FOCAL[®]

THE SPIRIT OF SOUND

"The Spirit of Sound"

Focal has been a leader in the international high-end audio industry since 1979. Today, thanks to more than 35 years of expertise in designing and manufacturing speaker drivers, the brand's innovation, its know-how made in France and its authentic high-fidelity sound are reputed worldwide.

Created in 1990, the Car Audio department enabled Focal to provide car and music enthusiasts with hi-fi sound: the perfect combination of driving pleasure with the joys of audiophile sound.

For us, innovation means pushing back the limits of the impossible. This is why we constantly strive to create products with the car interior in mind and to expand our offer accordingly.

We owe our success to our experienced engineers who enable our product ranges to evolve in order to meet consumers' needs, and most of all to meet the desires of the thousands of Focal fans throughout the world.

Focal products are organised into three categories:

- **Elite:** on-board audio perfection - get the highest musical quality for your car thanks to these customised installations capable of exceptional performances.
- **Performance:** give powerful and demonstrative sound through a sound system which reflects who you are.
- **Integration:** a simple way to improve your vehicle's acoustics without altering the original in-car system.

Each category is designed for different uses and ways of listening to music. Whether it's a customised Elite installation or a "plug and play" kit from our Integration line, the quality of manufacturing and the care for a refined finish are just as important.

Wherever you may be, we have one goal: to unite you around a common passion for rich and authentic sound. Innovation, tradition, performance and pleasure are our key values; they characterise "the Spirit of Sound".

For over 35 years Focal has been developing and manufacturing loudspeakers for the home, speaker drivers for the car, monitor speakers for recording studios and more recently headphones. Market leader in high-fidelity, Focal's worldwide reputation is well known: our brand is recognised everywhere for its sound quality and its numerous technological innovations.

Elite

"HAUTE COUTURE" SOUND

**Is your car a gem bespoke to you?
Is ultimate sound quality never far
from your thoughts?**

If so, then Elite is for you:
The Focal name is synonymous with unique, "hand-made" equipment to help you achieve the absolute performance from your music. Based on rare, precious metals, this range uses the very latest technologies, strong in the heritage of the Grande Utopia EM, currently considered as one of the best landspeakers in the world. Made in France, these dream products, available in **Utopia Be and K2 Power ranges**, are the natural choice for bespoke installations implemented exclusively for you by our expert installers.

Utopia Be and K2 power technologies

Utopia Be and K2 Power are two product lines oriented towards ultra-high-technologies, and are the result of an extraordinary human adventure to achieve optimum sound reproduction.

Our refusal of all concessions has enabled us to push back the limits by developing cones made with composite materials, such as the aramid-fibre cones of the K2 Power line, the "W" sandwich cone, or even cones made with ultimate materials such as beryllium, the jewel of the Elite range. These major innovations developed for the speaker drivers of the Grande Utopia enable an extended bandwidth up to 40KHz and unrivalled neutrality of the midrange.

The design of our "W" composite sandwich cones is a wise compromise between ingenuity, manual precision and acoustic expertise. By combining a structural foam core between two layers of composite fibres, we are able to give you the best of Focal know-how. Thus, we can guarantee total control over the rigidity, weight and damping of the speaker drivers used for the K2 Power and Utopia Be lines, which is essential for providing neutrality, faithful reproduction and high performances.

Power and fidelity work hand in hand: "live" sound in all its dimensions for the most demanding audiophile.

Flax® Technology

Patent pending n°1350116

Over the last 5 years, there have been many innovations regarding the materials used. The return to natural materials and their combination with modern composites has resulted in the creation of new kinds of modern hybrids.

The "Sandwich" technology which we master perfectly with the K2 and "W" cones is the best way to achieve a perfect balance between **rigidity/weight/ damping**.

The key to success for a speaker cone made by Focal lies in the satisfaction of these conflicting criteria.

When it came down to the delicate choice regarding the design of the core of the sandwich structure, our engineers were soon impressed by the characteristics particular to flax, and after five years of research, the **Flax sandwich cone** was born. The use of an ecological textile such as flax, combined with our composite technology has led to an innovative solution for manufacturing sandwich structures: very high-quality flax fibres between two sheets of glass fibres. French flax is considered the best in the world, and another important detail is that the manufacturing process can be mechanised and automated.

The high-end products of our Expert line are the result of our constant efforts to differentiate ourselves and our goal to provide ultimate acoustic reproduction. Featuring four new Performance kits, the "F" series prefigures radical changes in terms of design, innovation and sound while still respecting the demands for a product made in France.
