

Figure S1

*Boxplots of Supraglottal Inventories by Group*

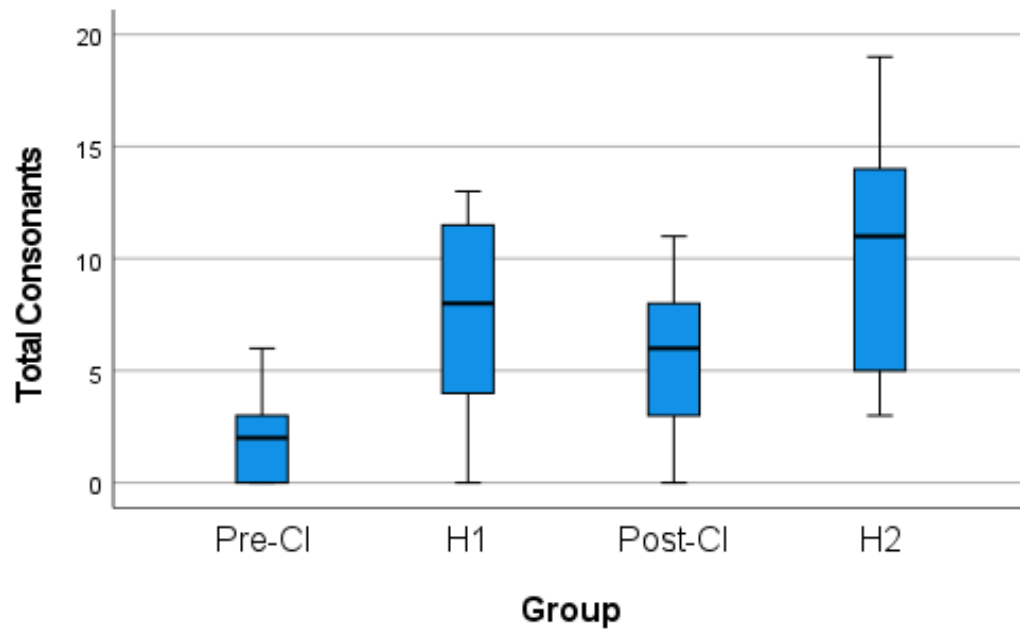

Table S1

*Mean Number (SD) of Supraglottal Consonants per Vocalization for Select Participants per Group*

Measure	<u>Group</u>			
	Pre-CI ( <i>n</i> = 6)	H1 ( <i>n</i> = 13)	Post-CI ( <i>n</i> = 11)	H2 ( <i>n</i> = 18)
SGC per Vocalization	1.0 (.06)	1.5 (.46)	1.3 (.20)	1.6 (.36)
Range	1.0-1.2	1.0-2.5	0-1.6	1.0-2.3
Different SGC per Vocalization	1.0 (.06)	1.2 (.26)	1.1 (.16)	1.3 (.24)
Range	1.0-1.2	1.0-1.9	0-1.5	1.0-1.9

*Note.* Table includes only participants who produced at least one supra-glottal consonant-vowel vocalization. Vocalization = Supraglottal Consonant-Vowel Vocalization; SGC = Supraglottal Consonant; Pre-CI = before cochlear implantation; H1 = hearing infants at Time 1; Post-CI = after cochlear implantation; H2 = hearing infants at Time 2.
