

33 good reasons for TRIAMOND™

The TRIAMOND™ treatment system allows you to treat up to 60 % more patients – simply because you can cut down the treatment time per patient by up to 50% compared to other methods. You will save at least 33% of material costs and also significantly reduce the risk of root resorption because less time and less force are needed. At the same time, it is easy & reliable to use, which means that your entire practice team will LOVE TRIAMOND™.

Curious?

Here are 33 good reasons why the TRIAMOND™ treatment system will make your patients happier – which means more active referrals as well as more joy and time in your day-to-day practice!

1. Reliable treatment results. With over 56,000 documented clinical results, you can be confident that The TRIAMOND™ system is designed to be used across the full range of orthodontic treatments. In the pivotal clinical trial, patients were not selected but treated “as they walked in the door”: a completely novel approach in clinical research, proving that the system will suit your individual practice routine and will provide the desired treatment results.

2. Enthusiastic patients. Scientific studies have repeatedly shown that patient compliance and patient satisfaction drops significantly after being in treatment for 1 year! The unique Wedgewise mechanism built into The TRIAMOND™ system enables you to benefit from logical and predictable biomechanics to achieve your treatment goals within one year, leading to happier patients. Happier patients mean more positive reviews, more referrals and more success for you and your team.

3. Assistants' favorite. Easy to bond, easy to open, safe to close and simple to clean. The ISO-tested closing mechanism, specially designed for the demands of a busy practice, makes for relaxed and safe handling. Both orthodontic novices and professionals LOVE the new ease of use.

4. Speedy delivery times thanks to 100% made in Germany. This means you can rely on punctual deliveries, the highest quality control standards as well as doctor-friendly pricing options - even in turbulent times. This assures you confidence in the performance of The TRIAMOND™ system.

5. One step ahead of your neighbor. You can sit back and relax – with The TRIAMOND™ system you will always be a few steps ahead of your competitors. Because nowadays it is not just about offering safe treatment methods, but also about providing fast

and efficient alternatives to increasingly demanding patients and parents.

6. Increase referrals directly & sustainably. You get a safe and healthy result in significantly less treatment time, and your patients will be happy to spread the word.

7. Simply better. The TRIAMOND™ system makes the entire treatment process more efficient, so that you don't just save an average of 33% in costs, you will also be able to increase your patient load by up to 60% without expanding your schedule or staff. Whether it's a solo or group practice - The TRIAMOND™ system has shown that it drastically improves case management efficiency for every type of clinical setting.

8. A perfect fit for your personal practice goals. Whether it's optimizing working hours, increasing productivity or freeing up more time: The TRIAMOND™ system offers many advantages that will support your personal practice goals.

9. Easy to implement. You can get started right away, safely & comfortably without altering your Clinical Treatment Protocol. The simplicity of implementing The TRIAMOND™ system is explained in an equally straight forward introduction: for a relaxed start, even during times of high workload.

10. Minimum storage costs, maximum cash flow. The TRIAMOND™ system needs fewer additional equipment (3 pliers, 2 wires, 1 open/closing). This means that you need significantly fewer products and can save a great deal of money, so you can use the freed-up capital for additional investments elsewhere.

11. FLATRATE prices. Still wasting time on negotiating prices? With The TRIAMOND™ system you benefit from fixed prices. So, there's no need to lose focus, instead concentrate on your actual work – saving you lots of time and money!

12. Stick to your own treatment philosophy. The TRIAMOND™ system fits neatly into your treatment plans based on your individual philosophy. This means you can get started straight away, without the need for time-consuming and cost-intensive training.

13. Healthier treatment outcomes. On average, clinical studies on over 56,000 cases have shown that, compared to any Edgewise Slot System, treatments were completed between 40-60% faster & healthier. Since treatment time is a major factor in orthodontically-induced root resorption, The TRIAMOND™ system reduces your risk exposure and maintains patient health.

14. Suitable for all practice sizes. Whether it's a single practice, a group practice or a community health center - The TRIAMOND™ system has proven to maximize the efficiency of all stages of treatment in every type of practice, both clinically and in terms of work flow.

15. Easy & safe to use. Thanks to the integrated safety mechanism in the clip, you will know right away when too much force is being applied to the periodontium. Just one of the reasons why the roots of our 56,000+ clinical cases were kept healthy!

16. Highest clinical efficiency. With The TRIAMOND™ system, you can perform treatment steps much earlier which saves both time and money. The system offers a variety of time-reducing features: for example, you can use intraoral elastics starting with a .014” Niti archwire and treat every kind of case with only 2 (sets of) archwires.

33 good reasons for TRIAMOND™

33 good reasons for TRIAMOND™

33 good reasons for TRIAMOND™

17. The first orthodontic crowd development. The TRIAMOND™ system was developed by Dr. Moshe Davidovitch, who had the idea for an efficient treatment system when he was still a student at Harvard! Years later, he put the idea into practice and successfully ran a clinical study with over 32 internationally renowned colleagues. This means that you will benefit from the combined knowledge of 33 specialists in the field of modern orthodontic treatment systems.

18. Experienced professionals at your side. Let's get personal! With TRIAMOND™, we want you to make the most of it from the very start. As part of MASTERMIND, you have exclusive access to monthly coaching calls with the inventor Dr. Moshe Davidovitch. Take the opportunity to benefit from his extensive knowledge and implement his tips in your daily practice!

19. Two archwires for ex & non-ex cases. Like clockwork, the diamond-shaped archwire and slot geometry complement each other so that tooth movement flows unlike any other method. This also means that both extraction and non-extraction cases can be treated successfully and efficiently with the same archwire sequence.

20. Free online knowledge base. New team members are quickly and comprehensively introduced to the TRIAMOND™ system through online seminars. This saves you plenty of time otherwise spent on training your team, and ensures a high standard of quality in your practice.

21. Maximum flexibility. From social six to orthognathic-surgical or other mutidisciplinary cases, the TRIAMOND™ system's slim biomechanics are extremely efficient and reliable and will simplify your path to predictable results in all types of malocclusions.

22. Years of success. The TRIAMOND™ system has been successfully used in practices and universities since 2016, so you can be sure that the impressive clinical results are not just based on selection. Its been show time and time again to achieve gold standard results in all types of cases.

23. Happy Customer Care. Our clinically experienced team supports you in making your patients even happier. We'd love to help you become more successful as an entrepreneur and have fun at work!

24. Expert network. TRIAMOND™ MASTERMIND connects international TRIAMOND™ users and offers a high clinical added value. You will benefit from sharing clinical knowledge, as well as tips regarding your practice work flow and your patient consultations. For example, you can access over 600 documented clinical cases online.

25. Simple mechanics. You can rely on maximally efficient biomechanics that only need a few tools. This is because TRIAMOND™ Vector Technology offers exact transmission of pre-programmed bracket values thanks to the diamond-shaped slot geometry.

26. Proper straight wire technique. You begin malocclusion correction from the day of bonding rather than working up in arch wires to do so. You won't need variable torque prescriptions, compensating bends or suffer from biomechanical side effects which occur to other methods.

27. "I love it when a plan comes together." Hannibal, leader of the famous A-Team, was one of the first successful process optimizers in popular television history. With TRIAMOND™, it's our turn to make orthodontic history. Thanks to the innovative slot geome-

try, the pre-programmed bracket values are transferred more efficiently which means that you will achieve your treatment result faster and without any detours.

28. Correct torque & angulation early on. You can correct faster and more accurately, and, on top of it, you can achieve the desired treatment result with significantly fewer appointments!

29. From Class II to Class I in 3 months. For example, you can use intra- or inter-oral elastics from the initial leveling archwire, even if it's a .014" Niti. This happens while you are establishing arch form and expressing bracket prescription in a gentle fashion which avoids the time-consuming side-effects and stages included in other methods.

30. A better alternative to clear aligners. With The TRIAMOND™ system you can treat in significantly less time, more efficiently and in a more predictable way. Get your patients in and out of treatment sooner!

31. Keeping your patients in focus. You are able to work in a more relaxed environment, with goal-oriented simple mechanics and little use of materials. This makes it even easier to concentrate fully on your patients.

32. Digital integration. Benefit from a fully digitalized treatment service, whether you prefer to manufacture in-house or conveniently order externally.

33. Gentle forces and low friction. Achieve patient-friendly tooth correction with gentle forces in the shortest possible treatment time.
