or lacecap clusters that are flat with large petaled, sterile flowers surrounding apetalous, fertile flowers in the center.

Hydrangea macrophylla 'Ayesha'

Bigleaf Hydrangea ○ ■ 1 g, 1

The unusual flower is bicolored; pale pink or mauve on the edge to white in the center of the cup shaped petals of this mophead inflorescence.

Hydrangea arborescens 'Hayes Starburst' in Liz Sharp's garden

Hydrangea arborescens 'Abetwo' Photo: Melinda Zoehrer

Mature Size Light Soil Latin name Common name Pot Size, Plant Size Price

Hydrangea macrophylla 'Blaumeise' Bigleaf Hydrangea

1 g, 1-2 A stunning lacecap developed in Switzerland, 'Blaumeise' has large flat flowers composed

of very wide deep purple blue sterile florets surrounding tiny indigo blue fertile flowers.

PATRON EVENING ONLY

Hydrangea macrophylla 'Hororb'

Abracadabra™ Orb Bigleaf Hydrangea 3-4 ○ **3** g, 1–2 A member of the Abracadabra™ hydrangea series. The sterile flowers of this mophead in-

florescence emerge green and peach before maturing to hot pink (blue in acid). The mahogany-colored stems offer a dramatic contrast to the flower color.

Hydrangea macrophylla 'Lynn'

Let's Dance® Starlight Hydrangea 2-3

A member of the Let's Dance® series, with very compact, reblooming, lacecap hydrangea

flowers on both new and old wood providing an extended season of vivid blue to pink color depending on soil pH.

Hydrangea macrophylla 'Madame Emile Mouillere'

Bigleaf Hydrangea \$25 1 g, 1-2

Considered by the late great gardener and writer Christoper Lloyd of Great Dixter to be the best pure white mophead. Tightly packed serrated flowers open wide and push against each other to produce a lacy work of art. Flowers age to blush pink or green and are great to cut and dry. PATRON EVENING ONLY

Hydrangea macrophylla 'SMHMP1'

Paraplu™ Bigleaf Hydrangea 2-3○ ¶ 1 g, 1–2 The intense color of this dwarf mophead varies from bubblegum pink to intense hot pink,

possibly with some purple in acidic soils.

Mature Size Light Soil

Pot Size, Plant Size Price

Hydrangea macrophylla 'Tokyo Delight'
Bigleaf Hydrangea 3–5 © 5, 1–2 \$35
An old lacecap favorite with outer white sterile flowers that slowly mature to burgundy around bright blue to mauve fertile flowers.

Hydrangea macrophylla 'Tovelit'
Bigleaf Hydrangea 3–4 ○ 1 g, 1–2 \$2
The rose to mauve colored flowers and the uniquely serrated petals of the flowers gives

Panicle Hydrangea is another old time standard that has graced gardens for decades. They have typically been the largest plants of the hydrangeas but current trends in breeding have reduced the size by more than half. What used to be a small tree form is now a midsized shrub. The enormous conical—shaped flowers appear to be mostly showy sterile florets but upon closer inspection, the numerous fertile flowers are held inside. Generally, flowers are white and may fade to pink before drying to brown. Several new selections turn pink quicker and retain more vivid pink longer, even on dried flowers. Panicle hydrangeas flower on current season's growth and therefore should be pruned in late winter or early spring.

Hydrangea paniculata 'Ilvomindy'

this mophead abundant charm.

Latin name Common name

Mega Mindy^{$^{\text{M}}$} Panicle Hydrangea 5–6 \bigcirc ¶ 1 g, 1–2 \$2 The compact plants produce large upright panicles on sturdy stems. Flowers begin white then fade to striking pinkish red in late summer.

Hydrangea paniculata 'SMHPFL'

Fire Light™ Panicle Hydrangea 5–7 ○ € 3 g, 2–3 \$35. This selection is much smaller than the species and has pure white flowers that transition to pomegranate–pink by late summer, retaining color into fall.

Oakleaf Hydrangea is appropriately named for the large, coarse textured foliage that remotely resembles that of an oak. Large flower clusters are globose to conical in form with numerous showy sterile flowers mixed in with small fertile flowers. The white flowers fade to pink in fall and dry brown, often remaining on the plants into winter. In fall, the leaves turn rich shades of mahogany-red.

Hydrangea quercifolia 'Amethyst'

Oakleaf Hydrangea 5–6 \bigcirc 3 g, 2–3 \$35 The unique white flower clusters mature a striking rich wine red unmatched by any other oakleaf hydrangea. **N**

Hydrangea quercifolia 'Brido'

Hydrangea quercifolia 'Little Honey'

Oakleaf Hydrangea 3–4 •• 1 g, 1 \$25 Foliage emerges gold, fades to chartreuse, then burgundy red in fall. Do not plant in full sun; leaves will burn. Summer white flowers may develop slight pink as they mature. N

Hydrangea quercifolia 'Munchkin'

Oakleaf Hydrangea 3–5 © 3, 1–2 \$35 This compact plant was bred at the U.S. National Arboretum and produces abundant 6.5 inches long white flowers that gradually turn medium pink. **N**

Hydrangea quercifolia 'Ruby Slippers'

Oakleaf Hydrangea 3–4 0 3 g, 1–2 \$:
Also bred at the U.S. National Arboretum and possibly the most compact of the oakleaf h

Also bred at the U.S. National Arboretum and possibly the most compact of the oakleaf hydrangeas. This selection has 9-inch long summer flowers that open white, quickly turning pale pink and deepening to rose. $\bf N$

Maroon stems of *Hydrangea macrophylla* 'Honorb'
Photo: Melinda Zoehrer

Latin name Common name Mature Size Light Soil Pot Size, Plant Size Price

Mountain Hydrangea is so similar to bigleaf hydrangea, that they are sometimes treated as a variety or subspecies of bigleaf hydrangea. Mountain hydrangea differs in that it is a more compact plant with smaller leaves and flowers. Plants are also more cold hardy than bigleaf hydrangea. Flower clusters are either mophead or lacecap and range from blue to pink base on soil pH and aluminum availability.

Hydrangea serrata 'Blue Deckle'

Mountain Hydrangea 2–3 © 1, 9, <1 \$25
The petals on the sterile flowers are variously serrated, and at times give a distinctly frilly appearance—an elegant plant. Flower color is pale pink to lavender in neutral soils, blue in acid soil. Leaves turn reddish in the fall.

Hydrangea serrata 'Grayswood'

Mountain Hydrangea 4–5 ○ € 1 g, <1 \$25 The lacecap inflorescences have pale blue fertile to white sterile flowers changing to crim-

The lacecap inflorescences have pale blue fertile to white sterile flowers changing to crim son red in fall. Leaves can be splashed pale green and darker green.

QUICK REFERENCE FOR CULTURAL SYMBOLS

All plant beights listed in catalog are in feet. No inches are used.

In order to help you select the right plant for your gardening needs, we have included the symbols below to indicate plant needs. These are broad guidelines, as plants can often withstand a wider range of conditions. Plants that prefer part shade may grow well in full sun if there is adequate soil moisture during hot, dry spells. Similarly, plants that prefer moist soils may grow well in drier sites if some shade is provided, especially midday.

Light Recommendations

o full sun partial sun full shade

Soil Moisture Recommendations

☐ dry soils ☐ moist soil ☐ wet soils

N after the plant description indicates plants are native to the Eastern U.S. We consider cultivars of native plants to be native, regarding them as selections from variants in the population.

₩ Provides above average support for adult butterfly, moth, or skippers and/or Lepidoptera larvae (caterpillar)

Plant provides food source for birds

PLANT DESCRIPTIONS **CONIFERS**

All heights of plants are in feet.

Cephalotaxus barringtonia 'Duke Gardens'

Japanese Plum Yew \$25

A graceful, spreading form that creates an elegant foundation plant. Selected at Duke Gardens in North Carolina, it shows heat tolerance and deer resistance.

Cephalotaxus harringtonia 'Prostrata'

Japanese Plum Yew 2-3 \$35

The low, spreading habit makes this an excellent groundcover, foundation plant, or to plant cascading over a wall. Adaptable, easy to grow, and deer resistant.

Chamaecyparis obtusa 'Nana Gracilis'

Hinoki Cypress 4-6

The formal pyramidal habit, slow growth rate, and dwarf form make this a superb conifer for the mixed border, especially where winter interest is desired. Dense, extremely healthy, rich green colored scalloped fans of foliage provide a good focal point.

Chamaecyparis obtusa 'Verdoni'

○ **3** g, 1–2 Hinoki Cypress

Bright yellow fans of dense foliage decorate this mid-size Hinoki, adding interest all year, particularly in the winter garden. Superb looking with Japanese and Korean maples.

Juniperus conferta 'Blue Pacific'

O 2 2 g, 1 Shore Juniper 1-2\$15

An attractive, durable, easily grown groundcover for full sun. The distinct blue cast to the foliage throughout the year makes this a very desirable conifer throughout the year.

30-50 O 🖳 1 g. 1 *Pseudolarix kaempferi* Golden Larch \$15 Graceful, deciduous conifer with soft-textured foliage that turns glowing gold then amber in fall. Cones resemble artichokes and add to elegant silhouette in winter.

Thuja 'Green Giant' Giant Arborvitae 50-70 ○ **3** g, 4–5 One of the fastest growing conifers capable of 2-4 feet of annual growth. The foliage retains its green color throughout the winter. Great for use as a screen, or to create garden rooms or a well-established look in no time.

TREES

All heights of plants are in feet.

John Frett has let his maple fetish seep through. Below is an exceptional selection of maple species and cultivars meritorious of the most selective mail order specialty nursery. A few mature small and therefore are popular choices for bonsai, while others are well suited for the modern urban landscape; all offer lovely fall color.

Acer 'JFS-KW202'

Crimson Sunset[™] Maple ○ **1**5 g, 6-8 20-35

New hybrid maple similar to Purpleblow maple provides excellent heat and drought tolerance. The medium size makes it a good candidate as a shade tree for smaller landscapes. The deep, rich purple leaves maintain color throughout the summer.

Acer buergerianum 'Mino Yatsubusa'

○ 🔍 1 g, 1 Threadleaf Trident Maple 5-10 \$35

Graceful dwarf form, with long slender 3-lobed leaves. Differs from straight species in leaf shape, rough bark, and brilliant orange and fiery red color in the fall.

PATRON EVENING ONLY.

Acer elegantulum Elegant Maple 15-25 ○ 1 g, 2-3 Extremely rare maple introduced from China in the 1990s. Part of the Japanese maple section reputed to possess verticillium resistance. Emerging, bright red, 3-lobed leaves fade to green in summer, returning to red in fall.

Acer grandidentatum Bigtooth Maple 20-35 \$45 A western U.S. variant of sugar maple with much better heat and drought tolerance, though with similar yellow to fiery orange fall color. Plant mature smaller, more in scale with urban landscapes.

Acer griseum Paperbark Maple 20-35 A very slow growing tree with exquisite peeling brown bark and red fall color. A longtime favorite of plant enthusiasts and a Pennsylvania Horticultural Society Gold Medal

Acer japonicum 'Green Cascade'

winner. Landscape size, ready to make a big impact.

Fullmoon Maple 4-5

Cascading waterfall effect created by the mounding habit and deeply dissected leaves. The delicate texture is enhanced by the brilliant yellow, orange and crimson fall color. Acer mandshuricum

Mandshurian Maple 15-25 \$45

Rare trifoliate maple similar to A. griseum and A. triflorum, though lacks the peely bark of its relatives. Based on several plants that John Frett has grown, Mandshurian Maple offers bright red fall color.

○ **4** 1 g, 1–2 Acer olivaceum Olive Maple 15-25

Another extremely rare maple with palmate leaves. Few specimens are growing in the U.S. but reportedly holds its leaves late in the fall to provide a late burst of yellow, orange and red.

PATRON EVENING ONLY

Acer palmatum 'Red Filigree Lace'

Japanese Maple 4-6

The maroon colored foliage of this diminutive plant persists through the summer and into the fall. But the color is secondary to the extremely fine textured, delicate lacey

Acer palmatum 'Tamukeyama'

4–6 O 7 g, 4 Iananese Manle Notable for its extremely fine textured, lacey purple foliage that it retains throughout

the summer. One of the very best Japanese 'Dissectum' group maples and a Pennsylvania Horticultural Society Gold Medal winner.

Acer pensylvanicum 'Erythrocladum'

10-15 \$65 Moosewood

"Awestruck," says John Frett, describing his first impression of this plant at the Arnold Arboretum. On older plants, brilliant red stems develop crisp white stripes, fantastic against an evergreen backdrop. N PATRON EVENING ONLY

Acer pseudoplatanus Sycamore Maple 40-60 ○ **3** g, 2–3 Once popular in local landscapes, this plant is only occasionally seen in Victorian landscapes and old farmsteads, but deserves renewed attention. Distinctive characteristics include: attractive flaking bark on mature plants, good yellow fall color, ornamental hanging fruit clusters, large bold textured leaves, and toughness as a shade tree.

Acer pseudoplatanus 'Esk Sunset'

15-20

Sycamore maple is named for the flaky bark that develops as plants mature. Eye-popping green foliage emerges with an orange-pink variegation and changes in the summer to green splashed with white and pink, with purple undersides.

PATRON EVENING ONLY

Acer pseudosieboldianum ssp. takesimense

○ **4** 1 g, 1–3 10-15 Korean Maple \$35 A Japanese maple relative with more rounded leaves. Plants are more durable than

typical Japanese maple with purplish red to scarlet fall color that does not disappoint. An excellent maple for small scale, tight garden situations.

Acer triflorum Three Flowered Maple ○ **1** g, 2–3 20-35 \$45 A remarkable tree, related to and similar to the better-known paperbark maple. A slow growing, small maple that offers peeling golden-tan bark and trifoliate leaves that turn a combination of bright yellow, orange or red in fall.

Acer truncatum 'Akikaze Nishiki'

Purpleblow Maple 15-25 ○ **4** 1 g, 1–2 \$45

The foliage is strikingly variegated with a combination of flecks and large white sectors. Large plants are quite noticeable, especially when combined with the typical green of other plants. Fall foliage is a combination of golden yellow, burgundy red and splashes of white. PATRON EVENING ONLY

Asimina Pawpaw 15-30

○ ■ 1 g, 2 Common as an understory tree though does equally well in full sun. Tropical-looking fo-

liage turns clear vellow in the fall, when delicious, banana custard-like fruit appears. Larval host for Zebra Swallowtail and Pawpaw Sphinx. N 🦋 🦃

We offer the following cultivars selected for fruit-eating quality:

A. triloba 'Prolific' Delicious fruit, creamy texture, bears at young age; ripens mid-September.

A. triloba 'Rebecca's Gold' Large large kidney shaped fruit with yellow flesh.

A. triloba 'Sunflower' Known for large flavorful fruit with fewer seeds; ripens early October; isolated plants produce heavy crops of fruit.

Cercidiphyllum japonicum 'Morioka Weeping'

○ 🔍 1 g, 1 20-30 Weeping Katsura \$65

Refinement on the more common 'Pendula', it provides a stronger central leader but with the same graceful weeping of the secondary branches. Fall color turns golden yellow to apricot with the unforgettable cotton candy fragrance. PATRON EVENING ONLY

Cladrastis kentukea 'Perkin's Pink'

○ **4** 7 g, 4–5 30-50 American Yellowwood

A true star with a heavenly fragrance and soft pink flowers mid-May. Up to 12-inch long terminal clusters provide fabulous display. A small- to medium-sized tree for residential landscapes with clear yellow fall foliage. Tolerant of wet soil. Prune when young to shape.

Fagus grandifolia American Beech 50-60 ○ **3** g, 2–3 One of the most common trees in our regional forests yet nearly impossible to purchase or find in the trade. John Frett has searched far and wide to be able to offer you this grand

Liquidambar styraciflua 'Slender Silhouette'

○ 🖫 10 g, 10 American Sweetgum 50-60 A student described this plant as a green telephone pole, which is not far from the truth. A mature plant will be less than 10 feet wide, possibly only 5 feet. The foliage turns yellow with slight red in the fall and fruit set is reputedly much reduced from the species although reports vary. N

Liriodendron chinense 'J. C. Raulston'

Chinese Tuliptree 40-60 ○ **4** 3 g, 5 \$45 Named for the late J. C. Raulston, this plant is a fast grower, 25 feet in 7 years. Similar in many ways to our native, the more deeply incised foliage provides a finer texture on land-

scape plants with the same golden yellow fall color. The cultivar was selected for a fuller canopy and more gracefully divided foliage.

Morus alba 'Nuclear Blast'

Contorted Mulberry 6-12Contorted stems form scaffolding for ribbons of foliage. The compact habit allows incor-

poration into a small-scale landscape. Fruitless form.

Nyssa sylvatica 'NSUHH'

○ CL 15 g, 6 Green Gable™ Black Gum 30-50

Selected by Alex Neubauer at his Tennessee nursery, Green Gable produces a strong leader, is uniformly branched and consistently develops scarlet red fall foliage. N

Nyssa sylvatica 'Zydeco Twist'

Contorted Black Gum 20-40 The distincly twisted branches offer great winter appeal, holding snow to highlight its

sculptural quality. Same vibrant scarlet-red foliage typical of black gums. N 🕷 🦃

Populus grandidentata Bigtooth Aspen 40-60 ○ **4**-6 \$25 Valuable for revegetation and improvement of disturbed sites, this aspen also provides good habitat for wildlife. Vibrant yellow fall color 'shimmers' when the wind blows. A fast grower for quick shade; possibly remove once superior trees mature. N 🦋 🦃

Prunus subbirtella 'Pendula'

Double-flowered Weeping Cherry 20-40 0 15 g, 6-8 Cherry blossom viewing is the essence of spring in Japan. Why not in your garden? Double pink flowers shroud the gracefully pendulant branches and extend the display period beyond single flowered selections.

Quercus alba White Oak O 🕰 2 g, 4 50-80 A majestic oak frequently found in local woodlands. A magnificent large shade tree with

the potential for red-purple fall color. Good for wildlife of many kinds. N 🕷 🦃

Quercus coccinea Scarlet Oak 50-60 Long considered one of the best native oaks for its spectacular red to scarlet fall color. Scarlet oak can be mistaken for pin oak but doesn't have drooping lower branches. N **W**

Quercus dentata var. pinnatifida

Damyio Oak 15-25 O 3 g, 1-2

This very rare Asian oak has large leaves dissected to the midrib, creating a lacier version of an otherwise course textured plant. Exquisite accent plant.

Robinia pseudoacacia 'Lace Lady'

Twisty Baby™ Black Locust 10-15 Characterized by its bushy shrub growth habit, 'Lace Lady' can be grown as a small tree or shrub. The twisted, contorted stems are distinctly architectural, particularly during winter months when highlighted with snow. White fragrant flowers are sporadically produced in late spring. N 🕷

SHRUBS

All heights of plants are in feet.

Latin name Common name Pot Size, Plant Size Price

Abelia × grandiflora 'Minduo 1'

Sunny Anniversary™ Hybrid Abelia 2 - 3

Fragrant, pale yellow flowers with splashes of pink and orange in the throat, produced midsummer/fall. Compact plant, excellent for foundation, groundcover and massing. A

Abelia × grandiflora 'Kaleidoscope'

Glossy Abelia 2 - 3

Lemon-yellow variegated leaves with lime green centers begin to grow on top of red stems in spring, turning bright yellow, orange and red in the fall, linger into winter. White fragrant flowers summer-fall and compact habit make it a winner. 🇳

Abelia × grandiflora 'Rose Creek'

○ 🔍 3 g, 2 \$35 Glossy Abelia 2 - 3

Abundant white flowers throughout the summer on compact plant with pinkish new foliage, maturing glossy green foliage. Burgundy foliage persists adding color to winter

Abeliophyllum distichum 'Roseum'

White Forsythia 2 - 30 1 g, 2 \$25

The "white forsythia" with fragrant, pale pink flowers March-April; bring spring inside by cutting branches to force.

Aesculus pavia Red Buckeye 15-30

Native to southeastern U.S., this large shrub or small tree produces spikes of red flowers up to 8 inches long in late spring. Nuts produced in the fall provide food for wildlife. Hummingbird magnet. N 🦃

Alhizia iulihrissin 'Chocolate' Mimosa 15-20 \$35 The fern-like leaves emerge bronze green, mature to deep chocolate burgundy color, last through fall. In summer, pink powder puff flowers atop. Does not self sow.

Amelanchier × grandiflora 'Autumn Brilliance

20-25 An easy-to-grow small tree with abundant white flowers in April, followed by glossy red

fruit June–July, and glowing red foliage in the fall. Tolerates wide range of soils. N 🕷 🧳

○ **3** g, 3–4 Amelanchier laevis Serviceberry 15-25 Excellent native providing smooth grey bark, delicate white spring flowers, red maturing dark blue fruit and spectacular orange red fall color. Fruit is tasty for birds and people alike. N 🕷 🦃

Arctostaphylos uva-ursi 'Massachusetts'

○ □ □ 1 g, .5 Bearberry

In spring, small, pink-white, urn-shaped flowers are followed by large, bright red berries in fall. Native to the Pine Barrens, this woody groundcover has dark evergreen foliage and thrives in poor, sandy soils. N

Ardisia japonica 'Chirimen'

● 🕰 2 g, 1 Evergreen, ground-hugging shrub, with white-pink flowers July-August followed by no-

table red fruit fall through winter. Best cold hardiness and most compact of Ardisia.

○ **1** g, 2–3 Aronia arbutifolia Chokeberry 6-8 Hard-to-beat shrub based on white flowers in spring, scarlet-red leaves in fall, abundant

red fruit in winter, and cultural adaptability in the landscape. N 🦃

Light Soil Pot Size, Plant Size Price

Aucuba japonica 'Gold Dust'

○ **4** 1 g, 1 Japanese Aucuba 4-6

An evergreen shrub ideally suited to understory and shade gardens. The bold textured, gold splattered foliage brightens up shady gardens. Red fruit on female plants and foliage unpalatable to deer added bonuses.

Aucuba japonica 'Hosoba Hoshifu'

Japanese Aucuba ○ **3** g, 2–3

Long, narrow leaves are heavily sawtoothed and splashed with gold. Spikes of maroon spring flowers give rise to bright red fruit in late summer and fall if there is a male nearby. Plant in protected site.

Buddleia 'ILVOargus01'

InSpired[™] Violet Butterfly Bush \$35 6-10 A sterile, non-invasive selection with fragrant purple flowers that appear throughout the summer and into fall. Great magnet for adult butterflies.

Buddleia 'Purple Haze'

Lo & Behold® Butterfly Bush 2-3\$35

Dwarf variety with low, spreading habit and abundant, fragrant purple flowers all summer. Flowers are sterile, not posing weed problem. Best if cutback early spring. Great magnet for adult butterflies.

Buddleia alternifolia Butterfly Bush 5-6 What it lacks in flower longevity, it makes up for in display. The lavender flowers shroud the naked stems in April and May and give way to silver grey foliage in the summer. Great magnet for adult butterflies.

Buddleia lindleyana Butterfly Bush 6 - 10\$15 Distinct species with spectacular rich violet flowers borne in arching clusters throughout the summer. Great magnet for adult butterflies.

Buxus microphylla var. koreana 'Tide Hill'

○● 🔍 1 g, 1 Boxwood \$15

John Frett's favorite dwarf boxwood; 10-year old plant in his garden is only 14 inches tall by 24 inches wide. Narrow evergreen foliage works well as a hedge.

Buxus sempervirens 'Elegantissima'

○ ¶ 1 g, .5 Variegated Boxwood \$15 Dense, compact, slow growing, evergreen shrub with variegated leaves.

Callicarpa americana American Beautyberry 8–10 \$15 Native to the southeastern U.S., boasting a vibrant display of purple fruit against clear yellow leaves in late summer and fall. Prune back early spring for more compact habit. N

Callicarpa dichotoma 'Early Amethyst'

○ ¶ 1 g, 2–3 Beautyberry 4-6 \$15

The amethyst colored fruit shroud the stems from late summer/midwinter for striking late season color. Lightly prune in spring or cut back to 6 inches late winter. 🦃

Callicarpa dichotoma 'Splashy' Beautyberry 8–10 ○ **3** g, 2–3 White-splashed variegation covers more than half the leaf surface all summer long. Pale lavender flowers followed by prolific number of purple berries. 🦃

Chaenomeles × superba 'Crimson and Gold'

Hybrid Flowering Quince 2-3 \$35 Compact plants boasts large, velvet, crimson-red petals with bright yellow stamens.

Chimonanthus praecox Wintersweet 8-12 O 2 1 g. 2-3 \$25 Extraordinarily fragrant, small pale yellow, bell-shaped flowers in late February.

Chimonanthus praecox 'Luteus'

Wintersweet 8-12 \$65 Beautiful clear yellow selection of the species produces early spring flowers. Very rare in the trade. Bring sprig indoors in winter to enjoy fragrant flowers or plant where you can enjoy its fragrance in winter. PATRON EVENING ONLY

Chionanthus virginicus Fringetree 15-25 ○ **4** 3 g, 4 Native to the mid-Atlantic, this large shrub or small tree produces clouds of fragrant white flowers mid spring. Female plants have clusters of blue fruit that attract birds in the fall. N 🦃

Chionanthus virginicus 'White Knight'

Fringetree 5-8 ○ **2** g, 2–3 \$45 Ideally suited to the smaller garden, this male cultivar grows less than half the size of the species. Plants produce frothy clouds of fragrant white flowers in spring. N 👺

Clerodendron tricbotomum

Harlequin Glorybower 5-10 ○ ■ 1 g, 2–3 A tropical plant best grown as a cut back shrub in our area. Deliciously fragrant flowers begin in July and continue to frost. As fruits develop, the sepals turn vibrant red, offsetting the fruits progression from white to porcelain blue to deep blue.

Clethra alnifolia 'Crystalina'

Sugartina™ Summersweet ○● **3** g, 2–3 2-3 \$35 Newest of the dwarf clethras, with very compact habit. White fragrant flowers produced mid to late summer attract many pollinators. Plant in drift, as foundation plant, or in herbaceous border. N 🕷

Clethra alnifolia 'Ruby Spice'

Summersweet \$35 Even with the plethora of new pink selections, this is still the richest in color. Fragrant flowers begin in late June and continue through July. N 🕷

Clethra alnifolia 'Sixteen Candles'

Summersweet 2-3\$25 Selected by plantsman Michael Dirr for its more compact habit and larger flower clusters than 'Hummingbird', though with same fragrant, ivory flowers mid to late summer. N

Cornus alternifolia Pagoda Dogwood 15-25 Much underrated native shrub with horizontal branching habit, white flowers April-May, blue-black fruit borne on red stems in late summer, and burgundy leaves in fall. N 🦋 🦃

Cornus alternifolia 'W. Stackman'

Golden Shadows[™] Pagoda Dogwood 8-15 ● **3** g, 2–3 \$45 Bold, brightly variegated foliage with gold margins fades to creamy white in summer, then two-toned pink-maroon fall color. White spring flowers, dark blue fruit in fall. N 🧺 🦃

Cornus florida 'Appalachian Spring'

Flowering Dogwood 15-25 Introduced by the University of Tennessee, this cultivar has improved disease resistance and larger than normal white bracts, good red fruit coveted by birds and striking red fall color. N 🍀 🧐

Cornus kousa var. angustata 'Elsbry'

Empress of China™ Chinese Dogwood 15-25 ○ 3 g, 4 Evergreen version of Chinese dogwood that retains purplish-tinged foliage through the winter, even in zone 7. Selected for early and abundant flowers late spring-early summer followed by bright red fruit in fall. 🕷 🦃

Cornus kousa 'Lustgarten Weeping'

Chinese Dogwood 3-5 ○ **4** 7 g, 4–5

Stake for extra height or cascade over walls or down a slope. Upright white flowers borne along branches late spring, followed by red fruit and foliage in fall.

Cornus sericea 'Cardinal'

○ ■ 3 g, 3 Red-twig Dogwood 8-10

(Svn: Cornus stolonifera) A fabulous old standard with cardinal red stems, distinct in the winter landscape. White flower clusters in late spring followed by white fruits in summer, quickly eaten by birds. N 🕷 🦃

Cornus sericea 'Farrow'

Arctic Fire[™] Dogwood ○ **4.** 3 g, 2–3 3-4 (Syn: Cornus stolonifera) Dwarf red-twig dogwood well suited for foundation and small garden areas. White flowers and fruit. N 🦋 🧐

Corylopsis spicata 'Aurea'

Spike Winterhazal 00 🐃 3 g, 1-2 \$45 4-8

Pendant, yellow, fragrant flowers grace the naked branches in late March into April providing early color in late winter. Emerging bright yellow leaves fade to chartreuse in

○ **4.** 1 g, 1–2 Corylus americana American Hazelnut 8-12 \$20 Part of our regional woods, typically growing as understory plant but in full sun becomes denser, fruits heavier, and shows intense coppery-red fall color. Wildlife love nuts. N \(\forall \)

Cotinus obovatus American Smoketree 15-30 \$25 Fiery orange and red foliage in the autumn. Billowy hairs attached to flower clusters turn

smoky pink/purple in summer, covering shrub with hazy, smoke-like puffs. N ○ **3** g, 2–3 Croton alabamensis Alabama Croton 4-6 \$45

Distinctly silver underside to the leaves and brilliant pumpkin color leaves in fall are this plant's defining attributes. Rarely seen in home gardens. Yellow flower clusters in April. N Cytisus × boskoopii 'Hollandia' Broom 4-6

Notable for its bright green winter stems, this cultivar produces abundant crimson flowers in spring. Plants grow best on poor, well-drained soils.

Daphne odora 'Maejima' Fragrant Daphne 2–4 ● **3** g, 1–2 \$45 Striking creamy-gold leaf margins provide interest year round. Extremely fragrant, carmine pink to white flowers February-March. Well-drained soil a must.

Daphniphyllum macropodum

○ ■ 1 g, 3 10-20 Daphniphyllum \$25

Broadleaved evergreen shrub with elongated leaves that resemble rhododendron leaves. Dark maroon flower buds appear early spring, abundant purple-blue fruits on female plants in fall and winter.

Deutzia gracilis 'Nikko' Deutzia \$30 Compact, arching habit useful when planted in masses or as a foundation planting; very drought tolerant once established. White flowers shroud the plant in spring.

Diervilla rivularis 'Troja Black'

Georgia Bush-honeysuckle 3_4

Striking bronze to burgundy leaves turn rich green in summer, strong red in fall. Yellow summer flowers, a hit with hummingbirds, provide interest in growing season. N 🦃

Magnolia

One of John Frett's absolute favorite groups of plants—he likes them all. Offered below is a great selection of magnolia hybrids, from small to large, white to red to yellow to pink, early to late flowering, and some extremely rare. Some are old favorites, many are first time offers.

Magnolia 'Cotton Candy' 15–25 \bigcirc © 2 g, 3–4 \$6 Huge flowers pink on exterior and interior; very rare; very hardy 'campbellii type' for colder climates.

Magnolia 'Flamingo' 15–25 ○ 2 g, 2–3 \$65

Flamingo pink, tulip-shaped flower; early spring; pyramidal habit.

Magnolia 'Ginter Spicy White'

15-25

2 g, 3-4

\$65

**Librid of several action large larged angles and Owner pagnolic large white flowers.

Hybrid of several native large leafed species and Oyama magnolia; large white flowers, bright red stamens; late spring; minty lemon scent; named for Lewis Ginter Botanical Gardens. \mathscr{S}

Magnolia 'Wada's Memory' 15–25 ○ 2 g, 3–4 \$65 Fragrant, large white flowers; early spring; upright pyramidal. \$\notint{\noting}\$

Magnolia × soulangeana 'JURmag1'

red flowered magnolia bred by leading magnolia breder Mark Jury in New Zealand.

Magnolia asbei Ash Magnolia 15–20 © 2 g, 1–2 \$3;

Magnolia dealbata 5–35 ○ 1 g, 1 \$3 Mexican relative of M. macrophylla; large white flowers, May; very bold texture; very rare. N ∜

Magnolia grandiflora 'Bracken's Brown Beauty'

Southern Magnolia 30–40 0 5 3 g, 3–4 \$45 Reverse side of leaves chestnut brown; superior hardiness; fragrant white flowers; summer. N

Magnolia macrophylla Bigleaf Magnolia 30–40 ○ 1 g, 1 \$25 Large leaves; enormous white flowers; small tree. N

Magnolia maudiae Magnolia 15 ○ € 1 g, 1–2 \$35 Evergreen; 4–6 inch fragrant white flowers; early spring, early summer repeat. Magnolia sieboldii 'Min Pyong Gal'

Oyama Magnolia 10–15 🔾 🕰 2 g, 2–3 \$65

Fragrant, semi-double with pink-tinged petals; summer; Oyama magnolia breakthrough.

Magnolia virginiana 'Henry Hicks'

Parrotia persica 'Ruby Vase'

Persian Parrotia

Latin name Common name

20-25 00 🐔 15 g, 5-8

Pot Size, Plant Size Price

Mature Size Light Soil

Parrotia has been long admired for its colorful bark on mature specimens, bright red flowers in early spring and orange to red flowers. This cultivar grows half as wide as tall making it much more adaptable to tighter sites.

Persia palustris Swamp Redbay 12 - 18 \bigcirc 4.1 g, 2–3 \$25 Grown from wild collected seed in the southern Delmarva Peninsula, where it is native to lowlands. In the laurel family, this large evergreen shrub produces blue-black fruit in fall. N 🧐

Philadelphus 'Snow Dwarf'

Dwarf Mock Orange

○ ■ 1 g, 2–3

A dwarf mock orange sized more like a perennial than a shrub. The double white spring flowers have a strong sweet fragrance.

Pieris japonica 'Dorothy Wyckoff'

Japanese Pieris

5-6 ○ **3** g, 1–2 \$35

Flowers appear like flowing pink waterfalls over the evergreen foliage in the spring.

Poncirus trifoliata 'Flying Dragon' 8-15 Plantsman Mike Dirr writes, "Only a demented collector would covet such a thing." White fragrant flowers in spring, small oranges in fall, bright green stems in winter (prized by flower arrangers).

Prunus mume 'Kinjishi' Flowering Apricot 8–12 ○ ■ 1 g, 1 Dwarf plant with mildly contorted stems and light pink to white flowers in late winter or early spring. Plants have a narrow upright habit. PATRON EVENING ONLY

Pseudocydonia sinensis

Chinese Quince

10-25 \$25

Typically grown as multistemmed shrub or tree to exhibit beautiful exfoliating bark. Nearly 2 inch pink flowers appear April-May. Highly aromatic, egg-shaped fruit is 5-7 inch long, maturing citron yellow. Yellow to orange and red fall foliage.

Rhododendron 'Gumpo Pink'

Satsuki Azalea

○ **3** g, 1 1-2

This low, compact plant with small, evergreen foliage and large ruffled pink flowers is a long time standard for spring color. Big floral impact on such a diminutive plant.

Rhododendron 'Koromo Shikibu'

White Spider Azalea

○● 🔍 1 g, <1

\$45

Original plant propagated from material Rick Darke obtained from the U.S. National Arboretum in 1986 as curator at Longwood Gardens. This selection has clear white, spidertype flowers in the spring. Rare plant. PATRON EVENING ONLY

● **⑤** 5 g, 2-3 Rhododendron 'MaryDel' Coast Azalea 3-4 Compact plant with luscious, deep pink buds that open to light pink/white flowers, with a spicy fragrance. Selected by the noted late plantswoman Polly Hill near the Choptank River. N

Rhododendron austrinum 'Millie Mac'

Flame Azalea 6-8 ● **⑤** 5 g, 2–3 Deciduous native shrub with fragrant, 1-1.5 inch orange/yellow flowers with a thin white

margin and long stamens; appear in early spring. N

Rhododendron catawbiense 'English Roseum'

Catawba Rhododendron 3 g, 2-4

A compact selection of our native evergreen rhododendron with light pink flowers in spring. N

Rhododendron periclymenoides

Latin name Common name

Pinxterbloom Azalea 5 g, 1-3 \$45

This deciduous azalea can be seen in our local woodlands in the spring. The typically dark pink buds open light pink with a pleasant fragrance. Foliage is yellow to orange in fall. N Ж

Rhododendron prunifolium

Plumleaf Azalea 8-10

● **⑤** 5 g, 2–3 \$45 One of the showiest and rarest of our native azaleas, with clusters of salmon-red flowers that appear in late summer-early fall. Leaves turn orange red in fall. N

Rhododendron viscosum 'Millennium'

Swamp Azalea

● **3** g, 1–2 3-5 'Millennium' consistently produces dark red buds that open deep pink in July. Distinctly bluish cast to summer foliage turning orange/red in fall. N

Rhus copallina 'Lanham's Purple'

Flameleaf Sumac

○ 🖫 3 g, 3–4 10-15 \$45

In September-October foliage bursts into scarlet flame. This selection offers rich burgundy foliage spring to early summer, fades to green. Great for difficult sites. N

Rhus copallina 'Morton'

Prairie Flame™ Flameleaf Sumac \bigcirc \bigcirc 3 g, 2-3 4-6 Shorter than the species, this introduction from the Morton Arboretum produces orange-

red to red fall foliage. A male selection, with creamy flower plumes late July-early August.

Rhus typhina 'Bailtiger'

Tiger Eves® Staghorn Sumac

4-6

O 5 g, 2-3

Finely dissected foliage emerges bronze-yellow in the spring, turns bright yellow in early summer, becomes chartreuse in late summer, orange-red in fall. A female selection, with fruit at the branch ends and more restrained growth than straight species. N

Rhus copallina 'Lanham's Purple' Photo: Rick Darke

Rosa 'Radtko'

Double Red Knockout® Rose 4–6 O C. 3 g, 3 \$35 Plants are compact, disease free, with fragrant, bright pink flowers summer—fall.

Rosa carolina Carolina Rose 3–6 ○ CL ≤ 1 g, 2–3 \$15 Beautiful native rose with 2–3 inch fragrant pink flowers for an extended period in sum-

mer. Red hips in the fall. N

**General Striking Striki

Rosa rugosa 'Frau Dagmar Hastrup'

Rugosa Rose 3–4 © 5 g, 2–3 \$35 A fine cultivar of rugosa rose with fragrant, single pink flowers, followed by showy red rose hips in autumn, enjoyed by birds or made into tea or jelly. Great for stabilizing banks.

Rosa setigera Prairie Rose 3-4 \circ \circ \circ \circ 19 Scrambling rose that will climb if provided a support. The single, 2-inch pink flowers are produced in early summer. Great plant for naturalizing. N

Sarcococca bookeriana var. bumilis 'Sarsid2'

Fragrant Mountain™ Sweetbox 1–2 •• €. 2 g, 1–2 \$35 A more vigorous, spreading groundcover slightly taller than the usual variety, but still maintains the strongly fragrant, small white flowers that appear in late winter. Drought tol-

Schima argentea 8–15 © © 3 g, 3–4 \$3 Hybridized with *Franklinia* to produce X*Schimalinia floribunda*, the most recent attempt to invigorate our native Franklin tree. Evergreen plants produce white flowers late summer into the fall. Hardy to zone 7.

Sinowilsonia benryi 15–20 • I g, 2–3 \$25 Rare member of the witch hazel family named for the great plant explorer E. H. Wilson. Soft and fuzzy leaves, separate male and female flowers, and unique fruit clusters add to its intrigue.

Spiraea japonica 'Walbuma'

Magic Carpet® Spirea

1–2

\$\infty\$ \bigs_3 \, g, 2

\$25

Foliage emerges orange—yellow, softens to orange—blushed chartreuse. Early summer, pink—lavender flowers contrast boldly with leaves. Use in masses as a groundcover.

Stachyurus chinensis 'Celina'

Chinese Spiketail

6–8

1 g, 3

\$45

Fountain-shaped shrub springs to life in early spring with long pendant clusters of yellow

flowers. Leaves turn bright orange red in the fall. **PATRON EVENING ONLY**

Stranvaesia davidiana 'Prostrata'

Chinese Stranvaesia 2–3 O CL 1 g, 1–2 \$2

(Syn. *Photinia davidiana*) Broadleaved evergreen that can function as a groundcover. Clusters of white flowers in May produce groups of 5−10 plump red fruits that dangle from maroon−red winter foliage. *❤*

Weigela subsessilis 'Canary' Photo: Melinda Zoehrer

Syringa meyeri 'Palibin' Photo: Rebecca Pineo

Mature Size Light Soil Pot Size, Plant Size Price

Styrax americanus American Snowbell 6-8 0 1 g, 2 \$35. A rounded and adaptable shrub naturally found as an understory tree near streams but very seldom seen in gardens. In higher light conditions, it makes a dense shrub. Small, abundant white flowers appear May and early June. N

Styrax japonicus 'Fragrant Fountain'

Japanese Snowbell 5-8 0 15 g, 5 \$25. Extraordinary weeping form, grafted onto a standard that can create a sculptural focal point. Numerous white, fragrant, bell-shaped flowers hang from the branches in June.

Syringa 'SMSXPM'

Latin name Common name

Syringa 'Declaration' Lilac 6–8 © 📆 3 g, 2-3 \$35 A U.S. National Arboretum release, boasting large, very fragrant, red-purple flowers in early spring with good mildew resistance.

Syringa × hyacinthiflora 'Evangeline' Lilac 8–12 ○ ♥ ♠ 1 g, 1 \$15 Early flowering plants produce double lavender pink flowers with a strong fragrance.

Syringa meyeri 'Palibin' Lilac 4–5 © CL 3 g, 2–3 \$35. Compact form produces rich, red-purple buds that open pinkish white after most other lilacs. Nicely fragrant flowers.

Trocbodendron aralioides Wheel—tree 8—15 0 1 g, <1 \$35 Evergreen shrub or small tree with spirally arranged, lustrous green leaves that give rise to the common name of wheel—tree. Native to the mountains of Japan, South Korea, and Taiwan, this is the sole living species in the genus Trocbodendron.

Vaccinium angustifolium Lowbush Blueberry 1-2 O 🖺 1 g, 1–2 \$15 The low growth habit makes this an ideal plant for use as a groundcover. Numerous white flowers in spring, loved by pollinators, are followed by small, edible blueberries midsummer. Fruit savored by all types of wildlife. Orange, red and burgundy leaves in fall provide a spectacular display. N 🕷 🦃 ○ **1** g, 1–2 Vaccinium bracteatum Sea Bilberry 2-4 A very rare evergreen species from Korea with foliage the typical size of other blueberries. Small white spring flowers give rise to blueberries in mid to late summer. UDBG plant has been hardy for 20 years. PATRON EVENING ONLY Vaccinium corymbosum 'Bluejay' ○ **3** g, 3–4 Highbush Blueberry Abundant white flowers in May and June followed by powder-blue fruit, perfect for muffins and pancakes. Red to orange autumn color. A mid season variety with medium fruit. N 🕷 🦞 Vaccinium 'Sunshine Blue' Blueberry 3-4 A southern hybrid that produces dark blue fruit mid season and is self fertile. N 💥 🥞 Viburnum 'Le Bois Marquis' ○ **4** 3 g, 1 Handsome Devil™ Viburnum 4-6 A hardy evergreen viburnum with young spring leaves flushed bronze-red, green for summer, and red hues in fall and winter. Fragrant white flower clusters in spring followed by bright red fruit. Viburnum bracteatum 'SMVDLS' ○ **1** g, 1–2 All That Glitters™ Arrowwood Viburnum 4-5 \$25 Closely related to Viburnum dentatum, this selection is more compact, with extremely glossy leaves, white flower clusters in spring, and abundant blue fruit in fall. $N \ensuremath{\,^{\circ}\!\!\!/}$ Viburnum luzonicum Viburnum 6-8 Virtually unknown plant with great merit. Densely branched, good for screening unwanted vistas, with small, lustrous green foliage that turns maroon purple in fall. The 1-2 inch diameter flower clusters produced April-May. Demonstrates excellent heat and drought tolerance. Vitex agnus-castus 'Abbeville Blue' 6-10 Amazing this plant is not more popular as it is very easy to grow, requiring only periodic pruning to shape and size. Foliage serves as backdrop for deep blue flowers in midsummer; will re-flower if old flowers removed. Weigela florida 'Elvera' Midnight Wine™ Weigela \$25 Plants can be used in groups or as a groundcover. Loved for its consistently dark, burgundy purple foliage. Light pink flowers appear in late spring-early summer. 🦃 Weigela subsessilis 'Canary' Weigela A selection by Dr. Richard Lighty, this rarely-seen species has clear yellow flowers that appear on upright arching branches in the early spring. Wisteria frutescens 'Amethyst Falls' Wisteria Vine ○ ■ 1 g, 2 A real gem! Our native wisteria, with 4-6 inch racemes bearing lavender purple flowers in May. Much more diminutive than its Asian counterpart. N

PERENNIALS

Latin name Common name

All heights of plants are in feet.

Adiantum pedatum Northern Maidenhair Fern 1 - 1.5● **●** 1 g Attractive fern with wiry black stems that support finely textured frilly fronds. Edible pink fiddleheads emerge in spring. Beautiful when paired with just about any other plant. N Allium senescens 'Blue Eddy' 0.5 Ornamental Onion Charming plant for the rock, herb, or front of the perennial garden, with lilac pink flowers appearing midsummer. Selected for its pinwheel-like, compact rosettes of powderblue leaves, which resemble 'swirling eddies of water.' Good drainage important. Amsonia bubrichtii Blue Star O CLEqt 2-4 Durable and drought tolerant perennial, with soft, fern-like foliage topped by blue flowers in spring (important for early pollinators) and pumpkin-colored in the fall. Takes 2-3 years to fully mature and doesn't require dividing. N Aralia cordata 'Sun King' Golden Japanese Spikenard ● 🖺 1 g Be architecturally and colorfully bold in your woodland garden with this scene-stealing plant. Big and bright yellow compound leaves are topped by 2 foot white flower spikes in late summer, followed by purple berries. A great addition as a mid or back-of-the-border plant, and does best in fertile, humus-rich soil; a real moisture lover. Arisaema consanguineum

•• • Himalayan Cobra Lily .5-1 Become entranced by this exotic jewel. Narrow leaflets with slender drip-tips and undulating edges crown each stately stem. The purple and greenish white-streaked spathe with its elongated hood that tapers to a pendulous, very long, thread-like tip, looks like a cobra poised to strike. June inflorescence followed by bright scarlet berries.

PATRON EVENING ONLY

○ **4.1** g Aruncus 'Misty Lace' Goat's Beard \$12 1.5 - 2Finally, an intermediate-height hybrid between our tall native Aruncus dioicus and the more diminutive Aruncus aethusifolius. Fern-like leaves with red stems form an astilbelike mound of foliage with frothy, creamy white flowers that rise above the foliage late spring to early summer.

Asarum speciosum 'Buxom Beauty' Alabama Wild Ginger ● 🖳 1 g <.5 \$14 (Syn: Hexastylis speciosa) Rare in its native habitat, ours are plants given to us by Dr. Sherry Kitto, which she grew from tissue culture. Glossy green, heart-shaped leaves with silvery mottled pattern and a strong stoloniferous habit make this a winner.

Asarum splendens Chinese Wild Ginger .5-1 Excellent as an evergreen, fast-growing groundcover, this exquisite ginger has large, silver mottled leaves and interesting 1.5-3 inch wide, brown, purple, and cream flowers.

Asclepias tuberosa Butterfly Weed 1 - 3\$7 Quintessential butterfly plant with bright orange to yellow flowers occurring June-August. Well-drained soil a must. Seed pods are decorative in winter. N 🕷

Baptisia 'Midnight' False Indigo 4-5 Part of the Prairieblues[™] series introduced by Chicagoland Grows, Inc. Long-lived perennial, with long, densely-packed panicles of deep blue-violet flowers with lemon-yellow edges appear in two intermingling bloom cycles.

Caulophyllum thalictroides Blue Cohosh 1–3 ● 🖺 1 g Grown for its beautiful blue-green foliage and indigo blueberry-like fruit. The leaflets look like meadow rue, hence the species name. Stunning in drifts, blue cohosh prefers rich, moist, well-drained soil, N

Queen of the Prairie 6–8 •• 3 g \$10
Statuesque, back-of-the-border beauty, distinguished by large, cloud-like plumes of fraggard deep pink flowers that fode to salmen pink set against ingread maple shared

fragrant, deep pink flowers that fade to salmon pink, set against jagged, maple-shaped foliage. Blooming July-August, Queen of the prairie is a staple in the design matrix of Piet Oudolf's designs. N

Hakonechloa macra 'All Gold' Hakone Grass 1–1.5 •• 1 g \$12 Illuminate the garden with these ribbons of chartreuse foliage, slightly more upright than other Hakone grass cultivars. Very drought tolerant once established.

HELLEBORE

Latin name Common name

In their book, *Hellebores: A Comprehensive Guide*," Cole Burrell and Judith Tyler write that "Hellebores come close to being the perfect perennial," which may be right. One of winter's most captivating plants, Lenten rose enlivens an otherwise quiet landscape with a tapestry of exquisitely shaped flower colors. Other fine attributes include evergreen foliage, hardiness, shade tolerance, drought tolerance once established, deer resistance, and the simple beauty of cut flowers floating in a bowl. We offer a few of the newer hybrids.

Helleborus 'Mango Magic' Lenten Rose 1.75 ● 1 g \$16 A Winter Thriller™ member; 2–3 inch, single, outfacing, warm apricot color flower, with hints of rose veins or speckles; heavy bloomer; March-April.

Helleborus 'Pink Fizz' Lenten Rose 1.75 ● 1 g \$16 A Winter Thriller™ member; 3 inch, single, outfacing, white petals with fuchsia veins and center; March-April.

Helleborus × nigercors 'Double Fashion'
Lenten Rose 1–1.25 ● 1 g \$18
A member of the Winter Magic™ series by Belgian hellebore breeder Thierry van
Paemel; double outfacing bloom; snow-white petals surrounding yellow stamens;
leathery evergreen leaves covered in power-grey veil; December-March.

Hepatica acutiloba Liverwort .5 •• 4 qt \$10 A local woodland denizen that brightens the early spring garden with pure white flowers, but can take on pink and purple shades too. Flowers appear before the three-lobed, mottled, leathery leaves. N

Heuchera 'Caramel' Coral Bells .75–1 . 1 g \$10 Compact cultivar boasting delicious apricot foliage that matures to a stunning salmon-red in autumn, and light pink flowers that dance above the foliage. Heat, humidity, drought tolerant, and if grown in full sun, provide sufficient moisture.

Hosta 'Royal Standard' Plantain Lily 1.5—2 •• 1 g \$12 A seedling of H. plantaginea, 'Royal Standard' inherits the best of its parent: very glossy green leaves that arch upward and wide (4 feet) and highly fragrant, trumpet-shaped, white flowers in late summer.

IRIS

In Greek mythology, *Iris* is the personification of the rainbow and messenger of the Gods, and indeed, *Iris* appears in many magical colors — a large genus with enormous diversity. Some love moisture, while others prefer dry. Some are perfect for rock, trough, and alpine gardens, while taller forms work well in many settings. They usually require no staking, are mostly fragrant, and many have attractive seed pods. Standards are the upper flower petals; falls are the lower flower petals.

Mature Size Light Soil Pot Size, Plant Size Price Latin name Common name Iris cristata 'Powder Blue Giant' Dwarf Crested Iris .5-.75 1 g Small, narrow, sword-shaped leaves; form dense colonies in optimum growing conditions; 3 inch, pale blue flowers, fringed yellow with deeper blue accents on falls. NIris ensata 'Rose Queen' ○ **2.2** g Japanese Water Iris 1.5 - 3Clump-forming; grows best in damp areas; pale lilac-pink flowers etched in deeper pink; midsummer; falls deep mauve at base. Iris ensata 'Variegata' ○ **2.2** g Striped Japanese Water Iris Crepe paper-like flowers; deep purple with a reddish sheen; falls vivid cerise flushed deep purple; variegated green and creamy-white foliage. 1 g Iris germanica 'Clarence' Bearded Iris 2.5–3 Sweetly fragrant rebloomer; large bi-colored flowers early summer-autumn; standards bluish-white, falls violet blue. Well-drained soil important. Iris sibirica 'Butter and Sugar' Siberian Iris ○ **4.**1 g Butter vellow falls, creamy white standards; early summer; rigid stems; arching clumps grass-like leaves; grows in wide range of soil types; deer resistant; grows under black Iris sibirica 'Contrast in Styles' Siberian Iris 2-3O 4 1g \$10 Wine purple standards, bright wine red falls, light blue-purple center; rigid stems; arching clumps grass-like leaves; grows in wide range of soil types; deer resistance; grows under black walnut trees. Iris tectorum 'Wolong' Japanese Roof Iris 2 ○ **4**1 g Deserving of more fanfare because of superb attributes: fans of narrow, lance-shaped leaves, vigorous grower, and rich lavender flowers with dark purple highlights. PATRON EVENING ONLY Iris versicolor Harlequin Blueflag 2 - 2.5○ **4**1 g \$10 Perfect plant for wet or very moist areas, with one-inch wide, sword-shaped leaves; light blue flowers appear in spring. N Iris × pseudata 'Aichi no Kagayaki' Iris hybrid 2 - 2.5○ **4.1** g \$12 (Iris pseudacorus × I. ensata) Cultivar name means "bright inspiration;" hummingbirds love; May flowers; standards light yellow; fall slight darker yellow; dark yellow patch; sterile, no seedlings. PATRON EVENING ONLY

Kniphofia 'Mango Popsicle' Dwarf Poker Set your garden on fire with this outstanding member of the Popsicle™ Series. Mouthwatering, mango-colored flower spikes appear late spring to early fall; remove spent flowers for continuous bloom. Attracts hummers, good cut flower, deer resistant, drought tolerant. 🧺 🦃

○ **4.4.**1 g Lobelia cardinalis Cardinal flower 2 \$9 Known for its stunning, bright crimson flowers that appear July-September, a magnet for hummingbirds and butterflies. An excellent naturalizer for the wild meadow or water garden. N 💥 🦃

Spigelia marilandica Indian Pink ○● 🔍 qt Want hummingbirds in your garden? The bright red flowers with vellow throats are sure lures. Flowers appear profusely in the early summer and sporadically thereafter. An underused native that deserves more respect. Our plants are seedlings from the garden of plantsman, author, and photographer Rick Darke. N 🦃 Stachys monieri 'Hummelo' Lamb's Ear 1.5 - 2O CL 1g Rugged perennial that is rabbit and deer resistant. Clump forming, heavily-textured leaves make way for heavily flowering, violet-rose flowers that are carried on sturdy spikes midsummer. Good drainage required. oo 🔍 qt Tricyrtis ravenii Toad Lily 3 New species from Taiwan whose name honors past Director of the Missouri Botanical Garden Dr. Peter Raven, whom TIME magazine named a Hero for the Planet. The name is not the only unique aspect — orchid-like, purple-spotted flowers appear midsummer through fall, making it the longest flowering toad lily. Veronica (austriaca × spicata) 'Baby Blue' Speedwell O CL qt New plant introduction from the Netherlands, featuring upright habit, with dark, bluecolored flowers on a compact plant. Will rebloom if sheared. Veronicastrum virginicum Culver's Root 5–7 ○ **4.1** g Nine-inch long spikes of white, pale blue flowers create candleabra-like effect in late spring to early summer. Great vertical accent plant for back of the border, mixed shrub border, cottage garden, and wet meadows. N ○ 🔍 1 g Viola 'Black Magic' Violet .5-.75 Characterized by its prominent black colored flowers with vivid yellow eye, floriferous habit, extreme cold hardiness, and compact stature. If cut back after initial flowering, it will flower sporadically through fall. If that weren't enough, fritillary butterfly caterpillars rely on violets as a food source. Zizia aurea Golden Alexander 2.5

TENDERS

All heights of plants are in feet.

Flat-topped clusters of bright yellow flowers above clean green foliage lend cheer to the late spring garden. The foliage of this carrot family plant attracts black swallowtail caterpillars and the blooms are cherished by an assortment of butterfly species. N

Colocasia esculenta 'Pink China' Taro,

Elephant Ears 6–8 •• C-1 g \$10

A hardy elephant ear? Yes indeed. Its star qualities include tall, bright pink stems with a pink eye on the leaves, and large jade-colored, heart-shaped leaves that will make you think you're in the tropics.

Musa 'Truly Tiny' Dwarf Banana 2–4 0 \$ 3 g \$10 One of the smallest bananas in the world. Excellent, tropical looking with a beautiful form and green leaves blotched in red. Great container plant.

A Plant Delights selection of pomegranate that is hardy in North Carolina, but while tough, needs protection in our region. In fall, bright orange, tubular flowers appear, followed by silver-dollar size fruits. An interesting conversation piece, plus fruit to boot.

PATRON EVENING ONLY

2-5

Worth having simply for the fact that it is the official state herb of Delaware. If that weren't

enough, then perhaps the daisy-like yellow flower plumes that appear August-September,

aromatic anise-flavored tea that can be made from the dried leaves and flowers, or deer

Solidago odora Sweet Goldenrod

resistance may add incentive. N

台UDBG FRIENDS

The University of Delaware Botanic Gardens is an outside laboratory and classroom in which studies in horticulture, landscape design, wildlife ecology, water quality, plant pathology, and entomology are pursued through experiential learning. UDBG maintains a diverse and dynamic living plant

collection that stimulates and engages, with more than 3,000 species and cultivars of plants. UDBG provides a welcoming environment for visitors to learn. The UDBG Friends, a membership organization, plays a vital part in funding, volunteering, and helping with the further development of the UDBG. The Friends help UDBG establish and expand programs in research, education, and environmental stewardship. Anyone with a lively interest in learning about gardening, design or nature, is encouraged to join. As a member of UDBG Friends, you can be a partner in the future of the gardens.

BENEFITS OF MEMBERSHIP

Basic Membership Benefits

- Free admission to UDBG semi-annual meeting & lecture
- Friends-only Shopping Day at Spring Plant Sale
- Discounted admission to events open to the public
- Reciprocal admission privileges to over 225 public gardens and arboreta through the American Horticultural Society
- The opportunity to support a growing organization

\$10 Student Membership Benefits

- Basic Membership benefits
- Subscription to UDBG Friends newsletter (3 issues/yr)

\$40 Individual Membership Benefits

- Basic Membership benefits for 1 person
- Subscription to UDBG Friends newsletter (3x/yr)
- 2 herbaceous plant dividends per year (1 in spring; 1 in fall)

\$60 Family Membership Benefits

- Basic Membership benefits for 2 adults in same household
- Subscription to UDBG Friends newsletter (3x/yr)
- 4 herbaceous plant dividends per year (2 in spring; 2 in fall)

* \$85 Nonprofit/Garden Club Membership Benefits

- Basic Membership benefits for 1 representative of nonprofit/ garden club
- 2 herbaceous plant dividends per year (1 in spring; 1 in fall)
- Subscription to UDBG Friends newsletter (3 x/yr)
- 1 free guided garden tour per year

\$185 Sustaining Membership Benefits

- Basic Membership benefits for 2 adults in same household
- Subscription to UDBG Friends newsletter (3x/yr)
- 6 herbaceous plant dividends per year

३ \$500 Benefactor Membership Benefits

- Basic Membership benefits for 2 adults
- Subscription to UDBG Friends newsletter (3x/yr)
- Herbaceous and/or woody plant dividends

♦ \$1,000 or above DIRECTOR'S FRIEND Benefits

- Basic Membership benefits for 2 adults
- Subscription to UDBG Friends newsletter (3x/yr)
- Personal garden tour with Director
- Connoisseur plant dividends
