

# flying conic

**NEW**

A unique tensile structure featuring a flying raised conic. This structure is both fun, functional and is very unique. A design inspired by integrating both the hyper and conic forms.

## Typical applications

- Playground Canopy
- Feature Shade
- Meet & Greet Shelter
- Picnic Shelter
- Outdoor Classroom

## Size options

- 5m x 5m

# it's all hyparconic! . . . . .

## Installation

- Typically a 1 day install on to concrete foundation pads
- Requires clear access for plant equipment during installation
